Conditions and Terms of Sale

WE PAY CARRIAGE OR POSTAGE

on all Retail Orders for Vegetable and Flower Seeds and Bulbs, and on all Vegetable Seeds quoted by the pound on page 19 of this Catalogue; also on Peas and Beans quoted at per quart at Special Post Free Rates.

WE DO NOT PAY CARRIAGE OR POSTAGE

on Agricultural Seeds, Seed Grain, Seed Potatoes, Fruit Trees and Plants, Garden Tools, Sundries, Manures, or Implements, nor on Peas and Beans in bulk, quoted on page 19 of this Catalogue.

PLEASE MAKE USE OF ORDER SHEET and Envelope enclosed in this Catalogue, and send fullest instructions re route, address, etc., and sign name in full.

PLEASE SEND CASH WITH ORDERS

It saves an enormous amount of work, and secures a discount of 5 per cent. off retail orders for Vegetable Seeds, Flower Seeds, Bulbs and Plants, or extra Seeds, Bulbs and Plants, to an equivalent value, EXCEPT on COLLECTIONS which are offered at specially reduced rates.

HOW TO REMIT

Remittances can be made by Crossed Cheques, Bank Drafts, or Postal Notes; for very small amounts Postage Stamps may be sent. Please add 6d. Collection on all Cheques for £1 or under.

OUR CREDIT TERMS

are Quarterly Accounts furnished and payable nett on 1st January, April, July and October, but we require satisfactory references before opening new Accounts.

NOTE

It must be clearly understood that we give no guarantee as to the correctness of name, description or product of the seeds we sell, and any purchaser who does not accept our seeds on these conditions is at liberty to return them, at our cost, within seven days from date of purchase. Our business system is as perfect as we can make it, but still we are not infallible. The best guarantee our customers can have is the fact that our large business has been built up by selling GOOD SEEDS, and it would very soon be ruined if we sold inferior stock.

Asparagus

6d and 3d per packet.

Conover's Colossal **Purple Dutch**
Camden Park Strain **Palmetto**

CULTURE. Plants are easily obtained from seed sown in July or August in good, rich soil. The plants should be thinned out in the seed bed to six inches apart, and in the autumn the bed should be heavily manured with stable manure, and a good dressing of salt or nitrate of soda should be spread over it. In the autumn of the second year, after sowing, the roots should be lifted and replanted.

Price of Roots 7/6 per 100; see also page 18

Notes on the CULTIVATION of Asparagus
Plant out in beds not more than four feet wide, so as to allow the cutting of the Asparagus to be done without treading the surface; the rows should be twelve to eighteen inches apart, and the plants ten to twelve inches from each other. The soil should be trenched three feet deep, and if the subsoil be stiff or inferior it should be broken up in the bottom of the trench and allowed to remain there, and heavily manured, being covered with the original top soil, which should also be very liberally enriched, before planting, with old stable manure, bone dust and a good dressing of coarse salt. When the plants are in position, a top dressing of three or four inches of stable manure should be placed over all the beds, and as the plants progress care must be taken to keep them free from weeds. When the stems turn yellow in the autumn, they must be cut down close to the ground, the surface cleaned and weeded and all seedling plants removed, and the beds thoroughly manured and top-dressed as before. Before spreading the top-dressing, fork in the manure between the rows of the plants, being careful not to injure the crowns.

Asparagus Pea

Lotus Tetragonolobus
6d and 3d per packet.

The habit of this plant is dwarf and trailing, it produces an abundance of crimson pea-shaped flowers; these are succeeded by strangely-shaped pods, which, when cooked, possess a most delicate flavour like Asparagus.

This is very worthy of cultivation

Asparagus

For Kitchen Garden Calendar and
Cultural Notes on Home-Grown
Vegetables

See pages 21, 22, and 23

Artichoke

Large Green **GLOBE** Large Purple
6d and 3d per packet.

CULTURE. The soil requires to be deeply trenched, as for Asparagus, and well enriched with manure. Sow in beds of light soil, in March or September, and transplant during the following autumn or spring, in rows four to six feet apart, and about four feet in the rows. They will then produce flower-heads fit for use during the following season; the fleshy part at the base of the leaves of the crowns of flower-heads only is used.

Plants 6/- per doz.; see page 18

JERUSALEM Purple or White

A Tuberous variety with annual stems. The best time to plant is from July to August, in rows three feet apart and twelve to eighteen inches apart in the row. Succeeds in any ordinary soil. The white is the superior variety for domestic use.

Price of Tubers, 3d per lb.; see page 18

PLANTS

SYDNEY

Broad Beans

1s per quart (post free, 1s 6d);
6d and 3d per pkt.

Anderson's Giant Long Pod. Plants produce on an average 10 to 12 stalks, and an abundance of pods from 15 to 18 inches long, delicate in flavour.

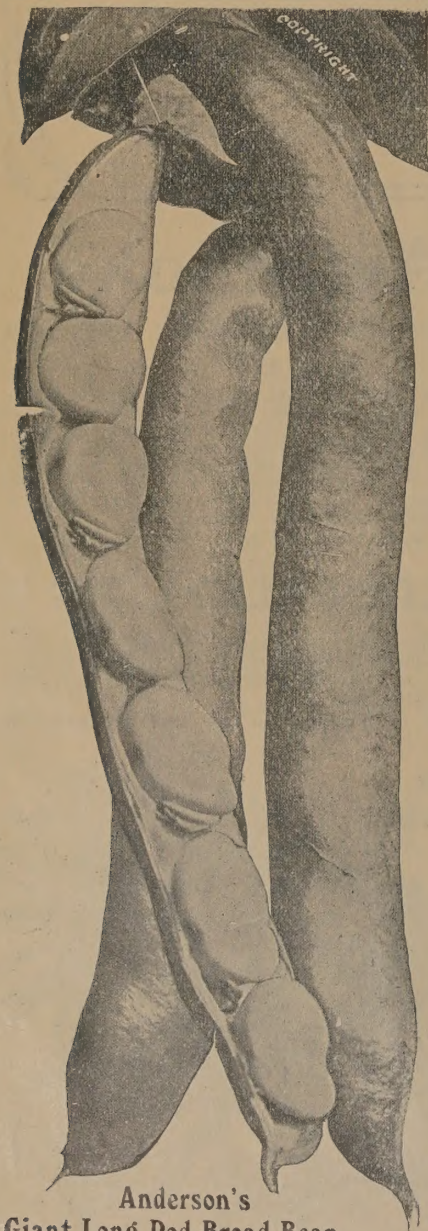

Broad Windsor. Immense crops.

Early Long Pod ("Hangdown").

Favourite with market gardeners.

CULTURE. Strong loam, and even somewhat clayey soil suits this useful vegetable. It does not require much manure, particularly when the land has been manured for the previous crop. Sow in March, April, May, June and July, in drills three to four feet apart, and twelve inches in the rows.

"Last selection of seeds were a great success."—D. McLEAN, Bradley Street, Cobarr—15-3-09.

Anderson's
Giant Long Pod Broad Bean

French Beans

1s 6d per qrt. (post free 2s). 6d and 3d per pkt.

DWARF VARIETIES

Canadian Wonder. Very long pods, excellent flavour; wonderful bearer, hardy.

Burpee's Stringless Green Pod. The pods are stringless, long, and nearly straight. A first-class Bean. Early, prolific bearer, excellent.

Negro Long Pod. Very productive, fine quality.

Pale Dun. Old favourite, productive, medium pod.

Governor Denison. Excellent flavour, productive.

RUNNER VARIETIES

White Dutch. Large and fine. Tall grower.

Zebra or Napoleon. Good variety.

Scarlet Runner. Suitable for the colder districts.

CULTURE. Sow the dwarf sorts every two or three weeks from September to February inclusive, in rows two feet apart, and four to six inches from plant to plant. The runners should have a space of from three to four feet between the rows, and about 12 inches in the rows. These should be sown in September, October, or November, and staked. Soil need not be too rich.

Butter Beans (Stringless)

1s 6d per quart (post free 2s); 6d and 3d per packet.

Perfectly stringless, and can be cooked whole; a distinct flavour. The pods when cooked are tender, and of a buttery, mellow taste.

The Startler (Golden Pods). Six inches long, perfectly stringless, buttery flavour. Plants 12 to 18 inches high; prolific.

Anderson's Wonder (Golden Pods). Strong, bushy-growing dwarf variety, very stringless, fine flavour; one of the best

Brittle Wax (Burpee's). Yellow-podded, stringless Bean of excellent flavour. Wonderfully productive.

Yosemite Mammoth. Strong grower; pods golden colour; tender and productive. A dwarf variety.

Mont d'Or or Golden Butter (Tall). Grows about six feet. Need not be sliced before cooking.

CULTURE. Same as French Beans.

Lima Beans

2s per qrt. (post free 2s 6d);
6d and 3d per packet.

One of the most productive and delicious Beans in cultivation, and quite distinct from any other. The Lima requires no special culture or attention; will begin bearing about Christmas, and continue to produce pods right on until frost comes, although the season may have been very dry. The beans are shelled when half or fully grown. Cooked and served with butter.

King of the Garden (Tall). Pods are large and well filled, and are produced in great abundance. The quality is all that can be desired.

Early Leviathan (Tall). This is the earliest Tall Lima Bean in cultivation; very productive.

Burpee's Dwarf. The best dwarf type of this delicious vegetable. Plants from 18 to 20 inches high; they spread into some three feet in diameter.

Henderson's Dwarf. A very early bush variety, 18 inches high; keeps on bearing during the summer if kept picked.

CULTURE. Sow the Beans in October, November, or December, in good loamy soil if possible, which has been well enriched. Sandy soil will also produce good crops if liberally treated. Plants of the tall variety should stand two feet apart, and the dwarf sorts 18 inches apart. The tall sorts require stakes about 6 to 8 feet high. The Beans bear their pods in great abundance; if carefully picked, bear all through summer.

Runner Beans

6d and 3d per pkt.

Tongan (Black Seeded). Called sometimes "Poor Man's Bean." A splendid type of bean for slicing and boiling in the same manner as ordinary French Beans. Perennial.

Madagascar. Large white seeds mottled with pink. The pods of this variety cannot be cooked, but the seeds are used in a similar way to the Broad and Lima Beans. Perennial.

Butterfly Runner Bean

(PHASEOLUS MULTIFLORUS PAPILIO)

6d and 3d per packet

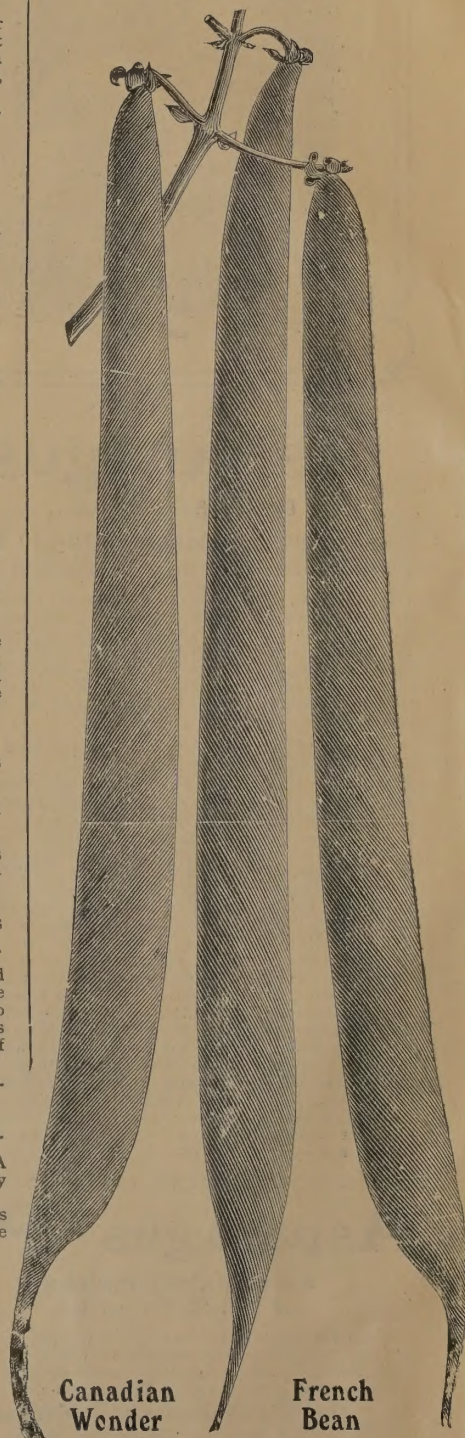

A variety of the well-known Scarlet Runner Bean, but is quite distinct, and far surpasses them in the beauty of its flowers; what chiefly distinguishes the latter is the large size of the prettily waved snowy white wings and the salmon rose of the standard. The seed is also distinct, being mottled brown on white ground.

Snake Beans

6d per oz.; 6d and 3d per packet

Bears pods about two feet long, in pairs, which are stringless and of good flavour, like French Beans, and used in exactly the same way. Plants grow six feet. The pods are produced with remarkable rapidity, and must be picked regularly to prevent Beans from ripening their seed. No trouble in preparation for table; only requires to be cut into sections.

"I received the bushel of Canadian Wonder Beans from you, and I think they were about the best sample I have yet seen."
W. A. TOWERS, Lawrence Road, Grafton.—21-7-09.

SYDNEY

PLANTS

Improved Blood Turnip Beet

Beet1s per oz. ;
6d and 3d per pkt.

Anderson's Extra Early Turnip Rooted. A beautiful deep crimson round variety

Improved Blood Turnip. Globular shape, bright blood red; flesh close and of excellent texture; tops small.

Eclipse. A very early variety, dark red, perfectly round, excellent for domestic use. Close grained and fine quality.

Egyptian Turnip Rooted. This is an extra early Beet, growing very fast; rather flat in shape, with blood red flesh.

All the Turnip Rooted varieties are much earlier than the long shaped sorts, and quite equal in quality.

Anderson's Long Blood Red. One of the finest table Beets. Short and crisp in the grain; beautiful deep rich colour; tender, and of fine flavour. 12 inches long.

Nutting's Dwarf Long Red. An old favourite sort, of medium size, solid and fine coloured. 12 inches long.

CULTURE. Beet should follow some crop for which the land has been well manured, because the symmetrical form of the root cannot be preserved if fresh manure is used. Sow in rows 18 to 24 inches apart; thin out to 10 or 12 inches and be careful to "single" the plants—generally two plants spring from a single seed vessel. Strong soil suits best for Beet, but it is not particular. Make sowings every month from July to December, and again about February or March, should the weather be favourable.

Long Red Beet

"I have grown your seeds for many years, and find they give every satisfaction."

J. H. MORROW,
Public School,
12-6-09. Bimbi.

Spinach Beet

1s per oz. ; 6d and 3d per pkt.

This is quite a distinct section, grown for the leaves only, the roots being worthless. The green leaves are cooked like Spinach, and the broad white stems served with white sauce, are delicious when flavoured with celery seed.

Giant. It's pure white stalks, when cooked, are not unlike Seakale.

Brussels Sprouts

1s per oz. ; 6d and 3d per pkt.

Improved. An excellent variety.

CULTURE. Sow in June and August for midsummer use, and again in November and February for early and late winter use. Plant out in rows two feet apart.

"I have much pleasure in telling you that I have been growing your Vegetable Seeds this seven or eight years past, and have always found them successful, and true to name and description. There cannot be too much praise given you for the great care taken of your stock."

E. W. RICH, Curra Creek, via Wellington—1-3-09.

Adams' Early White Broccoli

Broccoli

1s 6d per oz. ;
6d and 3d per packet.Adams' Early White
Knight's ProtectingElletson's Mammoth
Walcheren

CULTURE. Sow for the main crop in December, January and February, and again in June or July, and plant out as soon as the plants are ready and the weather suitable. Good, strong, richly manured soil is necessary to produce Broccoli in perfection.

Borecole or Kale

9d per oz. ; 6d and 3d per packet.

Dwarf Green Curled. Only suitable for the colder districts of the State. An excellent winter vegetable, highly esteemed for winter greens, as it is rendered more tender by frost and snow.

CULTURE. Sow in seed beds in January and June, and treat as Cabbage. It requires well-worked rich soil with liberal manuring. Should be planted in rows two feet apart, and 12 to 18 inches in the rows.

"I am very pleased with all seeds I have had from you."—H. H. WILLGOODE, Tenterfield.—10-7-09.

CABBAGE

Cabbage Plants

Can be supplied from JANUARY to
DECEMBER. (Particulars on page 18)

9d per oz.; 6d and 3d per packet.

Hints on the Cultivation of Cabbage

Strong loam produces the finest Cabbage; but all soils, from clay to sand, if deeply worked and manured, will produce good Cabbage. There should be at least three main sowings in the year. In June store beds of all kinds may be sown, and if the bed be on poor unmanured soils, as for this sowing they should be, they will furnish fine hardy robust plants for putting out for several months. The two other main sowings, in December and March, should be made in richly-manured beds, and will generally require mulching and watering. Two successive crops must not be planted in the same ground, or after turnips, or any of the Brassica tribe. For the smaller kinds the rows may be 20 inches, and the plants in the rows 15 inches apart; the distance apart to be increased for the stronger growing varieties. For the March sowing, only English or other imported seed should be used, otherwise the crop will run to seed in July and August.

"I received the seeds and Cabbage plants safely, and the plants were in splendid order, considering they were carried the last four miles on horseback."—W. H. EDWARDS, Williams River, via Dungog.—23-8-09.

Early Jersey Wakefield. Favourite; early medium size; fine table sort.

Winningstadt. Cone shaped; good sort to market; very heavy; excellent keeper; resists aphids.

Early Dwarf York. Small, but very early; good flavour; for private use.

Large York. Medium size, of fine quality, and very early.

Large Schweinfurt. Very large, fine white hearts; excellent quality.

East Ham and West Ham. Excellent market varieties for autumn and winter crop. Large, firm, and white hearted.

London Market and Enfield Market. Splendid sorts for general crops. White, firm hearts.

Sugarloaf. Most delicate flavour, excellent for private use.

Early Drumhead. A fine winter cabbage.

Henderson's Succession. See opposite page.

Anderson's Pedigree. See opposite page.

Early Spring (Henderson's). Resembling the Succession. Early, and solid header, producing uniform crop.

Winter Ballhead. A large hard-headed variety, of fine quality; splendid keeper.

Flat Dutch. Winter variety; late, flat, and solid.

Anderson's Defiance Red Pickling Cabbage. A grand variety; large solid heads, weighing 10 to 12 lbs. Colour, intense blood red; excellent strain.

Anderson's Improved St. John's Day. One of the finest summer Cabbages; will heart during the hottest months and produce large solid heads. It can be sown at any time of the year, although it is better and larger in summer. Turns in quickly, is all heart; dark green leaves; short stemmed.

St. John's Day (Early). Comes to maturity very quickly, and stands well; one of the best; fair size; hearts well. Has all the qualities of Improved St. John's Day, only it is not so large, but has the great advantage of being a little earlier.

Burpee's All Head (Early). Short stemmed, and a compact grower, has few spreading leaves. The heads are large, flat, and closely packed; the quality is of the best. Can be grown all the year round. 3s per $\frac{1}{4}$ lb.; 10s per lb.

Autumn King or Worldbeater. Fine late Cabbage, quite distinct. Its outer leaves are of a glaucous green colour, and crimped. Produces enormous hearts and very few outside leaves; it goes all to head, and is fine and close grained. Excellent for market or private use.

Large White Brunswick. A splendid large summer variety, which is not so subject to aphids and grubs as the other sorts. A favourite with market gardeners on that account.

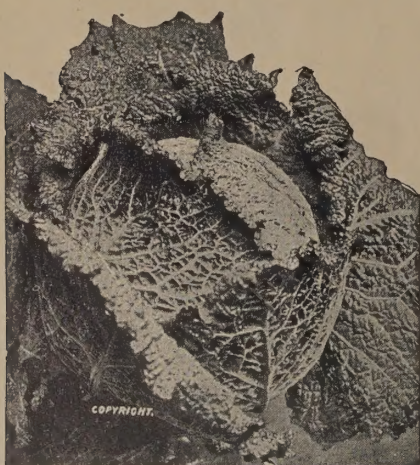

Savoy Cabbage

9d per oz.; 6d and 3d per packet

Drumhead Dwarf Green Curled

An excellent curled Cabbage; does remarkably well in the cooler parts of our State. Has a distinct flavour of its own; is at its best during cold, frosty weather.

CULTURE. Same as Cabbage. See above.

"The last seeds I got from you were a great success." H. DRENNETT, Delungra—18-1-09

The Cabbages

For MARKET GARDENERS
and LARGE GROWERS

There are probably no two Finer Cabbages
in Cultivation than these we offer as below:

Henderson's Succession

Our
Packet Seeds
are Post Free
everywhere

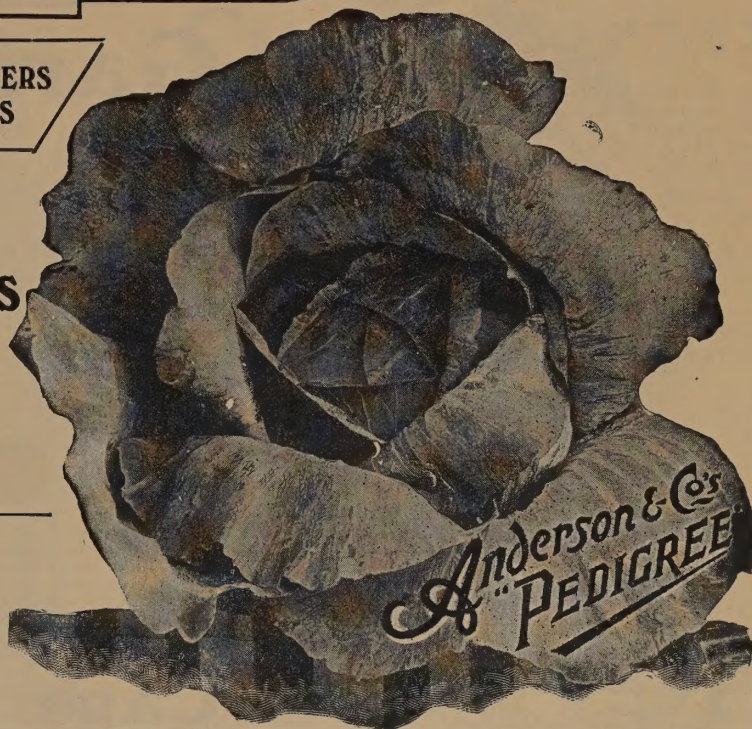

Anderson's Pedigree

Both have made a name for excellence of quality, weight of crop, sure heading and fitness for Market Trade that renders an increased supply of Seed each season a necessity.

Anderson's Pedigree Cabbage

8s per lb.; 2s 6d per $\frac{1}{4}$ -lb.; 9d per oz.; 6d and 3d per packet.

In every respect a splendid Cabbage, and one of the best ever offered; weighty and solid hearting; can be grown all the year round, and will not run to seed. It has fully maintained its character since first introduced by us.

Average Weight
of Our Strain
27 lbs.

Succession Cabbage

15s per lb.; 4s per $\frac{1}{4}$ -lb.; 1s per oz.
6d and 3d per pkt., post free.

This standard variety still maintains its position as one of the best market gardener's Cabbage that is grown in the State. For Autumn and Spring sowing it is excellent, but it is an all-the-year-round variety. Short stemmed, with enormous flat heads packed very closely, of fine texture and quality, and large specimens are not coarse in flavour. It is esteemed not only for its size and quality, but is a grand keeper. It stands the summer heat excellently, and travels well.

"The Succession Cabbage plants I got from you a short time back turned out splendidly, every one headed and grew very large."
H. ADAMS, Belmore Street,
West Tamworth—13-5-09.

"The Succession Cabbage seed I had from you in December last turned out grand, I having cut a good many loads (one load making £5 10s.), and some very fine heads, and I shall always recommend your seed to every one."
G. BARWICK, Wallalong, Hinton—
14-5-09.

"The Pedigree Cabbage is the best for this district. It stands the heat well, and the Aphis do not trouble them much."—P. P. LEVERETTE, Katella, Stuart Town—24-12-08.

Your Succession Cabbage has turned out splendidly. Have grown 2 acres of them—perfect models—up to 16 lbs. in weight. Your Imperial Purple Top Swede has been exceedingly good also."—A. G. STREETER, Rivervale, Carmilla, via Mackay, Q—14-8-09.

PLANTS

SYDNEY

Garden Carrot

9d per oz.; 6d and 3d per pkt.

St. Valery. An excellent scarlet Carrot; longer and thinner than Intermediate—gardeners' favourite. Perfect shape and fine quality.

Improved Scarlet Intermediate. Of fine size and shape, with short top; early and excellent.

Scarlet Long Horn. Medium length; very early; good colour and flavour.

Early Short Horn. Good colour and quality; very early; a favourite.

Long Red Surrey. Very long; grows to perfection on deep, rich land.

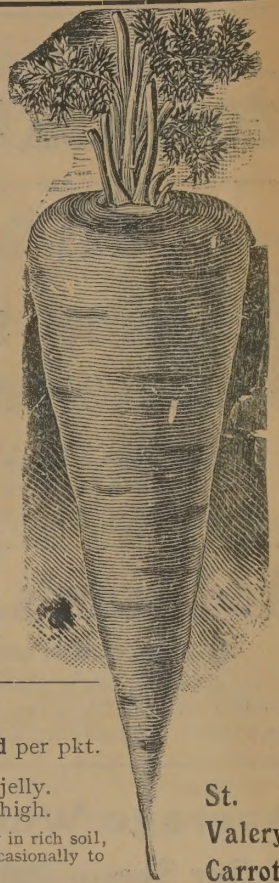

Large Red Altringham. Long red. See Field Carrots (Farm Seeds).

CULTURE. Make a sowing in July, and the main crop in September, in drills, 18 inches apart, and when fit thin out to 5 or 6 inches. Sand and sandy loam produce the best Carrots; they will grow in any soil if not stony, but will fork if grown on freshly manured land; they should, therefore, follow Cauliflower, Cabbage, Turnip, or some crop for which the land has been well manured. The beds should be both deeply and finely dug—not turned over roughly. Small intermediate sowings may be made in January or February; the Carrots will not grow large, but will be suitable for soups, etc. Plants need not be thinned to more than three or four inches apart.

Early Short Horn Carrot

For boxes of Assorted Vegetable Seeds,
Best Varieties, see page 20

St. Valery Carrot

Improved Intermediate Carrot

Cape Gooseberry 6d and 3d per pkt.

Ordinary Variety. Can be used for dessert; makes a delicious jelly.

Giant. A variety from Japan, of erect habit, from 1½ to 2 feet high.

CULTURE. Sow in September, and prick out in a row along a warm sheltered border in rich soil, two feet apart. The plants should be stopped by pinching out the top of the shoots occasionally to induce a sturdy, bushy growth.

"Thanks for the prompt attention to my order. The 14 packets of Vegetable Seeds arrived in good order. I have bought seeds from you for nearly twenty years, and I can say I have not been once disappointed with them. I have had splendid crops in my garden. I have never had a failure with any of your seeds yet. There were two packets over, for which many thanks."

Mrs. E. THOMPSON, Aramac Hospital, Queensland.—21-6-09.

Cauliflower

1s 6d per oz.; 6d and 3d per packet. (Except otherwise marked)

Veitch's Autumn Giant. Produces magnificent, very large snow-white, firm heads; plants are of a vigorous growth, requiring plenty of room. It is not early, however. Best months to sow are December, January, and February.

Anderson's White Queen. A superb variety. Very early, very dwarf; produces large, firm, closely-set heads, beautifully white and tender, luxuriant foliage, excellent flavour. One of the finest grown, which we strongly recommend. 3s 6d per oz.

Early London. A first-class early variety. Fine white heads; not liable to button; for private gardens one of the best; a very old favourite.

Large Asiatic. A large variety, of fine quality, for private use and for market, of excellent colour and very hardy.

Walczeren. Good reliable sort, and a favourite with some growers; medium; early.

CULTURE. Sow in rich, light soil in December and January, slightly shading and keep well watered. The plants should not be allowed to crowd each other, or to become stunted. During dull or showery weather plant out in rows three feet by two, in liberally manured land; water the plants for a few days unless the weather is showery. If Cauliflower plants once get a severe check they will never produce fine heads. Cauliflowers should never follow a Cabbage crop, nor be grown two seasons following on the same land.

"I may state that although you do not get many orders from me, I use a lot of your seeds, which have always given good results."
Mr. G. L. BAILEY, Upper South Arm, Bellingham.—18-6-09.

Anderson's White Queen Cauliflower

SEEDS

Anderson & Co.

PLANTS

SYDNEY

Celery

1s per oz.;
6d and 3d per packet.

CULTURE. Sow for main crop in September and October. Seed beds for this sowing should not be over rich. Sow as to furnish plants for putting out for several months, a later sowing, say in December or January, may be made; in this case sow the seed in shallow boxes, and place in a situation where they can be shaded if necessary, until the seed has germinated. To grow celery to perfection, choose a bed that has been richly manured for a previous crop, such as a Cauliflower bed. The soil should be of a friable nature and well pulverised. Open the trenches 18 inches wide and of a like depth; stack the soil on either side, to be ready for drawing back into the trenches as the plants progress. In the bottom of trenches place about six inches of stable manure partially rotted, and fork it well into the soil. Cover this with a couple of inches of the soil previously thrown out, and water copiously the night before planting; then carefully raise the plants from the seed bed, and plant along the centre of the trench, about nine inches apart. Weed often, and draw in soil as the plants advance, taking care that the hearts of the plants are not buried; continue to do so until the plants are full grown and the trench is nearly filled up. Keep plants going with water when young, if necessary, and use liquid manure; with this treatment Celery stalks will be well balanced and tender.

WHITE VARIETIES

White Plume. First-class variety; very tender. The stalks, inner leaves and heart are white, which simplifies the blanching process.

White Solid Paschal. This fine Celery has remarkable breadth of stalk; fine flavour, fleshy and very tender; self-blanching variety.

Winter Queen. The ribs are solid, crisp, and of nutty flavour, and when blanched are a fine cream white colour.

Cole's Crystal White. Large, and fine quality; crisp and well flavoured.

Wright's Selected Giant White. A leading variety; excellent quality; tender and crisp; blanches well.

Turner's Incomparable White. Old favourite; very fine quality, always reliable; fine flavour, tender when blanched.

RED VARIETIES

Rose Ribbed. A self-blanching variety of beautiful rich golden colour, with rose-shaded ribs; splendid quality.

Pink Plume. Stalks tender, of a pale pink colour and delicate flavour; self blanching.

Cole's Red Solid. Fine, pink colour; large solid stems; tender and crisp.

Laing's Mammoth Red. Large strong stalks of good quality; blanches well; crisp and tender.

Early Cyclone Cucumber

Cucumber

6d and 3d
per packet

CULTURE. Make a first sowing in the open ground about the middle of August, successional sowing in September and October, but in the colder districts six weeks later. The soil must be well and deeply worked, and made very rich to produce fine Cucumbers; three plants to each hill will be enough, and these should be about six feet apart; the ground should be mulched with manure, and the plants watered if necessary. In all cases the points of the shoots should be pinched out when the plants are in flower, to cause the fruit to set.

Anderson's Best of All. Magnificent white spined Cucumber, two feet long; close grained, rich flavour; few seeds. 1s per packet.

Anderson's Market King. Fine strain of long prickly Cucumber, even in size, and beautiful dark green colour.

Commercial. Early, hardy, very productive; dark green fruit; fine flavour; six to eight inches long. Market gardeners' favourite.

Choice Long Green. Excellent variety; fruit 18 inches long.

Long Green Prickly. Fine size, deep green colour; crisp, delicious; a favourite.

Short Green Prickly. Very hardy; a good sort.

Rollison's Telegraph. Beautiful long green variety; splendid fruit; excellent quality, dark green skin.

Chatsworth White Spine. Fruit dark green, two feet long, beautiful shape; solid white flesh; few seeds.

Crystal White. White skin, firm flesh, good keeper; early

Early Cyclone. Early; medium sized; white spine variety; suitable for slicing or pickling.

Fordhook Pickling. Best pickling Cucumber; strong vine. Thin skin, fine quality flesh; few seeds.

Thorburn's Everbearing. An excellent pickling variety with short vine, and very early fruiting qualities; continues to produce till late in the autumn.

Green Gherkin. Very small fruit; used only for pickling.

Apple-Shaped. Round in shape; fine white tender flesh.

Japanese Climbing (Green). Very early, prolific, rapid climber; well adapted for pickling or slicing.

Cress

6d and 3d per pkt.

CULTURE. Curled Cress—Sow thickly every two or three weeks, with or without a dash of Mustard seed. In summer months shade is necessary to produce a crisp and tender growth. Can be grown in any rich soil, in shaded beds or boxes; must have plenty of moisture. **Water Cress** can be raised from seed sown in a situation where it can be flooded or freely watered. If planted on banks of gently flowing shallow streams, or ponds, it will soon spread and afford a continuous supply.

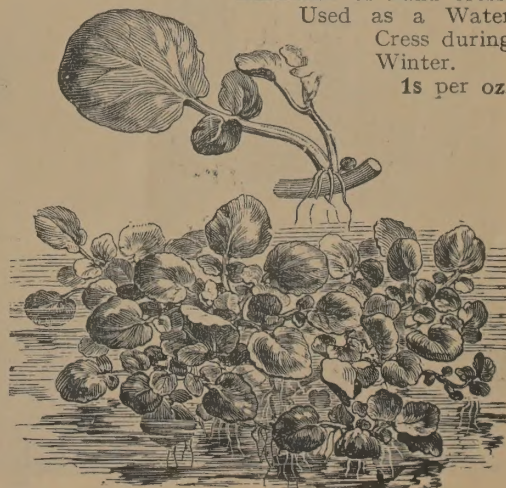

Triple Curled. Often grown with Mustard, making excellent salad.

Water Cress. Sow in moist land, or on a creek bank. 1s 6d per oz.

American or Land Cress.

Used as a Water
Cress during
Winter.

1s per oz.

Water Cress

White Plume Celery

SYDNEY

PLANTS

Sweet or Table Corn

9d per pint (post free 1s); 6d and 3d per pkt.

A delicious vegetable. The cobs should be cooked when they are quite soft and tender, like green peas.

Anderson's Table Queen. A superb variety; large cobs, and white grains of extra quality.

The Metropolitan. Ears nine inches long, exceedingly white in colour during their eatable condition.

Other fine varieties:—

Early Cory Crosby's Early Triumph Early Mammoth

CULTURE. Plant in September and October, in rows three or four feet apart, and one foot in the rows. Sweet corn will succeed in any moderately rich garden soil. It should be hoed and hilled when about a foot high.

How to Cook SWEET CORN

BOILED IN THE COB. Corn should be used as quickly as possible after it is gathered, and this should be when the cobs are soft. Before cooking remove the husks and every thread of silk, place the cob into a pot of boiling water, boil five minutes, Serve immediately, wrapped in a cloth on a dish or like Asparagus.

ROASTED. Husk the corn and remove the silk. Brush each cob with melted butter, and dust with salt and pepper, line a cooking dish with paper, place the cobs in it, and put in a very quick oven 10 or 15 minutes to brown. Serve on a table napkin.

Pop Corn

6d and 3d per packet.

CULTURE. Same as Sweet Corn.

Allow the cobs to ripen thoroughly, and then roast the grains in a close iron vessel until they "pop," shaking the vessel meantime. The corn is then taken out and slightly dusted with powdered sugar. It forms a delicious sweet.

Thyme

Marjoram

Endive

1s per oz.;

6d and 3d per pkt.

This salad plant, when well grown and blanched, is by some preferred to Lettuce.

Batavian.

Green Curled.

CULTURE. Sow in February and March, and plant out when fit, in rows two feet apart and one foot plant from plant; hoe, and when the plants are well advanced, tie the leaves into a bunch surrounding the hearts, to blanch and keep them tender. Rich soil is indispensable.

Green Curled Endive

Ornamental Gourd

Ornamental Gourds

6d and 3d per pkt.

CULTURE. Same as Cucumber or Marrows

This curious family, the fruit of which is most fantastic in shape, should be more largely grown. The foliage is handsome, and the plants of rapid growth; highly ornamental climbers.

Nest Egg Gourd. Pretty climbing plant for trellis or verandah, bearing very profusely, fruit the size, shape and colour of the ordinary hen's egg. Can also be used as Vegetable Marrow.

Dish Cloth Gourd (Loofa, or Vegetable Sponge). Dark green foliage; fruit about two feet in length; the woody fibre lining of the inside of the ripe fruit, when properly dried, is the dish cloth; most useful in the bath as a flesh rubber.

Mixed Ornamental Gourds. All the best sorts, including ORANGE, PEAR, PORTMANTEAU, CLUB, and NEST EGG.

Egg Plant

6d and 3d per pkt.

CULTURE. Sow in September, and plant out in rows two feet apart, and the same distance plant from plant. Shade and water until the plants are established. When the fruits are set, remove all but from eight to twelve on each plant—that is, allow only a single fruit to mature on each shoot. The young plants should be stopped to induce branching.

Black Beauty. Large, brilliant shiny black rind; early.
Improved New York Purple. Long White China

Deacon Lettuce

Lettuce

1s per oz. ; 6d and 3d per packet.

other non-solid sorts, will be improved by having the leaves loosely bound together round the heart when about two-thirds grown. In planting out, Lettuce should be lifted without breaking the roots, and planted out during dull and showery weather.

CULTURE. With rich light soil, and a supply of water, these salad plants can be placed upon the table daily throughout the year. All the varieties may be sown from January to June, and transplanted when fit, into rows at distances from each other suitable to the size of the variety. From June to January only sorts least liable to run to seed should be sown in drills where they are intended to remain for the crop. The Cos, and

CABBAGE VARIETIES

New York. Of unusual size and solidity, with little tendency to run to seed ; crisp, tender, and of excellent flavour.

Iceberg. A quick grower, with hard handsome heads, of exquisite flavour. A variety which we highly recommend.

Deacon. One of the best ; large heads ; leaves pale green without, with beautiful rich cream yellow within ; delicious buttery flavour, making a fine, fresh, crisp salad, Stands summer heat.

Yellow Seeded Butter. One of the best summer lettuces. Solid heads of a bright yellow colour, handsome appearance, crisp and well flavoured.

Hanson. Solid hearting variety, not liable to run to seed ; the outside leaves are a lively green, but the hearts are white, crisp and tender.

Tender and True. A splendid early crisp variety, fine curled leaves, pale green ; flavour excellent.

Ohio. Early, hardy, beautifully crisp, hearts freely when young, finely curled leaves, medium size.

Boston Curled. Extra curled leaves. Globular shape and large size, crisp, of good flavour.

Californian Butter. Outside leaves a fresh green colour, slightly marked with brown spots. The inside leaves are of the same rich cream yellow so peculiar to this family, Stands heat well.

Grand Rapids. A strong grower, keeps tender and crisp, both leaves and ribs are very brittle ; an excellent all-round Lettuce.

Tom Thumb. A small compact variety, of good quality, and does not go to seed quickly.

Mignonette. Beautiful russet-coloured variety, of unique appearance, small, but very solid and compact ; very hardy.

Mammoth Salamander. Has wonderful heat resisting qualities, and will yield fine solid heads of large size when other varieties are only a bundle of loose leaves.

Neapolitan Drumhead { The most popular varieties of Cabbage Lettuce among Sydney market gardeners, producing white solid hearts during winter and spring ; crisp, and of fine flavour.

UPRIGHT OR COS VARIETIES

Paris Green Cos

Paris White Cos

{ Favourite sorts, suitable for cold or warm districts, and will grow anywhere in the State, provided the soil is rich and moist. The leaves grow erect and produce long-shaped loose hearts ; leaves should be tied together to keep crisp.

Kohl-Rabi Turnip-Rooted Cabbage

1s per oz. ; 6d and 3d per pkt.

A delicious vegetable, but must be tasted in good condition to be appreciated.

LARGE GREEN
LARGE PURPLE

CULTURE. Sow in beds like Cabbage, from December to March, plant 18 inches apart. Any garden soil well manured will suit this vegetable.

Leek

9d per oz.

6d and 3d per pkt.

Anderson's Perfection.
Very handsome, blanches beautifully.

London Flag. A favourite with growers for market.

Musselburgh. A very large variety.

CULTURE. No culinary vegetable is of easier culture. Sow in prepared beds in April, May or June at the latest, and plant out in rows 18 inches apart and 8 inches in the rows, if the soil is rich and a large Leek desired. When the plants are six inches high they are fit for planting out.

Halbert Honey Water Melon

Cuban Queen. A very large bright crimson fleshed Melon, of superb quality and delicious flavour.

Mammoth Ironclad. Beautiful Melon, oblong, with mottled green skin, an average weight of 50 lb.; crisp, delicious, sugary flesh.

McIver Sugar. Fruit often 2 feet in length; skin shows bands of white, shading into green. Quality superior; flesh pale pink, crisp and luscious.

Halbert Honey. Rich and tender when ripe, 18 to 20 inches in length, flesh rich crimson-lake colour, deep green rind.

The Dixie. Very early variety; flesh bright red, skin dark green, beautifully striped, fruit oblong.

Cole's Early. Of good quality; very early, has bright red flesh, delicate flavour and very prolific.

Kolb's Gem. Light green skin, nearly round in shape; 30 to 50 lb. in weight; flesh bright red; rich and sweet.

Kleckley Sweets. Rich bright scarlet flesh, crisp, sugary and melting, free from stringiness; ripens close to the skin. Fruit 18 to 20 inches long, with dark green skin.

Ice Cream. White seeded, excellent, with a delicious flavour; an old favourite.

Black Spanish. Useful variety for main crop, very juicy, good size and flavour.

Sugar. Red seeded variety, very luscious; a favourite Melon, and one of the richest flavoured grown.

Sweet Siberian. Suitable for the colder climates of the Commonwealth. Very distinct, of oval shape and medium size.

CULTURE. Sandy loam is the most suitable for this delicious fruit, but in fair seasons it will do well in any good garden soil. Sow five or six seeds in prepared hills 5 or 6 feet apart each way, eventually leaving only two of the best plants in each hill. The best time for sowing is September and October.

Preserving Melons

6d and 3d per pkt.

Citron. A round variety with red seeds.

Long Green. Excellent for jam or pie making, but cannot be used without cooking.

CULTURE. Sandy loam is the most suitable, but in fair seasons they do well in any good garden soil. Sow five or six seeds in prepared hills, 5 or 6 feet apart each way, eventually leaving only two of the best plants in each hill. The best time for sowing is September and October.

SYDNEY

PLANTS

Rock Melons

1s per oz. ; 6d and 3d per packet.

Melrose. Flesh pale green, shading to salmon, outside rind dark green, oval shape ; valuable for market gardeners.

Early Hackensack. Early, delicious, thickly netted green skin, deeply ribbed ; green flesh.

Golden Perfection. A green flesh variety, of excellent flavour.

Netted Gem. Light green flesh, melting and sweet ; a hardy variety.

Miller's Cream. Nearly round ; with dark green skin ; thick, firm, fine, orange coloured flesh.

Emerald Gem. Delicious, early and prolific ; a smooth ribbed skin, emerald green colour ; flesh salmon colour.

Improved Jenny Lind. Large and fine quality, rich and highly flavoured ; an excellent keeper, bears freely.

Anne Arundel. A superb Melon, of great size and quality ; flesh solid, and of a beautiful green colour and delicious flavour.

Pine Apple. Highly flavoured, medium size, green flesh, sweet.

Nutmeg. A medium-sized Melon, delicious flavour ; a great favourite.

Baltimore. Fine variety, excellent flavour, green flesh ; large size.

Bay View. One of the finest Cantaloupe Melons ; rich in flavour.

Sweet Home. Beautifully netted and ribbed. Flesh very thick, light green, and sweet and luscious in flavour. A very rapid grower.

CULTURE. The culture of the Rock Melon is somewhat like that of the Cucumber. Sow out of doors in September and October. The hills need not be so wide as for Water Melons, nor should the soil be so highly manured. Water during dry weather to bring on the young plants and bearing vines. When the fruit begins to show signs of ripening, a frame of calico, or canvas covering, should be provided to prevent any external moisture injuring the fruit, otherwise the most delicious varieties will prove insipid, watery and worthless. Do not leave more than two of the strongest plants in each hole ; but do not thin them out until they begin to run.

Mushroom Spawn

6d per brick (post free, 1s 3d) ;
or Two bricks, post free for 2s 3d.

English. Procured from most reliable source.

How to Grow Mushrooms in the Open Air

THE following are instructions for successful outdoor culture :—Obtain good strong stable manure from well-fed healthy horses (this is most important) with plenty of straw through it to make a bed of size required ; stack the manure in a heap and allow it to stand for a few days until it begins to ferment, then thoroughly turn and mix it again into another heap, and it will soon after be in a high state of fermentation, and in a few days be ready for another turning ; it will then have reached the highest temperature and begin to subside, and when that takes place mix the heap with one part of rough, light loam to two parts of manure, and with that compost form the beds wherein the Spawn is to be planted ; make them about 4 feet wide, 1½ feet high ; on this, when the temperature is not more than 50 degrees, plant out the Mushroom Spawn, pieces of about the size of walnuts, 4 inches apart and 2 inches deep ; then cover the surface of the bed with 2 inches of fine loam, beating it down with the back of the spade so as to make it firm. The beds should then be covered all over to a depth of from 5 to 6 inches with light clean straw, which will give sufficient shade and keep the Mushrooms clean ; no other shade is necessary. The beds should be in a sheltered position in the garden, a north-easterly aspect preferred so as to avoid the westerly winds ; the shelter of a building, close fence or hedge will be all that is required. Mushrooms will make their appearance in about six weeks after planting, and they should be constantly gathered as they appear for about a month ; then the beds may be rested by keeping them quite dry for a similar period, starting them again into growth at the expiration of that time by giving them a good watering with warm water at a temperature of 48 to 50 degrees. If this alternate system is adopted the beds will continue to produce Mushrooms for one or two years without the addition of fresh Spawn.

Netted Gem Rock Melon

Anne Arundel Rock Melon

"I may say that the last lot of seeds received from you gave every satisfaction.—H. C. SALMON, Lindsay Street, Toowoomba, Q.—23-5-09."

Mango Melon or Vegetable Peach

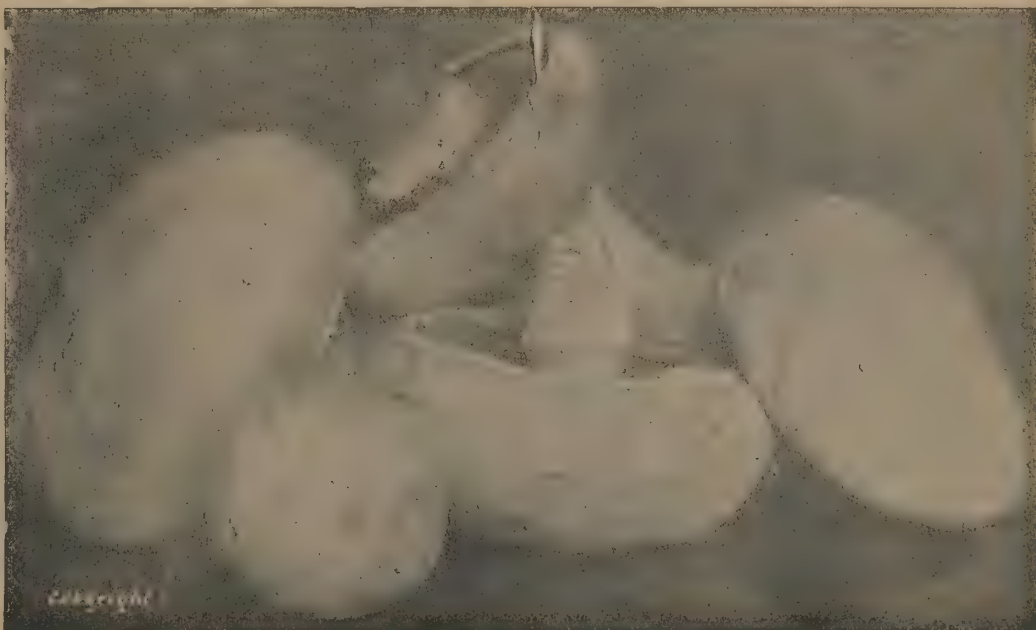

1s per oz. ;
6d and 3d
per packet.

A very productive little Melon ; fruit about the size of an orange, and of delicate flavour when baked or boiled like Vegetable Marrow.

Mustard Finest White

2s per lb. ; 6d and 3d per packet.

CULTURE. As a salad, Mustard is usually cultivated in the same bed with Curled Cress. But as fresh Mustard seed is used as a common condiment in pickling and preserving vegetables, and in other ways, it is desirable to grow it for that purpose. Every complete establishment should cultivate a patch, sown either broadcast or drilled as for turnips. Can be sown with Cress all the year round ; for a seed crop, in February.

Mushroom Spawn

SEEDS

Anderson & Co.

PLANTS

SYDNEY

Onion

9d per oz. ; 6d and 3d per pkt.

small ridges about three or four inches above the rest of the bed. After the plants have taken firm hold of the ground the ridges should be drawn away from the plants, so as to leave the whole of the bulb exposed to the air—nothing but the fibrous roots left underground. This rule is very generally neglected, the consequence being thick-necked and imperfect, bad-keeping bulbs.

FOR FIELD CULTURE. The best time of the year to sow for the main crop of Onions in the colder parts of the State is during July and August. In the coastal districts, however, and in the warmer parts of the State, it will be advisable to sow the seed in May, June, and July, according to situation, so that the crop will have a chance to mature before the hot weather sets in. The seed may be sown either broadcast or in drills. The soil can hardly be too rich, and should be well worked and made solid and compact, before and after sowing, by the roller. The chief point to be observed in sowing is to cover the seeds as lightly as possible. Indeed, when the soil is in really good condition for seeding, it is best to give no other covering than pressing it in by the roller, the seed being sown quite on the surface. This is necessary to secure the proper position of the bulbs above ground. When the land is likely to be weedy, drilling or sowing in rows should always be practised; and it is a good plan to drop grains of barley along the line at a foot or so apart, so that the rows may easily be distinguished and loss of plants prevented in using either hand or horse hoe. The barley is, of course, removed as soon as the rows can be distinguished. Our climate is well adapted for the growth of this, one of the most nutritious, wholesome, and universally esteemed of all culinary vegetables in cultivation. Sow the seed in drills 15 inches apart; 4 lb. per acre is sufficient, but if sown by the hand in an open drill, 8 lb. will be required; and when grown for pickling purposes 15 lb. of seed to the acre should be sown in drills, and 20 lb. per acre broadcast.

Anderson's Market Model. Of remarkable size and quality; colour brown. The bulbs are perfect in form, and very mild flavoured; large and early, and its keeping qualities are unequalled.

Anderson's Mammoth Silver King. Skin a beautiful silver white, mild and pleasant flavour.

Brown Spanish. A splendid variety, large and firm; largely grown for market; brown skin, good keeper, solid.

Brown Globe. Like above, with all its good qualities; in shape more globular; a fine keeper, very solid.

Extra Early Yellow Globe. Very early, remarkable keeper; excellent domestic variety.

Extra Early Flat Red. Very early, mild flavour; keeps well; moderate size.

James' Keeping. One of the best; keeps well; brown skin; resembles Brown Globe.

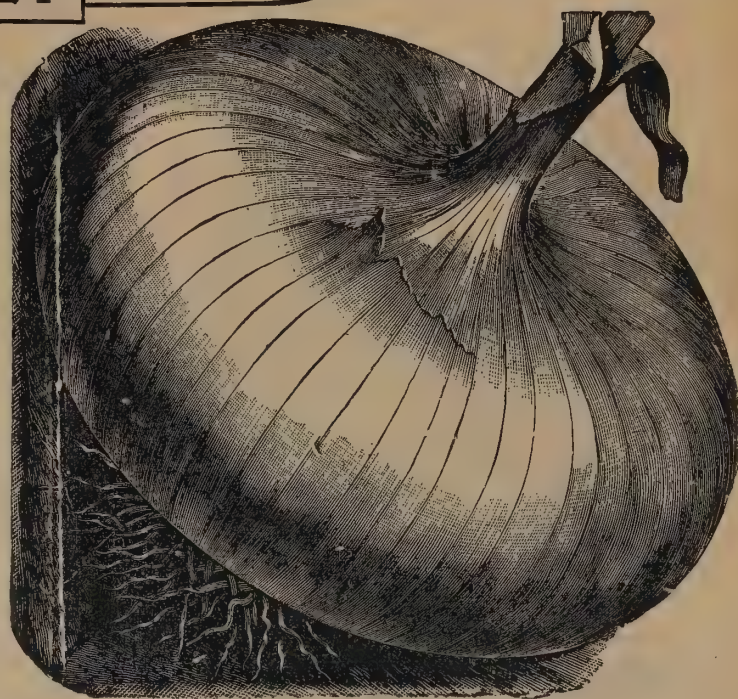

Giant Rocca. A fine onion, mild flavour. Large bulb, reddish yellow colour.

Anderson's White Pickling Onion, "Champion." Small, mild flavour, very early; exceedingly suitable for pickling. Sow thickly.

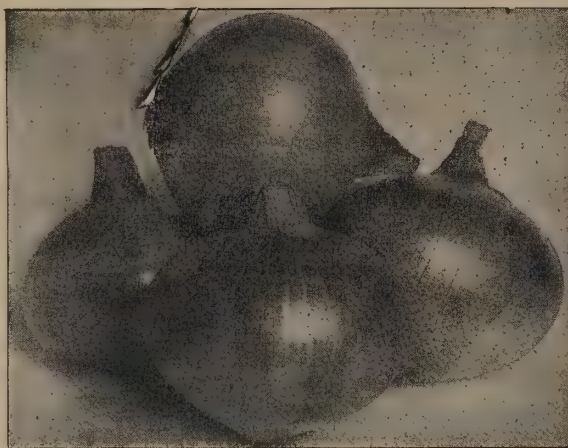

Silver Skin. Excellent pickling variety, with clean silver skin; sow thickly.

The Queen. Silver-skinned pickling variety, fine flavour; early; sow thickly.

CULTURE. For ordinary garden culture, and to produce large bulbs, sow in rich, well-prepared soil in the months of March or April, transplanting during the following July and August into drills two feet apart and 10 inches in the drill. The young plants should be carefully raised from the beds, so that the fibrous roots may not be injured. The rows where the young Onions are to be planted should have the soil raised in

SEEDS

Anderson & Co.

PLANTS

SYDNEY

Okra 6d and 3d per packet. Improved Dwarf. Long Green.

CULTURE. This vegetable is not much known here, but in India and America it is in general use for thickening soups and stews. Sow in September, October, and November successively. Any good garden soil will suit. The plants should be two feet apart. The pods are used while green and tender. Also utilised as pickles.

Hollow Crown Parsnip

Parsnip 6d per oz. ; 6d and 3d per packet. Hollow Crown. Large Guernsey.

CULTURE. Parsnip prefers rather stronger soil than the Carrot, but is otherwise grown exactly like it; however, the land must be well and deeply worked. Freshly manured land is not suitable, as it will cause the roots to fork. The rows should be two feet apart, and the plants should be thinned to eight or ten inches. Parsnip seed not being a good keeper, should be sown thickly, so as to ensure plenty of plants.

Parsley 6d per oz. ; 6d and 3d per packet.

Extra Triple Curled. Fine Garnishing; one of the best; beautifully mossy.

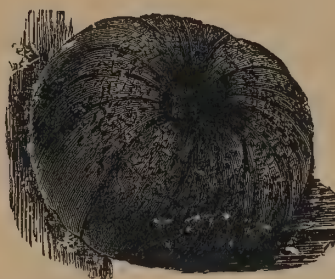

Champion Moss. Beautiful moss-like variety; pretty dwarf growing sort.

Fern Leaved. Ornamental; of strong flavour.

CULTURE. Sow in March, and again in August or September and October. The soil should be finely worked, and the seed sown in drills and lightly covered; the seeds take a long time to germinate. When the plants are a few inches high they should be thinned to about eighteen inches apart. The plants can also be raised in a seed bed and transplanted into rows; two sowings a year should be made, as old plants generally go to seed in the spring.

Extra Triple Curled Parsley

Button Pumpkin

Pumpkin

9d per oz. ; 6d and 3d per pkt.

FOR TABLE USE

Crown. Medium size, thick flesh, fine quality; good keeper and dry.

Large Button. Fine dry sort, good variety; fine keeper.

Ironbark. Not large, but of fine quality; thick flesh, good flavour; excellent keeper.

Calhoun. Resembling the Gramma; salmon coloured.

Japanese. Flesh a rich salmon colour, fine grained; very dry when cooked.

Cashaw. Large bottle-shaped fruit with crooked neck; very prolific; keeps well.

Turk's Cap. A fine table variety, and good keeper; red top.

Gramma. A very useful sort, both for cooking in various ways and for cattle or pig feed.

CULTURE. For garden culture heavily manure the land all over and dig in deeply; give an extra dressing to the holes or hills where the seed is to be sown, and fork well in. The holes should be six or eight feet apart, and only two plants should be allowed to remain in each hill. Sow six or eight seeds in each hill so as to guard against total loss of plants by insects. A good mulch of manure greatly increases the yield. Sow August to November.

"I received the Cabbage plants this morning, none the worse for their long journey, and they looked as if just pulled."

15-9-09. H. CLARK, Bowning.

Champion Moss Curled Parsley

Pe-Tsai (Chinese Cabbage)

6d and 3d per packet.

CULTURE. Chinese Cabbage, with large loose leaves, will succeed in dry seasons where other varieties of Cabbage do not. Sow during the autumn and spring. The leaves are used like Spinach Beet, which it somewhat resembles.

Pepper or Capsicum

6d and 3d per packet.

Celestial. Very ornamental; fruit creamy white colour, changing to vivid scarlet; beautiful decorative plants.

Elephant's Trunk. Very large, ten to twelve inches long, and three to four inches wide. useful and ornamental.

Bird's Eye. Highly prized for hot pickles, and the peppers when ripe can be kept for a long time if they are kept dry; very small.

Coral Gem Bouquet. Plants covered with very small Peppers; intensely hot.

Ruby King. Handsome large scarlet fruits, flesh thick; sweet, mild.

Long Yellow Cayenne

Small Chilli

Red Cayenne

Cherry

Sweet Spanish

Golden Dawn

CULTURE. Sow in pots or boxes in a frame or bush-house in July and August, or in beds in the open border in September or October, and plant out when the plants are three inches high—two or three feet apart—water and shade until they are established plants. The soil can hardly be too rich; but Chillies will thrive in any ordinary garden soil.

Golden Dawn Pepper

SEEDS

Anderson & Co.

SYDNEY

PLANTS

Garden Peas

1s per quart (post free, 1s 6d) ; 6d and 3d per packet.

CULTURE. The best season for sowing, for a large crop of Peas, is May, June, and July, but an early sowing may be made in March, and successive plantings during Winter and Spring. In fair seasons, by judicious selection of varieties, a constant succession may be kept for nine months in warm localities. Peas like a strong loamy soil; if somewhat sandy the better. If the situation be a dry one, crops sown later than July will not yield a return unless ample moisture be forthcoming, either from artificial or natural sources.

EARLY VARIETIES

Gradus. An early large podded Marrow Pea, one of the leading varieties.

The Daisy. Height 12 to 18 ins. Covered with pods 5 ins. in length; one of the best of its class.

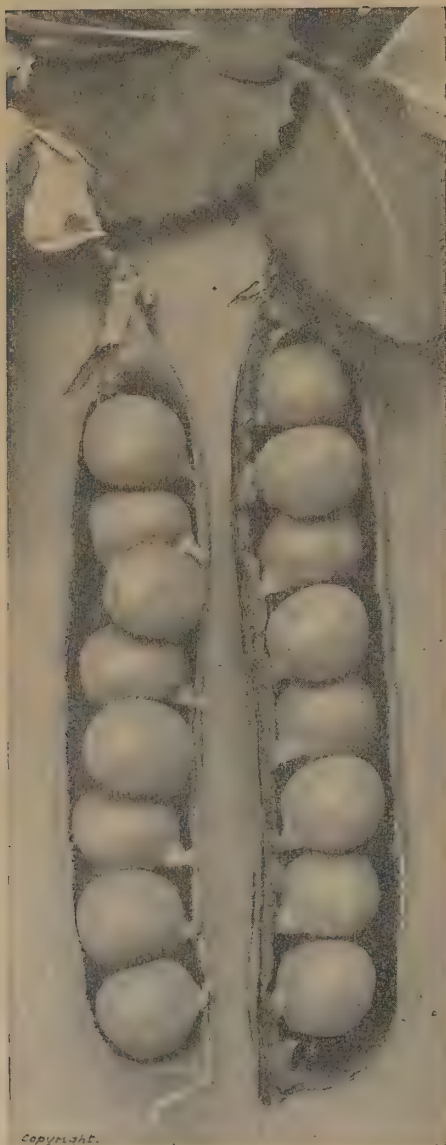

McLean's Little Gem. 1½ feet. An excellent Pea, and one of the very best Dwarfs; an abundant bearer, pods well filled, excellent flavour.

The Sherwood. One of the best Early Wrinkled Peas grown; pods large.

American Wonder. 1 foot. A very early and very Dwarf Pea, and a wonderful bearer; pods well filled, of deep green colour, and of superb flavour.

Wm. Hurst. 1½ feet. One of the very best Dwarf Marrow Peas grown; large, well filled pods of fine flavour.

Our PACKET SEEDS are Post Free Everywhere

The Sherwood Pea

MEDIUM VARIETIES

Yorkshire Hero. 2½ to 3 feet.

The most highly esteemed Wrinkled Pea grown. A wonderful cropper, with abundant well-filled pods; delicious flavour and vigorous growth.

Veitch's Perfection. 2½ to 3 ft.

A somewhat more delicate flavoured Pea than the Yorkshire Hero, and a little taller; not quite so hardy, however.

Stratagem. 2½ to 3 feet. Fine

Dwarf Wrinkled Marrow; crops wonderfully; pods large and fine; deliciously flavoured.

Telephone. Tall Wrinkled Mar-

row with pods of 10 to 12 Peas; fine flavour; grows 4½ feet high, a very strong grower.

Duke of Albany. Height 3½ to

4 ft.; a Pea of unusual merit. Thrives well early or late, and withstands the frost remarkably well, even in the coldest climate.

The Queen. Of sturdy branching

habit, about 2½ feet in height, with large pods, 10 to 12 Peas in each, most delicious flavour, a profuse bearer.

Dwarf Defiance. 2½ ft.; heavy

cropper, beautiful dark green pods—well filled.

LATE VARIETIES

Bedman's Blue Imperial. 2 ft.;

heavy bearer.

Pride of the Market. Superior,

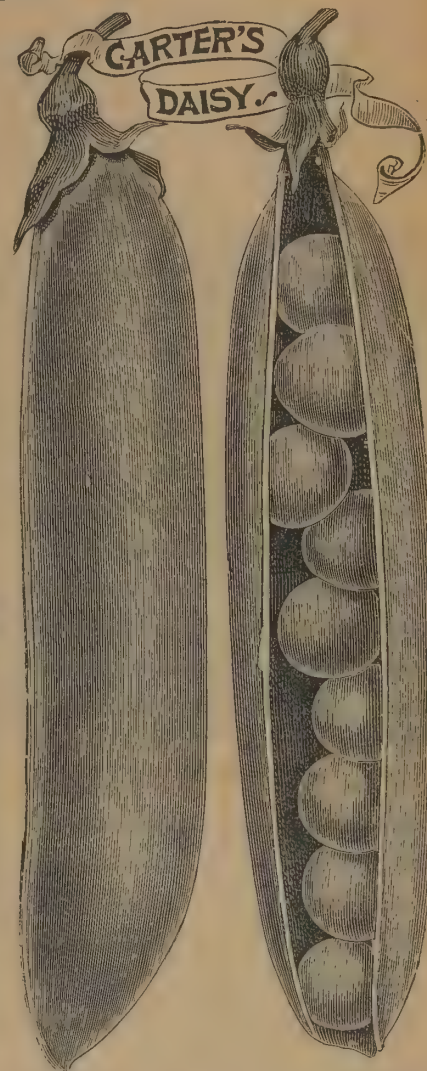

grand show variety; very prolific.

Telegraph. Great bearer, ex-

cellent quality, a valuable Pea for market or private use; height 4 feet.

Special Quotations

To MARKET GARDENERS and Large Growers for all varieties - - - See page 19

Sugar Peas

Edible Podded

2s per quart (2s 6d post free).

6d and 3d per packet.

Tall. The pods are cooked whole while young. It may also be used in the same manner as the other varieties of garden Peas.

Dwarf. Does not require staking; used also as the ordinary garden Pea.

CULTURE. Same as the ordinary varieties.

"I have great success in growing your Vegetable Seeds, the past 15 years. The rhubarb seed I got this last Spring has done so well, that I have been able to cut it for use this present year, also the Onions were a great success, every seed came up."—Mrs. ALF. COOK, Baker's Creek, Upper Taylor's Arm.—11-1-09.

PLANTS

Radish

CULTURE. Sow in light, rich sandy soil every fortnight for succession; use a shaded border during the summer months, and a mulching of manure on the surface, and water freely; sow in drills or broadcast.

6d per oz.; 6d and 3d per packet.

Long Scarlet. Splendid strain; bright coloured, crisp and tender.

Mixed Turnip. A mixture of red and white varieties in equal proportions.

Chartier. Very fine bright crimson colour shading off to white; crisp.

Long Cardinal. Early; smooth and tapering; crimson, slightly tipped white; crisp and tender.

Red Turnip. White Turnip.

Celestial or White Chinese.

French Breakfast. Red, tipped white.

Black Spanish. Very large.

Scarlet Olive Shaped. A delicious variety; white flesh.

Long Scarlet Radish

WHITE CHINESE RADISH

French Breakfast Radish

All our Packet Seeds
— are Post Free —

Red Turnip Radish

Rhubarb

Giant

Mitchell's Albert

Myatt's Lynnæus Crimson Winter

1s 6d per oz.; 6d and 3d per packet.

CULTURE. Sow under shelter of a few dry leafless boughs and a manure mulch in August or September. The young plants should be kept growing with frequent waterings if the weather is very dry. Let the plants remain in the seed beds until autumn, when they should be transferred to the permanent beds, made on the best soil, trenched two feet deep, and manured with half-decomposed stable manure. The plants should be three by four feet apart and the whole bed dug and manured every year.

For Roots of all sorts see Page 18.

Rhubarb

Rosella

6d and 3d per packet.

It is from the fleshy calyx of this handsome plant (*Hibiscus subdorifa*) that the celebrated Queensland Rosella Jam is made.

CULTURE. This plant requires a hot climate, and should be suitable for warm, sheltered situations near Sydney and on our coast. To get the plants early so that they may have a long summer and flower freely, it should be here raised in artificial heat in June or July, and kept in pots until towards the end of September, when the plants may be planted out in rows four or five feet apart.

Salsify

(Vegetable Oyster)

1s per oz.; 6d and 3d per packet.

CULTURE. This delicate vegetable thrives well in our climate. The roots are used like Carrots or Parsnips, and they can be cultivated exactly in the same manner—that is, in drills at similar distances and similar soil. Salsify is often called the "Vegetable Oyster."

Seakale

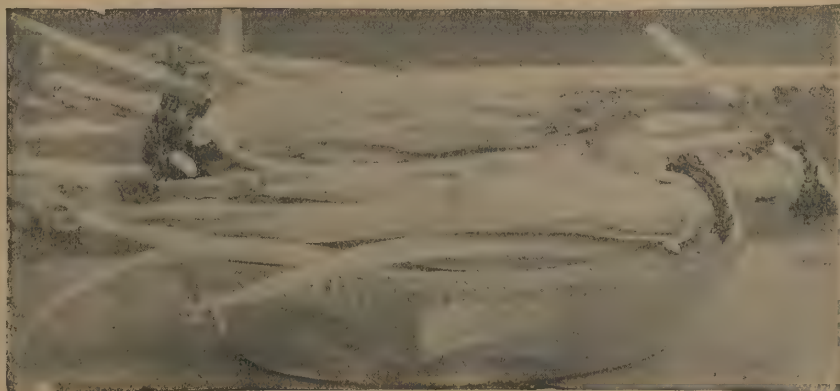

1s per oz.; 6d and 3d pkt.

CULTURE. Raise in seed beds, and when yearlings transfer plants to permanent beds (which have been trenched and manured to a depth of two feet) and plant from 2 to 2½ feet apart each way. Forced Seakale is a greater delicacy than Asparagus, and all that is necessary to produce it is as follows:—Early in June place a 10-inch common drain pipe, chimney pot (no matter if cracked or damaged), box, or barrel over each plant, and stack a good heap of fresh stable manure around them to the height of 3 feet; cover the tops of the pipes or boxes with a board or slate, so as to

keep the plants in the dark; the heat produced by the manure outside will cause the plants to grow, and owing to the darkness the shoots will be blanched pure white; the growth may be cut for four or five weeks, when it is not more than 5 to 6 inches long; then the pots should be removed and the plants allowed to make their natural growth.

For price of Seakale Roots see page 18.

PLANTS

SYDNEY

Viroflay
Spinach

Spinach

Round, Prickly, and Monstrous Viroflay
6d per oz. ; 6d and 3d per pkt.

CULTURE. Sow in rows about 18 inches apart, and thin out to about 9 inches; good rich soil is necessary to produce a succulent growth. February and March are the best months for sowing, but where moisture is obtainable Spinach may be grown six months in the year.

Custard Shaped Vegetable Marrow

Vegetable Marrow

9d per oz. ; 6d and 3d per pkt.

Anderson's Select Long Early White. Abundant bearer, large fruit; running variety.

Long Fruited Bush (White). Excellent quality and flavour, prolific, very early; plants do not run.

Long Fruited Bush (Green). Of equal merit to white-fruited variety.

Custard Shaped. A bushy, compact grower; good flavour.

Moore's Vegetable Cream. A selected variety, productive; fruit of medium size.

Rich Marrow. Delicious, flesh separating like grains of rice when cooked.

CULTURE. Cultivated and used in the same way as recommended for Squash.

Improved Hubbard Squash

Squash

6d and 3d
per packet.

Early White Custard. Wonderful bearer, delicate flavour, compact growth.

Early Golden Bush. With all the good qualities of the former, but yellow skin.

Improved Hubbard. One of the most reliable; very hard skin.

Fordhook. Flesh dry and sweet, will keep if well ripened; rind yellow; flesh straw colour; delightful flavour.

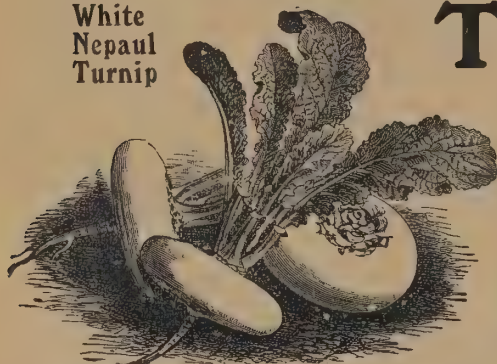

Delicata. One of the earliest of the running varieties, and very prolific; fruit small and solid, dry and rich.

Crookneck (Bush) } Both useful
Boston Marrow (Runner) } sorts

All the above are good, serviceable varieties for table use.

CULTURE. Sow in August, September, October, and November, successively. Prepare the beds as for Pumpkins, including the manure and top-dressing. The seeds, however, should be planted about 2 feet, and the rows about 4 feet, apart for the bush kinds. Running kinds at the same distance as Pumpkins. Squashes should be gathered for use while the faded bloom still adheres to the fruit. They should always be boiled whole, and be well drained before being placed on the table.

Our Packet Seeds are Post Free to any address!

White
Nepaul
Turnip

Turnip

6d per oz. ; 6d and 3d per packet.

CULTURE. A good light soil suits Turnips best, but with fairly rich soil of any kind, and favourable weather, very fine crops are obtainable. Sow in February and March in drills 18 inches apart, and thin out to 6 or 8 inches. Turnips may also be sown in November, and even earlier; but if dry weather sets in, only poor crops can be expected.

Anderson's White Model. Fine clear white skin, grand quality; perfect shape.

White Stone. Pure white flesh, oval shaped; excellent for market.

White Nepaul. Early short-topped; delicate, tender, snow white, flat shape.

Early Red American Stone. Flat shaped, but with a purple top.

Green-top Stone. A most esteemed variety.

Purple-top Munich. Extra early, fine flavour.

Long White. Suitable for hot districts.

Orange Jelly. A superior globular yellow-fleshed Turnip; flavour rich and excellent.

Scarlet Kashmyr. Very remarkable variety, earliest of all; skin scarlet, flesh clear white; flavour excellent.

Garden Swede, "Laing's." A favourite; suitable for autumn sowing.

Laing's Garden Swede Turnip

Select Long Early White
Vegetable Marrow

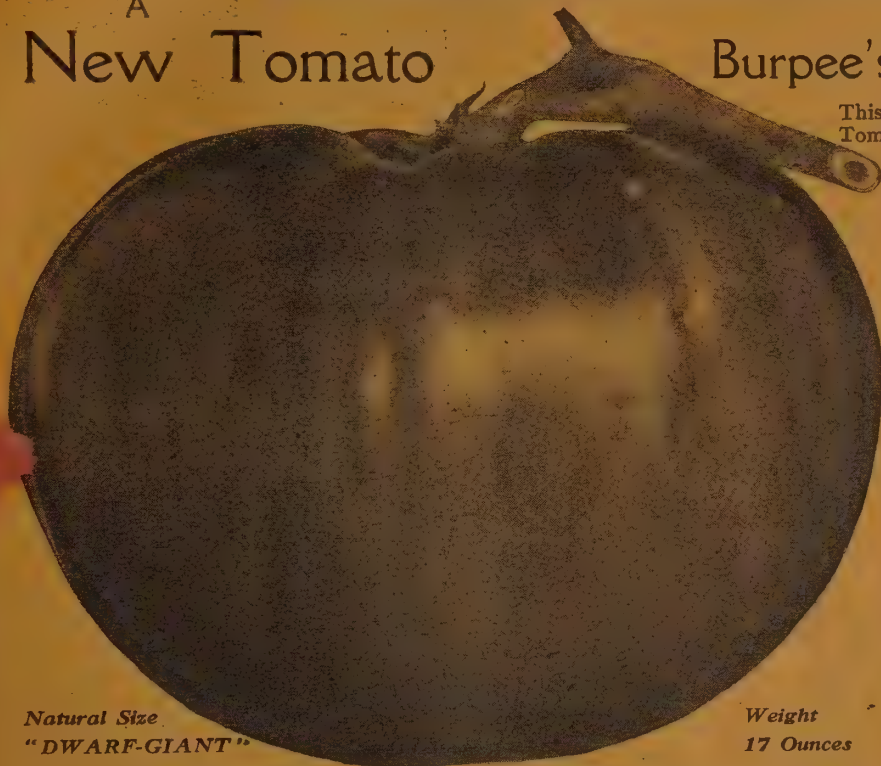

ANDERSON & CO.'S NOVELTIES for 1910

We offer a very choice lot of Novelties in Vegetable and Flower Seeds, also Plants and Fruit Trees for the season. They have been introduced by Growers of repute and standing, whose descriptions we have followed.

VEGETABLE SEEDS

A
New Tomato

Burpee's "Dwarf-Giant"

This variety is stated to be the largest-fruited of the Dwarf Tomatoes, and maintains a uniform size throughout the season.

The colour is a rich purple crimson, and the depth of colour is maintained throughout the whole fruit. The skin, though thin, and easily removed in peeling, is strong, and protects the fruit in travelling. The flavour is delicious, and the growth of the plant is uniformly bush-like, producing freely its nearly seedless fruit in abundance. A mid-season or main crop variety. 1/- per packet.

Natural Size
"DWARF-GIANT"

Weight
17 Ounces

Two New Capsicums

Red Hercules

A bright scarlet, very large fruited variety; productive and vigorous growing, with solid flesh of a good mild flavour. The fruits grow upright, and are consequently less liable to rot. Price 1/- per packet.

Golden Hercules

As the name implies, this is a yellow fruited variety of these giants among Capsicums; equally as productive and vigorous as the Red Hercules; growth of a similar character also. Price 1/- per packet.

CAPSICUMS are not used as generally as they might as a culinary dish, and these mild-flavoured varieties are particularly adapted to that purpose.

E. J. Quinn

VEGETABLE NOVELTIES for 1910

CONTINUED

New Water Melon "Delight"

The fruits of this almost Seedless New Water Melon are globular, large, and of a spotless dark green. The crimson flesh is refreshing, sugary and juicy, and is much esteemed in the country whence it comes—"Italy." **1s** packet.

New
Water Melon
"Delight."

New Pea "King Edward VII."

A dwarf early Pea of robust growth, and wonderfully prolific. The pods, slightly curved, are long and of a deep green colour. Undoubtedly one of the very best large podded dwarf Peas. Height 12 inches. **1s** per packet.

New Pea "Senator"

This heavy cropping Pea is a great favourite with market gardeners in England. From trials made, the good opinion of the home growers has been confirmed, and the "Senator" proved itself the heaviest cropper among all the varieties tested. Height 2½ feet. **1s** per packet.

Introductions

ETC.

OF 1909

Burpee's Kidney Wax Dwarf Bean

Very hardy and prolific Kidney Wax Bean, blight-proof, and with perfectly stringless pods. The pods are fleshy and flat, 6 to 7 inches long and half-inch broad, of a rich lemon yellow, of beautiful flavour. **1s** per packet.

Epicure Beans

have been much in favour during the past season or two, and although the majority of growers prefer a dwarf growing variety, the productiveness and ever bearing qualities of the Epicure have popularised it considerably. This Bean grows from 6 to 8 feet high, is stringless, and continues to bear right through the season if the young pods are kept pulled. Seed a light brown colour, useful both as a green or shelled bean. **6d** per packet.

The Czar Bean

is of the scarlet runner type with white flowers and seeds. The pods are 7 to 10 inches long and up to 1½ inch wide under ordinary cultivation. The pods are excellent when young and the seeds can also be used as a haricot or shell bean. This Bean can be highly recommended, being a free bearer and hardy. **6d** per packet.

Burpee's Stringless White Wax Bean

A New Bean of sturdy upright growth; the bushes are heavily laden with a magnificent crop of large, handsome pods of a bright lemon yellow, brittle, and entirely stringless. The seeds are large and pure white, and are most desirable as Shell Beans, both for Summer or Winter use.

1s per packet.

INTRODUCTIONS OF 1909

CONTINUED

Early Sweet Corn "GOLDEN BANTAM"

The "GOLDEN BANTAM" is not only very early but very hardy, and can be grown in the colder districts to advantage.

It is a dwarf variety, growing about 4ft. high; the ears are from 5 to 7 inches long, with two or three fine ears to each plant. 8d per packet.

Early Sweet Corn
"Golden Bantam"

The "Burpee Improved" Bush Lima Bean

THE 'Burpee Improved' Bush Lima Bean

This is the finest Bush Lima Bean that has ever been introduced. It is sturdy in habit and grows about 20 inches high. The pods are borne in prolific clusters, 4 to 7 pods in each cluster, and the pods contain 4 and 5 beans. The quality is of the highest, and the beans large. It is also very early and a continuous bearer

1s per packet.

Water Melon "Sugar Stick"

New WATER MELON "Sugar Stick"

A large light green or greyish melon of oblong form, the fruit measuring from 20 to 24 inches long, with an average weight of 30 pounds. Luscious, bright red, crisp and sugary flesh.

6d per packet.

New Rock Melon "Fordhook"

Heavily netted, nicely ribbed, and the golden-red flesh of exquisite flavour, and very firm. One grower says: "It is not only a prolific yielder, but has the size that the grower and shipper desire."

1s per packet.

Cabbage Lettuce "May King"

"MAY KING" has a flavour unexcelled by any other Lettuce; it stands well, and is 10 to 14 days earlier than any of the early varieties listed. 6d per packet.

"Fordhook" Rock Melon

NOVELTIES in FLOWER SEEDS

For 1910

From the Flower Seed Specialists of Europe and America

NEW SPENCER SWEET PEAS

Miriam Beaver

Marie Corelli

The flowers of this variety of Sweet Pea are brilliant rose carmine or red, of good size and form. The wings are a pure rich rose crimson; and the standard is the same, with a tint of cherry red. The whole effect is that of a brilliant crimson, clear, distinct and beautiful. The standard is large, round and wavy; the wings are full and inclined to remain boldly outright, instead of drooping; long stems, vigorous and free flowering.

1s 3d per packet.

Miriam Beaver

The following is a brief description of this beautiful New Spencer Sweet Pea from the original notes of the raiser:—"In shape, size, graceful arrangement on the stem, free blooming and seedless nature, it is in all respects the same as 'Countess Spencer.' Its novelty is its colour—a glowing, but soft apricot; tinted, shaded and suffused with lemon. It is a colour difficult to describe, and might be said to approach a terra-cotta tint. The flowers are uniformly of the largest size, and both standard and wings superbly waved and crinkled.

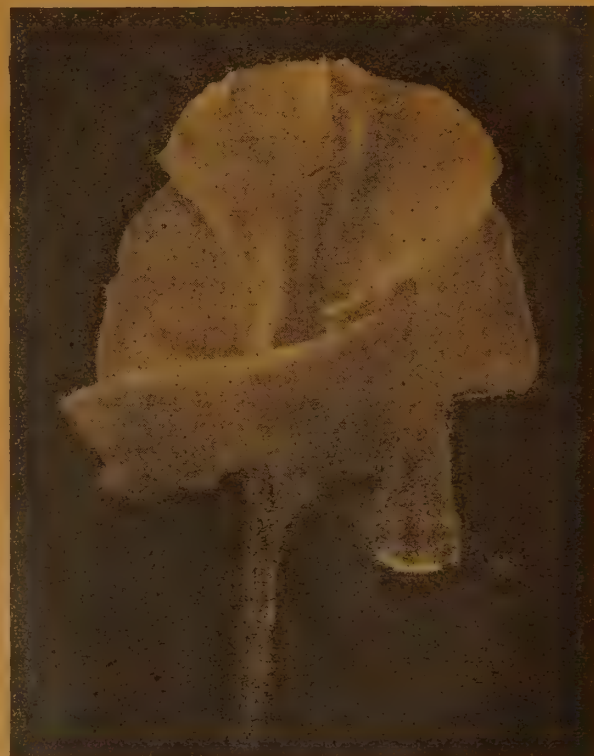

1s 3d per packet

THE superb elegance and delicacy of the Novelty Spencer Sweet Peas of 1909 was well sustained in the seven varieties that we included in our Special List.

This Season we are introducing

4 Novelty Spencer Sweet Peas

and we doubt not but that they will fully maintain the high standard of excellence that has characterized those introduced on former occasions.

W. T. Hutchins

W. T. Hutchins

A fine, bold, true Spencer of most perfect form and colouring. The buds show a decided buff; upon opening, the colouring inclines to pure cream, margined with blush pink. The fully-expanded flower has the appearance of light apricot, overlaid with beautiful blush pink.

1s 3d per packet

Senator Spencer

This is also of the true Spencer form—wavy edges on both standard and wings, with long stems. Usually four large, finely formed flowers on each stem. The colour of the flowers is a varying combination of deep claret and chocolate, striped and flaked on a ground of light heliotrope.

1s 3d per packet

For 5s. we will send (post free) 1 Packet each of the above Four Novelties and including 1 Packet of "Dorothy Tenant Spencer," a beautiful purple mauve self-coloured variety, 1s. per packet

New Long-Spurred Aquilegia

An improved strain of this highly esteemed herbaceous perennial plant is sure to be acceptable. This particular strain is one that has been brought to a high state of perfection by the raiser, who has devoted over 40 years to selection and fertilizing. The flowers are noteworthy for their large size and substance of the petals, and the length of the spurs. The colours embrace all the finest shades possible

1s 6d per packet

Australian-Saved Carnation Seed

The Colonial raised perpetual Carnations hold a very high place in the estimation of specialists, and the strain of seed we offer under this heading has been fertilized and saved from the finest crosses of Australian and American Carnations. The results from trials made of this seed has been most satisfactory, and a very large proportion of really first-class flowers may be expected.

3s 6d per Packet of 50 seeds.

NOVELTIES in Flower Seeds for 1910

CONTINUED

"Nice" Giant Stock, "Abundance."

"Nice" Giant Stock "ABUNDANCE"

The wonderful success that has followed the introduction of the "Nice" strain of Stocks is attributable to the suitability of the strain to Australian conditions.

Following the previous sterling sorts, we now introduce the "Abundance" as being the latest development in this particular section. As the name implies, its phenomenal profusion of bloom is the chief characteristic. It is dwarf in habit, and the colour of the flowers is a fine shade of carmine rose. The plant is sturdy and branching in habit and produces a large proportion of double flowers. **1s per packet.**

"The Stocks I had from your seed last Spring were the admiration of everyone who saw them."
—Mrs. Hedley Fox, Waratah, Kiama. 3-2-09.

Lobelia Hybrida "Miranda"

The foliage of this Novelty is very delicate, and the flowers are produced in great profusion, literally covering the plant. The colour is a bright rosy purple, which is heightened by a sharply defined white eye. **1s per packet.**

Lobelia Hybrida, "Miranda."

Mammoth Verbena "Rose Queen"

This remarkable novelty represents a degree of perfection hitherto unattained in Verbenas. Each individual flower on well-grown plants measures about an inch across and closely united in magnificent umbels. The colour is a most brilliant rose, and produces a fine effect in bedding plant arrangements. **1s per packet.**

New SALVIA SPLENDENS "Pyramidalis"

The growth of this new variety differs considerably from the ordinary Salvia. It is strictly pyramidal in form. The long flower spikes are bright scarlet, and branch out from the lower parts of the plant as well as the upper, forming a mass of attractive appearance. The popularity of the Salvia should be enhanced by the introduction of this admirable strain. **1s per packet.**

New Salvia Splendens
"Pyramidalis."

NOVELTIES in Flower Seeds for 1910

CONTINUED

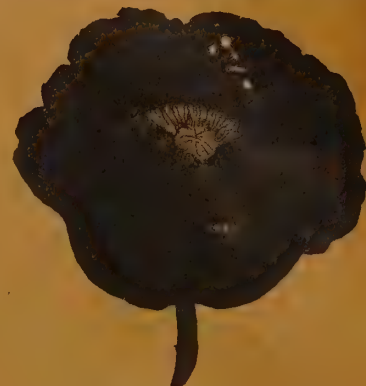

Cactus Aster, "Celestine"

Cactus Aster "Celestine"

The flowers of this very fine novelty are distinctly large and the petals narrow and tinted. The colour is a pure soft lilac of unusual beauty; gives a very charming effect. **1s per packet.**

Poppy "Charles Darwin"

This annual Poppy grows 2 to 2½ feet high, and is remarkable for the new and unique colour of its flowers. The smooth-edged petals being of a strikingly fine rich dark purple, each adorned with a velvety black spot at the base. **1s per packet.**

Poppy, "Charles Darwin"

Flower Seed Novelties of 1909

AND RECENT INTRODUCTIONS

New Ostrich Plume Aster "Pluto"

The flowers on opening are of a scarlet hue, which soon passes to the deepest possible dark blood red, a colour which in Asters is both striking and beautiful.

Fully two-thirds of the seedlings may be relied upon to produce blooms true to the above description. **6d per pkt.**

Aster "Eclipse"

Flowers are of immense size, measuring six to seven inches across, pure white with fine thread-like florets, quite double and without the yellow centre seen in many varieties.

The plants are strong and of robust habit, the flowers are borne on very stout stalks, and they stand remarkably well when cut. Sow in Spring. **6d per pkt.**

Cactus Aster "Rosy Carmine"

A new and quite distinct class of Aster of medium height and pyramidal habit. The plant throws out 15 to 20 strong side shoots, each bearing a most refined flower. The petals are nearly two inches long and are characterised by being slightly bent or twisted near the lip, thus giving it a cactus-like appearance. Early bloomer. **1s per pkt.**

Tasmanian-Saved Aster Seed

Asters have been and always will be a great favourite as a cut flower, and the success attending the introduction of the seed saved in Tasmania has proved beyond question the suitability of the plant to our trying summer climate.

The various classes that we offered during the past seasons have given splendid results.

Giant Branching Aster	mixed	..	1s	per packet.
"	pink	..	1s	"
"	white	..	1s	"
Hohenzollern	mixed	..	1s	"
Ostrich Feathered	mixed	..	1s	"

New Pansy "Raphael"

This distinct and splendid Pansy is a selection from the celebrated Bugnot strain. The flowers range in size up to about two inches across, and show the highest perfection in shape for Pansies. The ground colour is mostly an ethereal tint of light blue, and the three lower petals are adorned with a large dark violet blotch radiating into veins towards the edge of the corolla. The upper petals are transversed by fan-like rays of dark blue lines. **1s per packet.**

New Pansy, "Raphael"

INTRODUCTIONS OF 1909

CONTINUED

DAHLIA

Double Giant Paeony Flowered, Mixed
1s per packet.

The flowers of this grand and distinct novelty are of enormous size, resembling in appearance the bloom of the Tree Paeony.

Helianthus Cucumerifolius Plumosus

A new form of the miniature Sunflower in which the small flowers at the disc are changed to feathery tufts. Varying from light yellow to the richest golden yellow. Its singular beauty, together with the long stalks and durability of the flowers, make this variety particularly suitable for cutting purposes. 6d per packet.

Linaria Maroccana, "YELLOW PRINCE"

A fine new selection of this pretty little annual. The colours are of a bright yellow hue, which gives distinction and showiness to the plant. Sow Autumn and Spring. 6d per packet.

Nemesia Compacta, "Triumph"

The plant of this variety of Nemesia is very compact in habit, and with the very vivid and rich colours of the flowers will prove a most attractive and showy bedding plant. The flowers are very large and the colours vary from pale yellow to deep orange, scarlet to crimson, pink and lilac to purple. 6d per packet.

Japanese Kudzu Vine

(*Pueraria Thunbergiana*)

This is a twining vine of very rapid growth and perennial character. Foliage is large and lobed, and the purple pea-shaped flowers are produced in clusters. In the warmer parts of the State it will probably remain evergreen, and in the colder regions will be cut down by frosts, but makes fresh growth in Spring. 6d per packet.

"I never saw a more glorious show than we had from your Rainbow mixture Sweet Peas last year, they were the admiration of everyone."
—Dorothy Graham, Glengraham, Corunna. 30-3-09.

"The last Sweet Pea seed was a great success."—Mrs. L. English, Byng Street, Orange. 4-5-09.

SWEET PEA NOVELTIES of LAST YEAR

"King Edward" Spencer

The enormous flowers, waved and crinkled, are a deep rich carmine-scarlet of glossy effect. The wings are also carmine-scarlet. Stems twelve to fifteen inches long and frequently carry four fine blooms. The most beautiful of all the Spencers. 1s per packet.

"Apple Blossom" Spencer

Petals are waved and crinkled to a remarkable degree with distinct serrations on edges of standard. The colours are crimson-pink, shaded deeper at mid rib to lighter at edges, wings white; tinged and shaded with pink, medium size, hooded form. 1s per packet.

"Asta Ohn" Spencer

Lavender coloured Sweet Pea of the true "Spencer" type. Waved and fluted in the standard, with unusually large thoroughly waved wings. 1s per packet.

"Queen Victoria" Spencer

The flowers are extremely large, of the true waved "Spencer" type. The background is a deep primrose flushed with rose. 1s per packet.

"Ramona" Spencer

Clear white, with soft delicate lines and flakes of blush pink, waved and crinkled. A very free bloomer. 1s per packet.

"Beatrice" Spencer

The ground colour of the large flowers of this variety is white, tinted with soft pink and buff on the standard, while each wing has a blotch of brighter pink near the base. 1s per packet.

"Mrs. Routzahn" Spencer

Buff on apricot ground, flushed and suffused with delicate pink or very soft rose, deepening towards the edges of the standard and wings. The flowers are large, of the true "Spencer" type. 1s per packet.

SEE PAGE 41 FOR FULL LISTS OF SWEET PEAS

ROSE NOVELTIES for 1910

Althea (H.T.) Beautiful opaque salmon-pink, base of petal shaded with orange, the outside of the petal flushed with rose; very large and full; of vigorous growth 3s 6d

Cynthia (H.T.) Lemon-yellow, shaded with white; extra large and full, in the way of K.A. Victoria, but the plant is of much better habit of growth, being well branched and vigorous, and exceedingly free in blooming; excellent for exhibition and decorative purposes 3s 6d

Deuil de L. Compagnon (H.T.) Dark crimson purple, the darkest hybrid tea rose yet obtained; flowers are large, full and cupped 2s

Entente Cordiale (H.T.) Creamy or sulphury white the edges of the petals slightly tinged with carmine; large, full and globular, with fine, long-shaped buds; growth vigorous 3s 6d

Francis (Wichuraiana) Single red, with golden yellow stamens, followed by a multitude of red fruits, rendering the plant very attractive; habit and foliage of Crimson Rambler. 2s 6d

Frau Nicola Welter (H.T.) Buds ochre-yellow, open flowers orange-yellow, shaded with saffron; fine long buds and delicate Tea-rose scent; a free and continuous bloomer, especially in autumn. 3s 6d

F. R. Patzer (H.T.) The blooms are produced with freedom; they are carried on stiff, erect stems, and are of large size and substance and perfect formation. The colour is creamy buff, back of petals delicate warm pink; as the petals reflex the colour becomes light orange pink, forming a charming combination. A distinct and good rose for all purposes, especially valuable for exhibition purposes 3s 6d

Hector Mackenzie (H.T.) Deep rose, shaded with silvery carmine and crimson; very large, full and globular; a good new rose. 2s 6d

Jacques Vincent (H.T.) Coral red, shaded with yellow, centre salmon rose, an exceedingly soft and striking shade of colour; flowers large and elegantly formed; a distinct fascinating novelty. 3s 6d

James Coey (H.T.) The plant possesses a good constitution, the growth is erect and of free branching habit; admirably adapted for massing, and it blooms profusely and continuously. The colour is deep golden yellow, edges of petals white; the flowers are medium size, fairly full, and are carried on a stiff peduncle. In the bud state the form is perfection, and colour a delightful shade of orange yellow. 3s 6d

Lieutenant Ozren Leovics (H.T.) Flesh colour-salmon-white, reverse of petal slightly coppery; buds coppery rose; large, moderately full, opening well; growth vigorous. 3s 6d

Miss Eva (T.) Deep bright saffron yellow, changing paler as the flowers open; large and full; growth moderate 2s 6d

Madam Andre Porcher (H.T.) Brilliant deep carmine, very full and globular; growth vigorous; a seedling from Belle Siebrecht. 2s 6d

Margaret (H.T.) Award of Merit Temple Flower Show, 1909. A very clear and delicate tint of soft pink, a shade of colour that is particularly beautiful

under artificial light; buds long and handsome, developing into large, stiff petalled flowers, the outer petals being nicely reflexed; of good lasting qualities, excellent for cutting; growth vigorous. Dwarf. 3s 6d

Mrs. Hubert Taylor (T.) Every bloom is absolutely perfect in its shape and finish. The colour, which is very beautiful and distinct, is shell pink, the edges of the petals being ivory white. This is a pure Tea of exceptional merit and distinctness, producing flowers of the highest exhibition standard, and is strikingly free and continuous in bloom. A very chaste and charming variety, and one of immense gain to the Tea class, and it is not only an exhibitor's rose of the highest order, but it is also grand for garden decoration. Gold medal N.R.S. . . . 3s 6d

Mary, Countess of Ilchester (H.T.) Warm crimson carmine. It possesses unusually free and continuous blooming qualities; the flowers are of great size, with large massive petals, which are very smooth and circular. Perfumed. Altogether a rose of much merit and distinctness. . . . 3s 6d

Mrs. Arthur Munt (H.T.) The blooms, which are carried on stiff, erect stems, are very large, full, perfectly formed, with high-pointed centre; delicately tea scented. The colour is suffused peach, on deep cream, which becomes creamy ivory as the flower develops. A delightful rose for any purpose, and particularly valuable to the exhibitor as well as for garden decoration. A most welcome addition, and one of the very best of our introductions. It would be impossible to speak in too laudatory terms of this rose, which possesses every point required in a perfect rose. 3s 6d

Copyright.

ROSE NOVELTIES for 1910

Margaret Molyneux (H.T.) The blooms are semi-double, and are produced in trusses of three to five blooms, each carried on a long and rigid stem. The colour is as novel as beautiful, varying from saffron-yellow, shaded bronzy carmine in the bud stage, to delicate salmon pink as the bloom ages and expands. A decorative rose of the greatest beauty, and possibly the most lovely of all. 3s 6d

Mdm. Segond Weber (H.T.) A grand rose in every sense; flowers of enormous size; petals large and firm; habit of growth all that could be desired; colour rosy salmon; we have had some splendid blooms of this rose, and consider it one of the best. 2s

Mons. Emilana Oliden (H.T.) White, with rosy flesh centre, in the way of Mildred Grant, but of better growth; flowers very large, full, and opening well; petals large and smooth. Awarded First Prize and Silver Medal; a splendid exhibition bloom. 1s 6d

Mrs. A. R. Waddell (H.T.) Although this is classed as an H.T., we should be inclined to put it amongst the T.'s. Very long buds of a reddish salmon tint; a wonderfully good grower, producing a large quantity of beautiful buds, and one of the best for florists' work. 1s 6d

Nita Weldon (T.) The flowers, which are produced in marvellous profusion, are of large size, very full, and of globular form, the buds being long and pointed. The colour, which is distinctly unique, is an ivory white, with the edges of each petal faintest blush. The vigorous growth and perfect habit of the plant, combined with its wonderfully free-flowering properties, as well as the large size of the flowers, must justify its inclusion in any collection. Awarded the Gold Medal of the N.R.S., London, July, 1908. 3s 6d

Perpetual Crimson Rambler. A variety of German introduction, recommended by the producer as a fine, perpetual flowering form of the popular variety. 2s 6d

Otto Van Bismarck (H.T.) Colour of La France and habit of Caroline Testout. A fine new Rose that received a prize of 3,000 marks (£150) offered by a German horticultural journal for the best new rose. 2s 6d

White Killarney (H.T.) A white sport from a well-known pink-flowered variety of Killarney. American origin; highly thought of in U.S.A. 3s 6d

Walter Speed (H.T.) The blooms are large, with imbricated form and high-pointed centre; the large circular petals have great substance and are beautifully smooth. The colour is lemon yellow, which, as the flower develops, becomes milky white. A very beautiful and thoroughly distinct rose of the Antione Revoire type, to which it is infinitely superior, because of its colour, freedom of bloom, and vigorous constitution of the plant. A truly superb rose. 3s 6d

Barbarossa (H.P.) Bright carmine, extra large, opening well, and very fragrant; growth vigorous and hardy. Described as a red Frau Karl Druschki 1s

Stocks of some varieties are limited. Descriptions chiefly those of the raisers.

ROSES of 1909 Introduction

ARDS RAMBLER. The blooms are of perfect form, the petals of huge size, very smooth and possessed of great substance; the colour is a velvety orange crimson, shading to rosy carmine at the base of the petals; deliciously and highly perfumed. A grand climbing rose. 2s

ALBATROSS (H.T.) Flowers extra large, colour ivory white, faintly tinted with blush pink; of handsome conical form. The flowers are produced upon strong erect stems. 2s

BEATRICE (H.T.) Very suitable for exhibition purposes; full and substantial flower of a deep rich pink, shaded with vermilion when opening; the petals are beautifully reflexed; vigorous growth 2s

CELIA (H.T.) Flowers bright satin pink, centres somewhat deeper, large, full, of circular outline, the centres well raised and the petals reflexed. 2s

CHATEAU DE CLOS VOUGEOT. Velvety scarlet, shaded with fiery red, changing to dark velvety crimson as the flowers expand; a good grower, with handsome foliage. 2s

DR. O'DONEL BROWNE. Every growth produces a bloom which develops into a flower of the largest size and most perfect form; the blooms are very full, yet always opening well; the petals are smooth, well-shaped and massive; colour carmine 3s

DUCHESS MAURICE DE BROGLIE. Flesh white, the centre shaded with yellow and bright rose, the petals being reflexed with yellow, very large and full; growth moderate. 1s 6d

ELAINE. A magnificent high-centred large and full flower of palest lemon-white, the buds being slightly tipped with flesh pink and rose; the petals are reflexed and the outer ones pointed. 2s

FLORENCE EDITH COULTHWAITE. The flowers are large, full, and of perfect imbricated form, the petals smooth, circular, and of great substance. The colour, which varies somewhat, is deep cream stippled with bright rose on the inside of the petals and reflected on the back. 2s

GEORGE C. WAUD. Colour hitherto unknown amongst roses, a glowing orange vermilion that does not fade. The flowers are large, full, perfectly formed, with highly pointed centre. The growth is erect. 2s

GRACE MOLYNEAUX. Colour creamy apricot flesh in the centre, the outer petals when developed are delicate creamy white inside, with faint pink sheen on reverse; delightfully tea-perfumed and marvellously floriferous. 2s

H. ARMYTAGE MOORE. Flower of immense depth, with great shell petals, which are beautifully reflexed at the edges. The colour is a delightful shade of rosy pink on the outside of the petals, the inside of the petals being a delicate silvery pink. 2s

JEAN NOTE. Chrome yellow, changing to creamy yellow; large, full and globular; growth vigorous. 1s 6d

JOHN CUFF. The buds are very long and highly pointed. The flowers are of deep carmine pink colour, with a deep yellow zone at the base of petals. 2s

LADY URSULA. The petals are unusually large, smooth, circular, and of great thickness. The colour is a delightful shade of flesh pink, and thoroughly distinct. 2s

MADAME P. EULER. Silvery vermilion rose, a beautiful shade of colour; very large, very full, and lasting long in good condition; growth vigorous. 1s 6d

MOLLY SHARMAN-CRAWFORD. Blooms are very large and full, perfectly formed, with a high-pointed centre, from which the petals gracefully reflex; colour delicate eau-de-nil white, which, as the flowers fully expand, becomes dazzling white. 2s

MRS. DAVID JARDINE. The blooms are very large; perfect form; beautiful in its several stages of development. The colour is a delightful shade of bright rosy pink, shading in the outer petals to salmon pink. 2s

MRS WILLIAM COOPER. (H.T.) Vigorous and erect growth, flowers of great size and immense substance, with high-pointed centre; petals large and shell-like, beautifully smooth. The flowers are deep rosy flesh colour in the centre, paling towards the edges of the outer petals to delicate blush. Very sweetly perfumed. 2s

MRS. JAMES CRAIG. The flowers are freely produced, are large, full and of exquisite form. The colour is salmon rose, flushed pale yellow at the base of the petals, outer petals passing to pale rosy pink. Vigorous, erect and very branching. 1s 6d

MRS. STEWART CLARKE. Of immense size and great substance. The colour is very difficult to describe, varying from bright cerise pink to brilliant rose or cherry pink with a distinct zone of white at the base of each petal. 1s 6d

RHEA REID. Flowers red, large and fragrant, free and continuous in blooming, with a good constitution. 2s

WALTHAM BRIDE. Suitable for hedge, pillar, pergola, and arch planting; also for forming natural bushes or large-headed standards, the pure white blossom contrasting more effectively with the colours of other varieties planted in proximity to it; of the multiflorous type. 1s 6d

W. R. SMITH. The colour is creamy white, flushed and suffused with bright rosy pink, opening freely in all weathers; great size and substance; of the Maman Cochet type. 2s

Novelties in CARNATIONS

For 1910

1910 NOVELTIES IN American Varieties

BESSIE RANDELL. Deep rose pink, blooms of shapely build, full and high in centre, sound calyx and good stem, early and continuous bloomer, rich perfume, very strong and robust (does not burn) .. 2s 6d

BONFIRE. Large fiery red, blooms of good form and substance, with refreshing fragrance, growth free with long straight stems, free bloomer .. 2s

F. R. SEAGER. Pale pink, splashed rose pink, large bloom, full robust constitution, never bursts, always in bloom, greatly admired .. 2s 6d

GALA. Red, overlaid with metallic shading, heavy sheen, large well-shaped blooms, growth strong and healthy, "distinct" .. 2s 6d

HEATHER KEEP. Pure glistening white, slightly fimbriated, of great substance, perfect form, flowers $\frac{3}{4}$ inches across, are borne in the greatest profusion on long stiff, wiry stems, strong clove perfume, very robust and strong constitution; a real gem .. each 3s 6d

LADY MARMION. Perpetual flowering malmaison, very large, cherry red and white, loosely built resembles Marmion, much freer bloomer, strong perfume; unique .. 3s 6d

MASTER JACK. Large, bright red, with heavy fringe, well built flower, a very robust grower, producing flowers upon long wiry stems, sweet scented .. 2s

MRS. A. H. HAWKINS. Bright pink, with broad margin of white, heavily fimbriated, a lovely flower of the finest type, robust, clove scented, medium size; quite unique .. 3s

MRS. E. A. PEACOCK. Rich crimson scarlet, of perfect form and substance, slightly fimbriated, strong sweet perfume, flowers up to 4 inches across, are borne on long stiff wiry stems and never burst; growth and constitution all that could be desired .. 3s 6d

MRS. J. BIDENCOPE. White, each petal being overlaid with pink broad fringe of white, large flowers of good form and perfume, free strong grower; unique .. 2s 6d

MRS. L. J. LIPSCOMBE. Rich geranium pink, slightly fimbriated, perfect form, blooms up to 4 inches across, never bursts; flower spikes 30 in. high, with blooms branching out from top to bottom; growth strongest of all carnations, sweet perfume, requires little or no staking; immune from disease, a Carnation "par excellence" .. 3s 6d

PAULINE HERTZBERG. White ground, overlaid with pink, flowers exceptionally large and of good build, refreshing perfume, growth quick and strong, great favourite .. 2s 6d

1910 NOVELTIES—Continued

REMEMBERIT. Apricot and scarlet, very large and full flower, crown blooms have a tendency to burst, strong robust grower, quite distinct, always in bloom .. 2s 6d

ROMA LIPSCOMBE. Intense scarlet, very large fine deep blooms of great substance, free and continuous bloomer, strong perfume, robust grower, foliage $\frac{1}{2}$ in. wide; very striking .. 3s 6d

TELOPEA. Large dazzling scarlet, highly fimbriated petals beautifully crimped, "like the Romneya Coulteri" Californian Poppy, perfect shaped bloom, strong perfume, long wiry stems, strong constitution .. 5s

TORONTO. Very large, brick red, robust and free bloomer, strong healthy growth, good perfume .. 2s 6d

UNCLE SAM. Red, large and finely formed flower, fragrant and free, robust grower .. 2s 6d

WINSOME. White splashed pink, large flowers, clove perfume, strong, free and easy grower, medium length of stem, calyx always sound .. 2s 6d

ZANNEE. Maroon crimson, full and fimbriated, produced on long straight stems, most profuse bloomer, strongly scented, good grower .. 2s 6d

Perpetual Flowering Carnations

*Raised by Mr. G. H. KERSLAKE
and offered 1909 for the first time*

DAINTY. Blush white, slightly pencilled, crimson shell petal, perfect calyx, free flowering .. 1s 6d

EMO. Ground colour, yellowish-buff stripe or crimson excellent form, distinct variety .. 1s 6d

EXQUISITE. Rich yellow, delicately pencilled, orange-scarlet, a dainty flower of excellent form .. 1s 6d

HAROLD. Very large and non-burster, strong grower, long, stiff stem and free flowering, colour reddish-orange and crimson, good garden variety .. 1s 6d

KERSLAKE'S YELLOW. Clear yellow self. A sport from that most popular variety, Mrs. G. H. Kerslake. Retaining the size, form, and constitutional vigor of the original. .. 1s 6d

Mr. JOHN POPE. Brilliant scarlet-crimson, shaded maroon, good form, perfect calyx, free flowering and a vigorous grower .. 1s 6d

AMERICAN VARIETIES

Introductions for 1909

As a winter flowering class they are most desirable, bearing their lovely sweet-scented flowers into the spring, and are beautiful for decorative purposes. The flowers are borne on long wiry stems.

AURORA. Buff, flaked with bright pink, a nice combination of colours. .. 1s 6d

BRITANNIA. Scarlet, good form and substance, vigorous grower, highly perfumed. .. 1s 6d

ETHEL CROCKER. Pink, profuse bloomer. .. 1s

ENCHANTRESS. Soft pink, deepening towards centre, sweetly scented, and one of the largest and most striking Carnations in cultivation. .. 1s 6d

FLORA HILL. Pure white. .. 1s

GENERAL FRENCH. Rich crimson. .. 1s

HARRY FENN. Large crim. flowers, long, stiff stems .. 1s 6d

HARLOWARDEN. Crimson self .. 1s 6d

JUANITA. Lovely shade of salmon pink. .. 1s

LADY LOU. Splendid variety for cutting, large flower, bright cerise. .. 1s 6d

LADY BOUNTIFUL. Beautiful pure white, very large flower, long stems, richly perfumed. .. 1s 6d

LADY CARLISLE. Deep rose, very fine colour, vigorous grower, free bloomer. .. 1s 6d

MONTEREY. Crushed strawberry. .. 1s

MRS. T. W. LAWSON. A famous American variety, deep pink, perfumed and robust. .. 1s

MRS. LEOPOLD DE ROTHSCHILD. Salmon pink, dwarf habit. .. 1s

MRS. H. BURNETT. The finest flesh pink in cultivation, awarded more prizes than any other Tree Carnation; highly perfumed. .. 2s

NELSON FISHER. Cerise, nearly scarlet, strong grower, highly perfumed. .. 1s 6d

OCTOON. Dark crimson, clove scented, vigorous grower. .. 1s 6d

PASADENA. White striped scarlet, a fancy type. .. 1s

PROSPERITY. White mottled, soft pink. .. 1s

ROBERT CRAIG. Scarlet, immense size, vigorous grower, highly perfumed. .. 2s

ROSALIND. White ground, rose pink markings, rich perfume, strong grower. .. 1s

SENSATION. White ground, marked pink and yellow, a lovely combination of colours. .. 1s 6d

THE CARDINAL. Intense scarlet, good perfume .. 1s 6d

THE PRESIDENT. Very dark crimson, large and good form, clove perfume. .. 1s 6d

WATCHMAN. A good red shade. .. 1s 6d

WHITE PERFECTION. The best of whites; a constant prizewinner. .. 1s 6d

WHITE ENCHANTRESS. A pure white .. 1s 6d

WHITE LAWSON. Pure white; excellent. .. 1s 6d

WINDSOR. Deep pink, with pale edges; vigorous grower. .. 1s 6d

WM. CUTBUSH. A very fine scarlet; distinct. .. 1s 6d

Australian Raised Perpetual Carnation

Three New Perpetual Carnations for 1910

RAISED IN NEW SOUTH WALES

THE locally raised Carnation of the Perpetual Flowering Type is generally accepted as the best. Some varieties are naturally better than others. Last year we introduced two, viz., *Evelyn* and *Beatrice*. They will be found included in the General List on page 77.

*The following are THREE NEW CARNATIONS,
Our Introductions for 1910*

S. W. AUSTIN. White ground, very finely marked with heliotrope; a fine large show flower; requires no dressing. 1st prize two years in succession at the C. & P. Society's Annual Show; a non-burster, growth like *Conspicuous*. .. 2s 6d ea.

CAMMERAY. Yellow ground, very heavily marked with vermillion; the colours are very delicate. This plant has a very large bloom, and a real non-burster. 1st prize winner two years in succession. One of the best. .. 2s 6d each

WESTELLA. Ivory white ground, very finely marked with pink. Large show flower and a prolific flowerer and non-burster. .. 2s 6d each

FOR GENERAL LIST SEE PAGE 77

NEW SHOW CHRYSANTHEMUMS, &c.

New Show Chrysanthemums

Price, 2s each

ENCHANTRESS. Colour, a rich shade of rosy cerise; long curling petals; blooms large and of beautiful form.

FRED G. AUSTIN. A fine variety with extra long curling petals; ivory white, suffused with lilac in the centre.

INVINCIBLE. Bright bronzy chestnut, old gold reverse; bloom extra large, deep and well formed.

MISS DOROTHY WILLIAMS. Handsome exhibition variety. Ivory white; very large, deep and massive, easy grower.

PEGASUS. Colour pale canary yellow; extra large, full, refined bloom of excellent form.

TINTS OF AUTUMN. A most attractive variety. Colour scarlet, pink and gold, beautifully blended.

For

General List of Chrysanthemums see page 78

New Bouvardia

Price, 3s 6d each

MISS EILEEN BEESTON. This is an excellent Bouvardia, combining every good quality. The colour is a deep pinkish heliotrope, with a wine-red tube. Huge trusses of large flowers, very free, and of good habit.

New Single Chrysanthemums

Price, 1s 6d each

VERY fashionable Marguerite-like flowers; useful for bouquets and vases; lasting about ten days in water, and flowering late in Autumn, when other flowers are scarce.

DELIGHT. White, shaded carmine pink; large, beautiful tints.

LYRIC. Bronzy red, yellow centre; fine starry flower.

MISS IDA LOWER. Colour buff, heavily suffused pink and bright red; beautiful autumn tints; large and extra good.

LOVELY. Yellow, heavily shaded with bright reddish orange; a beautiful combination of tints.

For further List of Single Chrysanthemums see page 78.

New Types of Pentstemons

Price, 2s 6d each

THESE are the Gloxinia flowered types of this lovely garden plant, raised by Mr. G. H. Kerslake.

GLORIA. Tube and segments brilliant vermilion; throat pure white; blooms of gigantic proportions; spike medium length.

PHENOMENAL. Throat pure white, tube and segments rosy lake; immense funnel-shaped flower, and fine spike.

PRINCEPS. Tube and petals purplish-crimson; throat white, blotched chocolate. Blooms large; huge spike, nearly three feet long.

VIVID. Colour deep scarlet; throat white, pencilled and blotched at the orifice with crimson. A noble variety.

Pentstemon Novelties of 1909

GIGANTEA. Colour deep rose-lake, throat white, blotched at the orifice with deep rose; immense blooms. 1s

HERCULES. Tube crimson, segments scarlet, throat white, slightly pencilled scarlet; very long spike of large well-disposed flowers. 1s

MRS. G. H. KERSLAKE. Tube white, lip clear rosy lilac; throat white, faintly pencilled; probably the best of the light flowered varieties. 1s

RISEING SUN. Soft reddish salmon; throat white, beautiful spike of large flowers; a distinct and delicate tinted variety... 1s

New Ivy-Leaved Pelargonium

Price, 1s 6d each

BEAUTY OF PERTH. Is a most beautiful variety, colour very bright heliotrope, the petals splashed with deep crimson; very large trusses, free and sturdy grower, quite distinct from any other Ivy Pelargonium.

New CACTUS DAHLIAS for 1910

The following 12 choice varieties, raised by Mr. G. H. Kerslake, were offered in our Special Dahlia List published in October, 1909. The prices have been reduced for 1910.

We can now book orders for delivery from November to January, Green Plants only as ready, 3s 6d each

ALBERT E. TYSON. A rich, glowing (indescribable) sunset colour. Blooms extra large, very deep and of exquisite form. Every flower comes good; one of the best.

APPLE BLOSSOM. Pale heliotrope pink, shading to apple blossom centre. A large refined bloom of excellent form.

CAPTIVATION. Bright rose, tinted carmine. Long, fine petals; blooms large; lustrous in colour and of splendid form; constant.

INIMITABLE. Golden yellow, suffused and tipped bright scarlet. Blooms large, with long, gracefully curved florets. Of excellent form and very constant.

LUCRETIA. Colour mauve, shading to lavender. Large, full bloom, fine in petal and perfect, upright poise.

MODEL. Dark crimson or wine colour. As the name implies, every bloom is perfect. Free flowering, needing severe restriction when show blooms are desired.

MODESTY. Clear canary yellow. A large, full, refined flower of great depth. Constant variety.

MRS. H. S. BRANDT. Salmon-buff, shading to nearly yellow centre. Petals very long; blooms extra large, cone centre; elegant flower. One of the best show flowers ever introduced.

MRS. J. C. WHITE. Colour a beautiful salmon-pink. Blooms extra large, of splendid form. Constant, one of the best.

PERPETUA. White ground, delicately pencilled or striped red-dish cerise. Blooms medium size; petals very fine; stiff, erect stems. Refined fancy.

SENSATION. Handsome flower; yellow shaded fawn. Immense size and great depth. Best described as a glorified C. N. Richardson.

WALTER KERSLAKE. Rich, velvety maroon crimson, nearly black. Blooms medium to large. Fine in petal, and of good form. A beautiful novelty, superseding all others of the J. H. Jackson colour.

The following

HIGH-CLASS CACTUS DAHLIAS

offered in our 1909 Catalogue

are also productions of Mr. G. H. Kerslake

Admiration. Ground colour pure white, with the upper half of the florets overlaid with a beautiful carmine pink; a unique and beautiful variety. 4s each

Australian Perle. Colour purely white, with the base petals tinted deep heliotrope; fine spidery flower, of good form. 2s each

Bronze Queen. Blooms medium to large (six to seven inches across when disbudded), nearly globular, stems long, wiry, and perfectly erect; colour, bronzy chestnut. Elegant spidery flower; perfect form and very constant. 1s 6d each

Cynthia. Fine exhibition variety of an almost indistinguishable combination of carmine, pink and white. Blooms large, fine form, unique colour. The stems are a little weak, and for this reason it is distributed as a show variety only. 1s 6d each

Elegans. Yellow, base petals flushed scarlet, sometimes pervading the whole bloom. Petals very long, extremely narrow from base to apex. Blooms large, refined. Handsome show variety. Late. 2s each

George Griffen. Colour rich purple plum. Very large radial bloom, with long and extremely narrow petals. A great advance upon "David Rumble." 2s each

Golden Fleece. Canary yellow, shading to sulphur at the ends of the florets. Blooms extremely large and of much higher build than "Robert Henderson." 2s each

John Lawrence. A pretty shade of amethyst, passing to yellow at the base of the florets. A beautiful spidery bloom, of large size; excellent form and very constant. 1s 6d each

Lady Dudley. Colour a deep lustrous carmine-rose; florets extremely long and gracefully curved towards the centre, forming an imposing bloom, of immense size. Deeper in colour than the well-known variety "G. H. Kerslake," and as a show flower, very far exceeding it. 2s each

Mrs. Edward Evans. Large, full spidery flower, of a rich glowing scarlet, with the tips of the florets shaded cardinal. 1s 6d each

Mr. John Pope. An exceedingly handsome flower, of immense size, great depth, and perfect form. The ground colour is amber, overlaid (or frosted) with rich old gold, forming a unique and beautiful combination of colours; extra good. 2s each

Mrs. Herman Britz. Here we have a long-wanted colour, which is a beautiful bright orange scarlet. Blooms large, with long, narrow, slightly incurved florets. An excellent and most desirable variety for any purpose. 3s 6d each

Wye. In form, size, and habit of growth, this is nearly identical with "Warrawe," but of a warmer colour, the salmon ground colour being flushed with old rose. 3s 6d each

Pot Tubers of all the above supplied when at all possible.

CACTUS DAHLIA NOVELTIES

for 1910

The following List is comprised of the BEST ENGLISH RAISED VARIETIES, and they have quite a reputation for fine form and floriferous character:—

SATISFACTION. A very beautiful flower of the most incurved type. Even amongst the most lovely tints now to be seen in Dahlias this stands out as one of the most exquisite. The florets are long and equally narrow throughout, and when fully developed they incurve and intermingle, forming flowers of the most graceful character. Another good feature of this variety is its centre, as although it is extremely deep, yet the centre is never heavy, but of the most approved filbert shape. 3s 6d

SNOWDON. A grand flower of the purest possible white. The blooms are large and possess a great quantity of petals, which are long and narrow. The habit is extremely good, every flower stem being long and wiry. Amongst the many varieties distributed, this will take its place as one of the finest. 3s 6d

EVENING STAR. Quite a distinct type of Dahlia as regards form, the florets being numerous, very long and pointed and arranged neatly, star-shape. We can thoroughly recommend this variety as a genuine reliable Dahlia, as it has a magnificent flower stem, blooms freely over a long period, and is first rate for exhibition. The colour will please everyone, a bright terra-cotta at points of petals, the centre being gold, which suffuses itself upwards until lost in the deeper colour of the upper portion of the floret. 3s 6d

SNOWSTORM. A large bold white flower of fine form, which is moderately incurved. The plants are dwarf and sturdy and commence flowering very early in the season, and produce large flowers with the utmost prodigality. 3s 6d

DIADEM. One of the most graceful and telling exhibition varieties: The florets are exceedingly narrow, and they intermingle and incurve to such an extent as to almost meet in the centre. The colour is a deep rose for the most part, but, like many other cactus, the centre is a lighter tint, and the extreme points are decidedly tipped with yellow. 3s 6d

WELLINGTON. With so many lighter shades now to be seen in Cactus Dahlias, flowers of darker colouring are more than usually welcome, and in this we have a bright glowing crimson scarlet, with a shade of purple towards tips of florets. The flowers are of good size, incurving form, and all are produced on long stems. The plants are erect, strong, healthy growers. 3s 6d

MARATHON. Quite one of the largest flowers of the Cactus section, which, combined with its colour, yellow at the centre, shading off to rosy carmine, and distinctly tipped with white, makes it one of the most striking varieties. 3s 6d

MRS. T. W. WILLIS. Another very large and most beautifully coloured flower, the florets being of the longest, narrow throughout, and so numerous as to continue right to the centre, almost excluding the pollen. We can recommend this variety as being most reliable and in every way a first-class Dahlia. The plants make very fine specimens and produce an unusually large percentage of perfect blooms. The colour is white at the centre with edgings of lilac on the young florets, the greater part of the bloom being rosy lilac. 3s 6d

TEUTONIC. In striking contrast to those varieties which are of irregular formation, this flower is neatly made, every floret being evenly incurved, and these continue right to the centre. The plants are of wiry growth; healthy but not gross. It is difficult to exactly describe the colour, which has been given as amaranth crimson with ruby red shading. 3s 6d

SAXONIA. In this we have a splendid deep crimson which will give entire satisfaction. The flowers are large and well formed with fine florets, and they are carried on long stems. Plants are robust with dark green foliage. 3s 6d

FLORA. One of the most distinct varieties, the colour being buff suffused with pink and tipped white. Florets long and curl inwards. It flowers early. 2s.

C. E. WILKINS. This variety won the President's Silver Medal, offered for best bunch of Cactus in professional classes at the National Dahlia Society's Shows in 1907 and 1908, and is a magnificent Dahlia. The colouring is simply perfect, being an exquisite shade of bright, clear salmon-pink, overlaying yellow, which gradually towards the centre becomes more distinct. 3s 6d

FAIRY QUEEN. For fine florets and refined appearance generally this white variety is a first class introduction. The bloom has a good centre and is large and deep, plant especially dwarf, 2s 6d

NELLIE RIDING. Colour deep crimson with pure white tips. Flowers large and of finest form, being quite equal to the self-coloured varieties. Habit good. 2s 6d

SUNBEAM. Glowing chestnut on yellow ground. Blooms very large and of finest shape. 2s 6d

DR. G. G. GRAY. The most advanced and graceful type of Cactus Dahlia, having a great number of the narrowest needle-pointed florets which incurve and intermingle, forming blooms of great beauty. The colour is a fiery crimson scarlet without shading. 2s

INVERNIA. An altogether good Dahlia, being of immense size, but also of beautiful form and surpassing almost any other varieties for its all-round excellence. The plants have the best possible habit, being black wooded, with dark green foliage, and flower stems which carry the blooms right away from the leafage. Colour, an art shade of bright salmon fawn, with lighter centre. 2s 6d

REV. ARTHUR BRIDGE. Another grand addition, combining with its first-class exhibition flowers a practically new type of growth and habit which is likely to be the forerunner of a class of Cactus Dahlias, nearer the ideal than has yet been approached. The colouring is exceedingly beautiful, being a bright clear yellow, heavily tipped and suffused with bright, yet deep rose pink. 2s 6d

PAEONY FLOWERED DAHLIAS

This fine type of Decorative Dahlia has become quite established as an exceedingly beautiful variety for large work

We have imported a number of the latest types of this flower, and they will be included in our SPECIAL DAHLIA LIST, which will be published in October

EVER-BLOOMING ZONALE PELARGONIUMS

THIS highly attractive and brilliant flowering family of plants has come much into vogue of late years. For some reason that is inexplicable an objection exists with regard to these plants, simply we believe because they are known sometimes as geraniums. There is no more suitable plant to the conditions of climate that exist in New South Wales than these ever-blooming Zonales, and already a long list is to be found on page 84, but the following are newer and improved varieties.

SINGLES

Dr. Paul Duclour. Violet magenta, white centre	1s 6d
Cyclope. Intense purple magenta, white centre	1s 6d
Aldenhams. The richest crimson yet introduced	1s 6d
Veteran. Crimson scarlet	1s 6d
Aphrodite. Purest white, extra fine	1s 6d
Madam F. Carnot. Light rosy pink, large trusses	1s 6d
Shirley Hibberd. Scarlet, shaded plum colour	1s 6d
Lady May. Deep salmon, bedder	1s 6d
Daisy Angel. Purplish magenta, large white centre	1s 6d
Reformer. Reddish scarlet, new bedder	1s 6d
Cymric. Purple crimson, good advance	1s 6d
Donald Beaton. Bright orange, with decided yellow tint	1s 6d
Peach. Peach colour, with large white eye; good	1s 6d
Hopedene. Crimson lake, shading to soft magenta, white centre	1s 6d
Eric Pelton. Orange cerise, tinted	1s 6d
Chatsworth. Orange scarlet	1s 6d
Rival. Soft salmon red, beautiful new bedder	1s 6d
Lucy Mason. Salmon, red centre	1s 6d
Hilda. Salmon, shaded orange, pink tinge on upper petal	1s 6d
Juliet. Salmon pink, shaded orange	1s 6d
Blenheim. Grand scarlet, large white eye	1s 6d
Salmon. Rich Salmon colour	1s 6d
Olivia. Rosy cerise, upper petals shaded darker	1s 6d
Jubilee Old. Pink, white eye, large	1s 6d
Henry Compton. Deep pink, large trusses	1s 6d
Miss Pearson. Rose veined, centre white	1s 6d
Fashion. Purple crimson, white centre	1s 6d

SINGLES—Continued

Guenevele. Creamy white, grand truss	1s 6d
Seafoam. Pure white, excellent	1s 6d
Carmania. Soft salmon rose, white eye	1s 6d
John Milton. Orange scarlet, telling colour	1s 6d
Rudyard Kipling. Dark crimson purple very fine	1s 6d
Lord Stanley. Flesh colour, rose centre	1s 6d
Lord Avebury. Cerise, white eye	1s 6d
Cevic. Flesh tinted, white eye	1s 6d
Mrs. Brown Potter. Clear bright pink	1s 6d
Marquis de Piolene. Purple shaded fire colour, white centre	1s 6d
Rhodope. Bronze salmon, flushed pink	1s 6d

Chas. Fremine. Blush suffused lilac	1s 6d
Lady Warwick. White, margined reddish pink	1s 6d
Grace Harvey. Pale rose, light centre	1s 6d
Mauretania. Blush, salmon ring round eye	1s 6d
T. Hayes. Rich crimson, good	1s 6d
Medusa. Splendid crimson, extra fine	1s 6d
Tabitha. Purple rose shaded	1s 6d
General Outram. Good bedding crimson	1s 6d
Jerome K. Jerome. Reddish orange, suffused crimson	1s 6d
Glory of Hastings. Crimson	1s 6d
O. W. Holmes. Between orange and salmon, unique tint	1s 6d
Mrs. Gordon Linzee. Rosy salmon centre, suffused pink	1s 6d
Nellie. Delicate pink, white eye	1s 6d
Swallow. A beautiful cardinal colour	1s 6d

DOUBLES

Princess Alice de Rothschild. Gigantic blush rose, beautiful	1s 6d
Fraiche Beaute. White, tinged pink on margin	1s 6d
Mdme. Rene Choppine d' Armorville. Gigantic, rosy salmon	1s 6d
Andre Allar. Bright crimson	1s 6d
Fascinator. Gigantic, orange salmon, margined white	1s 6d
Dr. A. Vialletes. Gigantic, rosy violet	1s 6d
Comte Henri de Brettes. Gigantic, soft rose pink, very fine	1s 6d
Dr. Leon Petit. Gigantic, violet shaded magenta	1s 6d
Madeline Lemaire. Flesh salmon, enormous flowers	1s 6d
Chevaire Hermanos. Gigantic, vivid scarlet, very large	1s 6d
Mdme. Meyreir. Gigantic, apple blossom pink	1s 6d
Ami J. Exbrayat. Gigantic, very bright scarlet	1s 6d

GERBERA JAMESONI

THE POPULAR SCARLET DAISY OF SOUTH AFRICA introduced by us in 1901.

The beautiful, large, Daisy-like single flowers are most dazzling in colour; their long stalks adapt them most admirably to decorative work.

Strong well-rooted plants, 2s each, post free 2s 6d

NOVELTIES in TREES, SHRUBS, FERNS, CLIMBERS & POT PLANTS

A Grand New Shrub

Buddlea Variabilis, var. Magnifica

This splendid form of the well-known species equals the variety Veitchiana in size and profusion of bloom, whilst the flowers are of a much deeper shade of rose-purple. It thrives well in any soil or situation, and should be well pruned back in spring to ensure blooming in the summer. 2s 6d each

First-class Certificate from the Royal Horticultural Society.

ACER NEGUNDO FOLIA MARGINATA AUREA

Lovely green leaves, with a golden margin. 5s each

ACER NEGUNDO FOLIA MARGINATA ARGENTEA

Lovely green leaves with a silver margin. 5s each

HIBISCUS CALIFORNICUS

A magnificent pure white variety, the shape of H. Camdeni. A profuse bloomer. 2s each

Perennial Spirea (*Syn. Astilbe Japonica Type*)

SPIREA PEACH BLOSSOM. Graceful flowering spikes, pale shade of pink. 2s each

SPIREA QUEEN ALEXANDRA. Darker shade of pink than the above. 2s each

Nephrolepis Elegantissima

The Tarrytown Fern

This marvellous Fern is a sport from the Pierson Fern (*Nephrolepis Piersoni*), but is very much more beautiful and of greater commercial value. In this sterling novelty the small side pinnæ are again subdivided, producing an exquisite and beautiful effect, changing the entire character of the fronds, which measure less than half the length and about twice the breadth of the fronds of the Pierson Fern. The fronds also assume an entirely different form, the side pinnæ standing at right angles to the mid-rib of the frond, on edge rather than flat, as is usual, making both sides of the frond equally beautiful—entirely different from any other fern. One has to see the plant in order to form a correct idea of its beauty. The plant is very dwarf, only about half the height of the Pierson Fern, and of very much more compact habit. Taking it altogether, it makes one of the most exquisite plants, and one of the most valuable for table and house decoration that has ever been introduced. The cut fronds on account of their beauty are in great demand for table decoration, design work, etc. There is nothing in the fern line that is so handsome as this beautiful fern when well grown, well-grown plants making most magnificent specimens. It is an aristocrat among ferns, and is destined to become one of the most popular. It has been exhibited before all the leading Horticultural Societies in the world, where it has been the recipient of the very highest awards. Price from 2s 6d each

New Succulent Plant

Kalanchoe Flammea A brilliant scarlet flowering succulent. A great attraction; should be in every collection. 2s each.

In shape and character it somewhat resembles Bouvardia King of Scarlets.

PERENNIAL ORIENTAL POPPY

Goliath Large, orange scarlet shade, with black blotch in centre. 1s each

PERENNIAL CAMPANULA PERSICIFOLIA BACKHOUSIA GRANDIFLORA

Very nice dwarf flowering plant, with large white, pretty flowers. 1s each

Two New Verbenas

JOHN LINGHAM A good variety, with well-formed pips and trusses, colour rosy purple, with pure white eye. Very striking. 1s each

LILAC QUEEN A lovely pale lilac, free flowering. 1s each

ASTER, Beauty of Colwall

(The first and only double Michaelmas Daisy in cultivation.)

We consider this plant to be one of the finest we have ever distributed, and of all the varieties of Asters that have been raised for many years past, there are none that can approach in beauty the above novelty. The flowers are perfectly double, of a very pleasing shade of lavender, produced in great freedom on stout erect stems, about 4 ft. high. It is of robust constitution, a good grower, and requires no staking or tying to keep in position. It has been unanimously awarded a First Class Certificate by the Royal Horticultural Society, and is unquestionably the most perfect Double Aster yet raised. The demand is sure to be great. 1s 6d each.

Two New REX BEGONIAS

Of Special Merit

SILVER WINGS The centre of leaf is a glorious shade of light purple, with a silver margin; both colours very conspicuous for the delicate shadings. 1s 6d each

MRS. WM. D. SEARL A glorious combination of colour; a great advance from the Louis Clansen type, green, purple and silver predominating, with a dark green margin dotted silver. 1s 6d each

The above are two very striking varieties, and will improve any collection. We also stock 20 other choice varieties. 9s doz.

The Japanese Pink Wistaria

WISTARIA MULTIJUGA ROSEA A grand, meritorious novelty, very distinct. Plant vigorous and floriferous. Long clusters of lilac rose flowers. Lower petals yellow in the centre; flower buds of a nice clear rose. We are very pleased to have been able to offer a good stock this season of this rare novelty. Plants 5s each

NEW FRUIT TREES for 1910

New Apples 1910

HORN. Fruit small to medium; tree hardy and an immense cropper; a dessert apple of exceptional quality; good keeper. Price, 2s each.

SCHROEDERS. One of the best Apples of recent introduction; invaluable either for cooking or dessert; late. Price, 2s each

WINTER PEACH. Fruit medium size, cream colour; flesh very tender and juicy, with fine acidity; a valuable cooking Apple and good keeper; late. Price, 2s each

WILLIAMS FAVORITE. A very handsome dessert apple of very fine flavour; in appearance bright red; in shape similar to Pearmain. One of the best earlies. Price, 2s each

New Nectarines

ANSENNE. This variety is the parent of that well-known and popular variety Goldmine. The fruit is of largest size, and very highly coloured; flesh tender, melting, rich, juicy, and altogether of a most delicious flavour. Tree extremely hardy and productive; very regular cropper. Should be in every collection. Price, 2s 6d each

ZEALANDIA. As name denotes, of New Zealand origin. Fruit very large, rich red in colour, and is classed as one of the very best, and absolutely the largest Nectarine grown in New Zealand. Shape and appearance very similar to a highly-coloured peach. Tree vigorous and spreading. Cannot be too highly recommended. Medium. Price, 2s 6d each

New Peaches

JUBILEE. A very fine, showy Peach, clingstone, coming to us from New Zealand, the raiser speaking in glowing terms of this novelty, both as to productiveness and quality, and stated particularly that it is practically impossible for the fruit to be blown off by heavy winds. Price, 2s each

PULLAR CLING. This very fine canning Peach was raised at Ardmona. It is a very large, highly-coloured clingstone, and preferred by the canning factories above all others. Good grower, heavy and regular bearer. Price, 2s each

PHILLIP CLING. A variety coming to us from America with a great reputation, but, so far, has not fruited. Described as an enormous yellow-fleshed cling, coming in when practically all other clings are over, and consequently in great demand by factories, realising enormous prices. Good grower and regular cropper. Price, 3s 6d each

SELLARS CLING. Very large, rich golden yellow clingstone; ripe with Late Crawford; fine appearance; good flavour; one of the very best. Price, 2s each

New Berry

PHENOMENAL BERRY. A cross between "Improved California Dewberry" and the "Cuthbert" raspberry. Mr. Burbank describes it as larger than the largest berry ever before known; bright crimson raspberry colour; productive as could be desired, and the most delicious of all berries for pies, canning, jelly or jams. Price, 2s each

New Pears

BOUNTIFUL. Fruit of largest size; immense cropper; tree vigorous and thrifty; fine flavour; melting, rich and aromatic. Specially recommended. Autumn. Price, 2s 6d each

VERMONT BEAUTY. A beautiful new Pear of very striking appearance, the fruit being of medium size, roundish; skin yellow, almost covered with carmine; altogether a most handsome and delicious Pear of highest excellence, which we strongly recommend. Tree very healthy, hardy and productive. Price, 2s 6d each

BERGAMOT RENEE. Fruit very good and large, rounded; skin smooth and brown; flesh juicy, sugary, fine, melting; peeling like a peach when ripe. Price, 2s 6d each

New Plums

JUICY (JAP). A hybrid Plum, fruit being of medium size and perfect shape; skin very thin and transparent; colour light yellow, overlaid with scarlet. Tree hardy and luxuriant. Price, 2s each

KING DAMSONS. Fruit of the largest size, exceptional quality, and striking appearance. Tree very productive, medium; specially recommended. Price, 2s each

LATE ORANGE. Skin bright orange, covered with a heavy bloom, very rich flavour; good cropper; tree vigorous; one of the best of recent introductions. Price, 2s each

MIKADO. Fruit exceptionally showy, medium size; skin brilliant carmine; flesh thick, yellow; very juicy and good flavour; an improvement on that well-known and popular variety, Abundance (Botan). Price, 2s each

OGDEN. Fruit large, round; flesh firm, light golden colour; very productive growth; vigorous; one of the best. Price, 2s each

PRINCESS ALEXANDER. Fruit of largest size; splendid flavour, and quality; skin deep glowing red; heavy and constant cropper; specially recommended; medium. Price, 2s each

Pomelows or Grape Fruits

This fruit is becoming very popular, partly on account of its medicinal properties for correcting stomach troubles.

MARSH SEEDLESS. The fruit of this Pomelow is of medium size; thin rind, with about half the usual bitter; practically seedless; pulp juicy; very little rag, and of superior flavour; keeps and packs well; an acquisition in every way. Price, 3s 6d each

TRIUMPH. Medium size; peel smooth, clear, thin, and fine-grained; little rag and few seeds; very heavy, being juicy and well flavoured. There is no bitter in the juice, and but little in the rag. One of the best. Price, 3s 6d each

Passion Fruit

PASSIFLORA, EDULIS "MAGNUM BONUM." This is a very large variety of the well-known Passion Fruit and of exactly similar colour and appearance. It is a free bearer and luxuriant. Price, 1s 6d each

Tomato

6d and 3d
per packet.

See page 19 for
prices per oz.

CULTURE. Sow under glass in July, and outside during September, October, and November, and plant out as soon as ready into good strong, rich soil. Plenty of room and manure is all that is necessary to produce this favourite fruit vegetable in abundance. We consider by far the best way to grow them is to plant in rows 4 feet apart each way, and grow them on poles, or a trellis five feet high, regularly pinching back all the laterals to the second joint, until the plants have reached the top of the stakes; then top the main stem and continue to pinch back the laterals, and so remove all useless growth, until the trellis or stakes are covered with fruit from top to bottom. Mulch the plants well, and use "SURPAZOLL" to keep down the Tomato Caterpillar.

Chalk's Early Jewel. Large, extra early; heavy cropper; very robust and compact grower, uniform size, fruit bright scarlet, fine flavour.

Combination. Strong grower and very productive; fruits scarlet, uniformly large, smooth, solid, and free from cracks; good keeper.

Landreth's Earliest. Extra early variety, producing large red fruit.

Mikado. Fruit purplish red, of large size; produced in clusters.

Spark's Earliana. This exceedingly early Tomato has a large fruit of bright red colour, and very solid.

Ponderosa. A splendid large red variety, of immense size; solid and fine flavoured fruits, smooth; a great bearer.

Optimus. Superior red Tomato, uniform size, large and handsome; fruit in clusters, smooth, solid, and fine grained; splendid.

Burwood Prize. One of the best for market garden purposes; good yielder.

Duke of York. Rich scarlet, smooth, round in shape, flesh very firm, fine flavour; ripens uniformly; fruit in clusters of sometimes 8 or 10.

Matchless. Very large and of the brightest cardinal red colour; flesh nearly solid, entirely without core; not liable to crack.

Trophy. An old favourite; a fine hardy sort; fruit smooth, solid and with few seeds; one of the best.

Early Ruby. Heavy bearer, very early; good form, colour and solidity; the plant grows very openly.

Dwarf Champion. A beautiful red Tomato, medium size, solid, prolific, excellent; self-supporting on strong upright stems.

Dwarf Champion Golden. A counterpart of the well-known dwarf Champion, fruits a beautiful colour, solid, and of a fine flavour.

Crimson Cushion. Large; flesh very solid and of superb flavour.

Peach. A deep orange rose colour, with a bloom like the Peach.

Landreth's Earliest Tomato

Alice Roosevelt. Very early variety; perfect globular form, large, smooth, very fleshy and dark scarlet fruit.

Clusterosa. Yellow, egg-shaped bunch Tomato; very productive, and well flavoured small fruit.

King Humbert. A nice red Tomato, resembling a huge oblong Plum.

Golden Trophy. Golden colour, medium sized; delicate flavour.

Fordhook Fancy or Potato-Leafed. Erect growth, bears large crops of handsome ruby-red fruit of delicious flavour.

Beauty (Livingstone). Medium size; purplish crimson; smooth fruit.

Perfection. Excellent market sort; clear bright scarlet, solid.

We also supply the following well-known sorts:

Yellow Cherry. Yellow Plum. Red Cherry.
Scarlet Pear Shaped.

Matchless Tomato

Chalk's Early Jewel Tomato

---------------	---------	---------------

Lettuce

Can be supplied any time during the year.

Various Sorts		1s 0d per 100
---------------	---------	---------------

Tomato

Can be supplied from July till December.

Strong and well grown from the open ground
6d per dozen; 3s 6d per 100. Additional cost by post
of 2d per doz.; 9d per 100.
In September and October, special quotations per
1,000 lots.

Early Ruby	Crimson Cushion
Duke of York	Dwarf Champion
Fordhook Fancv	Mikado
Trophy	Optimus
Ponderosa	Golden Trophy

And other varieties.

Rhubarb Roots

Can be supplied from May to end of October.

Tops Crimson Winter	.. 9d each	.. 7s 6d doz.
Hogan's Shillelagh, Giant	.. 9d each	.. 7s 6d doz.
Sydney Market Variety	.. 6d each	.. 4s 0d doz.
Sydney Crimson Winter	.. 6d each	.. 4s 0d doz.

Crimson Winter is at its best when all other varieties are dormant; it can be used nearly all the year round where the frosts are not severe.

Chives (for Salads, etc.) .. 6d clump

Eschalots

6d per lb., post free, 1s 3d; special price for large lots.

Used like Spring Onions in salad, and sometimes for flavouring. The cloves must be divided and planted separately. Fresh manure should be avoided.

Clean Bird Seeds

Our stocks of Bird Seeds are carefully selected and machine cleaned. We have quoted the average prices per cwt., etc., but as Bird Seeds fluctuate very much in price, we are not bound by rates named.

Canary, plain	.. 3d lb., 1s 5 lb., 18s per cwt.
Hemp, Rape	.. 3d per lb., 20s ,,
Maw	.. 1s ,,
Millet, White French, Common, and Red	.. 4d ,,
Flax or Linseed	.. 3d ,, 20s per cwt.

Song Bird Mixture .. 6d per 2lb. bag.

For Canaries and other small birds, the seeds are all machine dressed.

Parrot Food .. 3d per lb.

This is a mixture specially proportioned for Parrots and other large birds, and contains a good variety of the best and most nourishing seeds.

Bird's Eye Chillies .. 1s per lb.

Pea Nuts .. 9d per lb.

Potato Onions

4d per lb.; post free, 1s; special price for large lots.

Plant during autumn; they yield good crops when Onions cannot be raised from seed, and come in at a time when Onions are scarce; the bulbs are produced like potatoes.

Tree or Top Onions

9d per lb.; post free, 1s 6d; special price for large lots.

Plant the sets or tops during the autumn and winter months; these will produce large bulbs at the base the first season. The large bulbs when planted produce the tops, which make excellent salad flavouring and pickle well.

Chokos

Can be supplied during August, the best month to plant.

Price 3d each, postage extra

Garlic

6d per lb.; post free, 1s 3d; special price for large parcels. This bulb, which belongs to the Onion family, is used for flavouring soups, stews, etc.

Sweet Potato Cuttings

Yellow Jersey 9d doz.; 4s 100

White Maltose 9d doz.; 4s 100

These are the two best varieties, and are very prolific and good flavour. We can supply strong-rooted cuttings from October to January.

Herbs

Strong plants of the following can be supplied all the year round.

Sage		3d each
Thyme		3d each
Marjoram		3d each
Mini Roots		3d and 6d per bundle

Beans & Peas For Cooking

	QUART.	BUSHEL.
Blue Peas		8d 10s
White Haricot Beans		8d 15s
Egyptian or Red Lentils		6d lb.
Grey, or German Lentils		5d lb.

Anderson & Co.'s Cultural Notes on Home-Grown Vegetables

Suitable Land

In making a new garden, it is all important that the land should be well broken up and deeply worked or trenched, also that the drainage should be perfect; only by thorough preparation of the soil can the best results be expected. Rich, strong, virgin loam, or a rich sandy loam of good depth, is by far the best for vegetable production; but for summer crops rich, peaty, swampy black soil gives wonderful results. If the only land available is naturally poor, it can be gradually brought into condition by trenching or digging it over deeply, and frequently enriching it with plenty of manure and other vegetable matter, and adding to it any of the constituent parts of a productive soil it may lack. Even sand will grow vegetables, but it should have plenty of manure, a good dressing of black soil if available, and rotted vegetable matter if procurable incorporated with it. Stiff soils should have sand and manure added to them, and as much light fibrous decayed vegetable matter as possible. Such land should be roughly broken up during summer, and be allowed to lie without a crop for some months. The action of the atmosphere will greatly improve it.

A Seed Bed SOWING AND TRANSPLANTING

Every garden should have a seed bed in a sheltered corner, where a stock of young plants can be raised for planting out when the weather is favourable and at the proper season. When about to form a seed bed, select good soil, if possible, and see that it is well drained. The soil should then be well and deeply dug over, and have old stable manure thoroughly mixed with it; the rake should then be run over it to level the surface. The seed can then be sown on it, and a light covering of soil only given. Half an inch is quite sufficient for Cabbage, Cauliflower, Tomato, and such sized seeds, and only a slight increase for larger seeds is required. Then mulch the surface lightly with old stable manure, broken up fine; it will keep the roots cool, check evaporation, and promote the young growth. Water every evening during the dry, hot weather, and use a fine-rosed watering can. These

remarks particularly apply to Cauliflower plants, which must be kept growing freely until they are planted out; otherwise good heads cannot be expected.

It is a common mistake to sow seed too thickly, for if the young plants are too numerous they must be thinned out directly they are fit to handle, otherwise they will become drawn and weak.

Cabbage, Cauliflower, Broccoli, Brussels Sprouts, Leek, Parsley, Tomato, Capsicum, should all be raised in a seed bed and, when ready, transplanted into their permanent positions. Select a cool or showery day. Lift the plants carefully with a trowel or spade, being careful to preserve all the young fibrous roots, and put out the plants in the manner directed in cultural directions given under the list of each vegetable in this catalogue. A good watering is necessary to complete the operation, and a mulching is of great service during the summer season.

Sowing and Thinning In Open Ground

If you know your seeds to be good, it is a great mistake to sow thickly, as it necessitates heavy thinning, which might have been avoided. It is a great mistake to allow vegetable plants to crowd one another, and if you want a first-class crop you must thin out the plants in the earlier stages of their growth. You will have larger return from a given extent of land by so doing.

Sow just before or after rain, if possible. Before sowing a crop always dig over the soil, thoroughly manure it, if required, and then reduce it to a fine tilth. Always sow in rows in preference to broadcast, as the former method has many advantages. Avoid deep sowing; a slight covering is enough for small seeds. Half an inch covering for Turnip, Lettuce, Onion, Radish, and such seed is quite enough; for Beet one inch, and for Peas about two inches.

See cultural directions under the heading of each vegetable in our "Select List of Vegetable Seeds."

Manuring

Most vegetables are strong feeders, and the land should be kept up to a high state of fertility by using plenty of manure to replace the chemical elements plants have extracted from the soil. Horse manure is excellent for vegetable crops, provided it is not perished by being exposed to the action of the atmosphere, which speedily extracts all the ammonia and other properties which it may possess. The best horse manure is that which is taken from the stable and placed in a heap or pit daily, and which are the droppings of well-fed, healthy horses.

Artificial manures, such as bonedust, superphosphate, blood manure, potash, lime, salt, are all excellent fertilisers, and if properly applied and selected for the requirements of the soil and the vegetables to be grown, they will always prove a profitable investment. "Special manures" for various crops, and all information regarding their uses can be supplied.

Anderson's KITCHEN GARDEN Calendar

FOR THE COASTAL DISTRICTS OF N.S.W.

This Calendar is equally applicable to the inland and highland districts of the State, by the adoption of the following suggestion. Make an allowance of, say, 10 days, i.e., sow 10 days later than you would do in Sydney (if guided by our Calendar), for every additional thousand feet of altitude above that of the coastal districts; by so doing it will bring the seasons of the coastal districts and those of the more elevated regions into line for seed sowing purposes. What is, however, of greater importance than a strict adherence to date, is the ability of the gardener to take advantage of climatic conditions as they occur, to sow or plant, as the case may be, all seasonable kitchen garden crops, immediately the favourable opportunity arrives. If the land has already been prepared for the reception of the seed and is fairly moist, and the weather is calm yet dull, then the conditions will be most favourable to successful germination of seeds and for transplanting, and the work should be undertaken without a moment's delay, though the date of sowing, etc., differs slightly from that mentioned in our Calendar.

January

This is a trying month for the kitchen garden, but evaporation from the soil may be checked to a great extent by good culture and judicious mulching of growing crops with thoroughly decomposed stable manure. The surface soil should be kept as open as possible, the "Planet Jr." Cultivator being a capital implement for breaking up the surface soil. Watering should be done either early or late in the day—water is best applied through the mulching. All seeds sown in beds must be carefully shaded until germination takes place, and the shading should also be used during the heat of the day, until the plants are sufficiently strong to withstand the conditions which surround them at this season in the open.

Avoid overcrowding in the seed bed by thinning out the plants. Transplant with great care, and whenever weather conditions appear suitable, everything sufficiently advanced should be planted out into permanent quarters. The land must be thoroughly broken up, and very well enriched with farmyard manure for Cabbage, Cauliflower, Brussels Sprouts and plants of that character.

Sow a full crop of French Beans, Butter Beans, Swede Turnip, and Spinach; also Cabbage and Cauliflower in the Seed beds and Celery in boxes.

A small sowing may also be made of Cucumber, Custard Bush Squash, Radish, Cress, Parsley, Onion, Carrot, Leek, Sweet Corn, and Peas—also Lettuce broadcast, in a moist place (to be thinned out, but not transplanted), and Parsley, Broccoli, Brussels Sprouts, Borecole, in seed beds. Plant out from seed bed Cabbage and Cauliflower plants, also Celery in prepared trenches.

March

This is a very busy time in the kitchen garden, for a very large variety of crops must be sown or planted, and all vacant land should be prepared for future crops. As March will probably be the last month for some time when the sun's rays will be sufficiently powerful to kill off surface weeds when cut, an endeavour must be made to rid the land of such unsightly encumbrances; therefore keep the Dutch hoe going, also the "Planet Jr." Cultivator, which is the gardener's friend indeed.

Surplus vegetables of several kinds must be gathered and stored for winter use. Carefully look over the Pumpkin, Vegetable Marrow, and Preserving Melon plots, selecting all fully ripe and matured fruits, and store them in a cool, dry, airy place for future use; these will keep sound for months if harvested towards the end of March. Keep the early Cauliflowers and Cabbages growing freely; if the month be a dry one they will need plenty of water—without it, the former are sure to "button," and many of the latter to "bolt."

Sow a full crop of Cabbage (imported seed), Radish, White Turnip, Spinach, Lettuce, Onion, Peas, Broad Beans, Parsley, and Water Cress.

Also a small sowing of Beet, Carrot, Endive, Parsnip, French Beans (last sowing), and Mustard and Cress.

Plant out from the seed beds of Cauliflower, Cabbage, Leek, Celery and Brussels Sprouts; also plant Eschalots and Tree Onion Bulbs and Early Rose Potatoes.

May

It will be necessary during the early part of this month to clear off what remains of several spent crops, prior to the manuring and digging of the soil in preparation for succeeding ones. It may be taken for granted that, secure in such a harbour of refuge as the old plants provide, will be found many slugs; therefore, immediately the old crop is removed, and ere these pests have time to secrete themselves in the soil, a fairly heavy dressing of salt should be sprinkled over the soil; it will work wonders upon them. A few days afterwards the manure may be dug or trenched in, and the bed made ready for its next crop. The Brassica tribe especially delight in soil treated after this method. At this season avoid planting in trenches, if your land does not part with water very freely or is imperfectly drained, as heavy winter rains may utterly destroy the crop if the practice is followed. New Asparagus beds may now be formed and old ones top-dressed and otherwise attended to.

Sow a full crop of Peas, Broad Beans, Radish, Leek, and Cabbage.

And a smaller sowing of Lettuce, Mustard and Cress, Onion, Turnip and Spinach.

Make a planting of Garlic, Eschalots, Potato Onions and Tree Onion Bulbs, Asparagus Roots, Winter Rhubarb Horse Radish, Herb Roots, and Celery Plants in trenches.

February

Occasionally we find this a more trying month than the preceding one, but a great many plants will have to go into permanent quarters, although the weather conditions be unfavourable, and great care will be needed in order to obtain a successful result. If it be necessary to plant out Cauliflower, Cabbage, etc., during a dry "spell," it can easily be done without the plants receiving any perceptible check, if a shovelful of manure with a handful of grass or loose litter be dropped upon the surface of the soil where you wish to plant, and if a thorough watering of the soil be given through this mulch, the soil will be exactly as it should be for starting operations on the morrow, while an overnight watering of the bed where the required plants are growing will prepare them for removal by charging them with water. Dull weather is, of course, to be preferred for such work. In selecting Potato "sets" for this planting, the best results will accrue from tubers averaging about 2 oz. in weight. What is known as "ripe seed" should in all cases be used. Look well to growing crops of Cucumbers, Marrows, Melons, etc., thinning out the growth, mulching, watering, etc., as may be thought desirable. Transplant from seed bed the strongest Cauliflower, Broccoli and Cabbage plants.

Sow a full Crop of Swede Turnip, Cabbage, White Turnip, Savoy, French and Butter Beans, and make a small sowing of Celery, Leek, Carrot, Onion, Spinach, Broccoli, Brussels Sprouts, Cauliflower, Peas, French Beans, Butter Beans, Parsnips, Beet, Mustard and Cress, Radish, Lettuce, in moist soil, not to be transplanted. Plant out during favourable weather Cabbage and Celery Plants, also Garlic and Eschalot Bulbs, and Early Rose or Kidney Potatoes.

April

Sow at once all that is required to fill up the kitchen garden while the days are fairly long, and before the soil has parted with the greater portion of the warmth, which for some months has been stored therein. Seeds will germinate more freely, and plants establish themselves more quickly now, than during the cold weather soon to be expected.

Work the ground thoroughly between the rows of Peas, draw a little loose soil towards the Plants, and stake tall varieties ere the wind or heavy rains batter down the crop. Slugs will now be getting in a little work during the night, and traps should be set; some fresh bran or a few lettuce leaves are both good baits, or freshly slacked lime or soot scattered over the surface of the soil will kill or keep them in check.

Herbs may be taken up, divided, and replanted, also winter Rhubarb—if young plants are not to be had from the seed bed which are to be preferred.

Sow a full crop of Peas, Broad Beans, White Turnip, Onion, Leek, Lettuce, Radish, Herb Seeds. Also a smaller sowing of Spinach, Broccoli, Carrot, Parsnip, Mustard and Cress, and Watercress.

Plant out from the seed bed Cabbage and Celery Plants, make a planting of Garlic and Eschalots and Tree Onion Bulbs, also a few Early Rose Potatoes, if good sets are obtainable—main planting to be made in June. Crimson Winter Rhubarb Roots can also be planted.

June

Proceed with all digging and trenching operations at once, and be careful in removing the refuse of any previous crop to destroy all insects and other garden pests which may have found a home there. It will save much future trouble to have the digging finished some considerable time in advance of planting, for the soil will be sweetening, mellowing, and crumbling into finer particles than can ever be the case with land which is cultivated to-day and cropped to-morrow.

If it is intended to give to somewhat exhausted land a dressing of bonedust in addition to the more homely farmyard fertiliser, this is the month to apply it, so as to get it well incorporated with the soil. Land so treated—which it is intended to crop in August—will be in capital condition at that time.

Sow a full crop of Peas, Broad Beans, Cabbage, Brussels Sprouts, and Broccoli.

And a smaller sowing of Lettuce, Radish, Carrot, Leek, White Turnip, Spinach, Broccoli, Tomato, Cape Gooseberry, Capsicum.

Plant out Winter Rhubarb, Asparagus, and Horse Radish Roots, Herbs, Eschalots, Garlic, and Potato and Tree Onions, Jerusalem Artichokes, Cabbage and Cauliflower plants.

Anderson's KITCHEN GARDEN Calendar

CONTINUED

July

Before the month is far advanced the gardener will congratulate himself if he has followed our advice relative to digging, etc., given in June Calendar, as July is an exceedingly busy month in the vegetable garden. Preparations may be made to advance by a stage some of the tender vegetables on hotbeds and under frames of glass or canvas. Many of them can be very easily advanced in this way, but success will depend upon the care with which plants are treated afterwards, more especially in gradually inuring them to light and air, and gradually hardening them off before being planted out in the open. Sow thus Tomatoes, Cucumbers, Squash, Marrows and Rock Melon seed. Asparagus beds will need attending to during this month, a heavy dressing of manure and some salt being given to the beds on the surface. Break up the soil accumulated in the alleyways, and make the beds tidy for the season. Keep the soil well and thoroughly worked between the rows of Potatoes, and destroy all weeds. Examine drains and paths, and see that all is as it should be.

Sow a full crop of Peas, Broad Beans (last full sowing near the Coast), Lettuce, Carrot, Beet, Rhubarb, Onion.

A smaller sowing of Cabbage, Parsley, Asparagus, Broccoli, Peas, Radish, Leeks (a full planting in rich soil), and Cucumber and Melons (under glass).

Transplant Onions and plant out Herbs. Make new beds of Asparagus, Horse Radish, and Rhubarb Roots, also Eschalots, Garlic, Tree and Potato Onions, and a make a general planting of Potatoes. (See our special list.)

September

This is another busy month in the Kitchen Garden. With the advent of warmer weather the summer Rhubarb will be starting into growth, and a good heavy surface dressing of decomposed stable manure will assist it much; there should be no stint in applying it, for the plant is a gross feeder, but is an exceedingly valuable one, and pays for doing well. The same remarks apply with equal force to the Asparagus, and if the manure has already been applied to it, a good dressing of agricultural salt may be given during the month.

Keep the hoe and "Planet Jr." Cultivator going, as weeds grow apace; look after Melons and Cucumbers, and pinch the runners when required. All crops are growing freely, and want special care and immediate attention in this way.

Sow a full crop of French Beans (dwarf and tall vars.), Butter Beans, Leek, Spinach, Cucumber, Sweet Corn, Celery, Cape Gooseberry, Capsicum (or Pepper), Rhubarb, Egg Plant, Pumpkin, Vegetable Marrow, Squash, Melons, and Tomato.

Also a smaller sowing of Peas, Turnip, Beet, Lettuce, Radish, Carrot, Parsnip, Onion, Swede Turnip, Parsley, Rock and Preserving Melon.

Plant out Tomatoes into good rich soil, and protect them until established; "Combination" and "Matchless" are fine varieties. Choco tubers may be planted towards the end of this month; if allowed to climb over a rightly-constructed trellis it will crop enormously in autumn.

November

This month is frequently subject to very rapid changes of temperature, and it may also be taken for granted that from now onwards shade and surface mulching—light or heavy, according to the size and description of the seeds sown—must be applied. Do not fail to keep the soil moist after sowing, and remove any shading material which may have been used gradually, as soon as the young crop comes through the ground. Keep the surface between the rows of plants in the open in order to check evaporation as much as possible. Vegetable Marrows, Melons, Pumpkins, etc., will need a lot of attention now in the way of thinning, pinching the points, and regulation of growth, for the plants will all be growing freely, and will soon get beyond us if neglected. French Beans will be one of the most important and useful vegetables for some months, and nothing prolongs the bearing of the crop more than regular picking of the pods as they fill; never allow any pods to ripen, and pull all old ones if not required for use. Remember Tall Growing Beans will need stakes on which to cling, and for a time the growth should be regulated upon them. A wire trellis or leafless boughs can be used for that purpose.

Sow a full crop of French Beans and Butter Beans, Lima Beans (tall and dwarf), most excellent vegetables, and smaller sowings for succession of Squash, Cucumber, Lettuce, Radish, Beet, Celery, Melon and Pumpkin. Plant out Tomatoes, King of the Garden Lima Beans is one of the best; bears in winter.

August

On the proper germination of the seed the welfare of our plants depends. They may outgrow to a great extent any neglect of proper treatment in the earlier stages of their growth, but the ultimate results will will never equal those grown under more consistent and intelligent practice—moisture, heat (varying more or less in degree according to the nature of the plant), and air in combination, bring about the germination of all good seeds. Some seeds are endowed with extraordinary vitality; they will, if kept perfectly dry and fairly cool, retain their vitality for years; others, like the Parsnip, for instance are decidedly bad keepers under any conditions, and can only be depended on for a short time.

Don't neglect the thinning out of all crops as they advance. A heavier and much superior crop of such things as Turnips, Carrots, Parsnips, Beet, etc., will be produced if this is attended to than if double the number of plants were permitted to occupy the same space. Keep the surface of the soil well worked, and slugs and other pests well in check.

Sow a full crop of Onion, Leek, Parsnip, Beet, Carrot, Tomato, Lettuce, Squash, Broad Beans, Cucumber, Melons, Peas, Pumpkin, French Beans, Butter Beans, Swede and White Turnip, Radish, Spinach, Capsicum or Chillies, Parsley, Broccoli, Egg Plant, Rhubarb, Asparagus, Cabbage, Brussels Sprouts, Vegetable Marrow, Cape Gooseberry, and Herbs.

Plant out Jerusalem Artichokes, Rhubarb and Asparagus Roots, Eschalots, Garlic and Tree Onions, Early Rose and other Potatoes. A few Sweet Potatoes may be planted in a light open compost (a mixture of bush scrapings and wood ashes being excellent for the purpose) to produce sets for planting out towards the end of next month.

October

Keep the surface open and free from weeds. It will pay you to use the "Planet Jr." Cultivator between the rows of all growing crops as often as time permits—one can never do too much of this kind of work in the vegetable garden; it is often more beneficial than a heavy watering, and in some cases, perhaps, equal to a dressing of manure. It reduces to a minimum the loss of moisture from the soil by evaporation, promotes growth, and gives a finished appearance to the vegetable plots. Look over all seed beds, and thin out severely, in order to check any tendency towards overcrowding.

Our instructions for the previous month may be looked upon as applicable to this one also. Very many vegetables will need transplanting from the seed bed; the weather will be getting warmer day by day, and much watering will probably be needed, and in some instances, perhaps a little shading also until the plants are established. All tender vine seeds may be sown this month.

Sow a full crop of French Beans (dwarf and tall), and Butter Beans, Sweet Corn, Pumpkin, Melon (Water and Rock), Cucumber, Vegetable Marrow, Squash and Celery.

Also a small sowing of Peas, Cabbage, Leek, Radish, Lettuce, Carrot, Parsnip, Onion, Turnip, Tomato, Spinach, Beet, Parsley, Capsicum, and Lima Beans (tall and dwarf varieties), a small early sowing towards end of the month.

Continue to plant out Tomato for succession.

Butter Beans will do well if sown this month; Anderson's "Startler" (Yellow Pods) is one of the best.

December

The Calendar for this month is not a heavy one, so far as it relates to seed sowing. A second sowing should be made ere it be too late of any crops which, owing to unfavourable weather conditions prevailing during the previous month, are not in good condition.

We would again emphasise the necessity for thorough cultivation of the surface soil by the free use of the hoe or "Planet Jr." Cultivator amongst all growing crops. If any persons who do not follow this practice would but give it a trial, we feel sure they would, after carefully observing the results, admit that no matter what labour it entails, it is time well spent, and pays. Much of the success attending kitchen garden work depends upon this. Tomatoes grown on stakes will require to be carefully tied up, all surplus growth removed, the points of shoots pinched if necessary, and the plants shaped as may be desired. Also look out for Tomato grubs; virgin soil suits Tomatoes admirably.

Sow a full crop of Cauliflower in a seed bed, Cabbage, French Beans, Butter Beans, and Tall Lima Beans.

Also smaller sowings of Beet, Brussels Sprouts, Carrot, Cucumber (for succession), Squash and Vegetable Marrow, Radish, Turnip (White and Swede), Lettuce, and Mustard and Cress.

Plant Eschalots and Tree Onions.

Mulch your Cucumber, Tomato and Melon Plants this month.

SYDNEY

PLANTS

JANUARY (Summer)

This is generally a very hot and dry month, and unless rain falls little can be done in the way of sowing flower seeds out of doors, unless shading and a copious and regular supply of water are supplied, and a mulching of manure is placed over the surface after sowing. Under these conditions all the seeds mentioned in List for Summer sowing should produce a late autumn display. The beautiful *Amaranthus Salicifolius* (or fountain plant) with fine coloured leaves, the charming small single-flowered Sunflowers, the *Phlox Drummondii* of gorgeous colours, and the *Portulacca* and *Balsams* are some of the best and most effective, and will do well if sown now under the shade of the shelter-frame to be transplanted later.

Make the first sowing of Pansies in rich soil, and as soon as the plants are fit to handle transplant them into another position in the shelter-frame, in rows two inches apart, so that they may make strong, well-rooted plants, to be planted out into the bed or border when ready.

FEBRUARY (Autumn)

This is the first month of autumn, and rains often fall at this season, and although the weather during the day is usually hot, the nights are cooler, and any favourable conditions of temperature should be taken advantage of for making a full sowing of seeds of plants marked as seasonable.

The canvas shade frame should be taken advantage of if dry weather prevents sowing out of doors. Plants raised from seed now will make much more rapid progress than they will do a few weeks later, when the nights are cold. Another good sowing of Pansy should be made under canvas frame in case of accident to previous sowing. Any strong seedlings in stock should be planted out to fill up vacant places in the garden, and if the sun's heat is strong, shade the young plants with light boughs until they are established. Such plants will provide flowers for the winter months, when they will be so much appreciated.

MARCH (Autumn)

The nights are now becoming colder, although the days may be warm, and a full sowing of all annuals and biennials named in the List for Autumn sowing should be made at once, as seeds germinate much more quickly when the soil is warm from sun's heat.

Many of the seeds named can be sown out of doors, but any tender annuals and biennials which do not object to transplanting are better sown under the canvas shade frame even now, as they are so much better under control. Stocks are most beautiful plants, which should not be neglected. The Intermediate and Ever-blooming sections should be sown under cover now; they like rich soil. Sow *Godetia*, a fine showy annual. Pansies can still be sown to advantage. If early sown Pansy plants are ready, plant them out into the border at once, so as to secure early bloom, and continue to fill up blanks from reserve plants.

APRIL (Autumn)

This is the last month of autumn, and sowing of suitable annuals and biennials should not be delayed; old English favourites should not be neglected: Primrose, Forget-me-not, Foxglove, Stocks, Wallflower, Poppies, Sweet Peas, and Pansy will all do well if sown this month. All the annuals mentioned in list can be sown out of doors, but many of the perennials and biennials marked P. and B. will do better in the shade frame, to be transplanted into the border when ready.

The canvas shelter frame is not only useful for shading purposes, but is a protection against frosts; remove the cover entirely during the day when the weather is fine, replacing it at night. Continue to plant out seedlings and keep the soil well open with the hoe.

MAY (Winter)

Cold nights are to be expected this month, which will check the growth of plants, but many flower seeds may still be sown to keep up a succession of bloom. (See those recommended for winter sowing.) Early frosts would injure more tender varieties of biennials and perennials, but if these are sown under the protection of the canvas frame no danger may be feared. The hardier plants named for winter planting can, however, be sown out of doors; Mignonette and Sweet Peas will do well. These charming English flowers are appreciated by everyone, and should always have a place in the garden. Stock, Daisy, Violet, Primrose, Pansy (raised in a frame) should be planted out also all other perennials from reserve stock.

JUNE (Winter)

This being mid-winter, there is little warmth in the soil, and only the hardiest varieties of flower seeds can be sown, such as mentioned in our Lists for Winter. The garden should be done up during the present month, all vacant land should be dug thoroughly over, manured and made ready for the coming season, as the busy months of July and August, when so much has to be done in sowing and planting, will keep the gardener fully occupied. All seedlings of hardy spring flowering plants remaining in reserve, such as Daisies, Violets, Primroses, Polyanthus, Wallflower, Forget-me-not, etc., should now be planted out.

Our Flower Garden Calendar

This CALENDAR must be accepted only as a basis to work from, as favourable or unfavourable seasons will prolong or curtail the periods for sowing Flower Seeds, but when allowance has been made for these contingencies our Calendar may be accepted as a guide. It has been compiled for the coastal districts of New South Wales having a climate similar to that of Sydney, and due allowance will have to be made for the variations of temperature of colder districts.

Our Packet Seeds are Post Free

JULY (Winter)

The weather during this month is usually warm in the daytime, with cool nights, and there is little growth, but preparatory work should be pushed forward, and if the season is a mild one, continue to plant out from the reserve bed, and sow all annuals mentioned in List.

One of the most charming annuals, and now a general favourite, is *Salpiglossis*; its flowers are superb and of every shade of colour, and it cannot be surpassed for table decoration. The *Superbissima* varieties are wonderful in size, shape and colour. To have these charming plants in bloom early, sow now under canvas, but next month is perhaps better.

AUGUST (Spring)

Now Spring has arrived, all plant life will have become active, and growth will be much more rapid than it has been during the previous months. No time should now be lost in making a full sowing of all the hardy annuals mentioned in List, in the open border, and the more tender varieties in the shelter frame; transplant from reserve all seedlings required to fill up beds; the gardener should always take into account the size of the plants when full grown, and the colour of the flowers, so as to produce a proper arrangement and a pleasing contrast of colours.

Sow a full supply of Poppy, *Salpiglossis*, *Phlox Drummondii*; two of the most charming varieties of the Poppy are the "Tulip" and "Shirley."

SEPTEMBER (Spring)

Like all other plants, weeds will be growing very rapidly during this month, and they should be removed while they are small and easily got rid of; the surface of the soil should be frequently gone over, so as to conserve the moisture which may be in it, and obtain the full benefit of any rains which may fall. Continue to sow all seeds named in Spring List, and thin out any seedlings which may have been sown too thickly in the border.

Remove any plants now past their best, and replace them with seedlings from reserves, as the garden must now be filled up, as summer is near at hand, and to provide a brilliant display during the coming months.

Now is the time to mulch the surface of the soil with manure, which will greatly prolong the blooming season of annuals. It will keep the soil cool and retain the moisture.

OCTOBER (Spring)

The summer heat will soon be upon us, but if favoured with thunderstorms we can still sow a great many hardy annuals with good prospects of success. The following are a few of the most valuable, as they are gay throughout the summer, and should not be neglected:—*Portulacca*, *Zinnia*, Sunflower, *Clianthus Dampieri*, Coloured-leaved *Amaranthus* (*Salicifolius* is a gorgeous species, 4 to 5 feet high); all these charming plants are admirably suited to our climate, and are very easily grown. For the several varieties to select from the Catalogue must be consulted. A garden can be kept gay during the hottest months if plenty of water and a little care is given to these beautiful plants. Water must be sparingly applied, however, to the *Clianthus*.

NOVEMBER (Summer)

We have now reached a season of the year when little can be done in the garden in the way of sowing, although the annuals mentioned in List are in excellent time and must not be neglected. Most of these plants can be transplanted, and from the reserve bed a full supply of them can be put out if available. They will be the feature of the garden during the dry summer months.

Salpiglossis will now be in full bloom, and will continue to flower for months, and we are sure they will bear out all that we have said about them; they should be in every garden.

DECEMBER (Summer)

Generally a very hot and dry month, during which little can be done in the way of sowing except under careful treatment, when all plants named in List can be sown for autumn display.

Water freely and well, if necessary, so as to keep the plants growing, but be careful not to allow the soil to cake; keep it loose with the hoe, but better still, have it mulched; this will save labour and water.

"I might mention that I have a lovely garden, and that I get all my seeds and plants from Mr. Hawkins, your Agent here. The last lot of Roses and Carnations I got are coming into bloom beautifully. I know you like to hear of the success of your customers."

Miss E. VILES, Moss Vale.

Classification of Flower Seeds

A after the name indicates Annual Plants, which flower, seed, and die within one year.

B indicates Biennial Plants, which flower during the season after sowing, then seed and die.

P after the name indicates Perennial Plants which can be raised from seed, and generally flower the same season they are sown, and continue to flower from year to year.

A selection has been made from our Catalogue of the best and most popular flowering Plants which can be grown from Seed, but there are many others to be found in our General List.

The Flower Garden

THE SOIL AND ITS PREPARATION.—

It is absolutely necessary that the soil in which flower seeds are to be sown should be thoroughly well dug over to a depth of 12 to 18 inches, and that the top soil should be worked into a fine tilth if the best results are aimed at, and before sowing, a good dressing of old stable manure or other suitable fertiliser should be dug in, and if the land is of a clayey nature, the addition of sand, loam, charcoal or wood ashes or decayed vegetable matter, worked into the top soil, will very much improve it; and again, if it is poor, white sand, a dressing of peat, loam, or even clayey soil broken up very fine will help to give it body, and greatly increase the vigorous growth of the plants. Keep the soil well stirred, so as to allow the air to penetrate freely and sweeten it; and, during the summer months especially, the surface should never be allowed to become hard.

SOWING FLOWER SEEDS.—Nearly all flower seeds are very small, some of them being like fine sand, and they must therefore be sown very near the surface, with only a slight sprinkling of soil over them, and no seeds should be covered to a depth of more than two or three times their diameter. Do not sow thick, otherwise you will have to thin out the seedlings or have them drawn. When the soil has been prepared as advised, level it with the rake, and pat it down with the spade to make it firm, and sow the seed over the surface in rows or patches as desired, but not too thick. Cover very lightly, and sprinkle a little fine, well-rotted manure over the soil, water carefully, and the operation is completed.

TRANSPLANTING.—Do not plant too close; take into consideration the size of the full-grown plants when you are planting out. Seedlings should be lifted from the seed-bed with a trowel, so as to secure a ball of earth round the roots, but when they are growing thick in clumps they must be separated, and the best-rooted seedlings, with plenty of small fibrous roots, should be selected. The ground having been dug over and manured, mark off the positions which the plants are to

Anderson's Practical Hints to the Amateur

occupy by the aid of a garden line; open a space with a trowel sufficiently large to accommodate the plants which have been lifted with a ball, and carefully place them into it, filling in the soil around them and making firm. The seedlings with bare roots can be planted by making a hole with a pointed stick large enough to allow the roots to drop down and hang perpendicularly; the soil should then be filled in and made firm. Zinnias and Stocks can be planted in such a way as to allow for thinning, as they always produce a percentage of single flowers which are useless, and as they flower when the plants are small, the single ones can be detected and pulled up, leaving the double flowered plants plenty of room.

THINNING OUT.—As flower seeds are generally sown far too thickly, it is often necessary to thin out the plants; this should be done as soon as they are fit to handle—when in the second or third leaf; transplant surplus if necessary, but do not allow the plants which remain to stand too close.

ARRANGEMENT OF COLOURS.—Beautiful effects can be produced in the flower garden by the blending or contrasting of the various colours, and we offer special facilities for so doing, as we supply the leading annuals in separate colours in collections. Of Phlox Drummondii, for instance, we offer 12 distinct colours; these can be sown separately and planted out in a bed according to the taste of the gardener. He will choose his favourite colours for a first place, and the less important ones will be planted sparingly to give variety, and perhaps the whole bed will be margined with pure white; in this way one can carry out any favourite arrangement or design of colours.

SOW OFTEN FOR CONTINUOUS

BLOOM.—By making frequent successive sowings at intervals, you can have in perfection the bloom of any annual during the entire length of its flowering season, and it can be arranged that the early sowing will have flowered and died off just as the second sowing is coming into bloom; in that way we secure a succession of flowers throughout the season.

THE SEASONS.—Favourable or unfavourable seasons will greatly prolong or curtail the usual sowing period; thus a good fall of rain in September would allow the gardener to make a late sowing of many annual plants, with every prospect of success, which he would not attempt under less favourable circumstances. Again, early frosts would check autumn sowings considerably.

KEEP THE GARDEN BRIGHT WITH FLOWERS.—As soon as annual plants are past their best pull them up; they never recover after they have bloomed freely and gone off; remove all dead flowers, leaves and seed pods, and you will prolong the blooming season of the plants and give a freshness to their appearance.

FEED YOUR PLANTS WELL.—Do not forget that all plants grown from seed can be greatly improved by liberal treatment. Old stable or cow manure can be used to advantage, but artificial fertilisers, such as blood or bone manure, superphosphates and the many "special" garden manures we offer, if used in smaller quantities, will give wonderful results; not only will they increase the vigour of the plants to which they are applied, but they will improve the size and brilliancy of the flowers. Charcoal or wood ashes, decayed vegetable matter to be found under old trees, are both invaluable as fertilisers in the flower garden.

MULCHING AND WATERING.—A top-dressing of old stable manure placed around the plants will prolong their blooming season, and render watering more effective. During the heat of summer water freely and thoroughly. One good soaking weekly is worth a dozen sprinklings, which often do more harm than good.

A few boards or battens to form the sides and ends, and some canvas or calico to make the covering, are all that is required to provide a frame such as we have referred to so frequently in our calendar.

It can be made of any required size, and should occupy a sheltered position, but where the plants will get the benefit of the morning sun. The timber forming it need not be more than six inches above the surface, but the top of the battens should be perfectly level. The canvas or calico forming the covering should be tacked on to a frame of hardwood, which will fit over the bed enclosed, and should be so fixed that it will not be liable to be blown off in windy weather.

The soil in the frame should be rich, well worked, and have plenty of old stable manure incorporated with it. The seeds should be sown on the surface in rows 3 to 4 inches apart, and divided by battens so as to avoid mixing; a light mulching of manure, rubbed fine, will complete the operation of sowing and help germination.

The Useful Shade and Shelter Frame And how to Make it!

The cover to the shade frame may be fixed close to the surface of the soil until the seeds germinate, but as soon as the seedlings are above ground it should be fixed so as to be at least 12 inches above the level of the soil, but it should always be removed in the evening and during dull, cool weather, to prevent the plants becoming drawn; it can be so arranged that the sides are always open. Seed sown in such a frame will make rapid progress even in the hottest weather, as the moisture which can be given to them at any time, and the sun's heat will make fine strong plants, to be lifted and put out where they are to bloom. The plants should be taken up with a trowel with a ball of

earth so as not to check their growth when transplanted. If they are becoming large, and the weather is unfavourable for transplanting into the open ground, they will be improved if they are transplanted singly into some other portion of the bed, there to remain until a favourable opportunity occurs to put them out. Such plants as Asters, Pansies, Salpiglossis, Antirrhinums, Phlox Drummondii, or in fact, any annuals or biennials which can be transplanted, treated in this way will give splendid results. Such a frame as we have described will always be useful in a garden, and it can be made any size.

The special advantage of a canvas frame is that seeds can be sown in it during the hottest and driest weather, and a fine stock of young plants can be secured which can be transplanted into the garden as soon as a favourable opportunity occurs. The seed can always be sown at the proper season, no matter what the weather may be, and it is particularly advantageous during dry seasons to have young plants to put out as soon as rain comes, instead of having to sow the seed; this would save several weeks, and prolong the blooming season.

Flower Seeds.

WITH HINTS ON CULTIVATION.

General List.

FOR FLOWER SEEDS IN COLLECTIONS SEE END OF GENERAL LIST

ABRONIA

3d per pkt.

- 1 Umbellata. Rosy, lilac, fragrant.
2 Villosa. Dark red.

Trailing plants, suitable for rockery; waxy, Verbena-like flowers, scented; hardy annual. Sow in spring and autumn. 6 inches.

ACROCLINIUM

3d per pkt.

- 5 Album, Single. Graceful white, with yellow centre.
6 Roseum, Single. Rose, dark eye.
7 Roseum, Double. Pretty bright rose, with yellow centre.

Beautiful everlasting; can be dried for winter bouquets; hardy annual. Sow in autumn or spring. 12 inches.

ADONIS

3d per pkt.

- 10 Vernalis. Perennial. Star-shaped yellow flowers.
11 Æstivalls (FLOS ADONIS). Annual. Crimson scarlet.

Free flowering; feathery foliage. Very showy. Sow in spring. 12 inches.

ALONSOA (Mask Flower)

3d pkt.

- 14 Warszewiczii. Brilliant scarlet.
15 Albiflora. White; very constant.

Very showy, half-hardy annual, with bright scarlet and white flowers. Sow autumn or spring. 12 inches.

ALYSSUM

3d per pkt.

- 17 Maritimum (SWEET ALYSSUM). Hardy annual; small trusses of white flowers in great profusion; cut down after flowering to promote new growth.
18 Maritimum Compactum (LITTLE GEM). Very dwarf, erect variety.
19 Saxatile. Dwarf, showy, hardy perennial; yellow flowers. Leaves hoary margined.
20 Saxatile Luteum. A new and improved variety with yellow flowers. Compact, suitable for rockeries.

Sow autumn or spring.

AMARANTHUS

3d per pkt.

- 22 Salicifolius (Fountain Plant). Crimson and yellow plume. 4 to 5 feet.
23 Tricolour (JOSEPH'S COAT). Leaves red, yellow and green. 3 feet.
24 Henderli. Leaves carmine, orange yellow and green. 4 feet.
25 Firebrand. Large leaves, deep blood-red, with bright yellow edges. 6 feet.
26 Queen Victoria. Purple-brown foliage.
27 Caudatus (LOVE-LIES-BLEEDING) Racemes of drooping purplish-crimson flowers. 3 feet. This variety is quite distinct from the other "Amaranthus," and is not a foliage plant.

AMARANTHUS—Continued.

- 28 Tricolour "Aurora." Pyramidal shaped bushes, with vari-coloured leaves, very ornamental.

Magnificent foliage plants, with gorgeous leaves of crimson and gold, and green and yellow; colours deeper in the autumn. They are beautiful border plants, requiring plenty of room, good soil, and a warm position. Salicifolius is, perhaps, the best—a most lovely variety—but Tricolour is also a gem; both are grown for their beautiful coloured leaves; they are hardy annuals. Sow during September, October, November, and December.

Antirrhinum, Extra Choice

AMMOBIUM

3d per pkt.

- 32 Alatum. White, with golden centre. 18 inches. Pretty hardy everlasting, small flowers, very easily grown; annual. Sow in spring.

ANAGALLIS (Pimpernel)

3d pkt.

- 35 Grandiflora. Choice mixed.
36 Grandiflora Cœrulea. Blue, very fine.

A pretty family of dwarf-growing annuals; constant bloomers, and very compact habit. Prefer rich soil. Sow autumn or spring.

ANCHUSA

3d per pkt.

- 40 Angustifolia. True deep blue.
41 Capensis. Bright azure blue.

A free flowering hardy perennial; excellent for bouquets; like a strong growing Forget-me-not. Sow in autumn and spring.

ANEMONE

6d per pkt.

- 45 Japonica. Very pretty; flowers all summer; purplish red. 24 inches.
46 Coronaria. Mixed; various colours. 12 inches.
47 St. Brigid. The Irish poppy-flowered Anemone. Large single and semi-double flowers of an endless variety of colour.

Tuberous rooted plant, easily produced from seed; magnificent colours; blooms early in spring, when flowers are scarce. Requires good, rich, well drained, light soil; Japonica is a hardy perennial. Sow early in autumn.

See Bulb List for Tubers of Anemones.

ANGELONIA

6d per pkt.

- 50 Grandiflora Alba.

A handsome upright growing plant, producing numerous spikes covered with pure white flowers; blooms freely during the autumn; can also be grown as a pot plant. Sow in spring.

ANTIRRHINUM

3d per pkt.

(Snapdragon)

- 52 Anderson & Co.'s Extra Choice. Unsurpassed for beauty of spikes; many of the flowers are distinctly and beautifully striped.
53 Brilliant. Scarlet, golden and white.
54 Delila. Carmine, white throat.
55 Galathea. Very fine crimson.
56 Picturatum. Showy, striped, spotted.
58 Grandiflorum "Queen Victoria." Pure white spike; very large.
59 Grandiflorum "Romeo." Deep rose, dark flesh and foliage.
60 Grandiflorum "Striatum." Magnificent striped var.
61 Tom Thumb. 9 inches high; various colours and very attractive.

A beautiful tribe of showy biennials, producing long spikes of flowers in endless variety of colour; self colours striped and spotted flowers; easily raised from seed. Sow during autumn and spring. Tall varieties, 36 inches.

PLANTS

SYDNEY

AQUILEGIA (Columbine) 6d per pkt.

Aquilegia

- 65 *Calliorea Hybrida*. Large yellow flowers, dark orange spurs; splendid
 66 *Cœrulea*. Beautiful species
 67 *Cœrulea Hybrida*. Single long-spurred varieties.
 68 *Chrysanthra Grandiflora Alba* (WHITE SPURRED) Snow-white flowers of elegant shape.
 69 *Skinneri*. Scarlet, tip yel.
 70 *Nivea*. Creamy white; semi-double.
 71 *Mixed*. Finest sorts; various colours. 8d pkt
 72 *Double*. Long-spurred; various shades.
 73 *Rose Queen*. Long-spurred single, rose coloured, white centre, yellow anthers.
 Very showy, hardy, herbaceous perennials; make handsome border plants; easily grown, requiring a light soil. Sow in autumn and spring. 18 to 24 inches.

ARABIS (Rock Cress) 3d pkt.

- 76 *Alpina*. White, very dwarf.
 For borders or rock work, blooming freely; hardy perennial. Sow in spring. 6 inches.

ARCTOTIS GRANDIS 3d pkt.

- 78 Flowers single, white, with a large, delicate pale violet centre.

ARMERIA (Thrift) 6d pkt.

- 80 *Cephalotes Alba*. Fine variety of this old English flower; hardy perennial; flowers are pure white. Sow during autumn and spring. 12 inches.

ASTERS 6d per pkt.

- 82 *Crown*. Various colours; white centre.
 83 *Christmas Tree*. Free flowering, rich colors 20 inches.
 84 *Dwarf Bouquet*. Various colours; effective
 85 *Dwarf Chrysanthemum Flowered*. Var. cols.
 86 *Dwarf Victoria*. One of the best classes; various colours.
 87 *Giant Comet*. Superb large flowers, long petals; various colours.
 88 *Giant Comet White*. Extra fine.
 89 *Globe Flowered*. Various colours; showy.
 90 *King Humbert*. Flowers white; 12 inches.
 91 *Late Blooming*. Branching; large white flowers.
 92 *Mignon*. Mixed cols: light blue, lilac, rose.
 93 *Ostrich Feathered*. Flowers white, long wavy petals. 18 inches.
 94 *Perfection*. Large, double incurved.
 95 *Pyramidal Flowering*. Dwarf; various cols.
 96 *Queen of the Market*. Branching; loose habit
 97 *Quilled German*. Striking colours.
 98 *Single Marguerite*. Valuable for cutting.
 99 *Snowball*. Imbricated petals, pure white.
 100 *Triumph Tom Thumb*. Large flowers, scarlet. 6 inches.
 101 *Triumph Tom Thumb*. Scarlet and white. 6 inches.
 102 *Hohenzollern*. Superb class, large flowers, excellent for cutting. Mixed colours.
 103 *Simples' Branching*. Late flowering; tall growing; double; mixed colours.
 104 *Pearl*. A graceful class, mixed.
 105 *Hercules*. Very strong, white flowers.
 106 *Elegance*. First-class single, vig. grower.
 107 *Invincible*. Branching white, large flowers.
 108 *Invincible*. Branching, mixed. Large flrs.
 A particularly fine strain, free flowering.
 108a *Triumph of Paris (COMET)*. Large wht. flrs.
 108b *Mauve Queen*. Very large flowers.

For Tasmanian Saved Aster Seed, see coloured pages.

A charming family of half-hardy annuals, producing a profusion of bloom in trusses of six to eight fine heads of beautiful colours, three or four inches across. Light rich soil with a mulching of manure suits them best. Can be sown during spring; should be transplanted. Must have plenty of water.

AUBRETIA 6d per pkt.

- 109 *Lelethilnl*. Luminous carmine rose.
 Hardy perennial, suitable for edgings and borders.

AURICULA 6d per pkt.

- 112 *Chloe Mixed*. Various colours, best sorts, 6 inches. Requiring special culture, and only suitable for the cooler districts. The entire flower appears as if dusted with powder; hardy perennials; to be sown in fine soil in boxes during the autumn and spring, and transplanted when fit to handle.

BALSAM 3d per pkt.

- 114 *Carnation*. Striped and flaked; attractive.
 115 *Solferino*. Streaked and spotted; distinct.
 116 *Camellia Flowered*. Self colours.
 117 *Camellia Flowered, Alba Perfecta*. Flowers white, double.
 118 *Camellia Flowered, Prince Bismarek*. Flower dble., brilliant salmon rose, very fine.
 119 *Chloe Mixed*. All the best varieties.
 A favourite annual, producing rose-like blooms of varied colours in great abundance. Suitable for outside cultivation and for pots. Balsams require rich soil and plenty of moisture. Sow in spring and summer. 18 inches.

BEGONIA 1s per pkt.

- 124 *Tuberous Rooted Single*. Charming colours.
 125 *Tuberous Rooted Double*. Beautiful shades.
 126 *Tuberous Rooted Double*. Beautiful shades.
 127 *Semperflorens*. A strain of bedding Begonias, with deep green shining foliage and profusion of flowers. 6d pkt.

Asters of Sorts

BRACHYCOME (Swan River Daisy) 3d per packet.

- 130 *Iberidifolia*. Bright blue flowers.
 131 *Iberidifolia Alba*. Pure white flowers. Hardy annual compact; stands dry weather; flowers daisy-like, produced in great profusion; prefers rich, light loam. Sow autumn and spring. 9 inches.

BROWALLIA 3d per pkt.

- 133 *Alata Coerulea*. Large; bright blue.
 134 *Alba*. White; very pretty variety.
 135 *Roezlii*. Blue or white; yellow tubes, large flowers.
 136 *Speciosa Major*. Large blue flowers.

Pretty hardy annuals; covering themselves with bloom; nice border plants; do best in rich light loam. Sow early in spring. 15 inches.

CALANDRINIA 3d per pkt.

- 138 *Discolour*. Pretty rose lilac.
 139 *Umbellata*. Beautiful magenta crimson.

Dwarf, free-flowering showy annual; adapts itself to almost any soil; an abundant bloomer. Sow in autumn or spring. 12 inches.

CALCEOLARIA 1s per pkt.

- 141 *Dalkeith Park Strain*. Spotted and blotched.
 142 *Hybrida Striata*. Beautifully striped.
 143 *Shrubby*. Self colours, yellow, brown.
 144 *Finest Mixed*. Selected strain; robust and floriferous.

A charming perennial plant for frame, conservatory, or bush-house culture only. Requires rich, light, fibrous soil, and plenty of pot room. To raise the seed successfully, sow on the surface in the lightest soil and cover with a sheet of glass; and as soon as the very small plants are in second leaf they must at once be transplanted into small pots, and in a few weeks transferred to blooming pots; give plenty of light and air, but shade from the bright rays of the sun, and be careful to destroy green fly, should it appear. Calceolarias cannot be grown as border plants. Sow in autumn. 12 to 18 inches.

CALENDULA (English Marigold) 3d per packet.

- 150 *Meteor*. Double; golden colour, striped.
 151 *Prince of Orange*. Double; rich orange, striped.
 152 *Pluvialis (CAPE MARIGOLD)*. White, petals shaded maroon.
 Favourite annual, capital for bedding or border, hardy. Sow in spring or autumn.

CALLIOPSIS or COREOPSIS 3d per packet

- 155 *Drummondii*. Yellow, crimson centre.
 156 *Grandiflora*. Perennial; golden yellow.
 157 *Lanceolata*. Perennial; fine yellow.
 158 *Atropurpurea*. Rich brownish crimson.
 159 *Blecolour Hybrida*. Double flowers.
 160 *Coronata Maxima*. Golden yellow.
 161 *Marmorata*. Yellow splashed crimson.
 162 *Golden Ray*. Elegant and graceful.
 This is one of the best of our hardy annuals; a most beautiful plant in the garden, not particular as to soil, a long time in bloom. Plants should be two feet apart. Sow autumn and spring. 2 feet.

CANARY CREEPER

(See Tropæolum)

CAMPANULA 3d per pkt.

- 165 *Pyramidalis Alba*. A magnificent white flowering variety, with long spikes.
 166 *Pyramidalis*. Blue, magnificent spikes.
 167 *Persicifolia Grandiflora*. An exceedingly fine strain; large flowers; mixed.
 168 *Carpatia*. Bright blue, small flowers.
 169 *Carpatia Alba*. Pure white and dwarf.

SYDNEY

Carnation,
Perpetual
or Tree

CANTERBURY BELLS 3d pkt.

- 175 Double Blue. 178 Single White.
176 Double Rose. 179 Single Blue.
177 Double White. 180 Single Rose.
(All of the Finest Strain.)
181 Calycanthema. Charming saucer-like outer
petal.
182 Striata. White, streaked violet.

A family of very showy border plants, the colours being very distinct and rich; the single varieties are exceedingly pretty, and the Calycanthema, double and pyramidalis varieties, are magnificent. Easily raised from seed; sow in frame or box, and plant out in the border later. Free bloomers; hardy perennials. Sow in autumn or spring.

CANDYTUFT (Iberis) 3d pkt.

- 185 Dobble's White Spiral. Pure white spikes,
4 in. long.
186 Giant Hyacinth Flowered. Immense spikes
of pure white flowers; an improved
strain. 15 in.
187 White Rocket. Magnificent spikes.
188 White. Large, effective and handsome.
189 Purple. Large, fine trusses.
190 Carmine. Flowers rich carmine.
191 Creamy White. Delicate colour.
192 Empress. Trusses of pure white.
193 White Perennial (IBERIS SEMPERVIRENS).
Snowy.
194 Tom Thumb. Pure white; dwarf.
195 Dwarf Crimson. Rich glowing colour.
196 Little Prince. Charming dwarf variety;
pure white.

The whole of this pretty family are well worth a place in the garden, the crimson and white varieties being exceedingly showy; they bloom in great profusion, and are very useful for cut flowers. Sow in autumn and spring, and thin to 6 inches.

CANNA 6d per pkt.

- 205 Madam Crozy. Crimson with gold margin.
206 Crozy's New Hybrids. Mixed; very effective.
207 Queen Charlotte. Bright crimson, broad band of
gold; beautiful.
See also "Plant Section."

Ornamental plants with handsome foliage; brilliant flowers; easily raised from seed in a frame. Magnificent decorative plants; grown in garden in sheltered situations, or in pots in a bush-house; half-hardy perennials. 3 to 4 feet. Sow autumn and spring.

CARNATIONS 1s per pkt.

PERENNIAL SECTION.

- 213 Bizarre. Flaked and striped; excellent.
214 Grenadin. Brilliant, double scarlet.
215 Double Mixed. Superb stock, best sorts.
216 Perpetual Flowering. Superb free bloomers, mixed.
217 Yellow Ground Perpetual. Race of perpetuals,
producing the much-required shades of yellow.
218 Riviera Market. Improved variety, very rapid
growth.
218a Riviera Market ("NICE GIANT"). Superb Mixture
saved from the largest blooms.

"The Carnation Plants reached me in perfect order, thanks to your careful system of packing. I also thank you for your prompt attention to my small orders."

H. L. JAMES, Bellingden.—24-4-09.

Campanula Calycanthema

CARNATION—MARGUERITE SECTION.

- 219 Mixed. Flowers the first season from seed. Large
proportion of fine double flowers of varied and
beautiful colours. Habit robust; very useful for
bedding 6d per pkt.
220 White. A beautiful pure white . . . 6d per pkt.
221 Malmaison. Enormous double flowers; but is rather
difficult to grow, and only a small percentage of
double flowers can be expected. 1s pkt.

The perennial varieties should produce a large percentage of first-class flowers, being saved from a magnificent collection of named sorts. Sow in pots or boxes in light soil, and placed in a frame or conservatory, and kept carefully watered until the plants are large enough to prick out; can also be successfully raised in a canvas frame. The Marguerite varieties are very hardy, and are easily raised from seed, and flower the first season. Sow autumn and spring.

CASTILLEJA 1s per pkt.

- 230 Indivisa. A lovely annual, producing superb flowers
of intensely brilliant crimson scarlet. Sow in spring.
18 inches.

For NOVELTIES SEE COLOURED PAGES

CELOSIA (Cockscomb) 6d per pkt.

- 233 Dwarf Varieties, Mixed. Choice selection of coloured
heads.
234 Dwarf Crimson. Standard variety.
235 Carter's Empress. Crested, bright scarlet.
236 Thompsoni Magnifica. A feathered Cockscomb of
great beauty; crests of various colours, from golden
to dark crimson.
237 Pyramidalis. Splendid feathery spikes of
various colours.
238 Spicata. Flowers of a bright rose tint on
the points of the side shoots.
The three first named produce large cockscomb
like heads. Pyramidalis bears its flowers in
feathery spikes, and should have the leader
pinched out, which will improve its habit; 2 ft.
Half-hardy annuals. Sow in spring.

CENTAUREA (Cornflower)

3d per packet

- 243 Emperor William. The charming Single
Blue Cornflower; the best of the section.
244 Red. Single Cornflower.
245 White. Single Cornflower.
246 Mixed. Single.
247 Cyanus fl. pl. Various shades; produces
a large percentage of double flowers.
248 Nana Com. Hybrida (MINIATURE CORN-
FLOWER). Finest mixed.
249 Nana Compacta, Victoria. Blue Cornflower;
dwarf.

CENTAUREA MOSCHATA

(Sweet Sultan) 3d per pkt.

- 252 Blue. Double.
253 Purple. Double.
254 White. Double.
255 Odorata Marguerite. Large white, sweet-
scented.
256 Suaveolens. Yellow Cornflower.
257 Imperialis. Assorted colours, very large fls.
The Cornflower, so common in the English
fields, is one of the most useful annuals in cultiva-
tion. It blooms during winter in profusion, and
is most useful for cutting for bouquets in winter
and spring. The plants should stand one foot
apart, and can be transplanted. This interesting
family comprises the well-known Sweet Sultan.
Height 1½ to 2 feet. Sow autumn and spring.

260 CENTAUREA CANDIDISSIMA

3d per packet

Valuable perennial foliage plant for ribbon
bordering; very effective when massed with
other coloured leaves; round, compact plants,
with silvery foliage; 12 in. Sow in autumn.

CENTAURIDIUM 3d per pkt.

- 261 Drummondii. Yellow flowers.
A showy, hardy annual of a dwarf and trailing
habit; suitable for edges and rockeries.

PLANTS

Chrysanthemum Coronarium, "Primrose Gem"

CENTROSEMA 6d per pkt.

262 *Grandiflora*. Flowers, $1\frac{1}{2}$ to $2\frac{1}{2}$ inches across, of a beautiful inverted pea shape; rosy violet to reddish purple, feathered with white.

An exceedingly beautiful perennial climber; easily grown from seed, which should be soaked for a few hours in tepid water before sowing. Sow in Spring.

CHRYSANTHEMUM**ANNUAL MARGUERITE.**

3d per pkt. except where otherwise priced.

265 *Double Hybrids*. Double and semi-double flower; white, yellow and crimson; various coloured centres

266 *Lord Beaconsfield*. White, crimson band, yellow centre.

267 *Carinatum "GOLDEN FEATHER"*. Golden foliage; flowers yellow and crimson.

268 *Carinatum, Purple Crown*. Purple scarlet in colour, with a golden ring; yellow foliage. 8 inches.

269 *Tricolour Dunnettil*. Single; very showy.

270 *Coronarium Sulphureum*. Double; flowers pretty lemon colour.

271 *Eclipse*. Bright golden yellow, scarlet ring.

272 *Segetum*. (CORN MARIGOLD). Pretty yellow.

273 *Tricolour Cocleum (TOM THUMB)*. Branching; profusion of perfectly scarlet flowers.

274 *Golden Wheel*. Golden yellow, purple centre.

275 *Carinatum, "NORTHERN STAR"*. A giant flowering variety; blooms $3\frac{1}{2}$ in. across. White, passing to soft yellow in centre.

276 *Coronarium "PRIMROSE GEM"*. A dwarf, compact variety, with beautiful double flowers.

These varieties are hardy annuals; strong growers, showy, and are admirably suited for cutting; they keep a long time in water. Marguerites are most popular, and should always have a place, as they are one of our finest garden annuals. Should be sown during Autumn or Spring 18 inches to 2 feet.

LEUCANTHEMUM SECTION (Perennials.)

284 *Inodorum*. Double white .. 6d per pkt.

285 *Indicum fl. pl.* The familiar Chrysanthemum; various .. 6d per pkt.

286 *New Early Flowering*. Of the Japanese type; very abundant bloomer .. 6d per pkt.

CINERARIA

1s per packet

290 *Hybrida Grandiflora*. Single flowers; charming colors superior to the double varieties.

291 *Hybrida Grandiflora "Kermesina"*. Crimson variety, velvety crimson, semi-double.

292 *Hybrida Grandiflora, Dble.* A very select strain, producing large percentage of double flowers.

293 *Hybrida Radiata*. A distinct class, star shaped,

Most elegant and charming bush-house or greenhouse plant. Should be raised in a frame, in pots and boxes, and transplanted rapidly into small-sized pots, and again into blooming pots as soon as the smaller are well filled with roots. Use light soil, mixed with old cow manure, a little sand and old vegetable mould made from decayed leaves; transfer to bush-house as soon as established in blooming pots. Can also be grown as border plants in a sheltered suitable position. Sow in the autumn. 18 to 24 inches 3d per pkt.

Packet Seeds are all Post Free

Cineraria Radiata

ORNAMENTAL LEAVED VARIETY.

296 *Maritima Candidissima*. Large leaves.

This variety, although classed as a Cineraria, is grown as a hardy foliage plant only, its beautiful silvery leaves being very effective in carpet bedding; it is of no value as a flowering plant. 12 inches. Sow in Spring.

CLARKIA

3d per pkt.

298 *Elegans*. Single purplish rose. 299 *Elegans*. Double. A showy hardy annual; easily grown; very effective in masses. Sow Spring and Autumn. 18 inches.

CLIANTHUS

6d per pkt.

301 *Dampierii (DESERT PEA)*.

A native of the driest portions of Western Australia. The flowers are brilliant crimson, about three inches long, and in the centre there is a large clear black marking, rendering it one of the most beautiful and attractive plants in cultivation. This biennial plant is a trailer, and is a little difficult to cultivate, but will repay all trouble. Sow from July to end of September, in a sunny situation; a sandy soil is most suitable, but in any ordinary good loam it will bloom well. Do not transplant seedlings.

302 *Puniceus (GLORY PEA)*.

A very handsome perennial shrub, resembling the *Dampierii*, but more easily grown and of more erect habit.

303 *Puniceus Alba*. A white variety, much prized on account of its highly decorative character.

CLINTONIA

3d per pkt.

307 *Pulchella*. Rich blue colour, yellow eyes.

Charming little plant for edging, pots or rockeries. Sow the seed in boxes and transplant. Hardy annual. Sow Autumn or Spring.

COBÆA (Climber)

6d pkt.

308 *Scandens*. Purplish blue.

309 *Scandens Alba*. White.

Useful ornamental climber; magnificent, large, bell-shaped flowers; rapid grower, fine foliage; hardy perennial. Should be raised in pots or boxes, and planted out in the Autumn or early Spring.

COLEUS

1s per pkt.

311 *Splendid Mixed*.

312 *New Large Leaved*. Finest mixed.

As a pot-grown foliage plant the *Coleus* cannot be surpassed; it is admirably adapted to our climate; requires careful sowing, as the seed is very fine; must be grown freely in good rich soil, with plenty of moisture, light and air, when the colours will be magnificent. As a pot plant, and grown in a conservatory or bush-house, it is charming, but in sheltered situations, and in the warmer parts of the State, it is a magnificent border plant. Sow in September and Summer.

Cobæa Scandens

PLANTS

SYDNEY

COLLOMIA

3d per pkt.

314 Coccinea. Scarlet and yellow.

Hardy annual; flowers Bouvardia-like; of compact habit. Sow in spring. 12 inches.

COLUMBINE (See Aquilegia)

CONVOLVULUS (Morning Glory)

3d per packet

316 Minor. Dwarf; mixed, various.

317 Major. Tall; mixed, beautiful climber.

318 Mauritaneus. Hardy perennial; for hanging baskets and rock work; beautiful blue.

A bed of the charming, free blooming annual, Convolvulus Minor variety, is most beautiful when in flower; and for a quick growing creeper of the annual type none can surpass C. Major and its varieties. Sow in the spring.

COREOPSIS

(See Calliopsis)

CORNFLOWER

(See Centaurea)

COSMIDIUM

3d per pkt.

321 Burridgeanum. Crimson and yellow. Showy hardy annuals. Well adapted for massing and for cutting for table decorations. Sow autumn or spring. 18 inches.

COSMOS

3d per pkt.

322 Pearl. A beautiful pure white

323 Dawn. Early dwarf variety; flowers white, tinted rose.

324 Sulphurea. Yellow.

325 Choicest Mixed Mammoth Flowering. Colours various.

326 Klondyke. Very floriferous; orange, distinct foliage.

327 "Lady Lennox." Giant Pink flowering variety.

328 Pink. Large flowering.

329 Purple. Large flowering.

A most popular class of hardy annuals, producing single flowers of great beauty; white, mauve, purple, etc., with fine foliage; most useful for table decoration. Sow spring. 6 feet.

333 COWSLIP (Primula Veris)

6d per packet

This old English flower succeeds admirably here in our cooler districts, where it can be grown to perfection. It should be sown in boxes, and transplanted to some sheltered, shady situation to flower. Hardy perennial. Sow in autumn or spring. 9 inches.

CUPHEA

3d per pkt.

334 Miniata Compacta. Flowers various colours.

A pretty annual, most useful for bedding; very dwarf and abundant bloomer.

CYCLAMEN PERSICUM

1s per pkt.

337 Papillo "Butterfly." Colours various; petals crested and twisted; very striking.

338 Albert Victor. Flowers intense carmine.

339 Giganteum. Immense flowers; mixed colours.

340 Delicatum. Beautiful snowy white flowers.

A most beautiful tribe of tuberous greenhouse plants, easily produced from seed if sown in light soil, in pots, and placed in a warm, sheltered corner of the bush-house; will repay all trouble. Seed should be sown during autumn and spring in pots. The cyclamen blooms a long time.

Butterfly Cyclamen

Mammoth
Cosmos

DAHLIA

6d per pkt.

343 Large Flowered Double. Fine select mixed.

344 Pompone. Finest mixed; very small flowers, double.

345 Single. Various; brilliant star-shaped flowers.

346 Single Perfection. Fine giant-flowering strain.

347 Single Tom Thumb. Very Dwarf; splendid.

348 Single Cactus. Twisted petals.

349 Double Cactus. Finest mixed.

350 Double Cactus. Colonial saved seed from the best varieties. 1s pkt.

Easily raised from seed if sown in a shelter frame, but there is a great probability of plants producing a large percentage of single flowers, even if seed is saved from double flowers; seedlings will flower first season if sown early. The single varieties are elegant and graceful, and most suitable for cutting. The Pompones are very small double varieties, but the Cactus are finest of all. Hardy perennials. Sow spring. 4 to 5 feet.

DATURA 6d per pkt.

(Trumpet Flowers)

355 Ceratocaula. Large trumpet-shaped pink and white flowers, beautifully sweet scented; a very useful hardy annual. Sow in spring. 36 inches.

356 Double Golden. Compact bush, about 2 feet high, and bearing large golden funnel-shaped flowers.

DAISY (Bellis Perennis) 6d pkt.

360 Longfellow. Large, beautifully double; dark rose.

361 Giant Snowball. Grand flower; pure white. 6 in.

362 Double Mixed. All the best sorts.

363 Fistulosus. Pretty form of Double Daisy; globular, various colours.

These favourite flowers can be easily grown from seed. They should be sown in a shallow box filled with light soil, and kept well watered; a cool position will suit best. The seedlings must be planted out when large enough to handle.

They are hardy perennials. Sow autumn and spring. 6 inches.

DIANTHUS (Garden Pink)

3d per packet.

368 Heddewegil. Single; beautiful.

369 Heddewegil fl. pl. Double flowers.

370 Heddewegil "Queen of Holland." Pure white, occasional rose tints in centre.

371 Double Snowflake. Beautiful double white, fringed.

372 Eastern Queen. Showy single flower.

373 Crimson Belle. Beautiful crimson, single.

374 Atropurpureus. Double; various.

375 Atropurpureus Albo Marginatus, "MOURNING PINK."

376 The Bride. White, purple centre.

377 Diadematus (DIADEM PINK). Fine double.

378 Laciniatus. Large single; fringed.

379 Laciniatus Striatus. Double flowers, striped.

380 Salmon Queen. Dwarf, salmon, changing rose.

381 Snowflake. Single laced, pure white.

382 Imperialis. An abundant bloomer.

383 Atrosanguinea. Double variety, dark blood red.

384 Plumarius. Fringed Pheasant's Eye.

385 Chinensis (INDIAN PINK). Fine double flowers, beautiful colours.

386 Snowdrift. Double white lacinated.

387 Plumarius Double, "Mrs. Sinkins." A beautiful double white strain; very attractive. 1s per pkt.

392 Barbatus (SWEET WILLIAM). Hardy perennial. Large trusses, splendid colour.

393 Barbatus (AURICULA-EYED). Distinct variety; very brilliant and beautiful.

394 Barbatus "Harlequin." Large single flowers; dwarf, beautiful.

The Heddewegil, Laciniatus, and Imperialis sections of Dianthus will bloom nearly the entire season. They are magnificent flowering biennials, with many colours and shades of colours. The flowers are of immense size, and the plants bloom all the season through, if the old flowers and seed pods are removed regularly. The last three on the list are the old favourite Sweet William of perennial duration, which produce fine trusses of bloom, with an endless variety of colour. Sow during autumn and spring. 12 inches.

DELPHINIUM
(Perennial Larkspur)
6d per packet

- 398 *Cashmerianum*. Fine variety dark blue.
399 *Chinense*. Fine mixed; a splendid strain.
400 *Elatum Hyb. Nanum*. A beautiful semi-dwarf strain which blooms freely and shows excellent colouring.
401 *Formosum*. Graceful; lovely blue flowers.
402 *Hybrids Mixed*. Choice selection, best varieties.
Colonial Saved Seed, 1s pkt.
403 *Nudicaule*. Bright scarlet; dwarf compact.
Charming family of perennials, with handsome foliage and fine spikes of flowers. Very effective in the border; they make handsome plants. Sow during autumn and spring. 2 to 3 feet when in flower.

DESERT PEA
(See *Clianthus*)**DIGITALIS****(Foxglove) 3d pkt.**

- 410 *Gloxinoides*. Superb variety; all colours.
411 *Ivery's Finest Spotted*. Superior strain.
Well-known favourite; does very well here, of easy cultivation; striking and showy when in flower; requires plenty of space; hardy perennial. Sow autumn and spring. 3 ft. when in flower.

DOLICHOS 3d pkt.

- 414 *Lignosus*. Small, lilac, pea-shaped flowers borne in clusters.
415 *Lignosus Albus*. White.
A charming, quick-growing climber, capital for covering an old wall or fence; small bright green foliage, not particular as to situation; one of the best hardy perennials. Sow in spring or autumn; evergreen. 20 feet.

DOLICHOS LABLAB.

- 417 *Daylight*. A grand climber, with beautiful white flowers and dark green foliage.
418 *Darkness*. A beautiful contrast to the "Daylight"; flowers dark lavender purp.
Both of the above are entirely distinct from *D. Lignosus*. They are annuals only. Sow autumn and spring.

ERIGERON 3d per pkt.

- 422 *Coulteri*. Single white flowers with golden centre, very suitable for cutting.

A hardy perennial plant from North America, growing 1½ feet. Very handsome with Daisy-like flowers.

424 **EUPHORBIA HETEROPHYLLA**
(Mexican Fire Plant or Annual
Poinsettia) 6d per pkt.

Bushy plants, 4 to 5 feet high, with glossy green leaves, which form at the end of the branches into large whorls and bracts, among which small green flowers appear, and immediately colour up to a brilliant orange scarlet.

ESCHSCHOLTZIA 3d per pkt.

- 426 *Californica*. Bright yellow and charming.
427 *Californica Alba Plena*. Beautiful double white.
428 *Californica Carminea*. Showy rose-coloured.
429 *Crocea*. Deep yellow, lovely shade.
430 *Crocea Double*. Orange flowers, hardy.
431 *Mandarin*. Rich orange colour inside.
432 *Maritima "Golden West."* Large flowers, light yellow and orange; spot at base of each petal; foliage whitish grey.
433 *Crimson King*. A beautiful red, very showy.

One of the most beautiful of the Californian annuals; has handsome foliage, expands its flowers to the blaze of the sun, is of dazzling brightness; wants plenty of space, will thrive in any ordinary soil; perfectly hardy. Sow autumn and spring. 9 inches.

EVERLASTING PEA 3d pkt.

- 439 *Lathyrus Latifolius*. Mixed.
440 *Lathyrus Latifolius Albus*. White.
441 *Lathyrus Pubescens*. Blue. 6d pkt.

This perennial is much hardier than the Sweet Pea, grows stronger, and keeps a long time in bloom; it has no perfume, but is most useful for cutting. Colours various; hardy perennial. Sow in autumn and spring. 4 to 5 ft.

FORGET-ME-NOT (See *Myosotis*)**FOXGLOVE (See *Digitalis*)****FREESIA 3d per pkt.**

- 442 *Hybridum*. Finest mixed.
Generally grown from bulbs, they are very hardy; easily raised from seed. Sow in early autumn.

FUCHSIA 1s per pkt.

- 445 *Single and Double*.

The seed we offer has been saved from the choicest varieties; hardy perennials. Sow during spring in pots in a frame or bush-house, and transplant the seedlings into small pots; only a percentage of double flowers can be expected. Seed will not germinate in the open ground. 36 inches.

GAILLARDIA 3d per pkt.

- 450 *Grandiflora*. Large, single, yellow flowers with crimson centre, long, stout stems.
451 *Grandiflora Follis Aureo Variegata*. Very attractive, blotched golden foliage.
452 *Amblyodon*. Fine deep red, tall.
453 *Josephus*. Scarlet, yellow bands.
454 *Fistulosa*. Pretty double-quilled sort.
455 *Picta*. A single variety; red and yellow.
456 *Lorenziana*. Double, yellow and deep crimson.
Hardy annuals and perennials, producing beautiful single and double flowers; very attractive and showy. Sow autumn or spring. 18 in. to 2 feet.

GENTIANA (Blue Gentian) 6d pkt.

- 461 *Acaulis*. Pretty little bright blue trumpet-shaped flowers, exceedingly beautiful.

Hardy perennial; one of the most charming of our alpine plants, suitable for the cool districts only. Sow during autumn and spring. 4 inches.

GERANIUMS

(See *Pelargoniums*)

GLADIOLUS 6d pkt.

- 465 *Gandavensis Mixed*.
466 *Lemoinei Varieties*.
Magnificent class of spotted Gladiolus; very best strains.

This magnificent genus is easily raised, and from hybridised seeds the variety of colours and tints obtainable is endless; light, sandy loam soil is most suitable for raising seedlings. Sow in spring. 36 inches.

GLOXINIA 1s per pkt.

- 470 *Grandiflora Crassifolia Erecta*. Distinct and beautiful flowers, erect, spotted and blotched; immense size, lovely foliage, one of the finest.
471 *Hybrida Grandiflora Defiance*. Flowers glowing crimson scarlet, with fringed margin; great size and substance.
472 *Grandiflora Corona*. A remarkable strain; flowers spotted and blotched; throat violet red, passing to indigo; white centre with blue spots. Enormous flowers.
473 *Giant Flowered*. Strong growing and erect flowering variety; flowers 4 in. diameter, very beautiful.

One of the handsomest tender tuberous plants in cultivation; requires pot cultivation and the shelter of a frame, bush-house, or conservatory; the fleshy velvety leaves are extremely beautiful, and the flowers are charming in the extreme. The plants bloom a long time; tender perennials. Sow during autumn.

GLOBE AMARANTH (See *Gomphrena*)**GODETIA 3d per pkt.**

- 478 *Fairy Queen*. Dwarf variety, large white flowers with carmine spots; very beautiful.
479 *Princess Henry*. Satiny rose; carmine spot.
480 *Splendens*. Pretty purple blotch on each petal.
481 *Duchess of Albany*. Satiny white.
482 *Princess of Wales*. Crimson rose, large.
483 *Lady Albemarle*. Bright crimson, large flowers.
484 *Duke of York*. A handsome dwarf variety; flowers bright scarlet carmine.
485 *Grandiflora Maculata*. Large white flowers with crimson spots.

A pretty tribe of really beautiful hardy annuals; will grow in the poorest soil, and produce a grand display of gorgeous flowers, even in a dry season, and cut flowers keep well in water. Should be sown during autumn and spring. 12 inches to 2 feet.

GOLDEN FEATHER

(See *Pyrethrum*)

GOMPHRENA 3d pkt.
(Globe Amaranth)

- 490 *Globosa*. Mixed.
491 *Aurea Superba*. Very bright.
492 *Nana Compacta*. Dwarf variety purple 6 inches.

One of the best of our hardy annual everlastings, and most useful for winter bouquets; it is of fine erect habit, a constant bloomer, and very attractive. Sow in the spring and early summer. 18 inches.

GYPSOPHILA 3d per pkt.

- 493 *Panloulata Compacta*. Semi-dwarf; hardy; white.
494 *Elegans Grandiflora Alba*. Newer type; very elegant.
494a *Muralis*. Dwarf, pink, pretty for borders.

A very free flowering hardy family of plants, particularly suitable to decorative work. Sow in autumn.

Godetia

Gerbera Jamesoni
New Hybrids.

ANDERSON & Co.
Seed Merchants
SYDNEY.

GERBERA HYBRIDS

ADNÉT STRAIN

THE beautiful lithographic production of these lovely flowers, as shown on the other side of this sheet, of the famous Gerbera Hybrids, was imported by us at great expense, to be used as a means of advertising the seed. A large supply of the seed was obtained direct from the raiser, M. Adnét, Cape Antibes, Fr., who has brought these Gerbera Hybrids to such perfection in colours, etc., and exhibitions of which have been given at leading shows in England and France, much to the delight of all Horticulturists.

UNFORTUNATELY THE SEED HAS GERMINATED SO INDIFFERENTLY

with us, and many others who have tested it, that we decided to

WITHDRAW THE SEED FROM SALE.

Should, however, we obtain a further supply of seed of strong germination, we will duly announce it by means of the Daily Press.

NOTE.—We can still supply Plants of the beautiful Scarlet South African Daisy (Gerbera Jamesoni), many thousands of which we have distributed—this type being introduced by us some nine years ago. Plants 2/- each.

3d per packet

548 *Hederacea Superba*. Ivy-leaved, various.549 *Limbatz Elegantissima*. White, rich purple star.550 *Mikado*. Most brilliant colours.551 *Grandiflora Alba*. Magnificent white flowers.552 *Bona Nox*. Most beautiful, large, blue flowers.553 *Imperialis, fl., Lutea*. Beautiful yellow.554 *Learli*. Perennial, the gem of the family, dazzling deep blue flowers, fine foliage. 6d per pkt.

A splendid family of climbers, rapid growers, fine foliage; handsome Convolvulus-like flowers; all very beautiful; hardy annuals, excepting *Learli*. Sow autumn and spring.

555 *Quamoelit* (CYPRUS VINE). Scarlet flowers.

The above is quite distinct, elegant feathery foliage, with small scarlet flowers, very attractive and handsome.

IPOMOPSIS

3d per pkt.

560 *Elegans*. Brilliant orange and scarlet flowers; succeeds best in light, rich soil.

Long spikes of flowers delicately spotted, graceful foliage. If planted in a sheltered position is very attractive; tender biennials. Sow during autumn and spring. 3 feet.

JACOBEEA (Senecio) 3d per pkt.

562 Double White. Blooms very profusely.

563 Double Dark Crimson. Bright.

564 Double Blue. Dwarf, showy variety.

565 Double Mixed.

A rapid growing annual; flowers double, daisy-like, fleshy foliage, bushy habit; requires plenty moisture; useful for cutting. Sow in autumn. 12 to 24 inches.

LARKSPUR

3d per pkt.

(Annual Delphinium)

570 Dwarf Rocket. Double various.

571 Pure White. Double; branching.

572 Dwarf Stock Flowered. Various.

573 Ranunculus Flowered. Various.

574 Giant Hyacinth Flowered. Spikes of beautiful double flowers.

575 Candelabrum. Pretty branching variety, blue shades.

One of the most valuable of our hardy annuals, producing flower spikes 6 or 8 inches in length; the flowers in beautiful colours; graceful foliage. 12 to 18 inches.

LEPTOSYNE

3d per pkt.

583 *Maritima*. Deep lemon yellow; very early; a charming plant.584 *Stillmani*. Golden yellow.

A most graceful annual from California; plants are bushy and compact, and the flowers are produced in great profusion. *Maritima* is very beautiful and fine for cutting.

LIMNANTHES

3d per pkt.

586 *Douglassi*. Flowers white; yellow centre.

Free blooming dwarf annual; suitable for edging; much liked by bees. Sow autumn or spring. 6 in.

Helianthus, Stella

695 Dunnetii Superbus. Purple, yellow, white.
696 Cruickshankii. Fine deep blue.
697 Nanus. Pretty dwarf blue var. 6 in. Great favourites.
The flowers are of most attractive colours; all hardy annuals. Sow autumn and spring.
698 Polyphyllus Albus. Long spikes; white.
699 Polyphyllus Atroceruleus. Blue.
700 Polyphyllus Douglassi Superbus. Rich purple.
701 Polyphyllus Mixed.
Perennial strain, producing superb spikes of flowers.

MESEMBRYANTHEMUM

3d per packet

732 Tricolour. Crimson, white, and purple; suits sandy soil well; only grows to height of 3 inches.

733 Crystallinum (ICE PLANT.) Peculiar glistening foliage, small white flowers; pretty. 6 inches.

734 Cordifolium Variegatum. A pretty variegated leaved variety. 6 inches.

Beautiful dwarf-growing plants of compact habit; half-hardy perennials. The first is a good rockery plant; the second is prized for its foliage, which looks as if the plant was covered with ice. Cordifolium is very suitable for bedding; bright rosy flowers. Sow spring and summer.

MICHAUXIA 3d per pkt.

730 Campanulata. Large, white, bell-shaped.

A handsome hardy plant, effective for borders; thrives well in warm, sheltered spots. Sow in autumn.

MIGNONETTE 3d per pkt.

736 Large Flowered. Very fragrant, fine spikes.

737 Parson's New White. Sweet-scented.

738 Crimson Giant. Large flowers, fine colour.

739 Crimson Queen. Beautiful spike, deep red.

740 Gabrielle. Robust large spikes, red.

741 Goliath. Enormous spikes, double red.

742 Ruby. "Machet" variety, coppery scarlet.

743 Victoria. Very dark red, fine spikes.

744 Mile's Hybrid. Spiral. Dwarf, long spikes.

745 Machet. Dwarf, massive spikes, scented, red.

746 Machet Golden. Large spikes, yellow flowers.

747 Machet "King of Dwarfs." Charming variety, robust growth, large spikes.

748 Bismarck. Very large, spikes reddish tinge.

749 Golden Queen. Bright yellow; pyramidal.

750 Giant Pyramidal. Fine spikes and fragrant.

This grand old annual is known to all, and its delicious perfume cannot be surpassed; it is easily grown; some of the varieties make excellent pot plants, and produce spikes of immense size. Sow autumn or spring.

MIMULUS (Monkey Flower)

6d per packet

760 Tigrinus. Showy, spotted; single and double mixed.

761 Tigrinus Grandiflora, Duplex. A new and improved variety; flowers fine, double.

763 Moschatus (Musk.) Scented, yellow flower.

764 Moschatus Compactus (Musk.) An improved compact variety, of erect habit; dwarf.

Charming plant for pot culture; likes rich, light soil and a liberal supply of water. Can be grown in the open ground, where soil and situation are favourable. Moschatus the well-known musk, has a delightful fragrance, is well adapted for pots or baskets. Tender perennials. Sow in spring.

MINA LOBATA 6d per pkt.

Its beautiful cream-white flowers are bright orange when half blown, and when in bud of a vivid red.

Pretty half-hardy annual climber. Grows to a height of 20 feet, produces abundantly. Sow in spring.

MUSK (See Mimulus Moschatus)

African Marigold

MATHIOLA 3d per pkt.

(Evening Scented Stock)

720 Bicornis. Beautiful pink and lilac flowers, fragrant, which open in the evening.
Hardy annual. Sow in spring. 18 inches.

MATICARIA 3d per pkt.

722 Eximia fl. pl. Pure white double flowers.
Beautiful hardy annual; pretty for bouquets. 10 in. Sow during autumn and spring.

MAURANDYA 6d per pkt.

724 Barclayana. Beautiful blue flowers.

725 Alba. Pure white flowers.

726 Rosea. Rose-coloured flowers.

A most superb climber, remarkably quick-growing and free-blooming; its foliage is small but dense, and of a lively green colour; they are half-hardy perennials, liking a rich, friable soil. Sow autumn and spring.

MEDEOLA 6d per pkt.

728 Asparagoides. Small white flowers, orange scented.

Very handsome climbing bush-house plant. The graceful beauty of its foliage renders it valuable for vases. Can be used either to climb or droop. Soak seed in tepid water some hours before sowing. Hardy perennials. Sow in spring in pots.

Mignonette, King of Dwarfs

PLANTS

Nasturtium, Tall Queen

MYOSOTIS (Forget-me-not)
3d and 6d per packet

- 770 *Palustris*. Bright blue; the true Forget-me-not.
 771 *Palustris* Tom Thumb. Very dwarf .. 6d per pkt.
 772 *Alpestris* Stricta Rosea. Upright growing, unique; flowers pink .. 6d per pkt.
 773 *Alpestris* Grandiflora (ROYAL BLUE). Large flowers, very deep blue .. 6d per pkt.
 774 *Sylvatica* Compacta Aurea. Golden leaved; flowers clear bright blue.
 775 *Elegantissima*. White, blue and rose.
 776 *Victoria*. Dwarf; globular habit; sky-blue flowers with double centre .. 6d per pkt.
 777 *Azorica*. Dark blue, white eye; biennial variety.
 778 *Robusta* Grandiflora. Very large flowering; blooms quickly from seed; blue .. 6d per pkt.
 779 *Dissitiflora* "Elfriede." Vigorous and branching, flowers large and deep blue .. 6d per pkt.
 This charming dwarf hardy plant should be sown in autumn, when it will bloom profusely during spring, covering itself with flowers of the most lovely blue; very useful for bouquets.

NASTURTIIUM 3d per pkt.
DWARF VARIETIES.

- 781 *Beauty*. Pretty yellow and scarlet.
 782 *Crimson*. Striking colour.
 783 *Empress of India*. Bright; beautiful scarlet.
 784 *Golden King*. Very handsome variety.
 785 *King of Tom Thumbs*. Scarlet.
 786 *King Theodore*. Darkest of all, nearly black.
 787 *Pearl*. A clear, soft white.
 788 *Rose*. Delicate, soft, rosy colour.
 789 *Scarlet*. Bright and beautiful.
 790 *Yellow*. Bright rich colour.
 791 *Finest Mixed Tom Thumb*.

NASTURTIIUM—continued.

TALL VARIETIES.

- 793 *Queen "Crimson Beauty."* Variegated foliage .. 6d per pkt.
 794 *Queen "New Hybrids."* A mixture of seven or eight colours, all with variegated foliage .. 6d per pkt.
 795 *Moonlight*. Flowers pale straw colour, crinkled.
 796 *Sunlight*. Flowers clear rich golden yellow.
 797 *Spitfire*. Bright scarlet flower.
 798 *Regallanum*. Lovely purple violet.
 799 *Tall, Mixed*. All the best varieties.
 801 *Lobb's Climbing Varieties*. Very suitable for vases or hanging baskets; mixed collection.
 802 *Lobbianum* Liliput. Mixed; charming new class, with very small flowers and foliage.
 803 *Ivy-leaved*. Unique foliage and flowers.

The value of this family for decorative purposes cannot be over-estimated; it is particularly hardy; will thrive in any soil, and its many forms are so varied that it possesses a pleasing variety of colour. Dwarf varieties do not grow more than 9 inches, and form compact bushes, and flower abundantly; can be transplanted and should stand 12 inches apart; hardy annuals. The tall varieties will spread or climb 15 feet. Sow autumn and spring.

Nemesia, Strumosa

NEMESIA

6d per pkt.

- 804 *Strumosa* Grandiflora. The best of this class. Flowers various.

Pretty compact-growing annual of great merit. Sow in autumn.

NEMOPHILA

3d per pkt.

- 806 *Insignis*. Flowers a pretty blue. Best.
 807 *Atomaria*. White, with black spots.
 808 *Discoidalis*. Black-brown; margined.
 809 *Marginata*. Blue, with white edge.
 Californian annuals, profuse bloomers, and charming colours; dwarf. *Insignis* is a lovely azure blue, while *Discoidalis* is white, tipped with dark brown. Sow autumn and spring. 6 inches.

NERTERA

6d per pkt.

- 821 *Depressa*.

A charming miniature bush-house pot plant, of a moss-like habit; very compact, forming a perfect carpet over the surface of the pot. The flowers are small, but are followed by beautiful coral-red berries about the size of a small pea; very attractive hardy perennial. Should be sown in spring.

NIEREMBERGIA 3d per pkt.

- 823 *Gracilis*. Light blue flowers. Charming little hardy annual, dwarf.

NIGELLA (Love-in-a-Mist)

3d per packet

- 824 *Damascena* Double White. Clear pure white.
 825 *Damascena* Double Blue. Companion flower.
 Pretty hardy annual, with graceful foliage. The flowers are nearly hidden in light feathery leaves; an attractive flower. Sow in autumn or spring.

NICOTIANA

6d per pkt.

- 827 *Affinis*. White flowers, with a long, delicate tube; it is delightfully scented. Sow in spring. 36 inches.
 827a *Affinis* Hybrids. Finest mixed.
 828 *Colossea*. Beautiful foliage plant. Hardy and robust.
 829 *Sanderæ*. Brilliant carmine red.
 829a *Sanderæ* Hybrids. Finest mixed.

NYCTERINIA

6d per pkt.

- 830 *Capensis*. White, with dark centre.
 831 *Selaginoides*. Lilac, sweet-scented.
 Very compact little hardy annuals; the plants are covered with pretty star-shaped flowers; very fragrant. Sow during spring.

OXALIS

3d per pkt.

- 833 *Rosea*. Flowers rose-coloured; suitable for hanging baskets.
 834 *Tropæoloides*. Flowers dark yellow, foliage brown. Charming dwarf, free-flowering hardy perennials. Sow in spring.

PAEONY

6d per pkt.

- 836 *Cholest Mixed*. Finest varieties and colours. 18 in.
 A magnificent family of plants, but difficult to raise from seed. Must be sown in pots or boxes, and germinated under glass; require a cool climate; hardy perennial. Sow in spring.

"I wish to thank you for the collection of Pansy seed you sent me this year. You might like to know that I have been a Pansy grower for thirty years, and in my early childhood we got seed from your firm, and I have had more satisfaction from your seeds than any other I have had in that time."

Mrs. C. H. BUCKLAND, c/o A. C. Mack, Esq., Beni, Dubbo.—28-9-09.

TUFTED PANSY

- 871 **New Hybrids.** Finest new Hybrid varieties. Most adapted for bedding purposes .. 6d per pkt.

These beautiful flowers are favourites with all; they are so easily grown, and bloom for so many months, that they find a place in nearly every garden, and repay the little trouble required to grow them to perfection.

The assortment of Pansies we offer embraces all the finest strains grown from seed in England, France and Germany. Our introduction of the beautiful "French-stained" Pansies many years ago was followed by the magnificent "Jewel" Pansy, a novelty of 1903. Both these strains produce flowers of great beauty and size, and marvellous shades of new colours, and as exhibition flowers, they have no equal; they have carried off the prizes offered by a great many Horticultural Societies, and we have received a large number of testimonials as to their excellence.

Should be sown in boxes or in the canvas frame in autumn, and transplanted to the flower garden. They love rich, sandy soil, and old cow manure is the best fertiliser. Liquid manure during blooming season will greatly assist the size of the flowers. Sow early in February.

PLANTS

SYDNEY

Papaver (POPPY)

3d and 6d pkt.

- 880 **Glaucum** (TULIP POPPY.) Dwarf, vivid scarlet, with two rows of petals—one in the centre, the other saucer-like. Very charming, free-blooming.
- 881 **Danebrog** (DANISH FLAG.) Bright scarlet, blotched silvery white.
- 882 **The Shirley.** Single and semi-double, charming shades of pink, rose-margined and veined.
- 883 **Snowdrift.** Flowers are a glistening white mass; 3 feet; charming variety.
- 884 **Umbrosus.** Deep crimson, black spot at base of petal. 18 inches.
- 885 **The Bride.** This lovely Poppy is pure white in colour, and of very large size.
- 886 **Miss Sherwood.** Single flowers of shiny satiny white.
- 887 **Alpinum.** Mixed. 6d per packet.
- 888 **Alpinum Roseum.** Beautiful rose-colour, as dwarf as the other Alpine var.; a lovely flower. 6d per pkt.
- 889 **Cardinal.** Beautiful dwarf, compact habit, about 18 inches. Large double flowers, glowing scarlet on white ground. 6d per packet.
- 890 **Dwarf Shirley.** Lovely flowers of scarlet, rose, salmon, and chamois. Height, 18 inches.
- 891 **Nudicaule Album** (ICELAND POPPY.) Lovely variety, pure white flowers; perennial.
- 892 **Nudicaule Coccineum fl. pl.** Large double flowers, beautifully bright orange scarlet. 6d per packet.
- 893 **Nudicaule Croceum.** Yellow; a charming variety of the "Iceland Poppy."
- 894 **Nudicaule Mixed.** Contains all shades of the "Iceland Poppy."
- 895 **Oriental.** Dark scarlet, peculiarly blotched with black; perennial.
- 896 **Mikado.** Double, pure white and scarlet.
- 897 **Ranunculus Flowered.** Beautiful, double, various.
- 898 **Lævigatum** (PERSIAN POPPY.) Brilliant scarlet, with black spots, surrounded by a white margin.
- 899 **Double French.** Exceedingly showy.
- 900 **The Admiral.** Large, round, smooth-edged, white flowers, with band of brilliant scarlet.
- 901 **Dainty Lady.** Australian-raised single Poppy, of great beauty; flowers dark mauve; unique.

This magnificent family of plants includes some of the most lovely colours and shades to be found in the floral world. The Single Shirley, Iceland and Tulip Poppies are charming, and the double varieties are gorgeous in the beauty of their colourings; they are easily cultivated, like plenty of room, and should be planted in clumps; hardy annuals. Sow during autumn and spring. 18 to 24 inches.

Shirley Poppy

PENTSTEMON

6d per pkt.

- 924 **Sensation.** A Gloxinia flowered variety; brilliant colours; flowers 2 inches across.
- 925 **Cobea.** Long pure white flowers, shaded blue.
- 926 **Finest Mixed.** Choice strain; best sorts.
- A fine hardy genus, free-flowering, and bearing fine spikes, 2 feet, and pendant trumpet-shaped blooms; hardy perennials. Sow during autumn and spring.

PERILLA

3d per pkt.

- 929 **Nana Compacta.** Lovely dwarf plant for bordering; a rich mulberry black foliage.

PETUNIA 6d and 1s pkt.

- 932 **Hybrida Single.** Finest mixed; 3d per packet.
- 933 **Hybrida Nana Compacta.** Dwarf. 6 inches high; regularly striped. 6d per packet.
- 934 **Grandiflora Intus Aurea.** Large-flowered, yellow-throated Petunias. 1s per packet.
- 935 **Grandiflora Inimitable.** Flowers beautifully blotched and striped. 1s per packet.
- 936 **Grandiflora Marginata.** Green-edged, beautiful single flowers, all shades. 1s per packet.
- 937 **Grandiflora Single.** Large-flowered, superb, mixed. 6d per packet.
- 938 **Grandiflora Fimbriata, Titania.** A beautiful velvety purple, with white margin, to 1s per packet.
- 939 **Fimbriata Single.** Fringed, mixed. 6d per packet.
- 940 **Double Inimitable.** Striped and blotched. 1s per packet.
- 944 **Double.** Fringed and plain edged; finest var.; mixed. 1s per pkt.
- 945 **Double Fringed.** Large flowering. 1s per packet.
- 946 **King Alphonso.** Very large, dark crimson flowers, with waved and frilled petals. 1s 6d per packet.

Petunias suit our climate admirably, and bloom in profusion during summer and autumn. Seed from the double varieties, however, will produce 70 per cent. of single flowers; tender perennials. Sow in a frame in spring or autumn and plant out.

PHACELIA

3d per pkt.

- 955 **Campanularia.** Flowers beautiful rich blue.

A highly interesting Californian annual. The plant is much branched, and of spreading habit. Hardy annual. 12 inches. Sow during spring.

PHASEOLUS

6d per pkt.

- 956 **Caracalla** (SNAIL FLOWER.) A charming perennial climbing plant, with bunches of sweet-scented purple and white curiously twisted flowers. Sow autumn and spring.

PERENNIAL PHLOX

6d pkt.

- 957 **Phlox Decussata.** Various colours.

This is quite distinct from the Annual, or Phlox Drummondii section, produces spikes of flowers, some two feet in height; it does not, however, usually flower the first season from seed. Sow in spring.

PICOTEE

1s per pkt.

- 959 **Choicest Mixed.** From the finest flowers.

- 960 **Perpetual Flowering.** Delicate marking, exquisite perfume; valuable for bouquets.

This charming plant, which is included in the family of the Carnation, is a general favourite; must be sown in seed pans or boxes, or in canvas frame, and transplanted. Hardy perennial; and the seed should be sown in autumn. 12 inches.

POLYANTHUS

6d per pkt.

- 963 **Floor's Castle.** Mixed. Superb gold-laced flowers. 6 inches.
- 964 **Grandiflora Mixed.** Extra quality.

A very beautiful class of hardy perennials, with distinct rich markings; prefer a cool climate, but can be grown in the coastal districts in spring. The seed should be sown in the autumn.

POPPY (See Papaver)

Dainty Lady Poppy

PASSIFLORA

3d per pkt.

- 914 **Edulis** (PASSION FRUIT).

This splendid creeper has fine foliage of a dark green colour, and delicious fruit. A first-class verandah or trellis plant, flowers not very attractive; hardy perennial and evergreen; grows to 15 feet; soak the seed before sowing. Sow in spring.

- 915 **Corulea Grandiflora.** Very large flowers of blue; very handsome. 6d per packet.

PELARGONIUM (Geranium)

1s per pkt.

- 918 **French Blotched.** Superb strain; distinct.
- 919 **Fancy Varieties.** Handsome, showy, striking.
- 920 **Large Flowered Regal.** From named sorts.

The abovenamed are the large flowering perennial class known as "Pelargoniums," as distinct from "Geranium," and are best suited for pot culture, although nearly all of them will stand in the garden if they are in a sheltered situation. Must be raised in pots in a frame. Sow autumn.

- 921 **Tricolour.** All the best varieties.

Tricolour is the coloured foliage variety of Geranium, with shades of green, crimson, brown, gold in the leaves.

Petunia, Grandiflora

SEEDS

Anderson & Co.

PLANTS

SYDNEY

PRIMULA SINENSIS

(Chinese Primrose)

1s per pkt.

- 1015 Fimbriata Finest Mixed. Lovely shades.
 1016 Alba Magnifica. Lovely pure white.
 1017 Coccinea Magnifica. Fringed; large red.
 1018 Meteor. Fringed; deep rich crimson.
 1019 Fringed Fern-leaved. Red.
 1020 Fringed Fern-leaved. White.

Beautiful, tender perennial, suitable only for pot culture, extremely handsome and free-flowering, and of easy culture. Seedlings raised in pots in the autumn should, as soon as the plants are fit, be transplanted; pot them off into small pots, and place them in a frame or bush-house, and as soon as they are again well rooted they should be shifted into blooming pots. Sow in autumn.

PRIMULA OBCONICA 6d pkt.

- 1024 Finest Mixed. A very beautiful flowering variety, excellent pot plant; requires similar treatment to Primula Sinensis.

Phlox Drummondii, Grandiflora

1025 PRIMULA VULGARIS (English Primrose) 6d per pkt.

A charming little plant, found in the fields in England. succeeds best in a cool, shady situation.

PYRETHRUM

3d per pkt.

- 1027 Aureum. Flowers insignificant, but by pinching the flower stems the young leaves produced are a bright golden colour, most effective as carpet bedding or ribbon bordering; called Golden Feather; a hardy perennial. Sow in spring. 9 inches.
 1028 Aureum Christatum. This variety produces perfectly curled leaves, and is very dwarf in habit; only grown for its foliage.
 1029 Selaginoides. A very pretty form of Aureum, with crest-like leaves; distinct, and handsome for carpet bedding.
 1030 Roseum Hybridum Grandiflorum. Quite distinct from all others. Beautiful perennial flowering plant, single flowers, produced on long wiry stems; good foliage. Suitable for colder districts. 18 inches.
 1031 Roseum, Double Hybrid. 6d per packet. Fine mixed double-flowering varieties.

RANUNCULUS

3d per pkt.

- 1034 Asiaticus Superbissimus. Producing flowers of a great variety of colour the first season from sowing. Seed should be sown in early autumn.
 Roots or tubers of the above can be obtained in March. (See Bulb List).

REHMANNIA

6d per pkt.

- 1035 Angulata. Herbaceous perennial; for sheltered border or green and bush-houses. Sow autumn.

RHODANTHE (Everlasting) 3d pkt.

- 1036 Maculata. Beautiful rosy pink.
 1037 Maculata Alba. Pure white.
 1038 Manglesi Major. Large bright pink.
 One of the choicest of early flowering everlastings; we cannot too highly recommend it. Should be in every garden. Maculata is particularly beautiful for bouquets. Half-hardy annuals. Sow in spring. 12 inches.

RICINUS (Castor Oil Plant) 3d pkt.

- 1041 Gibsoni. Large handsome purple foliaged plant; has a strikingly graceful appearance; dark purple stems and large leaves. An erect-growing branching shrub. Hardy annual. Sow the seed in the spring or summer. 4 to 5 feet in height.
 1042 Zanzibariensis. A highly ornamental variety; immense leaves, measuring 2 to 2½ feet across. Biennial. Sow in spring.

ROCKET, or DAME'S VIOLET 3d pkt.

- 1044 Sweet. Very delicious; fragrant flowers, purple and white.

Pleasing early spring flowering plant, profuse bloomer; hardy perennial. Sow autumn or spring. 18 inches.

ROMNEYA

6d per pkt.

(Californian Tree Poppy)

- 1045 Coulteri. Pure white flowers 4 to 5 inches in diameter, with delicate perfume.
 A hardy perennial plant suitable for out-door cultivation; foliage deeply cut and glaucous. Sow in spring. 6 feet.

ROSA POLYANTHA

1s pkt.

- 1047 Multiflora. Graceful clusters of single, double and semi-double flowers of various shades.
 A novelty from the fact of its flowering the first year from seed; height, about one foot. Sow in July and August under shelter, and plant out in September and October.

RUDBECKIA

6d per pkt.

- 1050 Bicolor Superba. Large flowered, yellow with large dark spots; very fine variety. 2 feet.
 1051 Neumannii. Vivid yellow; dwarf; very floriferous and constant bloomer.
 A beautiful class of annuals, which make very effective garden plants; splendid for cutting. Sow in spring.

SAINTPAULIA

1s per pkt.

- 1054 Ionantha. Fleshy leaves of a beautiful dark green; flowers clear blue violet tint, shading to yellow.
 A beautiful plant for glass or bush-house cultivation. The seed being very fine, it is necessary to bestow extra care and attention to successfully germinate it. Biennial. Sow in spring.

Primula Sinensis, Fimbriata

PHLOX DRUMMONDII

3d per packet

- 967 Grandiflora Finest Mixed. Lovely large-flowered varieties, with beautiful markings, the finest strain in cultivation.
 968 Grandiflora Alba. Single white; very pretty and free blooming.
 969 Grandiflora Dark Purple. Beautiful rich colour.
 970 Grandiflora Scarlet. Most brilliant colour.
 971 Grandiflora Red, White Striped. Very effective.
 972 Grandiflora Stellata Splendens. Pure white, with stellated centre.
 973 Alba Oculata Superba. Pure white flowers with carmine red eye.
 974 Alba fl. pl., Double White. Pure double white and very handsome.
 975 Cuspidata. Distinct class, with long winged and fringed petals, commonly known as "Star Phlox," attractive.
 976 Cuspidata Silver Leaved. The foliage of this variety is in beautiful contrast with the many charming shades of flowers.
 977 Nana Compacta. A beautiful dwarf variety, with a profusion of exquisite flowers; bush-like habit.
 978 Nana Compacta Radiata. Fine pointed star-like flowers, crimson with white markings.
 979 Cecily. Large flowered and dwarf. per pkt.
 Among our summer blooming annuals, the Phlox Drummondii takes a first place. If sown in the autumn it will flower in the winter, and continue to bloom for several months. A later sowing, in early spring, will give plants which will bloom throughout the summer, and if planted in beds produce a most dazzling effect, as the plants are covered with flowers, which often entirely hide the foliage. The Phlox possesses a great variety of colour; it is dwarf in habit, trailing not more than 12 inches high; hardy and blooms for many months. Some varieties are of delicate colours, while others are brilliant and dazzling. Sow during autumn and spring, and early in summer.

Phlox-Heynoldi Section 6d pkt.

- 987 Alba. Pure white.
 988 Cardinalis. Splendid tints.
 989 Empress Augusta. Copper rose.
 990 Rosea Intus Alba. Pink and white.
 991 Finest Mixed.

This section is particularly adapted to pot culture, but also blooms magnificently in the open border.

For Phlox Perennial, see No. 957

PORTULACCA

3d per pkt.

- 994 Grandiflora. Double, beautiful, free flowering, large size; mixed.
 996 Striata. Beautiful white flowers, striped and spotted.
 997 Aurea. Deep golden colours, dark throat; handsome.
 998 Grandiflora. Single; mixed.
 Portulaccas are particularly well adapted to our climate, and flower magnificently in the warmest situation; colours are most beautiful; suitable for vases or rock work; very dwarf, of a trailing habit; hardy annuals. Sow spring and summer. Do well in any ordinary soil.

POTENTILLA

3d per pkt.

- 1012 Finest Mixed. The colours are shades of red and brown, some striped.
 Handsome herbaceous perennials. They keep in flower a long time; both double and single varieties. Sow during autumn and spring. 12 inches.

6d per pkt.

1056 *Splendens Grandiflora*. Scarlet; very showy and attractive.

1057 *Ingenieur Clavenad*. An improved *Splendens*, flower spikes large, blooms earlier; fiery scarlet.

1058 *Argentea*. Silvery; flowers pinkish white; very fine

1059 *Patens*. Intense bright blue.

1061 *Bonfire*. Dwarf and bushy, covered with erect spikes of scarlet flowers. A beautiful dwarf variety.

Most striking garden plants, easily grown and very hardy, in suitable situations will bloom all the year round. Highly recommended. *Patens* is not so easily grown, but the beauty of its lovely blue flowers will repay the necessary care. Half-hardy biennials. Sow in the spring.

Sweet Scabious

SCABIOSA (Mourning Bride)

3d per pkt.

1065 *Finest Dwarf Double Mixed*. Red, white, lilac, and and purple. Showy and compact; hardy annual; will grow anywhere; very free blooming and fine for cutting. Sow in the autumn or spring. 18 in.

1066 *Golden Yellow Double*. Semi-dwarf and bushy, being a profusion of compact double flowers of a fine golden yellow.

1067 *Caucasica*. A handsome, hardy perennial; 2 to 3 feet high; excellent for cut flowers, which last a long time in water; soft lilac blue shade. 6d pkt.

1068 *Maxima*. A much improved strain, large double flowers, mixed. 2 ft.

SCHIZANTHUS

3d per pkt.

1070 *Grahami*. Beautiful red and shades.

1071 *Grandiflorus Oculatus*. Purple spots.

1072 *Pinnatus*. Beautiful bright blue.

1073 *Pinnatus Niveus*. A pure white variety.

1074 *Pyramidalis (Tom Thumb)*. Ten inches; various colours. Pyramidal.

Hardy annuals, requiring a sheltered situation, well suited for pot culture, handsome foliage, and bear thousands of Butterfly-like blossoms. Well worth a place. Sow during autumn and spring. 24 inches, except dwarf variety.

SENSITIVE PLANT

3d per pkt.

1078 *Mimosa Pudica*. Very pretty foliage.

A tender annual for bush-house culture; curious from the fact that when touched its leaves close and drop for a time—hence its name. Sow in spring. 18 inches.

SHASTA DAISY

(See *Chrysanthemum Leucanthemum*)

SILENE (Catchfly)

3d pkt.

1080 *Pendula*. Single, bright rosy red. 18 inches.

1081 *Compacta Rosea*. Double, dwarf, bright rose. 6 in.

This very showy annual will flower freely during the spring months; it should have a cool situation. Sow during autumn or spring.

SINNINGIA

1s per pkt.

1082 *Regina Hybrida Erecta*.

Belongs to same family as *Gloxinia*; has proved a most decorative glass-house plant; easy of cultivation; magnificent foliage, dark green, veined with silver. Cultivation same as *Gloxinia*. Sow March or April.

SNAPDRAGON (See *Antirrhinum*)

SOLANUM

6d per pkt.

1083 *Hybridum (Empress)*. Beautiful plant, laden with coral-red berries.

1084 *Wetherill's Hybrids*. Choice strain.

This handsome plant produces a profusion of coral-red berries, and is highly esteemed for table decoration. It makes a handsome pot plant, and is very attractive in the garden. Hardy annual. Sow autumn and spring.

SALPIGLOSSIS

3d per pkt.

1088 *Variabilis Grandiflora Superbissima*. A superior strain. 2 feet.

Beautiful showy annuals, richly coloured, delicately veined and mottled blossoms; very desirable; magnificent range of colours. Like a rich, light soil. Sow in the autumn and spring. 18 inches.

SALPIGLOSSIS FOR CUT FLOWERS

This beautiful annual is one of the best for cutting, either for bouquets or table decoration; it has long slender, upright stems, and the flowers are produced in graceful clusters. The flowers are single, and of a variety of charming colours, from old gold to purplish crimson, veined and blotched with wonderful tints only to be found in the *Salpiglossis*; but the great feature of this beautiful genus is that its flowers, when cut, can be kept in water for four or five days, during which period they never lose their freshness or beauty.

STATICE

3d per pkt.

1097 *Suworowi*. A handsome annual variety; bright rose-coloured flowers; free bloomer.

1098 *Perennial Varieties*. Mixed.

A very useful plant. The flowers are excellent for cutting and for mixing with others, and are well adapted for drying as everlasting. Sow in spring.

STOCK

3d per pkt.

TEN-WEEK VARIETIES

1100 *Large Flowered Dwarf*. Very showy, large flowers and colours.

1101 *Giant Perfection*. Beautiful double spikes. One of the best strains.

1102 *Victoria Bouquet*. Beautiful strain, double flowers.

1103 *Dwarf Pyramidal*. Large flowering; a splendid race; extra double.

1104 *Princess May*. A pyramidal ten-week variety, of beautiful primrose colour.

1105 *Perpetual Flowering*. Hardy, constant bloomer; various colours.

1106 *Triumph*. Bright brilliant crimson; double, and showing a peculiar changing lustre. 11 inches.

1107 *Princess Alice*. Pure white.

1108 *Wallflower Leaved*. Choice mixed.

"I have received the plants, including *Roses*, in splendid condition considering the long distance they have travelled, upwards of 650 miles, and I appreciate the careful manner in which they were packed."—A. BOND, Woodenbong, via Kyogle.—7-8-09.

STOCK—Continued.

INTERMEDIATE AND BROMPTON VARIETIES

1118 *Intermediate Scarlet*. Autumn Stock, beautiful.

1114 *East Lothian White*. Very fine pure white.

1115 *Brompton Scarlet*. Very showy and distinct.

1116 *Brompton White*. Fine spikes of clear pure white.

1117 *Brompton New Giant*. Beautiful white, large size.

1118 *Brompton Dwarf, Sunrise*. Large flowers, bright rose; numerous spikes; 70 per cent. double.

1119 *Queen of Whites, Intermediate*. An ever-blooming variety, growing 1½ to 2 ft., which is one of the best white sorts in cultivation. Very double, pure clear white.

1120 *Empress Elizabeth*. Large rose-shaped flowers, lovely dark red early; very double

1121 *Beauty of Nice*. Large fragrant flowers, delicate shade of flesh pink. 6d per pkt. each

1122 *Queen Alexandria*. Delicate rosy purple; same class *Beauty of Nice*.

1123 *Crimson King*. Large flowered

1124 *Almond Blossom*. Delicate shade

1124a *Soliel de Nice*. Sulphur yellow. Free

Stocks succeed well in any part of our State if the season is favourable, if they are grown in good rich soil. They are all beautiful plants, very showy, and delightfully perfumed. The *Intermediate* and *Brompton Stocks* produce splendid spikes of flowers. Stocks are gross feeders; like manure, and well-enriched soil worked deep. The *Bromptons*, if sown in the autumn, will flower the following spring. The *Ten-weeks* are hardy annuals, and grow about 12 in. The *Brompton* and *Intermediate* are hardy biennials. Sow during the autumn or spring. Stocks are liable to the attacks of aphids, but one or two applications of "Surpazoll" easily kill the pests.

Ten-week Stock

1125 *STOKESIA CYANEA* 6d pkt.
(Stokes Aster)

Hardy perennial of great value; herbaceous in character, forming an excellent addition to any garden; free flowering easily raised from seed. Sow in autumn and spring.

STREPTOCARPUS 1s per pkt.

1125a *Single Hybrids*. An exceedingly choice mixture of this beautiful flowering plant. Sow seed under glass. Suitable only for green or bush-house cultivation.

SWEET PEAS (See page 41)

SWEET WILLIAM (See Dianthus Barbatus)

TAGETES 3d per pkt.

1128 *Signata Pumila*. Bears an abundance of bright orange yellow flowers.

A very pretty and effective hardy annual of the Marigold tribe; very useful for beds and massing. Sow during autumn or spring. 12 inches.

THUNBERGIA 6d per pkt.

1130 *Choicest Mixed*. Flowers brilliant and various colours. Beautiful half-hardy annual, of twining habit; grows rapidly. Sow in spring. 36 inches.

TORENIA 1s per pkt.

1133 *Bailloni*. Flowers are yellow, brownish red throat. 1134 *Fournieri Grandiflora*. Large purple and white flowers.

An elegant and extremely ornamental pot plant of great beauty; a tender perennial, suitable only for glass or bush-house cultivation. 12 inches.

TROPÆOLUM 6d per pkt.

1135 *Canariensis* (CANARY CREEPER). Foliage delicate, flowers golden.

Beautiful tender annual; fine creeper, free grower. Sow in spring.

VERBASCUM 6d per pkt.

1138 *Pannosum*. Large sulphur-yellow flowers.

The plant grows to five feet; splendid leaves, 2 feet long and 8 inches wide; flower stalks 2 feet long; strikingly beautiful decorative plant. A perennial. Sow in spring or autumn.

VERBENA 6d per pkt.

1140 *Mammoth Hybrid*. Mixed; extra large flowers. 1141 *Auricula Flowered*. Mixed colours; 6 inches.

1142 *Coccinea*. Beautiful glowing scarlet, very fine. 6 inches.

1143 *Italian Striped*. Handsome striped. 1144 *Cerulea*. Shades of blue; contrasts well; effective.

1145 *Candidissima*. Beautiful pure white; large trusses of flowers.

1146 *Erinoides Alba*. Eight inches high, branching freely, profusion of trusses of white flowers.

One of our most useful bedding plants; very hardy, and of magnificent colours; not particular to soil or situation; blooms in profusion. Sow autumn and spring.

Verbena, Mammoth Hybrid

Wallflower, Double German

VIOLET 6d per pkt.

1150 *Odorata* (SWEET VIOLET). The old, well-known fragrant variety; very hardy and blooms abundantly; hardy perennial. 6 inches. 3d per pkt.

1151 *The Czar*. Very large, fragrant; great improvement on old variety; purple. 6 inches.

1152 *Alba*. Pretty white, distinct. 6 inches.

1153 *Admiral Avelan*. Purplish red.

1154 *Princess of Wales*. Very large flowers.

1155 *Sulphurea*. Sulphur yellow.

1156 *White Czar*. Large flowers.

1156a *Welsiana*. Dark blue; large flowers.

VIRGINIAN STOCK 3d pkt.

1157 *Red*. Good rich colour. 6 inches.

1158 *White*. Fine pure white. 6 inches.

Very dwarf, free-blooming, hardy annual; very effective for edgings. Sow the seed in the early spring.

"*Dianthus grown from your seeds last year were a great success, many of the blooms measuring three and four inches across. Some of the plants had as many as three different coloured flowers on them.*" G. B. WHITE, Dunoon, via Lismore, 24/6/08.

"*I had great success with the 14 packets of seeds sent up by you at the beginning of this month. I planted on the evening of March 5th, and yesterday made transplantings of Stock and Annual Chrysanthemums. In planting I used only half a packet, and 12 varieties came up very thickly. In justice to your seeds, which are my first trial. I may mention that several of my neighbours have been using other seeds without anything like my success.*"—E. H. MILLER, Esk, Q., 29/3/09.

"*The five packets of Pansy Seed I got from you about three weeks ago came on splendidly, also the Snapdragons.*"

C. GEHRIG, Coach Factory, Albury, 17/3/09

WALLFLOWER 3d and 6d pkt.

1160 *Blood Red Single*. The old favourite; distinct.

1161 *Choicest Mixed*. Single; colours from blood red to pale yellow.

1162 *Cloth of Gold*. Distinct rich golden yellow.

1163 *Eastern Queen*. Single dwarf variety; flowers of bright chamois, changing to salmon red.

1164 *Ruby Gem*. Single; a most brilliant flower, beautiful ruby violet; flowers extra large.

1165 *Early Single*. An annual wallflower, beautifully sweet scented; a charming pot plant.

1166 *Double German*. Grand strain, choicest double. all colours; most beautiful. 6d per pkt.

Favourite English flowers; double varieties are handsome plants. Single varieties have delicious perfume; hardy biennials. Sow autumn or spring. 12 inches.

WHITLAVIA 3d per pkt.

1171 *Grandiflora*. Bright blue; very pretty and striking. 6 inches.

1172 *Gloxinoides*. White and blue; showy. 6 inches.

One of the most charming Californian annuals; very effective for bedding; grows freely in any good garden soil; very hardy. Sow in autumn and spring.

ZINNIA 3d per pkt.

1174 *Grandiflora Plenissima*. A beautiful Zinnia of immense size and robust growth; various brilliant colours; the flowers are very fine, sometimes 6 inches across; colours intense.

1175 *Grandiflora Queen Victoria*. Double white.

1176 *Elegans Curled and Crested*. Unique and charming type, flowers being beautifully twisted and curled, giving a most attractive appearance.

1177 *Elegans Double Striped or Zebra*. Flowers distinctly striped. 18 inches.

1178 *Elegans Pumila fl. pl.* A surprisingly beautiful dwarf strain, wonderful shades of colour, and flowers nearly all double.

1179 *Elegans Tom Thumb Double*. Various brilliant colours; very dwarf: only 6 inches.

1180 *Elegans Liliput fl. p.* Mixed; a charming very small flowering class of double Zinnias, suitable for front borders; flowers adaptable for bouquets.

1181 *Elegans Liliput fl. pl. Scarlet Gem*. Double; flowers bright scarlet.

One of the grandest annuals in cultivation, and has been wonderfully improved of late years. Zinnias flower throughout the entire summer. They should always be transplanted. Sow seed in spring and summer for succession. Tall varieties from 2½ to 3 feet.

Zinnia, Grandiflora Plenissima

Our PACKET Seeds
are "The Best"
Post Free everywhere!

Spencer Types

(Giant Flowering)

- KING EDWARD.** The enormous flowers come almost uniformly waved and crinkled to a pronounced degree. The unusually large wings make the flowers appear truly gigantic in size. The standard is a deep rich carmine-scarlet of glossy effect. The wings are also carmine-scarlet and on the reverse side are of a deep rosy carmine. Stems are long and frequently carry four fine blooms, while the majority bear three flowers. The most beautiful of all the Spencers. 1s. pkt.
- APPLE BLOSSOM.** The petals are waved and crinkled to a remarkable degree. The flowers are most attractive: crimson-pink, shaded deeper, wings white, tinged and shaded with pink, medium size. 1s. per packet.
- QUEEN VICTORIA.** The flowers are large, of the true waved "Spencer" type, and have a most pleasing colour effect, a deep primrose flushed with rose. 1s. per packet.
- ASTA OHN.** The first lavender coloured Sweet Pea of the true "Spencer" type introduced. The flowers are large, waved and fluted. The stems are long, each bears uniformly four flowers. The colour of both standard and wings is charming soft lavender, suffused with mauve. 1s. pkt.
- RAMONA.** Clear white, with soft delicate lines and flakes of bluish pink. Immense size. 1s. pkt.
- BEATRICE.** The ground colour is white tinted with soft pink and buff on the standard, while each wing has a blotch of brighter pink near the base. 1s. per packet.
- MRS. ROUTZAHN.** Buff on apricot ground, flushed and suffused with delicate pink or very soft rose, deepening towards the edges of the standard and wings, giving somewhat a picotee-edged effect. 1s. per packet.
- CAPTAIN OF THE BLUES.** Bluish purple, with distinct margins of lilac; immense flowers. 1s. pkt.
- FLORA NORTON.** Bright blue with tint of purple. Very wavy. 1s. per packet.
- LOVELY.** Light bluish pink with blotch of rose. 1s. pkt.
- BURPEE'S WHITE.** True Spencer type, waved, crinkled and fluted. The flowers are born three and four to the stem and are uniformly well placed. The stems are extra strong. 3d. per packet.
- BURPEE'S PRIMROSE.** The texture is fully as substantial as in Burpee's White Spencer. The colour is a pronounced primrose or creamy yellow throughout, thoroughly crinkled or waved. 3d. per packet.
- FLORENCE MORSE.** The colour is a delicate bluish with a picotee edge of pink. Very large, open flower with wavy wings, carrying four blossoms to the stem. 3d. per packet.
- SAINT GEORGE.** Colour is described as bright, fiery scarlet standard, wings slightly deeper, the large flowers possessing the wavy form of the well-known Spencer type. 3d. per packet.
- COUNTESS SPENCER.** Giant pink. 3d. per packet.
- HELEN LEWIS.** Giant orange pink. 3d. per packet.
- JOHN INGMAN.** Rose crimson, veined. 3d. per pkt.

Unwin Types 6d per packet

Large flowers with wavy petals, similar to SPENCERS, but not quite as large.

- E. J. CASTLE.** Bright rose crimson with veins of deeper rose, wavy edges.
- FRANK DOLBY.** Pinkish mauve and lavender, open and wavy form.
- GLADYS UNWIN.** Clear bright light pink, very large, open form, wavy edges.
- NORA UNWIN.** Pure white large open wavy form; very superior.
- MRS. ALFRED WATKINS.** Pink shading to bluish and buff at edges; open wavy form.
- PHYLLIS UNWIN.** Light magenta, rose and carmine; large open wavy form.

The above collection of 6 distinct sorts, 2/6 post free.

Winter Flowering Class 3d per packet

- MONT BLANC.** Very early white.
- MRS. WM. SIM.** Salmon pink.
- LE MARQUIS.** Dark Blue.
- FLORENCE DENZER.** White.
- EARLIEST OF ALL.** Pink and white.
- MRS. ALEX. WALLACE.** Lavender.
- BURPEE'S EARLIEST WHITE.** Pure wht.
- Mixture of Above Sorts. 3d. per packet.

These are
a very
satisfactory
class for
Winter
blooming

1 pkt. each of the 7 sorts for 1/3, post free.

From the many hundreds of varieties of Sweet Peas now under cultivation we have selected some of the newer and improved types. These will be found listed under their various headings.

Sweet Peas have become such universal favourites that it is hardly necessary for us to recommend them. They form very effective climbers for trellis, and their floriferous character and sweetly perfumed flowers make them one of the most attractive annuals.

Autumn sown Sweet Peas do best, as the plants become strong during the winter and flower earlier.

Special List of Sweet Peas

Published in February

For NOVELTIES IN SWEET PEAS for 1910

See Coloured Pages

Sweet Pea, Spencer Type

Grandiflora Types 3d per pkt.

The following list of Sweet Peas contains only the best of the large flowering type, as distinct from the Gigantic or Spencer Sweet Peas.

- 1501 Dorothy Eckford. Large white.
- 1502 Phenomenal. Blue-edged white.
- 1504 Lady Grisel Hamilton. Largest flowered lavender.
- 1505 King Edward VII. Largest pure red.
- 1506 Hon. Mrs. E. Kenyon. Largest primrose.
- 1507 Mrs. Walter Wright. Largest purple blue.
- 1508 Navy Blue. Best dark blue.
- 1510 Prince of Wales. Rose crimson.
- 1511 Jeannie Gordon. Rose and pink.
- 1512 Othello. Maroon.
- 1513 Janet Scott. Deep pink.
- 1514 Mrs. Geo. Higginson, Jun. Azure blue.
- 1553 Queen Alexandra. The new scarlet.
- 1516 Duke of Westminster. Clear purple.
- 1518 Helen Pierce. Mottled blue on white.
- 1519 Prima Donna. Pink.
- 1520 Miss Willmott. Orange pink.
- 1521 Stella Morse. Cream and buff.
- 1522 Lovely. Light pink.
- 1515 Salopian. Pure red.
- 1524 Countess of Cadogan. Purple and light blue.
- 1525 Lottie Eckford. Blue edged white.
- 1526 Queen Victoria. Primrose.
- 1528 Mt. Blanc. White; very early.
- 1554 Queen of Spain. New shade of pink.
- 1530 Saidee Burpee. White.
- 1531 Countess of Lathom. Light salmon buff.
- 1550 Shasta. Pure white; very large.
- 1534 Admiration. Pinkish lavender.
- 1535 Apple Blossom. Rose and white.
- 1536 Black Knight. Dark maroon.
- 1555 Bolton's Pink. New deep pink.
- 1540 Royal Rose. Rose and pink.
- 1541 Golden Rose. Primrose, striped pink.
- 1542 Emily Henderson. Sturdy, white.
- 1543 Cocleinea. Bright cerise.
- 1556 Romolo Plazanni. Best purple blue.
- 1545 Mrs. Dugdale. Crimson rose.
- 1546 Aurora. Light striped.
- 1547 Dainty. White, pink edge.
- 1548 Jessie Cuthbertson. Primrose, striped rose.
- 1549 Lord Rosebery. Bright magenta rose.
- 1552 Sybil Eckford. The best buff and pink.
- 1557 Henry Eckford. Exceptionally bright and distinct; almost a clear orange self.

The above collection of 44 high-class sorts for 5/-, post free.

Cupid Sweet Peas 3d per pkt.

- 1600 Her Majesty. Deep rose.
- 1601 Beauty. Delicate rose, nearly white at the edges. 6 to 8 inches.
- 1602 Pink Cupid. 6 to 8 inches high.
- 1603 White Cupid. 6 to 8 inches high.
- 1604 Mixed.

Nothing can be more lovely than a patch of these charming little plants. They produce such a mass of bloom on such small plants.

Bush Sweet Peas 3d per pkt.

- 1613 Mixed. Containing all the colours in this section, about 30 varieties in all.

Sweet Peas in Mixtures

- 1620 RAINBOW MIXTURE. Our own mixing. Contains English and American varieties of the tall-growing section of Sweet Peas. A superb assortment. 3d and 6d per packet. 9d per oz. 1s 6d per 4 oz. 2s 6d per 8 oz. All Post Free.
- 1622 MIXED SPENCERS. A mixture of all true Spencer types. 1s per packet.
- 1621 Double Mixed. This section is not particularly recommended, but as we have frequent enquiries, it is included—only a small proportion come double. 3d per packet.

"The Sweet Peas here are just a real picture, they are something wonderful. Mrs. Edols says she never saw so lovely a sight, and the flowers are so large; the soil here suits them."

T. REDDINGTON, Burravong Stn.,

16-10-09.

Flower Seeds

in

Collections

DISTINCT COLOURS

SEALED PACKETS

The advantage of these Collections of distinct colours over packets containing seeds of mixed colours is, that in planting out, the colours can be so arranged that they will blend together, or that they will not contrast too strongly; again, any favourite shade can be planted more largely than the others. Massing in large beds most beautiful results can be obtained by the proper arrangement of colours. For information as to sowing season, see Calendar on page 24.

ALL POST FREE!

HOLLYHOCK

For the cooler districts we strongly recommend this most effective plant; spikes six feet high, which are covered with large double rose-like flowers. Requires good rich soil, well worked.

Tender BIENNIALS & PERENNIALS
EXTRA CHOICE.

Primulas, Calceolaria, Cineraria, Begonia, Cyclamen, Gloxinia, etc., or any six packets our customers may choose, not more than 6s. in value at catalogue rates. For pot culture. Should be raised in seed pans and flowered in pots in a frame or bushhouse.

Pansies "Sunshine" Collection

9 VARIETIES, 1 Packet of each, 3s post free.

Universal favourites, easily cultivated, very free bloomers. The seed should be sown in boxes or frames, in autumn, and transplanted; they love rich sandy soil. Anderson's Large French Stained. Finest strain grown; colours beautiful.

Odier's Choicest Strain. Grand show variety, finely marked; good substance.

Masterpiece. Petals curled on margin; all shades. First-class Assorted. Splendid large flowers, great variety of colours.

Trimardeau. Beautiful strain; vigorous; compact habit; flowers rich and varied; large.

Lord Beaconsfield, Giant. Deep purple violet, shaded white on upper petals; distinct.

Victoria. Beautiful strain; deep maroon crimson, with light-coloured margin.

Non Plus Ultra. An attractive and superb strain, with all shades of rich colour.

Peacock. Upper petals marked with central spot of pale violet blue, shaded, lateral petals deep claret.

OF FLOWER SEEDS AND GRASSES

Annuals and Biennials

"GEM" COLLECTION OF 14 BEAUTIES

Post Free, 2/-

Amaranthus. Tricolour foliage plants. Calliopsis Drummondii. Single yellow, with dark centre; profuse bloomer.

Cornflower. Blue and other colours. Pansy or Heartsease. Wonderful colours and shades. Sunflower, Miniature. Very free flowering. Stocks (TEN-WEEK). Large-flowered; charming perfume. Zinnia Grandiflora. Gorgeous colours; flowers during summer.

Phlox Drummondii Grandiflora. Grand annual; flowers all summer.

Balsam. Choice mixed; brilliant colours of every shade. Cosmos. Most lovely, profuse bloomer.

Dianthus Heddewegii. Lovely little annual; blooms all summer.

Mignonette (CRIMSON GIANT). Grand spikes.

Poppy. Single or double; gorgeous colours.

Salpiglossis. One of the loveliest showy annuals.

Ornamental Grasses

Agrostis Nebulosa (FAIRY GRASS). Very ornamental; graceful habit.

Avena Sterilis (ANIMATED OATS). Curious large spikelets, and of very elegant habit.

Briza Maxima (QUAKING GRASS). One of the best known of these grasses; easily cultivated.

Eragrostis Elegans (LOVE GRASS). Strong growing, with broad foliage, covered with down.

Erianthus Ravennae. Handsome and stately hardy grass, bearing beautiful silvery plumes; stems sometimes attain a height of 6 feet.

Eulalia Japonica. Very ornamental hardy grass, well suited for growing in large pots or tubs.

Hordeum Jubatum (SQUIRREL TAIL). Distinct long feathery plumes.

Lagurus Ovatus (HARE'S TAIL GRASS). Thrives well in almost any situation.

Pennisetum Rupellianum. Most elegant variety; long slender leaves and stems, and beautiful plumes, charmingly decorative; one of the best.

Stipa Pennata (FEATHER GRASS). This pretty grass presents a most attractive appearance in borders, and when cut is elegant in bouquets.

Stipa Elegantissima (EMU GRASS). A very attractive addition to our list.

Tricholaena Rosea (RED TOP GRASS). Strong grower; very ornamental.

Zea Japonica Variegata (STRIPED JAPANESE MAIZE). 6 ft. Packets of the above Ornamental Grasses in Mixture 6d ea.

These Grasses, from their graceful habits and easy culture, deserve to be very largely grown, whilst their value for use in bouquets cannot be over-estimated.

COLLECTIONS OF ORNAMENTAL GRASSES

Specially Selected

Creepers and Climbers

ALL OF WHICH CAN BE GROWN FROM SEED.

Centrosema Grandiflora. Perennial climber of great beauty; beautiful pea-shaped flowers. Seed should be soaked in tepid water for a few hours before sowing 6d per packet

Cobæa Scandens. Produces magnificent large bell-shaped purple flowers, is a rapid grower, and has fine foliage. Sow in rich soil during autumn or spring 6d per packet

Cobæa Scandens Alba. White flowers .. 6d per packet

Convolvulus Major (MORNING GLORY). A quick-growing annual; beautiful single flowers in shades of purple and blue 3d per packet

Dolichos Lignosus. Pink hardy perennial creeper; very ornamental and vigorous grower. Flowers very freely, and makes a beautiful dense screen. 3d pkt.

Dolichos Lignosus, Alba 3d per packet

Dolichos Lablab.—

DAYLIGHT. Beautiful white flowers .. 3d per packet

DARKNESS. Lovely dark flowers; very rapid annual climber 3d per packet

Everlasting Pea. A hardy perennial climber; strong grower; useful for cutting .. 3d per packet

Everlasting Pea (LATHYRUS PUBESCENS). Blue; a splendid climber 6d per packet

Humulus Japonicus. Fine green foliage 3d per packet

Humulus Japonicus Variegatus. Handsome foliage; annual climber; rapid grower and hardy 3d pkt.

Ipomea. Handsome convolvulus-like beautiful flowers. Quamoclit is quite distinct, elegant feathery and ivy-leaved foliage, small scarlet flowers.

HEDERACEA SUPERBA 3d per packet

LIMBATA ELEGANTISSIMA 3d per packet

QUAMOCILIT. Scarlet, small handsome foliage. 3d pkt.

MIKADO. Brilliant colours 3d per packet

GRANDIFLORA ALBA. Magnificent white flowers 3d pkt.

BONA NOX. Large blue flowers .. 3d per packet

Ipomea Learii. Hardy perennial; free grower; magnificent flowers of superb violet-purplish col. 6d pkt.

Japanese Kudzu Vine (PUERARIA THUNBERGIANA). A remarkably rapid-growing vine of perennial duration. Large foliage and purple Wistaria-like clusters of flowers. Sow autumn and spring according to climate 6d per packet

Lophospermum Scandens. A charming perennial climber; purplish-violet bell-shaped flowers of great beauty, the foliage is handsome 6d per packet

Mandevillea Suaveolens. Beautiful pure white flowers; foliage small; habit rather straggling 6d pkt.

Maurandya Barclayana. Lovely little climber, delicate foliage and a profusion of deep purple flowers; it grows closely to a wire or other trellis; 6 ft. 6d per packet

Medeola Asparagoides. Foliage plants of great beauty, but does not grow tall; it is rather tender, however, and its flowers are insignificant. Grown in a bush-house it is very beautiful 6d per packet

Mina Lobata. Pretty half-hardy annual; beautiful creamy-white flowers, are bright orange when half-blown, and when in a bud a vivid red. Grows 20 feet 6d per packet

Nasturtium. Lobb's climbing variety. Especially suitable for vases 3d per packet

Nasturtium, Tall. Hardy, free-growing annual climber, flowers in shades of yellow, orange, and crimson. 3d per packet

Nasturtium. Ivy-leaved sorts; mixed .. 6d per packet

Passiflora, Cœrulea Grandiflora. Large blue flowers. 6d per packet

Passiflora Edulis (EDIBLE PASSION FRUIT). This delightful fruit is easily grown from seed, and as a climbing plant to cover trellis or verandah it cannot be surpassed 3d per packet

Phaseolus Caracalla (SNAIL FLOWER). Perennial climber; bunches of sweetly-scented curiously flowers 6d per packet

Tropæolum Canariensis. (CANARY CREEPER.) Tender annual climber of great beauty; foliage small and fimbriated; flowers golden yellow. Raise in pots or boxes, and plant out in spring 6d pkt.

Anderson's FARM Calendar

TWELVE MONTHS' WORK ON THE FARM

IN arranging the following Calendar we have taken the climate of Sydney and the coastal districts of New South Wales as our basis, but for the colder districts of the State all that is required will be to make an allowance for the variation of climate; for instance, should it be known that the season of any particular district is a month later than that of Sydney, it will only be necessary to take January Calendar as a guide for February sowing; February Calendar for March, and so on right through the year.

Full particulars as to cultivation of the various plants referred to will be found on the pages devoted to Agricultural Seeds

January

Sow Anderson's Imperial Swede and other Field Turnips, Field Cabbage, Buckwheat for green crop, Johnson Grass (late sowing), Rape for autumn sheep feed, Soja Beans for green fodder (late sowing), Maize for grain crop, and Thousand Headed Kale (late sowing).

ANDERSON'S "IMPERIAL" is the best all-round Swede.

February

Sow Anderson's Imperial Swede and other Field Turnips, Carrot (when September sowing has failed), Field Cabbage (late sowing), Rape for sheep feed, Buckwheat, Cape and Skinless Barley for green fodder, Maize for green crop, Parsnip as field crop, and Thousand Headed Kale (late sowing).

March

Sow Rape for sheep feed, Broad-leaved Lucerne, Rye Grass, Prairie Grass and Cocksfoot Grass and Clovers for Pasture; Burnett Grass and Sainfoin for green fodder; Buckwheat (last month to sow); Black or Golden Tares can be sown alone or mixed with Oats, Barley, or Rye; sow Oats, Cape and Skinless Barley, Rye and Scarlet Clover separately for green crop; Carrot (if September sowing has failed).

April

Sow for main crops, Horse Beans, Field Peas, Rape (for winter crop), Black and Golden Tares for green fodder (alone or mixed with Oats, Barley or Rye) Broad-leaved Lucerne, Cocksfoot, Prairie, and Rye Grass, and Clovers for permanent pasture, Burnett Grass, Sainfoin; Wheat for grain and hay, Oats for grain and green crops, Cape and Skinless Barley and Scarlet Clover for green crops, Rye for grain and green fodder.

May

Sow for late crop, Field Beans, Peas, Rape for winter feed; Black and Golden Tares for green fodder sown separately or mixed with Oats, Barley, or Rye, Broad-leaved Lucerne, Rye Grass, Prairie Grass and Cocksfoot Grass, Clovers for permanent pasture, Wheat for grain and hay, Oats for grain and green crop, Barley, Cape and English for grain, Cape and Skinless Barley for green crop, Rye for grain and green fodder, Scarlet Clover for green crop, Onions (broadcast or in drills).

June

Sow for late crop, Field Beans, Field Cabbage (on poor soil), to be transplanted August and September; also Field Peas, Rape, Wheat for grain and hay, Oats for grain and green crop, Barley, Cape and English for grain, Cape and Skinless Barley for green crop, Rye for grain and green crop, Onions (broadcast or in drills).

July

Sow Onions (broadcast or in drills), Rape, Wheat (late crop) for grain and hay, Oats for late crop and green stuff (late districts); Barley, Cape and English for grain, Cape and English and Skinless Barley for green fodder, Rye for green crop, Tobacco in seed bed, planting out in October; Potatoes (see special list).

Skinless Barley is becoming more and more popular, as it yields a heavier crop of green fodder than the "Cape," and is fit to cut much earlier.

August

Sow Chicory, Field Pumpkin, Onions (broadcast or in drills) in the colder districts; Grass Seeds and Clovers and Broad-leaved Lucerne if favourable seasons; Oats for green fodder (late districts), Barley, Cape, Skinless and English for grain, Rye for green stuff, plant Potatoes (offered in special list), Sugar Beet, Sunflower for fowl feed, and Mangel.

Rape for winter green crop. This fine fodder plant is being more largely sown from year to year; it yields enormously; is excellent food for sheep and cattle, which are very partial to it.

September

Sow Buckwheat end of month, Field Carrot, Cattle Melon, and Chicory; for green fodder, Johnson Grass, Amber Cane, Planters' Friend, Sorghum, and Hungarian Millet; Maize for seed crop and green fodder; Field Pumpkin, Mangel, Sugar Beet, Sunflower, Cocksfoot, Rye Grass, Prairie Grass, Clovers, and Broad-leaved Lucerne, if favourable season; also Couch Grass, Potatoes (offered in special list); Cow Pea for green crop or manure.

October

Best month to sow Amber Cane, Planters' Friend, Sorghum, Pearl Millet, Broom Millet, Johnson Grass, Hungarian Millet, Maize, and Buckwheat, all for green fodder; Broad-leaved Lucerne, if favourable season, and Couch Grass; Soja Beans, Teosinte, Sunflower Seed for poultry feed; Cow Pea.

Cattle Melon and Pumpkin. The latter is not sufficiently grown; it is a splendid reserve food, and is relished by stock. Anderson's yields large crops; Mammoth is a splendid variety.

November

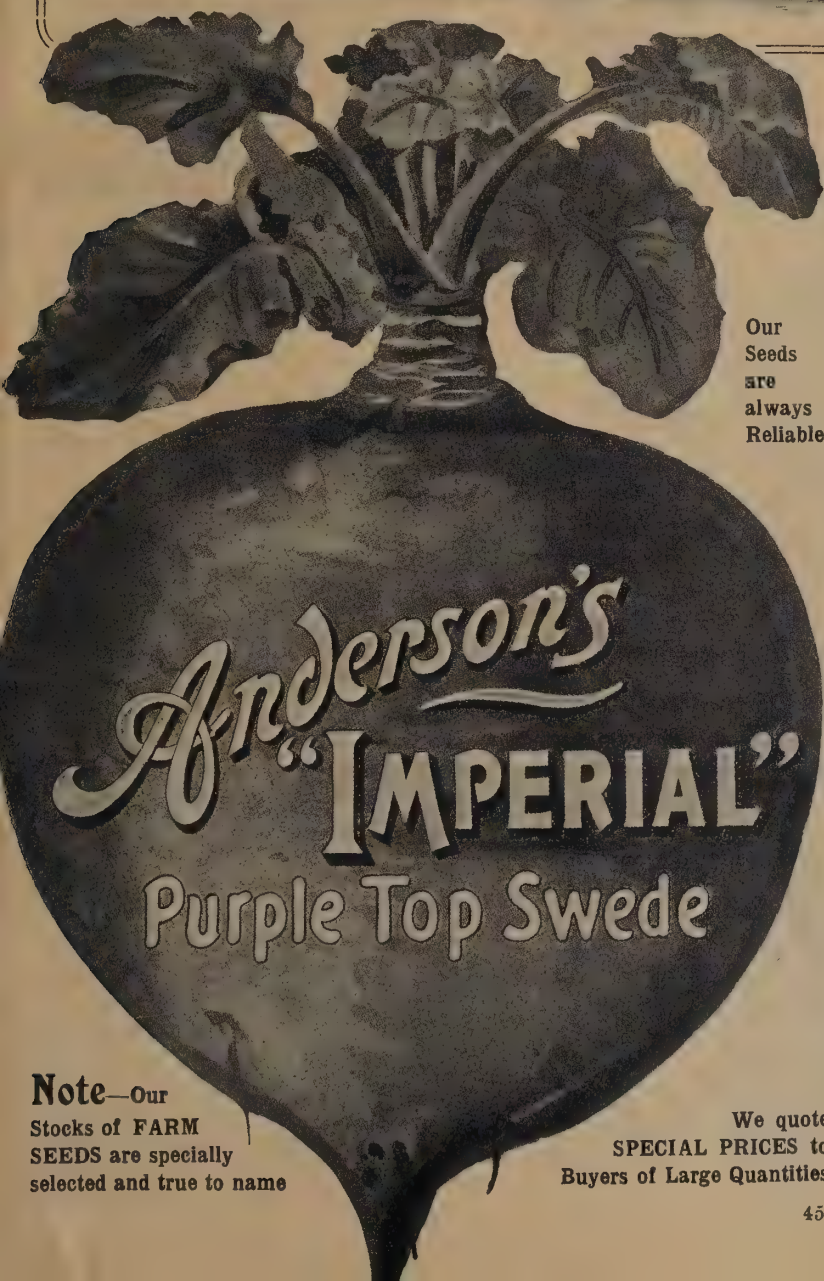

Sow for green stuff, Buckwheat, Amber Cane, Planters' Friend, Sorghum, Johnson Grass, Hungarian Millet; Pearl Millet, Maize, for seed crop and green fodder, Pie Melon, Field Pumpkin, Soja Beans, Teosinte, Sunflower for poultry feed, Cow Peas for green crop and green manuring.

Johnson Grass. This is a splendid grass for waste and poor land, rocky ridges; it is very hardy, spreads rapidly and produces a large amount of green fodder; but must not be sown on cultivated land, as once introduced it is difficult to get rid of.

December

Sow for green fodder, Buckwheat, Amber Cane, Planters' Friend, Sorghum, Broom Millet, Johnson Grass, and Hungarian Millet; Maize, for seed crop and green fodder, Soja Beans, for green crop. If the weather is favourable sow also Anderson's Purple Top Swede; one of the best of our root crops, and yields enormously; as much as 25 tons per acre is not an unusual crop.

Read for full information ANDERSON'S MANUAL OF THE FARM

Our
Seeds
are
always
Reliable

Swede and other Field Turnips

2s per lb. ; post free, 2s 6d

Anderson's Imperial Purple Top Swede. Splendid heavy Swede ; fine shape, excellent quality, and keeps well.

Skirving's Purple Top Swede. Heavy cropper and a well-known variety.

East Lothian Purple Top Swede. Hardy and a good keeper.

Sutton's Champion Purple Top Swede. Fine shape and heavy cropper.

Emperor Green Top Swede. Good size and a fine keeping variety.

Purple Top Yellow Aberdeen. Large, good quality. } Suitable for

Green Top Yellow Aberdeen. Hardy, good keeper. } the Colder

White Pomeranian Globe. Large and very useful. } Districts.

CULTURE.—Any rich, strong land, if well ploughed, harrowed and rolled, will produce fine turnips. The best time to sow Swedes is January or February, although some prefer an earlier or later sowing. Sow in drills 4 feet apart, and thin the plants to 18 inches apart ; 2 to 3 lbs. of seed will sow an acre.

The Aberdeen and White Pomeranian can be sown a few weeks later.

Mangel Wurzel or Mangold

(Seed is very scarce)
and dear this season

2s per lb. ; post free, 2s 6d

No dairy farm should be without a few acres of this most valuable root crop. It greatly adds to the quality of milk, and can be stored for many months if required. It is useful also for feeding cows and pigs. The Long Red and Yellow Globe are the varieties most esteemed.

Mammoth Long Red. Best variety for deep, well-worked rich land.

Long Yellow. Excellent for deep, rich, strong soil.

Yellow Globe. Most suitable for shallow soils ; keeps well.

CULTURE.—Good, strong, and deeply-worked soil will produce the heaviest crops ; the land should be ploughed deeply twice, scarified, rolled, and harrowed lightly. Sow in drills 4 feet apart, and thin to 12 to 18 inches between each plant ; 3 to 4 lb. of seed is sufficient for an acre, and soaking the seed in warm water for 24 hours will hasten germination. August and September are the best months to sow.

SEEDS

Anderson & Co.

PLANTS

SYDNEY

Japanese
Buckwheat

Buckwheat

Silver Hulled. Much earlier than the old common variety; continues longer in bloom and yields much larger crop. Seed light grey, beautiful pink blossoms. 9s per bushel.

Japanese. Matures a fortnight earlier than the Silver Hulled, is a heavy cropper, and possesses all its good qualities. 8s 6d per bushel.

CULTURE. A splendid quick-growing fodder plant, which can be sown in succession from the end of September to March, and will produce a heavy crop in a few weeks, provided the weather is favourable; it will be killed by frost, however. Buckwheat also makes excellent flour, which is largely used in America for cakes. It is also grown for green manure, to be ploughed in, which greatly increases the fertility of the soil. Bees are very much attracted to the flowers of the Buckwheat, which are highly honey-producing. Poultry are also very fond of the seed, and the straw, after threshing is valuable for pig food. Prefers alluvial soil, but will succeed on any average land, well drained and well worked; sow the seed, and then lightly roll the surface. Sow 4 to 5 pecks broadcast, and 1½ to 2 pecks in drills, per acre.

Chou Moellier (New Fodder Plant)

This plant belongs to the same family as the Rape, Thousand Headed Kale, and the ordinary Field Cabbage. It yields an enormous amount of feed, sometimes grows 6 feet in height. In a young state it can be fed down like Rape, or allowed to mature, and chopped or cut up, and fed to dairy stock.

Cattle are very fond of it; as a milk producer it is said to be unequalled, and in no way taints the milk. The stalk is soft and succulent and highly nutritious.

Sow seed in Autumn or spring in drills 2 feet apart; young plants can be thinned or transplanted, to stand 12 to 14 inches apart in the rows. Packets 1s. each, post free.

Field Carrot

White Belgian. Large Red Altringham.
Long Red Surrey.

3s per lb. post free.

CULTURE. Valuable root crop, prefers land of a light loamy or sandy description, deeply tilled. Choose land in good heart and never use stable manure when putting in this crop. There is little trouble with the crop after it is fairly through the ground and had a first weeding and thinning. Four pounds will sow an acre in drills. Sow during September. Another sowing may be made in February or March.

Chicory

Large Rooted

2s 6d per lb.

Chicory is grown for the roots only, which, when dried, are roasted and ground, for mixture with Coffee. It is a perennial plant with large blue flowers.

CULTURE. Cultivated as a root crop. Chicory should be grown in a similar manner to carrots; drills 18 inches apart, and about an inch deep the seedlings to be thinned to stand 9 inches apart in the rows. A loamy or sandy soil is most suitable. Stable manure must not be used at time of sowing, but if the ground is in not sufficient heart, guano or bone dust may be applied. The ground must be kept free from weeds until the foliage over-shadows it. Sow during August and September. Five pounds of seed will be ample for an acre.

Field Horse Bean

Heligoland or Tick. 5s to 6s per bushel.

CULTURE. The land for this crop should be deeply ploughed and well worked; a good strong soil or even clay is preferable to light or sandy soil. April is the best month to sow, but later sowing can also be made during May, June, or July. One bushel will sow an acre in drills 2 to 3 feet apart.

Florida Velvet Bean

6d per lb.

Special price for quantity.

It is claimed for this Bean that it is one of the best land fertilisers which can be grown; it is a nitrogenous plant, enriching the ground in a wonderful manner; stock are also fond of it, either as green fodder or when matured.

CULTURE. Sow in spring in hills 4 feet apart, and the same distance between the rows. 2 or 3 Beans in each hill. 15 to 20 lb. will sow an acre.

Mauritius Bean

This Bean is now considered by experts to be the best of all the Legumes for the fertilisation of the soil, particularly for Sugar Cane. We anticipate having a good supply for 1910 sowing, and we shall be pleased to have inquiries for prices, etc.

Cattle Cabbage

Robinson's Champion Ox.

4s per lb. post free.

CULTURE. Sow in June in seed beds of poor soil to furnish plants for transplanting into the field in August and September. Another sowing may also be made in January or February, but June is the best month for sowing for large field cabbage required during winter and early spring for cattle or pig feed. One pound of seed will give plants for one acre. Land must be strong, rich and well worked; and horse, cow, or pig manure can be used in large quantities.

Cattle Melon

5s per lb. post free.

If the soil is sandy and loamy, and of a fair depth, it will give a heavier and more certain crop than pumpkin, and is excellent for cattle and pigs.

CULTURE. Deeply dig or trench the ground, add farmyard or artificial manure abundantly; plant in hills 3 or 4 yards apart, and sow a few seeds in each hill. September or October are the best months to sow, but later plantings may be made in favourable seasons. One pound of seed will sow an acre.

Cattle Cabbage, Champion Ox

SEEDS

Anderson & Co.

PLANTS

SYDNEY

Soja Bean 1s per lb.

CULTURE. This plant makes fine green fodder for stock, cut when in flower; it makes excellent hay, of which stock are very fond. The seed should be sown broadcast, at the rate of about 7 lbs. per acre. Sow from October to January.

Soja or Soy Bean

Sheep Burnet

New South Wales Saved Seed .. 1s per lb.
Imported .. 10d ..

Special price for large lots.

CULTURE. This valuable forage plant is a perennial, and is specially adapted for poor, arid soils which would not grow Lucerne. It produces most nutritious feed for sheep and cattle. It has a long tap root, which penetrates so deeply into the soil that it is enabled to resist the most severe droughts. Burnet can be sown alone, or with grass seeds for hay or pasture. Sow in March and April broadcast at the rate of 30 to 40 lbs. per acre; 5 to 6 lbs. when mixed with grass seeds.

Bird's-Foot Trefoil

(Lotus Major) 3s 6d per lb.

This plant is well deserving cultivation on light inferior soil, on which it will yield a greater bulk of herbage than any of the other cultivated Clovers; it is highly nutritious, and is eaten with avidity by cattle and sheep. From the great depth to which its roots penetrate it is not liable to be injured by drought. Sow 10 to 12 lbs. per acre.

"I cannot get any seeds to grow but yours. I have used yours for 20 years now, and have always had good results."—NEIL MACDONALD, Ellerslie, Struck Oil, via Moongan, Q.—23-3-09.

Cow Pea or Catiang Bean

4d per lb.; 15s bushel.

Special quotations for large parcels.

The Cow Pea does well and produces large crops of first-class fodder during dry seasons, and stock of every kind are particularly fond of it. It has great value as a green manure, and like all leguminous plants, it takes nitrogen from the atmosphere and deposits it in the soil during growth.

White Clay Coloured Black Whip-poor-Will New Era

CULTURE. Spring is the best time to sow, and if the crop is intended for green feed we advise sowing in drills 2½ to 3 feet wide, and thinning the plants to 1 foot apart in the drills; about 10 lbs. of seed will sow an acre in this way, but for green manuring 30 to 50 lbs. should be sown broadcast and the crop should be ploughed down just when the seed pods have formed. For this purpose it can be sown during early summer.

Field Pea

Partridge or Grey 5s to 6s bushel
Large Blue 10s bushel

Useful either for horse or pig feed. Both seed and straw are valuable.

CULTURE. Any fair loamy strong soil, if well drained and deeply ploughed, or a sandy loam will suit this crop; and it is not necessary that land should be very rich, as a strong haulm is not desirable. The seed can either be sown in drills or broadcast. Sow in April, May, or June. 1½ to 2 bushels per acre.

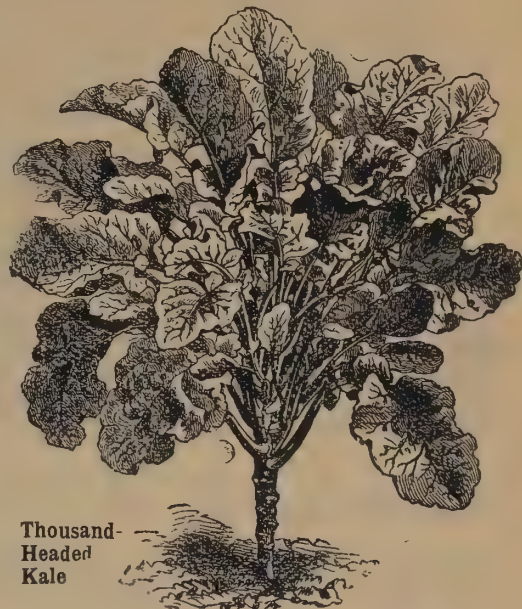

Sugar Beet 1s 6d per lb.

Vilmorin's Improved White
Klein Wanzleben, White

This root crop makes excellent food for dairy cattle and pigs, and yields heavily.

CULTURE. The cultivation is much the same as that of Mangel Wurzel, but the plants should stand closer in the rows.

Thousand-Headed Kale

Thousand-Headed Kale

2s per lb. Special price for large lots.

Allied to the Cabbage, and now largely grown.

A valuable fodder plant for stock of every kind, yielding immense quantities of green food; grows four to five feet high, and can be fed down two and sometimes three times during the season. Does not impoverish the land to any great extent, and does not cause lambs or sheep to scour or blow.

CULTURE. Sow in June in seed beds of poor soil, to furnish plants for transplanting into the field in August and September. Another broadcast sowing, 5 to 6 lbs. per acre, may be made in January or February, but June is the best month for sowing for winter and early spring for cattle or pig feed. One pound of seed will give plants for one acre if raised in a seed bed and planted out—or sow in drills 2 to 3 lb. per acre, thinning where required. Land must be strong, rich, and well worked; and horse, cow, or pig manure can be used in large quantities. Bone dust at the rate of 3 to 4 cwt. per acre will not be a too liberal dressing where farmyard manures are not available.

White Mustard

Price, 8d per lb.

Special quotations for cwt. lots.

Mustard is sometimes grown as an auxiliary forage crop. It is apt to prove too laxative when fed alone, and should therefore be given with caution, especially to animals that have been accustomed to dry food. We recommend the use of it with Dwarf Essex Rape at the rate of 1 oz. of Mustard Seed to 1 lb. of Rape—the two combined forming a most excellent fodder. As a green manure, Mustard can be used with great benefit to land that is devoid of humus.

Onion

As a Field Crop

"The goods arrived in excellent condition, for which I thank you."
H. M. COCHRANE, Glen Helen,
South Camira.—13-8-09.

Extra
Early
Yellow
Globe
Onion

We have thousands of acres of suitable land in this State to produce all the Onions we require. Given a good season, the returns are large, and seldom that rates ruling in Sydney market fall below a good payable price.

Anderson's Market Model ..	6 0	Extra Early Yellow Globe ..	6 0
Brown Spanish	5 0	Queen	5 0
Brown Globe (crop failure) ..	—	Anderson's Silver King ..	6 0
Extra Early Flat Red ..	6 0	Silver Skin Pickling ..	6 0

CULTURE. The soil can hardly be too rich, and should be well worked, and made solid and compact with the roller before and after sowing. Cover the seed as lightly as possible. It is best to give no other covering than pressing it in with the roller, the seed being sown quite on the surface. This is necessary to secure the proper position of the bulbs above ground. When the land is likely to be weedy, drilling or sowing in rows should always be practised; and it is a good plan to drop grains of barley along the line, at a foot or so apart, so that the rows may easily be distinguished and loss of plants prevented in using the hoe. The barley is, of course, pulled up as soon as it has served its purpose. To produce large-sized Onions, the seed should be sown in prepared beds in April, and when the seedlings are large enough to handle, transplant them carefully in rows 2 feet apart, and 9 inches apart in the rows. The best time of the year to sow for the main crop of Onions in the colder parts of the State is August. In the coastal districts, however, and the warmer parts of the State, it will be advisable to sow the seed in May, June and July, according to situation, so that the crop will have a chance to mature before the hot weather sets in.

Genuine Dwarf Essex Broad-Leaved Sowing Rape

4d per lb.; 28s per cwt.
Special Prices for Large Lots.

Our Stocks have all been tested, and are first-class in every way.

RAPE AS A GREEN CROP. For fattening sheep and lambs, Rape is one of the best rotation crops for the Australian farmer, and can be grown on any soil suitable for root crops. As an autumn crop for sheep it is excellent, and in Australia it might be made a winter crop in all the coastal districts. Rape is of the same botanical order as the turnip. The leaves in their early stages resemble those of the Swede Turnip; but as they advance a tall, branching, foliage-covered stem forms, which at once distinguishes it from the turnip. Where sheep or lambs are fattened for market Rape will be found to be of great assistance, and there is no better green crop for putting value on stock. It is very nutritious, much relished by sheep, yields enormously, and cannot be too highly recommended. Land should be prepared for Rape by ploughing well during the winter, and exposing it to the action of the atmosphere; the land should then be cross-ploughed, harrowed, and worked to a fine surface by January. When sown broadcast from 5 to 7 lbs. is used per acre. Rape can also be grown for green manure, and ploughed under as soon as the plants have made a strong growth and become well rooted. For Barley and Wheat this makes an excellent manure, and it will also rest and clean the land. For sheep the seed should be drilled the same as for Turnips; sow 3 to 4 lbs. per acre, and when the seed comes too thick thin the young plants like Turnips, and cultivate the crop in a similar manner. Sheep must not be turned in until the crop is full grown.

Peanuts (Arachis Hypogea) 9d lb.

These Nuts do well in most of the warm districts of our State and in Queensland. The soil should be of a very open nature, thoroughly broken up, but not to a greater depth than 4 or 5 inches, it being desirable to keep the Nuts as near the surface as possible. Sow the Nuts in September, in drills, 3 feet apart and 9 to 12 inches between the Nuts, and about 3 inches deep; they may be planted whole at the rate of 40 lbs. to the acre. It is necessary to keep the soil free from weeds until the vines have covered the ground, when the crop will need but little attention. Harvest when the vines turn yellow, and while most of the Nuts still cling to the roots. After the crop is harvested, pigs or poultry turned on to the ground will soon clear up any Nuts or remnants that may be left.

== OUR FARM SEEDS are all Specially Selected ==

Cattle Pumpkin

Anderson's Mammoth, 5s lb. Gramma, 6s lb.

CULTURE. The best month to sow is October, though it is common to do so in August and September. There is no advantage in sowing before about the middle of October as a field crop; and, if the land and weather be unfavourable, sowing may be delayed until the end of November. To get heavy crops, the richer the land the better, and it should be subsoiled as well as ploughed; and if manure is applied, should be distributed near the surface and over the whole area devoted to the crop and dug in—not merely in the holes where the seed are sown; these should be well prepared and manured, and only 3 or 4 plants be allowed to remain in each of the hills, which should be 3 to 6 yards apart. One pound of seed will sow an acre.

SEEDS

Anderson & Co.

SYDNEY

PLANTS

Johnson Grass or Evergreen Millet

(Sorghum Halepense).

1s per lb.

Special Quotations for large parcels.

It once introduced almost impossible to eradicate, therefore don't sow near the garden or cultivated paddocks.

CULTURE. One of the best fodder plants we have for poor land, and while it is known as Johnson Grass, it is in reality a Millet, and is being sown largely on the poorer pasture lands, where it has proved invaluable during periods of drought, yielding a large amount of fodder. It spreads rapidly even on poor lands, its runners sending up a shoot at every joint. For this reason it should not be sown on cultivated land or in the garden, as if once introduced it is almost impossible to eradicate it. Its remarkable adaptability to all sorts of soil, however, and its resistance to drought render it most valuable. It can be cut three times a year, and it will give 5 tons of hay per acre. The best time to cut for that purpose is when the plant comes into bloom. Sow and cover lightly to 15 lbs. per acre. Sow during spring; it will not stand frost.

Large Russian Sunflower

Sunflower

(Large Russian)

1s per lb.

CULTURE. The seed makes an excellent poultry food, and comes to perfection in a few months. Sow August or November in drills 3 to 4 feet apart, and thin same distance between each plant; 7 lbs. of seed should be sown per acre.

Rye (Common)

5s to 6s per bushel.

CULTURE. This excellent forage plant will grow on poor land or rich land, can be sown alone or with tares, comes quickly to maturity, and yields most nutritious green fodder. It is also grown for its straw, which is straight and strong. Sow from March to July, broadcast; 1 bushel per acre.

"Part of the Lucerne Seed I received from you some short time ago I sowed, and which is now up and looks well. I find the other seeds to be of good class also. These seeds appear to be fresh, for all appear to grow."—CLAUDE H. KEMP, Police Station, George's Creek, via Millgrove.—31-8-08.

Tares or Vetches

Tares or Vetches

12s 6d per bushel.

Special Price for large quantities on application.

Large Black.

Golden.

CULTURE. Valuable either for hay or green fodder. Prefers rather a strong well-worked soil, and will even grow in clayey ground during moist seasons if it has been well manured. On average land one ploughing will be sufficient. It is a good plan to roll the ground after sowing. Sow in March, April and May, with barley or rye; Tares yield an immense amount of forage, which may be made into hay, used green as it is cut, or it may be preserved by pitting, or in silos, like other green crops. It is also a good crop for ploughing in as green manure. Both varieties may be sown broadcast, at the rate of a bushel or a bushel and a half to the acre, and half or a whole bushel of rye or barley may be sown with them. The latter keeps the tares off the ground, and helps to produce a better and heavier crop.

Tagosaste

(Cytissus Proliferous).

4s per lb.

This plant is sometimes called "Tree Lucerne," but it is entirely distinct from the "Medicago" family. It is a hard-wooded tree shrub 16 to 18 feet high. A forage plant which stock are fond of—bees are attracted by its flowers. Valuable in hot, dry districts as its roots deeply, and is a very hardy perennial plant.

CULTURE. Sow in autumn or spring on poor sandy land, and thin out the plants to 10 feet apart.

Sainfoin or Esparcette

1s 6d per lb.

CULTURE. This excellent forage plant is particularly suited to our dry climate, and with an occasional dressing of manure, well forked in, will maintain its vigor for eight or ten years. A rather light soil, deeply worked and well drained, is most suited for it. Under these conditions it will yield abundantly. Sow the seed broadcast at the rate of 40 lbs. per acre. Sow March and April.

Teosinte

(Euchlaena Luxurians)

6d per packet.

5s per lb.

Teosinte

CULTURE. This being a tropical plant, only the warmer districts of this State and Queensland are suitable to its cultivation. It resembles Maisie in appearance, but sends up a great number of shoots with an abundance of foliage, and under favourable conditions yields an enormous weight of forage. When it has reached a height of 3 or 4 feet, will, if cut for fodder, give 3 or 4 cuttings; but if allowed to grow 12 feet, cattle will only eat the tops. Sow October and November.

Tobacco

2s per oz.

(Nicotiana Virginia)

Havana Florida Maryland
Virginian Gold Leaf Kentucky
Connecticut Big Frederick
Broad Leaved Dutch

CULTURE. The Tobacco plant requires a great amount of care during its growth, and much depends on the soil and situation selected for it; the land should be rich and deep; a sandy loam suits it best; hungry soil will prove very disappointing. Sowings should be made in a seed bed in a sheltered position, during July and August, planting out when strong enough in October. By mixing the seed with sand when sowing a more even distribution of the seed is secured. One ounce will produce sufficient plants for an acre.

Sorghums and Millets For Green Fodder

Our FARM SEEDS
are True to Name

PRICES fluctuate very much. Quotations and Samples on application.

Most useful forage plants, producing enormous crops, on any well-worked average soil during the hottest months, and on rich alluvial land yield enormous crops. Can either be cut green for fodder or ensilage, or ripened and cut into chaff.

Early Amber Cane. Very early.

Sorghum Saccharatum (black seed.) Branching habit, excellent, favourite.

Planter's Friend (brown seed.) Wonderfully productive.

Kafir Corn (*Sorghum Tartaricum*.) White seeded, grown principally for fowl feed.

Hungarian Millet. Excellent for green fodder and hay. 3 to 4 feet only. 10 lbs. per acre in drills. 4d lb.; 28s cwt. Special prices on application.

White French. This variety makes very valuable feed and good hay.

Pearl Millet (*Penicilaria spicata*.) In a young state the shoots are prostrate, but they afterwards assume an upright habit, and grow 8 to 10 feet. The fodder is much relished by stock, but it is not so valuable as some of the other varieties; 10 to 12 lbs. will sow an acre broadcast. Sow October and November. 1s per lb.

Japanese Millet. One of the finest fodder plants, of rapid growth, yielding large quantities of green fodder. Drought resisting. 6d per lb.

Broom Millet (White Italian). Valuable only for broom making. 6d lb.

CULTURE. The land should be deeply ploughed, harrowed, and rolled, and lightly harrowed a second time before drilling. Sow seeds in drills 3 feet apart; Sorghum at the rate of about a peck per acre; Millets rather less. September, October, November and December are the best months for sowing.

Selected Seed Maize

It is so difficult to fix prices for Seed Maize that we only give a list of the varieties we shall probably have for sale during the season, samples and prices of which we shall be pleased to send on application. When possible the Maizes will be selected cobs, and "topped and tailed," thus securing first-class seed; but they will be as per samples offered.

Anderson's Golden King. One of the finest Maizes grown; large even grain, without smut or disease, yielding 100 to 120 bushels per acre.

Clarence Wonder. Fine Maize; very early; deep grain, light yellow in colour; yields well.

Early Mastodon. A magnificent early variety; heavy cropper, nice even grain.

Golden Drop. A horse-tooth variety, giving excellent heavy crops.

King's Early. A good early variety of dwarf habit, yields well, and is a good colour.

White Ninety-Day (or Hickory King.) Not a large grain, but yields well.

Red Hogan, Iowa Silver Mine And other varieties.

Ninety-Day. A variety in large demand for green fodder.

SPECIAL QUOTATIONS FOR LARGE LOTS.

CULTURE. A fine, rich, black chocolate soil, not too sandy, is the very best for a maize crop. The land should be ploughed deeply, rolled, and a light harrow should be passed over it before planting. Sow 15 to 16 lbs. for seed crop in drills 3 feet to 4 feet 6 inches apart. For a green crop sow broadcast—say a bushel per acre, or 1/4-bushel in drills. Ninety-Day is best for that purpose. Keep land well scarified between rows, especially during dry weather; kill weeds, and sow from end of September to Christmas.

Maize

Our FARM SEEDS are specially selected

Permanent Pasture Grasses

Hints on Sowing; Cultivation of Grass Paddocks, &c.

Suitable Lands

The best results must always be expected from rich lands, but much can be done with even average soil if it is well prepared; the former will require no manure, but the latter will be greatly assisted by a good dressing of artificial fertilizers—say 3 cwt. of fine bone dust to the acre, the first cost of which will soon be repaid by the increased crop.

Preparation of the Land

Generally the better the land is worked the more satisfactory will be the results, and if the reader requires confirmation of this statement, let him look at any paddock of Oats, Barley, or other green crop which has been sown on land recently cleared and stumped, and he will find that wherever a tree has stood, the crop will be much higher than in any other portion of the paddock, the reason being that in removing the stumps by fire or otherwise the land has been broken up to a depth of probably 2 or 3 feet. It will therefore be seen that you cannot plough the land too deep before sowing grass seeds cross-ploughing will also do much to improve it and it will often be found that a rough harrow passed over the land before sowing will be desirable.

Manures for Grass Lands

The use of artificial manures cannot be too strongly recommended, because they contain all the fertilizing qualities of stable and cow manure, and also much that these do not possess, and also because they do not contain weed seeds, which all stable, and particularly cow manure does in very large quantities. Artificial manures last longer in the soil, and are more easily applied, and, when all is taken into consideration, they are best.

Seasons to Sow

Autumn sowing is best, and March and April are the best months, but later sowings can be made with advantage in many districts, and a favourable season will often also render this practicable. August and September are the best spring months, but all sowings should be complete by that time, as the young plants must be established to enable them to stand a dry summer.

Pasture Grasses

Imported English Grasses cannot be sown successfully in every part of the State. In the very hot and dry districts, which are liable to droughts, these Grasses are not at all suitable; but in districts where some of the land is rich, and where irrigation can be applied, Lucerne could be successfully cultivated as a forage plant.

The Seeds to Sow

The selection of grass seeds of a permanent character is an all-important matter; such seeds can only be obtained from old pastures. Farmers should be careful to sow only clean seeds, otherwise they will introduce into their farms all manner of weeds.

Grass Seed = Mixtures =

For Permanent Pastures

THESE Grass Seed Mixtures have been proportioned as the result of much experience in the supplying of seeds for laying down land to Permanent Pasture all over the State, and have given great satisfaction. We shall be glad to send particulars of other mixtures for pasture land on receipt of information as to locality, description of soil, etc., and to quote special prices when large areas are to be sown.

Cheaper Mixtures can also be supplied.
Quotations on application.

For the Warmer Districts

Mixture A

- 5 lbs. Cocksfoot Grass
 - 10 lbs. Perennial Rye Grass
 - 20 lbs. Prairie Grass
 - 3 lbs. Rib Grass
 - 2 lbs. White Clover
 - 40 lbs. Sufficient for 1 acre
- Price, per acre, 16s

Mixture B

- 20 lbs. Prairie Grass
 - 12 lbs. Cocksfoot Grass
 - 5 lbs. Rib Grass
 - 3 lbs. White Clover
 - 40 lbs. Sufficient for 1 acre,
- Price, per acre, 19s

For the Cooler Districts

Mixture C

- 15 lbs. Perennial Rye Grass
 - 4 lbs. Cocksfoot Grass
 - 10 lbs. Prairie Grass
 - 6 lbs. Mixed English Grass
 - 3 lbs. Rib Grass
 - 2 lbs. Wht. and Red Clover
- (where suitable)
- 40 lbs. Sufficient for 1 acre.
- Price, per acre, 21s

Mixture D

- 21 lbs. Perennial Rye Grass
 - 5 lbs. Cocksfoot Grass
 - 7 lbs. Prairie Grass
 - 2 lbs. Rib Grass
 - 5 lbs. Mixed English Grass
 - 3 lbs. White Clover
 - 2 lbs. Red Clover
- If land suits.
- 45 lbs. Sufficient for 1 acre.
- Price, per acre, 23s

The Seed Sowing

This is a simple matter; about 40 lbs. mixed seed (equal to 2 bushels) will be sufficient for an acre, and these should be sown broadcast over the land, and a day should be selected when there is not much wind, otherwise it will be difficult to sow evenly. The heavy seeds—Clover, Ribgrass, etc.—are better sown separately, and as it may be difficult to distribute evenly a few pounds of seed over an acre, we recommend that these heavy seeds be mixed with three or four times their bulk of sand or soil and then sown after the grass seed. The sowing completed, a roller or light harrow should be run over the ground, and this will be all that is necessary to cover the seed; and if the land was in good condition when seeded, or if rain should fall soon after, the young plants will make their appearance in a week or ten days.

Sowing with a Green Crop

This method is practised in England, but is not suitable for New South Wales, as the climatic conditions are altogether different; however, it is a capital plan to sow a green crop first on newly cleared land, as there is sure to be a great deal of weed seeds in the soil, which will come up with the crop and be killed by the second ploughing, leaving the land clean for the reception of the grass seeds to follow. It is advantageous to run a roller over the land when the grass is only a few inches high. The first crop of grass should be cut and not eaten down, as the young plants are liable to be pulled up if stock is turned in upon them. The second crop can, of course, be pastured. Do not allow young pastures to ripen seed for the first two years at least, as by so doing you weaken them, and the grasses will permanently die out; in the case of Rye Grass, the seed saved from young pastures is worthless, as it will not produce plants of a permanent character, but annuals only, which will die out after the first season.

Improving Poor Pastures

To improve bare or poor pastures we recommend the following course, which will in good seasons give splendid results:—Break up the bare patches with a heavy hoe, and during showery weather sow 30 lbs. mixed grass seed to the acre over the barest portions of the paddock, then pass a flock of sheep over it, driving them closely, so that they may tread the seed in where most wanted; this will take the place of harrowing or rolling. In dry seasons a large percentage of the seed sown in this way will be sacrificed, but that risk must be faced, as our plan is the best and the only one to thicken up old and poor pastures without breaking them up. To shut up a paddock, and allow the grasses to ripen their seeds, which, when ripe, will sow themselves, and thus improve the pasture, is not to be commended, as the seeds are just as likely to be blown to where they are not wanted as to be sown where they are required.

Italian Rye Grass

PRAIRIE GRASS (Bromus Unioides)

6s to 7s 6d per bushel.

Special prices for large lots.

A very early Summer Grass, growing very rapidly at that season, and continues to yield a fair amount of herbage throughout the autumn and winter in favourable seasons. It seeds very freely, and soon spreads by self-sowing. A nutritious fodder and pasture grass; one of the most valuable we possess. In rich land it will produce very heavy crops of the richest forage, and will afford five or six cuttings in the year. As a pasture grass it is first-class, being even richer in nutritious properties than the much-valued Perennial Rye Grass. It will give the best results in rich, moist land, but will do fairly on any soil, and should form part of all pasture mixtures. Two or three bushels will sow an acre.

SWEET-SCENTED VERNAL GRASS

(Anthoxanthum Odoratum) 1s per lb.

This perennial grass is liked on account of the perfume it imparts to meadow hay. As it starts early, it is a useful grass in pastures where the land is of a moist character. A pound or two should be added to all permanent pasture mixtures.

MEADOW FOXTAIL

(Alopecurus Pratensis) 1s 9d per lb.

One of the earliest and best pasture grasses. Its dwarf spreading habit renders it valuable for grazing purposes. It does not come to full maturity until the second year after sowing, and should, therefore, only be used in permanent pasture mixtures.

PERENNIAL RYE GRASS

(Lolium Perenne) 5s to 6s per bushel.

An excellent pasture grass; produces an abundance of fibrous roots, starts very early in spring. Possesses most nutritious qualities, and is relished by all kinds of stock. It bears depasturing well, and will succeed in an average soil. In the cooler districts of the State it thrives admirably, and yields surprising results. Samples of Rye Grass Seed differ so very much in quality that great care on the part of the purchaser is necessary. Seed from old pastures should be insisted on, none other is permanent, and cheap seed is generally found to be full of weeds, and therefore very dear. Two bushels will sow an acre.

POVERTY BAY PERENNIAL RYE GRASS

Price on application.

This is one of the best types of this fine grass so suitable for the cooler districts. It is vigorous in growth; yields a large amount of herbage, and is in every way a superior stock.

“I am getting the ‘Nambucca News’ to publish an article about the Phalaris Commutata Grass. I have had good luck from the seed I got from you, in fact from all the seeds I have obtained from you.”—A. H. COOK, Taylor's Arm, Nambucca River.—1-9-09.

Cocksfoot Grass

COCKSFOOT GRASS

(Dactylis Glomerata)

12s 6d to 14s per bushel.

This is perhaps the most generally useful of all the introduced grasses. It produces heavy crops of feed, which is greedily eaten by all kinds of stock; can be either depastured or cut for hay; grows rapidly after being cut or grazed, and will flourish on a variety of soils and situations. It is largely grown by dairy farmers and graziers, and one of the most prized of the imported grasses in New South Wales, owing to its hardy constitution and excellent fattening qualities, and it should be in every mixture. It reaches its greatest perfection in the cooler districts of the State. Two bushels will sow an acre.

COUCH GRASS

(Cynodon Dactylon) 1s 6d lb.

Special prices for large lots.

Bermuda Grass of America.

Doob Grass of India.

In dry seasons this grass is invaluable. It is esteemed as a pasture grass for its nutritious and flesh-forming properties. It will grow during the hot months of summer, and start into fresh green growths after rain. Its long succulent shoots run underground, and soon cover the surface of the land, rooting at every joint. It is a summer and autumn grass, and has no rival in dry, hot seasons. For a lawn or bowling-green this is without doubt the most suitable grass for the coastal and warmer districts, and if kept well watered and cut, it will produce a beautiful green carpet during the hottest weather. Sow 10 lb. per acre.

ITALIAN RYE GRASS

(Lolium Italicum) 5s 6d per bushel.

This is an excellent grass to grow for green fodder for dairying purposes. On rich, moist soil it will yield three or four heavy cuttings in a year. It is only a biennial, however, and not suitable for permanent pasture. Seed bearded. Two bushels will sow an acre.

CRESTED DOGSTAIL GRASS

(Cynosurus Cristatus) 2s per lb.

A valuable grass for sheep pastures, forms a compact turf, deep rooting, capable of resisting drought. Good lawn grass, but not strong-growing enough for cutting as fodder. Its chief value is for permanent pastures.

BUFFALO GRASS

(Stentaphrum Americanum)

Roots only can be supplied. These should be planted about 1 to 2 feet apart, according to the size of the roots planted, and desire for immediate effect, in autumn and spring. When once established it makes wonderful progress. After planting, topdress with manure, and water regularly until the roots begin to grow. Roots enough to plant 30 feet square, 1 foot apart, 5s.

SEEDS

Anderson & Co.

SYDNEY

PLANTS

PASTURE GRASSES, CLOVERS, &c.—continued

PASPALUM DILATATUM—The Great Dairying Grass

1s per lb., small lots.

10d per lb., in sack lots.

Special prices for large lots.

FINEST STRONG-GROWING SEED. This grass has proved a great success in the Northern River districts, and is particularly suitable for pasturing dairy cattle. It luxuriates under sub-tropical influences. It stands dry, hot weather admirably, yields a large quantity of herbage, and will soon spread. The seed, being very light, requires careful sowing, and should be sown at the rate of 2 lb. per acre mixed with other grasses, or 6 lb. per acre sown alone. The best time for sowing is in spring and early summer.

ROOTS can be planted nearly all the year round, but the very best time is early in spring and right through the summer until April, when they take root at once and make vigorous growth. Roots planted later than this do not make a start until the warm weather again sets in. We can supply strong young plants at 10s. per 1000, or 1s. 6d. per 100. The number required for planting one acre is 1750 to 1800—5 feet apart each way. This fine grass is very suitable in very warm districts; and does well upon dry land, and withstands both drought and frost. A great stock feed.

PASPALUM VIRGATUM

4s 6d per lb.

This fine grass is very suitable for warm districts; does well upon dry land, and withstands both drought and frost. A great stock feed.

WALLABY GRASS

(Danthonia Semiannularis)

1s 9d per lb.

A valuable native forage grass that adapts itself to almost any condition of soil or climate, and is recommended for systematic cultivation.

Timothy Grass

PHALARIS COMMUTATA (The Great Winter Grass)

Seed should be sown from January until April or May, early germination being of great importance if desired for transplanting; give the plants plenty of room; they subdivide well, and are easy of propagation in that way, and if sheltered can be grown on and planted out in spring. It grows very rapidly, attaining a height of 7 to 8 ft., and makes excellent hay, yielding some 8 tons per acre. During the growing season the green herbage is very rich and good.

1s per pkt.

Special price at per lb. and for quantity.

ROOTS.—Strong plants, 1s 6d per 100, 10s per 1000.

TIMOTHY (Phleum pratense) 9d per lb.

A very productive and nutritious grass suitable for hay, green fodder, or as one of the grasses in permanent pasture mixtures. In rich soil it yields enormous crops of fodder, while in poor soil it is also productive, sown with other grasses for grazing, when its luxuriant character will be altered, as it readily accommodates itself to circumstances. Sow in autumn and spring

SMOOTH-STALKED MEADOW GRASS

(Poa Pratensis)

1s per lb.

(**Kentucky Blue Grass.**) A good pasture grass; suits the coast and cool districts, and will thrive in poor land. It forms a thick turf, and prefers sandy loam. Should form a portion of all pasture grass mixtures; is one of the very best herbage grasses in cultivation.

WOOD MEADOW GRASS (Poa Nemoralis)

Very scarce and dear; price on application.

A fine grass for sowing on natural pastures in country shaded by timber; it will also grow well in open country. Very nutritious, though not remarkable for abundance of yield; desirable grass for pasture mixtures.

ROUGH-STALKED MEADOW GRASS

(Poa Trivialis)

1s 9d per lb.

Suitable for pastures, and much relished by stock. All these meadow grasses prefer light soils, and may be sown at any time during the autumn or spring, when the soil is in suitable condition and the weather favourable.

EVERGREEN MEADOW GRASS (Poa Sempervirens)

Very scarce and dear; price on application.

This grass stands drought well, and is one of the most valuable of the Poas. Very suitable for lawn mixtures for cooler districts.

RHODE'S GRASS (Chloris Gayana) 3s 6d per lb.

This famous grass has now fully established itself, and is recognised as a most valuable fodder grass. Sow seed autumn and spring, and during summer. 1 to 2 lb. seed will sow an acre. Roots, 1s. 6d. per 100; plants, 10s. per 1000; 1750 to 1800 plants, 5 ft. apart, are required per acre.

Special Leaflet on Cultivation, etc., on application.

Paspalum Virgatum. Fine Grass for Dry Country.

Kentucky Blue Grass

Meadow Fescue

RIB GRASS

(Plantago Lanceolata) 6d per lb.

In spring and other seasons, when moisture is abundant, the Rib Grass yields an enormous amount of rich herbage, and should be included in all pasture mixtures. Sow with grasses 2 or 3 lb., or 20 lb. if alone, to the acre.

SHEEP'S FESCUE

(Festuca Ovina) 1s per lb.

A very hardy pasture grass, most suitable for sowing on the tablelands of the State; thrives on any average soil, and will even grow luxuriantly on poor land. It stands dry season fairly well, relished by stock, suitable lawn grass cooler districts.

MEADOW FESCUE

(Festuca Pratensis) 1s 6d per lb.

A valuable grass for permanent pasture on all good but not too dry soils. Its leaves are succulent and tender, and it never forms rank turfs. Much liked by cattle.

TALL FESCUE

(Festuca Elatior) 1s per lb.

Productive and vigorous growing variety, much relished either as a pasture or hay. Strong and moist soils are suitable for its growth.

HARD FESCUE (Festuca Duriuscula) 1s per lb.

A variety of Sheep's Fescue, somewhat taller, and a good pasture grass for soil of a sandy or light nature. It will not grow well on heavy land; but on suitable soils, even when they are by no means fertile, it is both productive and nutritious.

RED OR CREEPING FESCUE (Festuca Rubra)

1s per lb.

Another variety of Sheep's Fescue, having spreading or creeping roots, making it a desirable grass for binding loose sandy soils, or light soils liable to occasional floods; this grass also lends efficient aid in forming permanent pastures.

RED TOP GRASS (Tricholaena Rosea)

3s 6d per lb.

This is a splendid heavy cropping grass, making splendid hay or chaff, and growing to a height of 3 feet. It stands drought well, but dies down during frosty weather, to grow again strongly in the spring and summer; it suits the warmer parts of the State. Seed germinates freely, and the grass is not easily killed by other pasture grasses. Sow in the spring at the rate of 2 lb. to 3 lb. per acre mixed with other grasses; 12 lb. if sown alone for hay.

BROMUS INERMIS

1s per lb.

This is one of the finest fodder grasses in cultivation. It yields large crops of rich succulent food and stands drought well. Sow in spring, 25 lb. to the acre broadcast. It will stand for years, and can be cut for a hay crop.

SEEDS

Anderson & Co.

PLANTS

SYDNEY

**PERENNIAL RED CLOVER
OR COW GRASS**

(Trifolium Pratense Perenne) 1s 3d per lb.

This is the grand old Red Clover of the English meadows, which is relished by all stock, has splendid fattening qualities, and should be in every pasture mixture sown on the tablelands of the State and cooler districts; a good fodder plant, and makes fine hay. Sow in autumn, 2lb. only when included in pasture mixtures.

RED CLOVER (Trifolium Pratense)
9d to 10d per lb.

This is a fine Clover for pasture lands, but is a biennial only; the flower is a dull rose colour, and affords a rich feed.

SCARLET CLOVER (Trifolium Incarnatum)
9d per lb.

Excellent for a green crop, of fine quality; large yield, quick growth, and relished by all kinds of stock; if sown on grazing land, care must be taken that it is kept fed down, as if it is eaten by stock when in flower it has an injurious effect. It has a beautiful crimson flower. Sow 20 lb. per acre.

WHITE CLOVER (Trifolium Repens)
1s 6d per lb.

White Clover has long since become naturalised in many districts, and is very generally found on alluvial flats. It is valuable in pastures, either for dairying or fattening, and will thrive on comparatively poor land. In dry and hot weather the herbage withers and disappears, but again makes a vigorous growth in the spring. Sow February to May; 2 to 4 lb. will be sufficient for an acre if mixed with grasses.

**PASTURE GRASSES
CLOVERS, &c.—cont.****STRAWBERRY CLOVER**

(Trifolium Fragiferum) 6s per lb. in husk.

A fine Clover for low-lying lands; has great fattening qualities. It is of a trailing habit, and quite different in appearance to all other Clovers.

ALSIKE CLOVER (Trifolium Hybridum)
1s per lb.

A heavy yielding and excellent Clover, but requires a moist situation. Sow in September, if the land is moist, otherwise March or April; 5 to 6 lb. of seed for mixing with pasture grasses will be sufficient.

TREFOIL OR YELLOW CLOVER
9d per lb.

This is a hardy Clover for sheep pasture and very useful in the colder districts, but it is not of the same value as either the Red or White Clover; it is very free growing, spreads easily, and is difficult to eradicate.

NATIVE TREFOIL or BURLESS CLOVER
(Medicago Obicularis) 1s per lb.

This fine herbage plant is largely grown in New South Wales, and produces during good seasons a large amount of feed. Sheep are very fond of this plant; closely allied to the well-known Lucerne (Medicago Sativa).

TRIFOLIUM SUBTERRANEUM
3s 6d per lb.

The best time to sow this useful exotic Clover is in March, when the soil is in a favourable condition to receive the seed. If sown alone it will take 15 lb. to the acre, but if sown with grass mixtures 4 lb. will suffice for a similar area.

The King of all Fodder Plants!**LUCERNE**

(Medicago Sativa)

Samples and Prices on application

NEW SOUTH WALES GROWN SEED
of the True Broad-leaved Type. We have a limited stock, but owing to the disastrous floods in the Hunter River and Tamworth districts, supplies for 1910 will be uncertain.

IMPORTED LUCERNE

Many of our clients are now using the finest type of IMPORTED SEED. We offer

Finest TURKESTAN LUCERNE**Finest PROVENCE GROWN****Re-Machined**

Each year the acreage under Lucerne increases, and this grand fodder crop is more than ever being recognised as the **KING OF FODDER PLANTS**. Sales of our re-cleaned genuine Colonial-grown samples have increased very largely, and are always to be relied on.

No Dairy Farm should be without a large paddock of Lucerne, as it largely increases the yield of butter, gives enormous crops of green fodder in succession, and is a great standby in dry seasons if a good supply of hay has been secured. Every station or home farm should have its Lucerne paddock for the same reason; and if the small selector is wise he will make this one of his first cares—to sow a small paddock of this valuable crop on the best land he has, being careful that the soil is thoroughly well worked. Lucerne can be used either as a green crop or as hay, and all stock thrive well upon it. The land intended for it must be well and deeply tilled, and deep alluvial soil is most suitable, although any well-worked average land will produce fine crops. Sow in drills about 10 lb., and broadcast about 15 lb. of seed to the acre. The best time for sowing, under ordinary circumstances, is Autumn; but spring sowing is also successfully practised by large growers.

Colonial Grown Broad Leaved Lucerne One Month's Growth. Irrigated.

**Anderson's
LAWN GRASS**
SeedsFOR MAKING NEW AND
RENOVATING OLD**Lawns, Tennis Grounds, &c.**

For the Cooler Districts of the State.

1s 6d per lb.; 25s per bushel of 20lb.

We confidently recommend this mixture as being free from weeds and coarse grasses, and such as will give great satisfaction and produce a fine sward, but as this mixture is exclusively made up of English grasses it is more particularly suitable to the cooler regions of the State. The seed should be sown thick, and the grass regularly watered during dry, hot weather. Sow at the rate of 40 to 45 lb. per acre.

Lawns of COUCH GRASS

For Coastal and Warmer Districts of the State

In the warm districts of our State there can be no doubt that Couch is the hardiest and most reliable grass for a lawn or bowling-green, and it can be provided either by turling or by chopping up the roots into short pieces of about two or three inches, and planting them in rows, about six inches apart, covering them right over. It is a mistake, however, to suppose that any lawn or bowling-green can be kept in good order without constant care; they must be cut regularly with a mowing machine. (Our machines are very light and effective, and not costly). The grass must be top-dressed at least once a year, and, above all things, it must be thoroughly watered during dry weather. A green velvet carpet can be produced in time with Couch Grass from seed if sown at the proper season, at the rate of about 10 to 15 lb. per acre. Sow September, October and November.

1s 6d per lb. Special price for large lots

AUSTRALIAN SEEDS

Native
Salt Bush Seeds

HOW TO SOW SALT BUSH SEED.—The best time to sow Salt Bush Seed is in early spring or early autumn when the ground is moist. Under such conditions the seed will germinate quickly. The seed should be sown in patches—about half-a-dozen seeds together—at distances of about 30 yards for the tall-growing kinds, and 5 yards for the dwarf-growing sorts, and from half-an-inch to an inch deep. If the soil is of a strong, tenacious character, the seeds should be covered with some light decayed vegetable matter. The seed can be put in with the aid of a light hoe. It is not necessary to plough the land preparatory to sowing.

ROUND-LEAVED OR OLD MAN SALT BUSH (Atriplex Nummularia) 3s per lb.

This Atriplex attains a height of 6 to 10 or more feet. The leaves are variable, but are mostly round, rather thick,

CREeping SALT BUSH (Atriplex Semibaccata) 4s per lb.

This is a procumbent or prostrate perennial plant, with herbaceous stems, spreading from $1\frac{1}{2}$ to 2 or more feet. The whole plant is pale green, though sometimes it is nearly white. It is a most valuable plant for sheep; they eat it with avidity, and thrive remarkably well on it. Single plants are said to have covered a diameter of 16 feet in one season.

SLENDER-FRUITED SALT BUSH (Atriplex Leptocarpa) 3s per lb.

The drought-enduring qualities of this fine Salt Bush are truly remarkable. Sheep are particularly fond of this plant, and eat it right down to the ground. Leaves are variable, mostly oblong, 1 to 2 inches in length.

HALIMUS-LIKE SALT BUSH (Atriplex Halimoides) 3s per lb.

A dwarf bush. The whole bush has a glaucous or whitish appearance. Its leaves are variable. Both sheep and cattle thrive well on this plant.

ALL-FRUITED SALT BUSH (Atriplex Holocarpa) 4s per lb.

It produces rich succulent herbage, of which sheep are extremely fond. It is a most valuable fodder plant, and patches or paddocks of it should be conserved.

Native Grasses

MITCHELL GRASS (Astrebla Triticoides) 8s per lb.

This grand perennial Grass is found on rich soil all over the interior, but nowhere in large quantity. Under good cultivation it yields a very large amount of rich succulent herbage, stock being very fond of it. It is said cattle will fatten on its dry broken stems and leaves.

BLUE GRASS (Andropogon Sericeus) 7s per lb.

A splendid and valuable pasture grass, and makes considerable growth during winter, and is thus doubly valuable to the grazier. During the summer it yields an amount of rich, leafy, bottom herbage, of which sheep are particularly fond, and fatten well on it. It will stand close feeding, and makes capital hay.

Native Hardwood and Other Tree Seeds

Eucalypti

We use every care in the collecting of these Eucalypti, and give special attention to export orders, but sell them on the distinct understanding that we supply them under the Botanical names by which they are known in Australia, and that we are not to be held liable for results.

The value of the timber of the Australian Eucalypti has now been generally recognised all over the world. As hardwood timbers, some of the Eucalypti have no equal, and possess high qualities for resisting the attacks of the dreaded Terebro for submarine work. Some of them are so hard that they may be said to be almost indestructible. For street paving they are the best in the world, and their value is fully recognised. Eucalyptus Globulus (Blue Gum of Tasmania), is of very quick growth; has valuable hygienic properties, well known in Europe. Special Quotations to large Buyers.

E. AMYGDALINA (Messmate) 15s per lb.
A first-class timber for flooring-boards, joists, and other house carpentry. Not a good fuel. 150 to 200 feet.

E. BICOLOUR (Black Box) 17s 6d per lb.
Equal to the best Ironbark, and more easily worked. 100 to 150 feet.

E. CITRIODORA (Lemon-scented Gum) 5s per oz.
A useful timber; delightfully scented leaves.

E. CORYMBOSA (Bloodwood) 17s 6d per lb.
Timber first-class for posts, piles, and such like; extremely durable in the ground. 150 to 200 feet.

E. CORYNOCALYX (Sugar Gum) 30s per lb.
Timber very durable, used for railway sleepers, etc.

E. DIVERSICOLOUR (Karri Gum). 20s per lb.
A quick grower, straight stemmed. Wood is light in colour, bends freely, is straight-grained and tough. Grows 300 to 400 feet.

E. ERYTHRONEMA 1s per pkt.
A graceful shrub or small tree, native of the drier parts of Western Australia. One of the prettiest of the Eucalyptus of the West. Flowers vary from a flesh pink to a beautiful glowing red.

E. FICIFOLIA (Crimson Flowered Gum) 2s 6d per pkt.
Does not exceed 30 feet in height; has beautiful bright crimson flowers; very fine for the shrubbery.

E. GLOBULUS (Tasmanian Blue Gum) 15s lb.
A splendid fast-growing timber tree.

E. GONIOCALYX (N.S.W. Blue Gum) 15s lb.
A fine timber, largely used for fencing and building.

E. GUNNI (White Gum) 17s 6d per lb.
One of the hardest Gums; bushy, and only attains a height of about 30 feet. Cattle will browse on the foliage.

E. HAEMASTOMA (White Gum) 15s per lb.
A good domestic fuel. 50 to 100 feet.

E. HEMIPLIOIA (Common Box) 15s per lb.
Strong, tough and durable, but will not last sunk in the ground. First-class fuel. 100 to 150 feet.

E. LEUCOXYLON (Ironbark) 15s lb.
Of great strength and durability; exceedingly hard; largely used for underground work.

E. LONGIFOLIA (Woollybutt) 15s lb.
Fair timber for fencing and building purposes; good fuel; very durable. 100 to 200 feet.

E. MARGINATA (Jarrah of West Australia) 20s lb.
Very excellent timber; one of the most durable woods known; resists Terebro.

E. MELIODORA (Yellow Box) 15s lb.
One of the strongest and most durable timbers.

E. OBLIQUA (Stringybark) 15s lb.
The best wood for flooring boards, rafters, and sawn stuff generally; of quick growth, inferior fuel, but produces the best charcoal for the forge. 120 feet.

E. OBTUSIFOLIA (Yellow Blackbutt) 15s lb.
Like the preceding, but softer and more easily worked; quick grower. 150 feet.

E. OCCIDENTALIS 20s per lb.
The "Flat-topped Yate" of Western Australia. It bears a profusion of yellow flowers; ornamental.

E. PANICULATA (White or Grey Ironbark) 15s per lb.
Timber valuable, used by coachbuilders and wheelwrights; very lasting and good fuel. 150 feet.

E. PILULARIS (Blackbutt) 15s per lb.
Like Stringybark, and used for similar purposes; small spars are used for shipping. 150 to 200 feet.

E. PIPERITA (Peppermint Gum) 15s per lb.
The wood is used for same purposes as other Stringybark trees. Foliage rich in volatile oil.

E. REGNANS (Mountain Ash) 80s per lb.
The wood is fissile, well adapted for shingles, rails, staves, inner building material, etc.

E. RESINIFERA (Forest Mahogany) 17s 6d per lb.
Very durable and fine for housework.

E. ROBUSTA (Swamp Mahogany) 15s per lb.
Good lasting timber for house carpentry; not durable in the ground.

E. ROSTRATA (River Red Gum) 20s per lb.
Lasts equally well above or below ground, or in water; largely used for wood blocks in street-paving.

E. SALIGNA (a Blue Gum) 15s per lb.
A fine fencing timber.

E. SIDEROPHLOIA (Dark Ironbark) 20s per lb.
Valuable for every purpose for which strength and durability are required. One of the strongest of all Australian timbers, and is used for a great number of purposes, and is superior to most as a fuel. 150 ft.

E. TERETICORNIS (Grey Gum) 15s per lb.
Very strong, durable hardwood, almost equal to Ironbark; lasts in the ground; inferior fuel. 150 feet.

E. VIMINALIS (Manna Gum) 20s per lb.
Used for shingles and rails, and as rough building material; very strong.

There are many other varieties of Eucalyptus that are not included in this list, but of which we can supply the seed and full information regarding their properties if required.

Hedge Seeds
Wattles, etc.

SPECIAL QUOTATIONS TO LARGE BUYERS.

AFRICAN BOX THORN 1s per oz.; 10s per lb.
(Lycium Horridum). One of the best hedge plants; hardy. shoots are armed with strong thorns; plants bear clipping well. Sow in spring, and plant out during the following winter.

OSAGE ORANGE (Maclura Aurantiaca) 6s per lb.
A deciduous shrub, bearing short sharp thorns and bright green leaves. Height, 12 feet.

ACACIA DECURRENS (Black or Green Wattle) 2s 6d per lb.

ACACIA PYCNANTHA (Golden Wattle) 1s 6d lb.
Both A. Decurrens and Pycnantha are largely grown for the bark, for tanning purposes.

ACACIA SPECTABILIS 6d per pkt.
A highly ornamental variety.

ACACIA DEALBATA (Silver-leaved Wattle) 8s per lb.
A very pretty ornamental variety.

ACACIA BAILEYANA 8s per lb.
The well-known Cootamundra Wattle.

ACACIA PENDULA (Weeping Myall) 1s per pkt.
A handsome tree which grows some 20 feet. Cattle and sheep are both fond of the young growth. A splendid timber, dark brown colour, heavily veined.

CASUARINA

Commonly known as Oaks, though not allied to the Quercus or English Oak. The following are the most used:

TORULOSA (Forest Oak) 15s per lb.
Largely used for shingles, and greatly in favour for fuel for domestic use; burns to a white ash. 40 ft.

STRICTA (She Oak) 15s per lb.
More tough than other species; used for tool handles, 20 to 30 feet.

QUADRIVALVIS (Swamp Oak) 15s per lb.
Fuel, shingles and handles. 60 to 70 feet.

SYNCARPIA

LAURIFOLIA (Turpentine) 20s per lb.
One of the largest timber trees; most suited for piles or jetties. 150 to 200 feet.

ANGOPHORA

SUBVELUTINA (Apple Tree) 20s per lb.
Much used for bullock yokes, wheel naves, and any purpose requiring toughness with lightness.

I beg to acknowledge receipt of seeds, trees and plants in splendid condition. I congratulate you on your splendid packing, I think the paper wrapping is an improvement, as the Rose trees are not in the least shrivelled, and the Carnations quite fresh, although they were not unpacked for nine days, through my absence from home. I take the earliest opportunity of remitting.
—Mrs. E. A. MARKWELL, Wallace-street, Warwick, Q.—23-6-09.

THE ORCHARD

The Land

It is not necessary that the soil chosen for an orchard should be rich, although such land will always produce splendid crops after the trees are a year or two old. In their earlier stages, on rich soil, trees are always liable to make too much young wood, and require hard pruning. Any ordinary average soil will grow fruit trees, provided it is well worked. It is not necessary to trench the ground unless the subsoil is very stiff; then we recommend that it should be trenched, and a thorough system of drainage should be adopted if necessary. This can be done by putting in rubble, pipe, or timber drains to a depth of three feet, in rows, and twenty to thirty feet apart, so as to carry off all surplus water from the subsoil as quickly as possible. In trenching the ground the greatest care should be taken not to bring the stiff clay subsoil to the top; it should only be broken up in the bottom of the trench. On land of a fairly good depth, and open subsoil, digging and ploughing will be all that is required to prepare it for the fruit trees, but the question of drainage must not be overlooked unless a naturally drained slope has been selected; on strong, stiff soils drainage is absolutely necessary.

Planting

To prepare for fruit trees, the land should be measured off into rows 20 to 30 feet apart, and the trees should stand at the same distance from each other in rows, so that they will be 20 to 30 feet apart each way, and if the planting is done as shown in the block—which is known as the quincunx plan—the trees will be in straight lines if looked at from any part of the orchard, and will give the cultivator every facility to work between them. The holes to

Quincunx Plan

receive the trees should be dug to a depth of 18 inches, and made wide enough to allow the roots of the young trees to spread out. The soil in the bottom of the hole should be broken up as fine as possible, then a good stout stake should be driven into the centre of it.

Examine the roots of the tree, and remove all bruised or broken rootlets with a sharp knife, then place it in the hole close to the stake, and spread out the roots carefully and as horizontally as possible; drop the fine soil on to the roots until the hole is about one-third full; then gently shake the tree from side to side and lift it slightly from time to time with an up-and-down motion; the object of so doing is to allow the soil so shake down among the small roots; then fill up the hole to the level, and tread the soil lightly around the tree; secure it to the stake in two places, near the ground and near the top, and the planting is completed. Trees should be planted not more than a couple of inches deeper than they stood in the nursery.

ITS PLANTING & ITS CARE!

Manure

It is not desirable to give young trees manure in the earlier stages of their growth, as it is liable to promote an overgrowth of young wood, and if the land is virgin soil, or if it has been out of cultivation for some years, the breaking it up for the fruit trees will be quite sufficient to cause them to grow freely for a year or two at least, but if the land is naturally poor a good dressing of bone-dust or other manure can be given to the trees at a later date if they show any signs of stunted growth.

Aspect

In selecting a site for an orchard an easterly to a north-westerly aspect should be chosen if possible. The matter of shelter, if not naturally provided, should be of the first importance, as also natural drainage and convenience of position.

Time to Plant

Deciduous fruit trees, or summer fruits as they are sometimes incorrectly called, such as Peaches, Plums, Cherries, etc., should be planted during May, June, July and August, and, if the weather is favourable, the earlier the better. Evergreen trees, such as Oranges, Lemons, etc., can be planted at almost any season of the year, but from April to June, and September to November, are the best months. Only plant in July and August, in localities fairly free of frosts.

Position for Various Fruit Trees

If the orchard is on a slope, the highest parts should be allotted for Apricots, following on in succession in the order named down the slope, with Peaches and Nectarines, Plums, Apples, Pears and Quinces. If the situation is sheltered and the climate suitable, the Citrus family (Oranges and Lemons) should be planted near the centre of the plantation.

The Trees We Supply

THE STOCKS USED. No point in the propagation of Fruit Trees is more important. This receives our very special attention. Trees which are worked either on unsuitable or unhealthy stocks will never prove satisfactory, and will always be a cause of disappointment.

APPLES.—We work on Northern Spy stocks, well free from the ground.

PEARS.—On Seedling Pear; they will not sucker; deep-rooting, and very vigorous.

CHERRIES.—On Seedling Mazzard; without doubt by far the best Cherry stock.

PLUMS.—On Myrobalan and Mariana Seedlings—some on Seedling Peach, best suited for warm dists.

APRICOTS.—On Seedling Apricots, which we prefer, as in our opinion they produce better results; also on Peach and Plum stocks, which some growers prefer.

PEACHES, NECTARINES and ALMONDS.—On a Seedling Peach of robust and hardy constitution.

VINES.—On their own roots, and also on Phylloxera-resistant stocks (see lists).

ORANGES.—On Orange and Lemon stocks.

LEMONS and MANDARINS.—On Orange and Lemon stocks.

First Pruning of Young Trees

When the deciduous trees are planted they should be cut back to the height fixed upon for the trunk. If there be no lateral branches, three buds only should be allowed to push out from the head of the tree. This will generally be the case with Apples and Pears, but Peaches and such like will often have several lateral branches. In that case cut the leader to the height required, and cut off all the laterals except three near the top; these should be left to form the head, but should be shortened. Each tree after planting may be painted with sulphur, lime and salt to destroy any insect pest which may possibly be hidden in the bark. As the majority of our trees have already been headed and formed in the nursery, all that is necessary is to cut back the head to within three or four buds of the branches from the barrel, say, four equally balanced limbs, at 20 to 22 inches from the surface of the soil.

When young fruit trees are properly summer pruned during the first few years after planting, it conduces to the early development of fruit-bearing spurs on such trees as Apples, Apricots, Pears, Plums, etc. If the operation is skilfully performed, the vigour of the whole, or any particular part, can be reduced or limited. By systematically pruning in summer, much good will not only result to the branches retained, but there will be less need for cutting severely in winter, and consequently the strength of the trees will be conserved. Summer pruning must not be done before the shoots have reached a certain stage; otherwise the buds at the base of the spurs left will develop growth the same season, instead of remaining dormant, and forming into fruit-bearing buds for the following crop. Generally, the most suitable time is when the growth becomes firm for about half its length, which should be shortened there or a little higher up, according to the vigour of the tree. The summer pruning of such fruit trees as Nectarines and Peaches, which do not usually bear fruit on spurs, will require different treatment. The fruit of these trees is mostly borne on what is called young wood—that is, growth made during the previous year. Therefore, only the useless and superfluous growths should be removed.

Disbudding may be considered a part of summer pruning for by the judicious removal of the developing shoots at such an early stage of growth will not only conserve the strength of the trees, but will save a lot of labour which would have to be expended in cutting them out after they became woody.—Abridged from ANDERSON'S MANUAL OF THE ORCHARD.

Varieties to Plant

If, as a commercial speculation, a large area is being planted, we cannot too strongly emphasise the necessity of confining the plantation to a few well-tested varieties that do well in the locality, and have proved profitable.

Frequently we hear orchardists regretting the error they made when first planting, in having TOO MANY VARIETIES, and consequently they have never sufficient of any one sort to enable them to place on the market in a satisfactory manner.

Ascertain what is doing well in your locality, and confine yourself to this sort, leaving an odd row or so for experimenting with new importations

Grape Vines

European Grape Vines should be placed five feet apart each way, in straight lines, that the plough may be used either across or along the vineyard. If the land be rich and deep, the distance between the vines should be increased to 6, 7, or 8 feet. The American Grape Vines do better on a trellis, as the training and pruning that suits them best is quite different from that employed for others. These may be planted 10 or 12 feet apart, along each side of a trellis which covers a broad walk. Rooted Vines may be planted at any time from June till September, pruned back to two or three eyes.

For further Information on Orchard Work, see
**"Anderson's Manual of the Vegetable
 Garden and Orchard"**

(FULLY ILLUSTRATED)

Our Select List of Choice Fruit Trees

for 1910

When Selecting Fruit Trees

Medium sized trees, with plenty of fibrous roots, are much superior to old over-grown trees. If fruit is grown for sale, have a larger number of trees of a few approved good sorts, in preference to a large variety in small lots. Customers who have no knowledge of the best market varieties should leave selection to us.

80s per hundred. Packing Free.
Fifty Apple Trees supplied at hundred rates.

APPLE TREES prefer compact, sandy loam, with shelter from west and south. Stiff, clinging land is not suitable, but any good average light soil will give good results. Young trees generally grow too fast, therefore strong growth should be checked by pinching back shoots in summer, and by winter pruning of roots. All our trees are worked on Northern Spy stocks.

- 1 Adams' Pearmain. Excellent quality. 2 D L.
- 2 Alexander. Large showy. 1 K M.
- 3 Allington Pippin. Medium size, oval, conical, skin clear yellow, flaked crimson. 2 D M.
- 4 Allsop's Early. An extremely early variety; very showy fruit. 2 K D E.
- 5 Aitkin's Seedling. Early variety; ripens Xmas. 2 K D E
- 6 American Golden Pippin. Excellent. 2 K D L.
- 7 Annie Elizabeth. Fine for export. 1 K D L.
- 8 Apple of Commerce. Highly coloured, late keeping; large, roundish; delicious. 1 D L.
- 9 Baldwin. Grand cold country apple. 1 K D L.
- 10 Beauty of Bath. Fine quality. 2 D E.
- 11 Beauty of Kent. Large, fine quality. 1 K M.
- 12 Boston Russet. First-rate flavour. 2 D L.
- 13 Blenheim Orange. Deep orange skin, red stripes, large sized; yellow flesh. 1 D L.
- 14 Black Ben Davis. Imp. Ben Davis. 1 D L.
- 15 Buncomb, or Red Winter Pearmain. Fine Colour and flavour; keeper. 2 K D L.
- 16 Ben Davis. Grand keeper. A. 2 D M.
- 17 Calville Blanche d'Hiver. Fruit large; pale greenish yellow; ripens late. 2 D L. 1/6
- 18 Carolina Red June. Beautiful fruit, red purplish skin; juicy. 2 K D E.
- 19 *Carpenter's Nonsuch. Spicy flavour. 1 K D M.
- 20 *Carrington (Smith's). Fine apple. 2 D E.
- 21 Champion. Very late; firm skin, deep golden yellow; early cropper. 2 D L.
- 22 Claygate Pearmain. Abundant. 2 D L.
- 23 Cleopatra. Large, crisp. 1 D L.
- 24 Climax. Skin yellow, streaked red; flesh yellow, crisp and juicy; very sweet. 2 D E.
- 26 Cox's Orange Pippin. One of the best. 2 D M.
- 27 *Creases (Frampton). Bright red. 1 K D L.
- 28 Delicious. One of the best late keeping apples; delicious flavour. 2 D L.
- 29 Devonshire Quarandean. Best early. 2 D E.
- 30 *Duchess of Oldenburg. A very beautiful and useful variety. 2 K D M.
- 31 Early Harvest. Medium round; bright straw colour; needs good cultivation. 2 D E.
- 33 Esopus Spitzenberg. Tender, juicy. 1 D M.
- 34 Fishkill. Fruit roundish oblate; size, medium to large; colour, creamy white, with bright blush; flesh white, tender, juicy; sub-acid flavour. 2 K D M. 1/6
- 35 *Five Crown Pippin. (London Pippin). Valuable for all purposes. 2 K D L.
- 36 French Crab. Medium size, globular; splendid keeping apple. 2 K D L.
- 37 Gannon Grove. Suitable for warm districts. Deep orange, stripes and blotches vermilion. 2 K D E.
- 38 Gavenstein. Synonymous with Carpenter's Nonsuch.
- 39 Golden Russet. Very rich, high aroma. 2 D L.
- 40 Granny Smith. Heavy bearer; keeps. 2 K L.
- 41 Green Sweet. Fruit roundish oblate, inclining to conical; med. size, green; flesh white, tender and juicy, and very sweet; very late. 1 K L.
- 42 Hover. Flesh yellowish, firm, juicy. 2 D L.
- 43 Huntsman. Large; yellow flesh; sub-acid; very good winter. 1 K D L.
- 44 *Irish Peach. Early blight-proof. 2 D E.

- 45 Jeneton (Ralls). Pale red, striped light yellow; flesh nearly white. 1 K D.
- 46 John Sharp. Blight-proof and productive. 2 D M.
- 47 Jonathan. Beautiful dessert fruit; rich. 2 D L.
- 48 Keswick Codling. Productive, early. 1 K E.
- 49 Kentucky Red Streak. Good. 2 K D L.
- 50 Lady Sweet. (True.) Raised in N. Y., large, roundish-conical; yellowish green, striped red; flesh greenish white, tender, juicy, crisp and sweet; season very late. 2 D L.
- 51 Late Wine. Skin shaded light crimson. 2 D L.
- 52 Lemon Pippin. Fine baking apple. 2 K D L.
- 53 Ligne Tillisch. Fruit large size, very showy. 1 K D.
- 54 Lord Nelson. Showy; first-rate. 1 K D M.
- 55 Lord Suffield. Handsome, large. 1 K E.
- 56 *Lord Wolseley. Firm and juicy. 2 D L.
- 57 *Magg's Seedling. Skin yellow, fruit striped, juicy and firm. 2 K D L.
- 58 Malden's Blush. Tender, pleasant. 2 D E.
- 59 Marjorie Hay. Early dessert; fruit large, conical, striped and mottled with lively red. 1 D E.
- 60 McIntosh's Red. Good for both hot and cold climates, rich, red stripes, flesh white. 2 D L. 2/-
- 61 Mobbs Royal. Extra large, good. 1 K M.
- 62 Milden. Fruit large; oblong-conical; deep red stripes; flesh sub-acid; good dessert or kitchen; fairly late. 1 D K M. 1/6
- 63 Mo Pippin. Pale ground, striped red; flesh crisp. Keeps through winter. 1 K D.
- 64 Minkler. Medium, red, acid; good. 2 K D M.
- 65 *Munroe's Favourite. Skin yellow, with reddish brown. 1 K L.
- 66 New York Pippin. Synonymous with Cleopatra.
- 67 Newtown Pippin. Fine dessert. 2 D L.
- 68 Nickajack. Large, dull red striped, firm, great bearer and keeper. 1 K D L.
- 69 *Northern Spy. Tender, delicious. 1 D L.
- 70 Ontario. Canadian var. Large conical, yellowish-white, overspread and striped with deep red; flesh fine, tender and juicy, with sub-acid flavour; very late. 1 D L.
- 71 Palouse. Fruit medium to large; conical; pale yellow, striped and splashed; flesh yellow, crisp. Mid-season apple. 2 D L.
- 72 Peasgood's Nonsuch. Large handsome. 1 K D M.
- 73 Perfection. Richly coloured, fine fruit. 2 D L.

PLANTS

SYDNEY

APPLES—continued

- 122 **Edward VII.** A cross from Blenheim Orange and Golden Noble; one of the very best late kitchen and table apples; very prolific. 1s 6d.
- 123 **Thorle Pippin.** Medium size; clean growth, and hardness of the tree recommend it as an invaluable variety. 1s 6d.
- 124 **King David.** "King David" is a rich dark-red apple, with yellowish flesh; flavour good, juicy, rich. 2s.
- 125 **Marchales Red.** Fruit very large, oblong, quality very good, slightly acid in flavour; extremely heavy cropper. 1s 6d.
- 126 **Wright's Perfection.** This apple is one of the heaviest croppers known, and comes into bearing sooner than any other apple. 1s 6d.
- 127 **Carlton.** Blight-proof; strong, thrifty grower, most prolific; fruit large, yellow striped and suffused with carmine; flesh crisp, juicy, of delicious flavour. 1s 6d.
- 128 **Cardinal.** Bears abundantly; flesh sprightly, sweet and transparent; yellow, flecked red; early. 1s 6d.
- 129 **Christmas Pearmain.** Fruit medium size and excellent flavour, scarlet on the exposed side. 1s 6d.
- 130 **Edward Lipplatt.** Fruit large; flesh white, crisp, juicy and sweet, with aromatic perfume; a dessert apple of highest excellence; late. 1s 6d.

- 131 **England's Glory.** A very handsome, red-cheeked apple, free grower and a great bearer; a first-class dessert apple. 1s 6d.
- 132 **Foster.** Beautiful colour, and of very fine flavour. Coming in February, it is a free grower and heavy bearer. One of our very best early export. 1s 6d.
- 133 **Jewel.** Fruit juicy, sweet, and very tender. 1s 6d.
- 134 **King's Acre Pippin.** Late dessert apple; resembles the Ribston Pippin in shape; colour greenish yellow, flushed and striped with red; flesh yellow, crisp, and juicy; a valuable market apple; late. 1s 6d.
- 135 **Lady Hopetoun.** First-class dessert apple, perfectly blight-proof. Fruit hangs well until the end of April, should be valuable as an export apple. 1s 6d.
- 136 **Lady Sudeley.** Early, large pale yellow, marked with crimson streaks. 1s 6d.
- 137 **Lincolnshire Triumph.** Medium size, round, handsomely shaped, deep bright crimson skin, yellow where shaded, flesh juicy, tender, white stained with red; good dessert apple; medium. 1s 6d.
- 138 **Thomas Rivers.** Cooking variety of rich flavour, large and brilliant colour; flesh very firm; early. 1s 6d.

Fifty Pear Trees supplied at hundred rate.

The climate, situation, soil, and cultural notes given for Apples will apply to pears. Pears will not be in full bearing until the sixth year after planting, excepting such varieties as Bartlett, Keifer's, and a few others, which frequently commence at second year after planting. To induce fruitfulness, we advise a judicious system of summer pinching where practicable, followed, if necessary, by root-pruning in winter.

- 140 **Bailey's Bergamot.** Fine winter pear. 2 D M.
- 141 **Bergamot Esperance.** Yellowish-white flesh.
- 142 **Bergamot Gansel.** Melting, rich. 1 D M.

 301 Madame de la Bastie. Medium size; flesh yellowish white, red near stone, firm melting, juicy. F. 1s 6d

Peaches

CLINGSTONE Varieties marked (C)

FREESTONE Varieties marked (F)

SANDY loam is the best, but any soil will produce good peaches, if it is well drained, in nearly any district in N.S.W. As the young trees make very strong growth during the summer, it is desirable to rough prune them while they are growing; all strong, superfluous shoots or branches should be cut right out, and all long shoots which remain should be shortened back, the object being to induce the production of spurs or small wood, which yield the fruit. The trees should be carefully gone over in the winter, and the pruning finished.

In order to prevent disappointment to our customers, we would point out that there is very little difference either in the fruit or the period of ripening of the following varieties:—

ALEXANDER, BRIGGS' RED MAY, HIGH'S EARLY CANADA, WATERLOO.

- 310 Admiral Dewey. Early; yellow flesh; freestone.
 311 Akarana. Fruit large round and highly coloured, sweet, sugary. 1 L.
 312 Alexander (F). A fine large early peach. E.
 313 Amellaberta. Large yellow-fleshed freestone. 1 M.
 314 Amsden's June (F). Greenish-white skin, red in the sun; flesh white, very vinous and juicy. 1 E.
 315 Bell's November. Earliest in existence, ripening November; partial slipstone; great acquisition.
 316 Bonanza (F). Large fruit, white skin, carmine cheek, rich flavour; good and handsome. L.
 317 Brandy Wine (F). Yellow flesh. L.
 318 Briggs' Red May (F). Very best early peach. E.
 319 Camden Golden (F). Fine late peach; excellent qual.
 320 Camden Superb (C). Early red variety, coming in about Christmas.
 321 Chair's Choice (F). Very finest quality, yellow flesh, deep red cheek, yellow skin; rich; good. L.
 322 Champion (F). Large early variety, high flavour; good shipping variety.
 323 Christina (F). Large, yellow, juicy, delicious. L.
 324 Comet (F). Large, yellow, juicy; ripens March.
 326 Downing (F). Beautiful; early; ripens December.
 327 Duke of Edinburgh (F). Excellent. M.
 328 Early Albert. White flesh; delicious flavour.
 329 Early Beatrice (F). Flesh rich, vinous flavour, skin yellow and red. 2 E.

ON MYROBOLAN AND MARIANA STOCK.

Plums thrive in our cool highlands. Any good soil will suit them so long as the subsoil is porous, and well drained. We highly recommend the beautiful Japanese varieties for quality and appearances. Plums require to have their long shoots stopped during the growing season, so as to produce spur wood.

- 451 American Damson. Juicy, sweet and rich. K L.
- 452 American Red. Ornamental early. K D E.
- 453 Angellina Burdett. Large, richly flavoured. D M

- 425 Large Red. Deep red; a valuable variety; large.
- 426 Ogon. Large yellow, round fruit, skin rich amber; yellow flesh, firm, and fine flavour; heavy crop. L.
- 427 October Purple. Fruit round, distinct flavour.
- 428 Oki Smomo. Large, long fruit, deep red skin, like Burbank.
- 429 Prunus Pessardii. Small red fruit; ripens very early, and can be eaten when half-grown; leaves red bronze, purple wood.
- 430 Prunus Simoni. A magnificent fruit, large and flat, crimson skin, yellow flesh, with a fine flavour.
- 431 Red June. Very early, medium size fruit, bright red skin, flesh yellow, very good variety.
- 432 Sutsuma. The best of the Blood Plums; fruit med. and round, flesh dk. red; heavy bearer. L.

- 433 Shipper. Fine firm plum; wine colour flesh, skin blackish purple; good cropper.
- 434 Sultan. Firm and solid; dark crimson; sub-acid.
- 435 Shiro. Firm, yet juicy light yellow; clingstone.
- 436 Wickson. Excellent; keeps and ripens well.
- 437 Superbe. Fruit of immense size. An ideal shipping plum, being very firm, and does not scald. 2s.
- 438 Wright's Early. Of New Zealand origin. The raiser claims it to be the best early plum. 1s 6d.
- 439 Wright's Late. The fruit is large, with deep red flesh, and the stone is no larger than that of a cherry. The fruit will hang on the tree until March. 1s 6d.
- 440 Maynard. Deep, purplish crimson, thin blue bloom; flesh light yellow, marbled with red; firm, delicious, highly flavoured. 2s.
- 441 Alpha. The earliest of all Japanese; dark red on amber-coloured ground; flesh yellowish, juicy, and very sweet, of good flavour. 2s.
- 442 Federation. The fruit resembles the "Wickson." Ripe second week in February. 2s.
- 443 Hay's Seedling. Fruit round, skin dark purple, flesh yellow, firm, rich, juicy, and of exquisite flavour. 2s.

Prune Plums

This list is specially recommended as giving the best varieties for drying for Prunes.

- 520 Bulgarian. Deep purple skin, yellow flesh; large sized.
- 521 D'Agen. Small, but unrivalled for drying.
- 522 Fellemberg. Dark purple skin, medium size.
- 523 Giant. The largest variety known.
- 524 Golden. Fine variety to grow, beautiful appearance, flesh yellow, rich and sugary, exquisite flavour, freestone, and heavy cropper.
- 525 Golden Drop (Goes). Also a good prune.
- 527 Imperial Prune. Ripens early; thin skin. 1s 6d.
- 528 Pacific. Unsurpassed for drying.
- 529 Pearl. White, semi-transparent, heavy bloom. 1s 6d.
- 530 Pond's Seedling. Fruit large, with yellowish flesh; one of the best Market Plums.
- 531 Robe de Sergeant. Like Prune d'Agen in every way.
- 532 Oregon Silver. Large, bears heavily; clingstone.
- 533 Splendor. A most excellent Prune; freestone.
- 534 St. Catherine. Fruit pale yellow, medium size fruit, juicy and of fine flavour.
- 535 Sugar. Fruit even in size, large; rich in sugar; hence its name. Stock limited. 1s 6d.
- 536 Tragedy. Large fruit, flesh yellow.
- 537 Clairac Mammoth D'Ente. Very large and fine prune; delicious when fresh, and dries with good weight and colour. 1s 6d.
- 538 Tennent. Large, dark purple, parts freely from the stone; dries well. 1s 6d.

FIGS

1s 3d per Single Tree. } Packing charges for
12s per dozen. } long distances 1s doz.
80s per hundred. Packing Free.

THESE require no special treatment, and provided the soil is good and fairly moist, it will produce fine fruit. If the fig is grown near the house, where it can be abundantly watered from the laundry, it will produce enormous crops of fruit, give a fine shade, and form a shelter. It requires little pruning.

- 550 Adam. Large size fruit, pale brown, very early, and a good market sort.
- 551 Black Genoa. Large, juicy, and rich.

- 552 Black Provence. Small, rich, abundant bearer.
- 553 Brown Ischia. Medium size, rich and prolific.
- 554 Brown Turkey. Luscious, good for drying.
- 555 Brunswick. Very large, rich and excellent.
- 556 Castle Kennedy. Large and handsome; early.
- 557 De L'Archipel. Large, pear-shaped, syrupy.
- 558 Early Violet. Small, sweet and abundant.
- 559 Green Ischia. Very hardy, purple flesh, good.
- 560 Marseilles White. Fine for drying.
- 561 White Adriatic. Large size, red flesh, rich.

80s per hundred. Packing Free.
Fifty Cherry Trees supplied at hundred rate.

CHERRIES thrive exceedingly well in our cooler districts. The best soil for the cherry is one not over rich, but free or friable, a sandy loam having the preference—a well-drained subsoil being essential to success; clays or any strong, stiff soils that will hold water are unfit for its culture.

- 570 Archduke. Large, very rich and good; dark red. M.
571 Bedford Prolific. Tender and rich; brownish. E.
572 Belle de Montreuil. Very large, round, marbled, with red, sugary; early variety.
573 Belle d'Orleans. Flesh yellow, tender, juicy; one of the best and earliest cherries; pale red.
575 Bigarreau Abel. Fruit large, heart shaped, black; flesh firm, juicy, highly flavoured; late. 1s 6d.
576 Bigarreau Black. Large fruit. L.
577 Bigarreau Elton. Especially selected as being one of the earliest and most profitable.
578 Bigarreau Gaucher. Large, nearly round, skin dark brown, flesh reddish, firm and juicy. E.
579 Bigarreau Jabourlay. Very early; fruit large, dark red, rich flavour. 1s 6d each. E.
580 Bigarreau M. Gaucher. Fruit large, nice red colour, heart-shaped, firm, juicy, delicious; ripening late in season. Vigorous and prolific.
581 Bigarreau Napoleon. Large, late, rich; pale red. L.
582 Bigarreau Pellissier. Beautiful large fruit; skin dark glossy red; flesh rosy, firm, crisp, early.

- 583 Bigarreau Rockport. Beautiful bright red cherry, firm, rich and juicy, an early variety.
584 Bigarreau Twyford. Bright red; flesh firm. E.
585 Black Eagle. Medium size, rich and delicious.
586 Black Heart. An old favourite. E.
587 Black Republican. Solid flesh, juicy. L.
588 Late Duke. Very fine, late and prolific; dark red.
589 Californian Advance. Large, dark purple. E.
590 Centennial. Very large fruit, firm, pale red. E.
591 Claremont. Very fine, pale, large and early. E.
592 Early Lyons. Deep red flesh, juicy. E.
593 Early Purple Gean. The earliest variety known; fruit dark, and the tree a great bearer.
594 Early Rivers. Large size, purplish-black skin, rich flesh, early and heavy cropper.
595 Florence. Large, richly flavoured, and late; red.
596 Fruburst du Mark. Medium size, dark red skin and flesh; very sweet; good market sort. E.
597 Guigne Annonay. Fruit, large, dark black; flesh firm; constant cropper. E.

- 598 Late Duke. Very fine, late and prolific; dark red.
599 May Duke. Very good, fine cropper; surest bearer in Sydney climate; red. E.
600 Morello. Large, best for preserving. L.
601 Noble. Very large, dark red; flesh firm, good flavour. Tree hardy and prolific. 2s. L.
602 Ohio Beauty. Heart-shaped fruit, light yellow skin, white flesh, tender and juicy. L.
604 Preece de Boppard. Early. Fruit dark glossy red, striped and spotted flesh; constant cropper.
605 Reine Hortense. Flesh tender and juicy. M.
606 Roman Olivier. Flesh firm and sweet. 1s 6d. E.
607 St. Margaret's. Large, firm, sweet, sub-acid. L.
608 Werder's Early Black. Very large, tender, juicy. E.
609 Burdoff's Seedling. A magnificent large dark red, very early variety. Doing famously to within 20 to 30 miles of coast-line of N.S.W. 1s 6d.
610 Merville de Langsur. A very prolific and upright grower; a fairly late variety. Fruit very large and oval; skin dark red; very juicy and sweet, acidulous flavour. 1s 6d.
611 Great Biggarreau. Very large, dark red to black; firm yet juicy, strong grower, very productive, late. 1s 6d.
612 Lambert. Largest size, bright rich colour, glossy with small russet dots; flesh reddish; very firm and unsurpassed in qual. Later than "Big Napoleon." 1s 6d.
613 Bigarreau Noir de Guben. Large and good, very lustrous in colour and a prolific bearer. 1s 6d.
614 Bigarreau Noir de Schmidt. A very large black cherry, rich and good; medium. 1s 6d.

Persimmons or Date Plums

Acclimatised, 1s 3d Single Tree. } Packing charges for long
Colonial Grafted, 1s 6d } distances, 1s doz.

A TOMATO-SHAPED fruit with a thin skin; flesh, when ripe, delightfully sweet and luscious. It is a dwarf tree shrub, which will grow in nearly any part of our State; prefers a warm climate, but will not be injured by slight frosts.

Varieties that ripen NATURALLY on the Tree.

- 620 Dai Dai Maru. Large, orange skin, yellowish flesh, nearly seedless, early.
621 Hiyakume. Early, oblong, large, 5 x 2 inch.
622 Kurokuma. Early, highly flavoured.
623 Okamee. Square shaped, large, skin reddish orange, almost seedless.

624 Zeuja Maru. Small fruit, deep orange skin, improved by allowing to hang on tree.

Varieties that DO NOT ripen naturally.

- 625 Hachiya. Elliptical, yellow.
626 Jubilee. Medium early, good variety.
627 Tanenashi. Yellow, oblong, seedless.
628 Yemon. Flattened, yellow, with rose colour.

Quinces

1s 3d Single Tree. } Packing charges for long
12s per dozen. } distances, 1s per doz.
80s per hundred. Packing Free.

Fifty Quince Trees at hundred rate.

Most useful for preserves and culinary purposes generally, and may be grown in poor soils, where ordinary fruits will fail; very hardy; makes a fine tree when fully grown.

- 640 Appleshaped. Excellent for stewing.
641 Bourgeat. Large, smooth skin.
642 Champlon. Large and good; late.
643 Fuller. Large and early, highly flav.
644 Large Portugal. Very large and good.
645 Master's Early. Earliest of all; large.
646 Missouri Mammoth. Pleasant flavoured
647 Orange. Large round fruit, early.
648 Pearshaped. Large and good.
649 Pineapple. Name comes from flavour, which is suggestive of pineapple.
650 Rea's Mammoth. Large fruit, round, smooth, and handsome; early.

- 651 Van Daman. Superior quality.
652 De Vranja. New introduction from Servia, recommended for its prolific qualities; fruit enormous. 1s 6d.
653 Zucker (SUGAR). Introduced from Asia, fruit very sweet. 1s 6d.
654 Bereckzi. Enormous size; sweet, skin glossy golden yellow, smooth. 1s 6d.
655 Giant of Lescovaz. A new Quince imported from France, the fruits often attaining up to 3½ lb.; flesh white, does not turn red when cooked; tree very prolific. 1s 6d.

Oranges, Mandarins, Lemons

1s 6d Single Tree. } Packing charges, 1s doz. } 27 5s per hundred. Packing Free.
18s per dozen. } for long distances. } 50 Orange, Mandarin or Lemon at 100 rate

THESE magnificent fruits are now very largely cultivated in our own and the neighbouring States, and with the exception of the cold regions (New England and similar climates) they will grow in nearly every other part of the State, provided they have a good, well-drained soil and a sheltered position. As these trees bear immense crops of fruit, they must be kept growing freely (by artificial means if necessary), and great care must be taken to keep trees free from scale or other pests, and to remove it directly it appears

ORANGES

- 660 Bahia or Navel. Large shy bearer, warm situ.
661 Blood or Maltese. Med. deep red juice.
662 Buckeye Navel. Improved Washington Navel from California. A true Navel Orange, ripening early, distinct, delicious. 2s 6d.
663 Golden Nugget Navel. From California; there considered superior to Washington Navel. Fruit smooth, solid, thin-skinned; colour, strong gold. Regular, even cropper. 2s 6d.
664 Holdfast. Hangs a long time, large fruit, juicy
665 Homassassa. A Californian variety; prolific.
666 Jaffa. Excellent, and a constant bearer.
667 Joppa. Large and beautiful fruit, thin skin; juicy pulp, without seeds.
668 Mediterranean Sweet. An excellent orange.
669 Parramatta or Queen. Large, hardy, prolific.
670 Rio. Fine, thin-skinned fruit, juicy, excellent.
671 Seville. Bitter; for preserving.
672 Siletta. Small, handsome and good.
673 St. Jago. Fruit medium, smooth, juicy, fine
674 St. Michael. Large, thin skin; best for export
675 The Navelencia. As its name implies, is a cross between the popular Valencia and Washington Navel. Retains the good qualities of Washington, together with hardness and lateness of Valencia, reported to ripen 30 to 60 days later than Washington. A valuable variety to Citrus growers. 2s 6d.
676 Thompson's Improved Navel. Reputed to be a distinct improvement on Washington Navel, earlier, and good even consistent cropper. 2s
677 Valencia. A late orange, but most excellent.
678 Washington Navel. Prolific, better than the old Navel in size and flavour; hardy.
679 White Siletta. Earliest, skin fine thin, juicy.

MANDARINS

- 700 Beauty of Glen Retreat. A most excellent new variety, hardy and free flowering.
701 Canton. Synonymous with scarlet.
702 Cumquat. Small; for preserving.
703 Ellendale Beauty. Improved Beauty of Glen Retreat; is not liable to split in wet weather. Being a colonial-raised variety, it should be valuable.
704 Emperor. Large, beautiful fruit; one of best.
705 Fawcett's Early Shipping. A cross between an Orange and Mandarin, being practically the largest Mandarin in cultivation. Fruit ripens very early, and is a good carrier.
706 Jacob's Improved Thorney. Is reported to be a distinct improvement on old Thorney, being much larger and earlier, and does not split in wet weather.
707 Scarlet. Large fruit, skin almost scarlet, flesh juicy, handsome.
708 Thorney. Small, firm, fine, high flavour.
709 Parker's Special. Early, solid smooth skin.
710 Oonshiu. From Japan; large fruit, juicy.

LEMONS

- 725 Belair. Good variety.
726 Common. Well known, rough skinned.
728 Genoa. An Italian variety; very juicy, good.
730 Lisbon. The best for all purposes.
731 Lisbon Variegated. Vig. grower and bearer.
732 Messina. Favourite variety; very juicy.
733 Sili. Medium, thin skin, juicy.
734 Thornless. Larger than Lisbon, but coarser.
735 Villa Franca. Oblong, thin skin, sup. flavour.

Limes

1s 6d Single Tree;
18s per doz.

Packing charges 1s doz for long dist's.

- 745 East Indian. Large, very juicy.
746 Persian or Sweet. Sweet and pleasant flavour.
747 West Indian. Best for limejuice.
748 Tahiti. Fruit very large.

Shaddocks

1s 6d
Tree;
18s doz.

Packing charges, 1s doz. for long distances.

- 750 Blood. Excellent for preserving.
751 Common. Large, sour juice.
752 Manilla. Small, sweet juice.

Two-Year-Old Lisbon Lemon

 844 Whinham's Industry. Very large, dark red.
 845 Whitesmith. Large, white.
 846 Yellow Lion. Beautiful yellow variety.

Raspberries

- 3s per dozen { Packing charges for
 20s per hundred { long distances, 1s doz.

A REALLY useful fruit, and of easy culture in the colder districts of the State.

- 855 Antwerp Red. Large, fine flavour.
 856 Antwerp White. Large, mild, sweet.
 857 Cuthbert. Sturdy grower, red.
 858 Northumberland Fill-basket (Thornless). Deep red, good size and flavour.
 859 Victoria. Large, red, excellent, late.

Blackberries

THIS fruit ought to be found on every farm and station in the country. The bushes form an admirable, thick, prickly hedge, and its fruit is most useful as dessert or for preserves. Quick growing; not particular to soil or climate.

- 865 English. Fine large fruit, good flavour. 1s each.
 866 Himalayan. Beautiful fine foliage. 1s 6d each.
 867 Loughton. Large, excellent flavour. 1s each.
 868 Loganberry. (The Thornless Raspberry-Blackberry). A hybrid between the raspberry and blackberry; fruit as large as the blackberry, produced in clusters; dark red colour, partaking of the flavour of both fruits. 1s 6d each.

- 869 Mammoth. Magnificent clusters of dark red berries; luscious flavour. 1s each.

- 870 White Crystal. Clear golden yellow form of Blackberry. Large; seeds small; early. 1s.

- 871 DEWBERRY. Lucetia. One of the very best of this attractive class of fruit berries; large and handsome, and of shining jet black; of delicious quality. Price, 9d each; 6s doz.

Guavas 1s single tree

Of easy culture in districts where the climate is not colder than that of Sydney; preferring good and deep soil, but will grow and do well in any ordinary orchard ground.
 780 Purple. A handsome shrub; fruit deep purple.
 781 Parker's Hybrid. Fruit yellow, large, superior.
 782 Yellow. Large fruit; splendid for dessert.

Strawberries

5s hundred. Except otherwise quoted.

- 790 Arie. A Queensland variety coming on to Sydney market early in August; a heavy and constant cropper, and resists drought. Fruit above medium; beautiful glossy scarlet; flavour good. 6s per 100.
 791 Annetta. Another Queensland seedling that promises to eclipse anything we have in the way of early berries. Large fruit, to 16 to the quart; bright shining red; of delicious flavour; in shape somewhat square without the Marguerite point. Seen in Sydney market early in spring; withstands frosts and droughts. 6s 100.
 792 British Queen. Fine high-flavoured variety.
 793 Cresswell. A fine Strawberry, good for warm districts. Large, long fruit, bright glossy red; second early, will crop right up to May.
 794 Dr. Moreau. Large, well-flavoured, and heavy cropper. Hardy and drought-resisting.
 795 Edith. Good cropper, and fine flavour.
 796 Federation. A desirable fruit, very suitable to hot climate. 6s per 100.
 797 Glenfield Beauty. Fruit produced in bunches, rich flavour and colour; free grower, excellent.
 798 Governor-General. Highly coloured; bearing well into winter. 6s per 100.
 799 Howcroft. Large fruit, very suitable for dry situation.
 800 Jesmond. Splendid flavour, handsome appearance, most prolific, blight-proof.

Passion Fruit

- 785 Passiflora Granadilla. 2s each.

- 786 Passiflora Edulis. The well-known Passion Fruit. 6d each; 5s per doz. Special quotations for large quantities.

- 787 Tacsonia Mollissima (White Passion Fruit). 1s 6d.

STRAWBERRIES do best in strong soils, and should be planted in beds. Planting may be commenced in May, and continued till end of July. Rows 4 feet wide, plants 18 inches apart.

- 801 King Edward VII. Result of systematic hybridising of Royal Sovereign, and raiser claims to have produced a far superior fruit. Berries extra large; deep vermilion; produced in bunches well clear of ground. A heavy and constant cropper, bearing from September to May—in fact, it is almost an all-the-year-round Strawberry. Flesh pure white; delicious pineapple flavour. Cannot be too highly recommended.

- 802 Laxton's Noble. Highly-coloured fruit, rich vinous flavour. 6s 100.

- 803 Mammoth. Large, early and excellent.

- 804 Marguerite. Splendid size, 3½ oz. each fruit.

- 805 Royal Sovereign. Superb variety; large, luscious, deep scarlet fruit; abundant bearer. 6s per 100.

- 806 Sir Harry Rawson. Splendid flavour, Marguerite type. Large and attractive.

- 807 The Captain. Fruit very large, fine flavour.

- 808 The Marshall. Large deep crimson berries borne in clusters; splendid winter bearer. 6s per 100.

- 809 Trollope's Victoria. One of the best.

- 810 Up-to-the-Mark. Medium sized, bright red; in fruit from November to May. 6s per 100.

- 811 White Chilian, or Hautbois. Large bearer, good flowers. 10s per 100.

Japanese Wineberry

Packing charges for long distances, 1s doz.

BELONGS to the Raspberry family; will stand frost and heat; fruit in clusters, and berries enclosed in a "burr," which opens when the fruit is ripe. 1s 6d each.

Medlars 1s 6d each.

THRIVES well in New South Wales, requires very trifling attention, and is not particular as to soil.

- 876 Dutch. Very large. 877 Monstrous. The largest.

- 878 Royal. Large and of good flavour.

Currants 9d Single Tree. 7s dozen.

Packing 1s doz. for long distances.

These fruits are suited only to our cool districts. Black Naples, La Fertile, and La Versailles are best adapted for culture where winters are too mild for general collection.

- 880 Black Naples. A beautiful large fruit, but late.

- 881 Carter's Black Champion. Richly flavoured.

- 882 La Fertile. Red. 883 La Versailles. Red.

- 884 Ogden's Black. Resembles Black Naples; earlier.

- 885 Red Imperial. A really splendid heavy-bearing variety; beautiful red fruit of large size.

- 886 Red Dutch. 887 White Dutch.

- 888 White Imperial. Large.

Mulberries

- 900 Black or English. Luscious fruit, for any part of the State; very ornamental tree 1s 6d and 2s 6d.

- 901 Cape. Fast growing; useful for shelter; fruit small; culinary purposes only. 1s.

- 902 Downing's Everbearing. Fruit long, juicy, rich; valuable for cooking only. 1s 6d.

- 903 Hicks' Everbearing. Rapid-growing shade tree; fruits freely; sweet sub-acid flavour. 1s 6d.

- 904 Prolific. Wonderful bearer; table and kitchen. 1s 6d

Grape Vines

EUROPEAN VARIETIES, Strong, Well-Rooted Plants

6d Single Vine; 5s doz.; 25s hundred
Except where otherwise markedSpecial Quotations for Large
Quantities.

A GRAVELLY, stony, or otherwise well drained subsoil is essential to the successful growth of the Grape Vine. The following is a selection (chiefly table) of the best known and most useful varieties; all of A1 quality, and will give the very best results.

- 910 Almeria or Daria. Bunches very large, berries largest size, skin tough, beautiful light amber colour.
911 Barbarossa. Purple, tapering bunches.
912 Black Alicant. Very prolific, medium size.
913 Black Champion. Bunch and berry large, deep black; ripens fairly early.
914 Black Damascus. Large loose bunches, berries large and round; flesh rich and sugary; late table grape; black skin.
915 Black Frontignan. Bunches medium size; flesh tend.
916 Black Hambro. Most useful grape, sure cropper, fine flavour, large.
917 Black Monukka. Bunch large and sweet; table grape; seedless. 1s.
918 Black Muscat of Alexandria or Snow's Black Muscat. Splendid, delicious.
919 Black Prince. Berries large, oval, juicy, good flavour; excellent table grape.
920 Bowood Muscat. The same character as Muscat of Alexandria.
921 Buckland's Sweetwater. Large, hardy, early grape.
922 Camden Sherry. Very rich appearance, and hangs well; fine grape, amber.
923 Centennial. Berries large amber. 1s each.
924 Champion Muscat. Handsome, large, round grape, nearly black; tender, juicy, Muscat flavour. 1s.
925 Chasselas. Berries sweet and juicy; excellent table grape; greenish yellow; early.
926 Chasselas Rose. Bunches long, yellow berries, changing to rose.
927 Chasselas Vibert. Large berry, amber colour; rich.
928 Crystal. Berry large and round, pale amber.
929 Doradillo. Hardy and prolific; rich amber.
930 Early Sherry. Early, white; largely grown for market.
931 Emperor. Fruit purple, firm.
932 Ferdinand de Lesseps. Very distinct flavour, strong grower; berries large and closely set; skin thin, pale yellow.
933 Fewarra. Fine late grape, tough skin; hangs for weeks; good for warm districts. 1s.
934 Gordo Blanco. White Muscat, a beautiful flavoured grape; an excellent variety.
935 Golden Champion. Berries large, yellowish white, most delicious.
937 Green Gascoigne. A large, round berry; fine bunch, free bearing; greenish yellow.
938 Golden Hambro. Deep amber colour grape; large berries, rich flavour.
940 Gros Colman. Bunches and berries extra large, black; a valuable market variety.
941 Lady Downe's Seedling. Bunch and berry large, rich; black.

- 942 Lady's Finger. Fruit long and golden amber, and very delicious.
943 Lady Hampden. Supply limited. 1s.
944 Madresfield Court. Large berries; Muscat flav., black.
945 Malaga. Skin deep black, large tapering bunches; late; black.
946 Mrs. Hall's Perfection. Our supply is limited. 1s.
947 Mrs. Pearson's Golden Queen. Golden yellow berry; luscious. 1s.
948 Mrs. Pince's Black Muscat. Highest excellence, fine muscat flavour; large berries and bunches.
949 Mudgee Black Sherry. Handsome large bunches. 1s ea.
950 Muscat of Alexandria. One of the finest table grapes; pale amber.
951 Princess Alexandria. A red Muscat, suitable for County of Cumberland; good bearer; high, rich flavour. 1s.
952 Raisin des Dames. Largest size berries, closely set; beautiful yellow skin and tough; flesh tender and exquisite flavour.
953 Red Hanneport. Heavy cropper; reddish purp. 1s ea.
954 Red Prince. Large round berries of a deep red colour; requires a warm, sheltered situation.
955 Rose of Pera. Very suitable for warm districts; heavy cropper and very hardy.
956 Royal Ascot. Bunches medium size; early; purple.
957 Sabalskowski. Large grape, berries tapering; skin deep pinky red; suitable for hot climate. 1s 6d ea.
959 Sultana. Medium size; valuable Raisin making. 1s.
960 Sweetwater. Like Royal Muscadine, deep golden colour; very juicy; early; good sort.
961 Syrian. Grand grape; immense bunches and berries; juicy and sweet; amber. 1s.
962 Thompson's Seedless. Resembles Sultana; much larger. 1s each.
963 Tokay. Berries large; skin clear, transparent yellow; flesh white, very juicy; fine table grape.
964 Trentham Black. Melting flesh; rich.
965 Ulliade. Very fertile; excellent table grape; purple.
966 Waltham Cross. Large berries and bunches; pale amber; good.
967 Wantage. Bunches large; pale red; hardy.
968 Wax. Amber coloured, skin transparent, fine flav.
969 Wortley Hall. Deep purple colour, large bunches and berries, handsome but late.
970 Zante. The Currant of Commerce, seedless.
971 Black Tokay. Good market variety. 1s.
972 Black Lady's Finger. Hardy and not susceptible to black spot. 1s.
973 Flame Tokay. Late ripening variety. 1s.
974 Gros Maroc. Large late black. 1s.
975 Santa Paula. Cylindrical berries, $1\frac{1}{2}$ in. long. 1s.

AMERICAN VARIETIES, 1s. each

THESE Vines are free from the attacks of Oidium. They are strong growers and heavy bearers, and should have trellis support, with abundance of room, and only be pruned so as to regulate them on the trellises. For winemaking and for preserves they are esteemed, but the flavour is—by some—considered peculiar when used as a dessert fruit.

- 990 Anna. Pink, bunch and berry large, sweet.
991 Bell's Seedling. Excellent variety of Isabella.
992 Catawba. Purple berries, bunch medium; juicy, rich, immense bearer.

- 993 Isabella. Best known American grape. Has a peculiar flavour; makes a good wine or jelly. Oidium never affects it.
994 Wilder. Bunch and berry large and round, and very productive.

Grape Vines on Phylloxera-Proof Stocks

1s Single Vine; 10s 6d dozen; except where otherwise marked.

We can supply all the following varieties, grafted on the new Phylloxera-resistant stocks, at above named prices. For descriptions of the Grapes, see list above of same varieties offered on their own roots.

- | | | |
|-----------------------------|------------------------------------|---------------------------------------|
| 1000 Black Alicante | 1008 Chasselas Vibert | 1016 Mrs. Pearson's Gold Queen, 1s 6d |
| 1001 Black Hamburg | 1009 Emperor | 1017 Mrs. Pince's Black Muscat |
| 1002 Black Monukka | 1010 Gros Colman | 1018 Red Hanneport. 1s 6d |

GRAPE VINES CANNOT BE SENT INTO QUEENSLAND FROM NEW SOUTH WALES UNDER ANY CONDITIONS.

Other Fruits are admitted provided they are passed by the Government Experts, who examine all plants and trees on arrival in Queensland.

NUTS of Sorts

ALMONDS 1s 3d Single Tree; 12s doz.

It is unaccountable that this Nut, so commercially valuable, and so largely consumed in this State, should be so rarely grown among our settlers. It grows with a facility equal to that of the commonest kind of Peach, and requires far less attention than the best kinds of that fruit.

- 1040 Brande's Jordan. Very large, good bearer.
1041 Burbank Seedling. Hardy and heavy cropper; highly recommended.
1042 I.X.L. Nuts large, soft shell.
1043 Golden State. Heavy and regular bearer, with smooth kernel and soft shell.
1044 Nonpareil. Large and sweet.
1045 No Plus Ultra. Extremely prolific, producing Nuts in bunches, large and fine flavour.
1046 Paper Shell. The commonest sort.
1047 Princess. Large, richly-flavoured kernels; much later than other varieties. 1s 6d.
1048 Riverside Peerless. A variety of Australian origin; fairly vigorous. Nut resembles Brande's Jordan, but is a trifle larger, and far more highly flavoured; husk soft. 1s 6d.
1049 Sultana. Soft shells; superior flavour.
1050 Grosse Tendre. A new almond, very large, thin shelled, good grower and heavy bearer. 1s 6d.
1051 Hatch's Nonpareil. A very fine almond, large kernel, and very thin shell. 1s 6d.
1052 White Nonpareil. The tree is a strong grower, of spreading habit; nuts very large. 1s 6d.

WALNUTS

- 1055 Chaberte. Large French variety; very productive. 2s 6d each.
1056 Juglans Regia. The English variety. 1s 6d.
1057 Juglans Seiboldii. A Japanese variety. 2s.
1058 Juglans Cordiformis. A flat variety. 2s.
1059 Juglans Nigra, Black. 1s 6d.
These delicious nuts can be produced in any climate suitable for the Spanish Chestnut, and in colder districts. Young trees are invariably without fibre roots, but customers need not hesitate to plant our stock, as they rarely fail.

NUTS and FILBERTS

1s 6d Single Tree

- The undermentioned Nuts thrive well on the mountains between the coast and the Riverina. They will grow well, but produce little fruit, in the immediate neighbourhood of our coast. At Braidwood, and even at Picton and Berrima, Hartley, Mudgee, and Bathurst they bear well.
1065 Cob Nut 1068 Northampton Prolific
1066 Gosford 1069 Red Filbert
1067 Hazel 1070 White Filbert
1071 Spanish Chestnut (CASTANIA VESCA). 2s. A fine stately tree; magnificent foliage, fruits freely and will succeed admirably in our cooler districts.
1072 Japanese Chestnut. 2s. each. Produces good Nuts when only four years old.
1073 Queensland Nut (MACADAMA TERNIFOLIA). 1s 6d.
1074 Hickory or Pecan Nut. A most delicious Nut, quick growing; full bearing in eight years. 2s.

LOQUATS 1s 6d Single Tree

- 1080 Gigantea. Japanese variety, heavy cropper.
1081 Early Golden. An early variety; good.
1082 Herd's Large. Enormous.
1083 Mammoth. Very large.
1084 Californian Advance. A variety claimed in California to excel all other varieties. Fruit large, deep gold yellow, being nearly all pulp. Flavour distinct and delicious. 3s 6d each.

MISCELLANEOUS FRUITS

"I received the Trees and Grape Vine and am indeed pleased with them."—Miss L. TRAYNOR, Bale St., Moree.—2-8-09.

"All the Fruit Trees, Rose Trees, Bananas, etc., are doing well, not a single failure."—J. MACCARTIE, Billinudgel, Byron Bay.—22-8-08.

INSECT PESTS of the ORCHARD

AND SOME REMEDIES

Apple Blight — Woolly Aphis—This can only be got rid of by brushing the affected parts with the Resin and Soda Wash.

Codlin Moth—Bandage trunks of trees in a systematic manner; having these removed every 10 days and dipped into boiling water. Pick up and burn all dropping fruit. Spray with Arsenate of Lead.

Peach Aphis—Spray every week in early spring with Tobacco Wash, no matter if strong; but keep at it. A weaker solution is desirable for the first few days when fruit is forming, *i.e.*, just as blossom is falling. Use also Sunlight Soap Wash or Surpazoll.

SOME Common Pests and Diseases

Scale on Orange and other Evergreen Trees—Kerosene Emulsion, if judiciously used, will keep these in check, but, where possible, we advise the use of hydro-cyanic acid gas. Also a liberal spraying with Resin Wash or Scalecide in winter and early spring.

Scale on Deciduous Trees—
Use Resin Wash or Scalecide.

Fungoid Diseases, such as Powdery Mildew, Apple Scab, Shot Hole Fungus, Peach and Plum Rust, can be largely kept in check by systematic spraying with Bordeaux mixture or Vermorite. Write for information about these remedies.

Recipes for Washes, etc.

Kerosene Emulsion

Hard soap $\frac{1}{2}$ lb., kerosene 2 gallons, boiling water (soft) 1 gallon. Dissolve soap in 1 gallon of boiling water and then churn for 10 minutes. For Winter use add the above to 7 gallons warm water. For Summer use add the above to 22 gallons warm water. This remedy is applied with a spray pump, and should not be used while the sun is hot, but in the evening or on cloudy days. Great care must be used in keeping the mixture agitated, and the vessel used to carry the mixture should be thoroughly emptied each time before refilling, or the kerosene, which never thoroughly mixes, may accumulate and give too strong a dose.

Sulphur, Lime, & Salt Wash

Take 40 lbs. unslacked lime, 20 lbs. sulphur, 15 lbs. salt, and 20 gallons of water. To mix, take 10 lbs. lime, 20 lbs. sulphur, and 20 gallons of water; boil for $1\frac{1}{2}$ hours, when the sulphur should be thoroughly dissolved; slack 30 lbs. of lime in a barrel with hot water, and, when thoroughly slacked, but still boiling, add the 15 lbs. of salt; when this is dissolved, the whole should be added to the lime and sulphur in the boiler, and the whole boiled for half-an-hour longer, when water, to make up 50 gallons, should be added. Strain through a sieve, and keep well stirred while in use. Apply, when tree is leafless, with a spray pump.

Sunlight Soap Wash One bar of soap to 5 or 6 gallons water, very effective and easily prepared.

Tobacco Wash for Peach Aphid, &c. Refuse tobacco (stems, &c.) 4 lbs., soft soap, 1 lb., water, 10 gals. Soak the tobacco in water for 24 hours, draw the liquor off, and boil the tobacco for three hours, to extract the nicotine. Mix the two liquors, after having strained all refuse from that which has been boiled. Dissolve the soft soap by simmering in water, and add the tobacco water in the proportions named in formula. Apply with a spray pump in early spring before the trees blossom. A little washing soda added to above improves it.

Paris Green Take 1 lb. of Paris Green, and add water sufficient to make a mixture the consistency of table mustard, then add 160 gallons of water. This must be kept well stirred whilst in use. This is also useful in destroying caterpillars on the vine, or any leaf or bark-eating insects.

Ammonia-Carbonate of Copper Dissolve 3 ozs. of carbonate of copper in 1 quart of strongest Liquid Ammonia, and when the chemical action has ceased, add 22 gallons of water. Apply with a spray pump. This is one of the best fungicides, and is suitable for nearly all fungus diseases.

Vermorite A scientifically prepared Bordeaux mixture. Original packages of about $4\frac{1}{2}$ lbs., sufficient for 22 to 25 gallons of water, $\frac{3}{8}$; sufficient for 5 gallons, $\frac{1}{-}$.

Bordeaux Mixture Lime 4 lbs., bluestone 4 lbs., water 40 gals. Slack lime with a little water, then dissolve bluestone in a little HOT water. Stir well. Use coarse nozzle for this wash. We can supply prepared Bordeaux mixture powder ready for dissolving in water, in the same proportions as above. 8lbs. to 40 gallons of water. Price on application.

"Swifts" Arsenate of Lead This is the best remedy for CODLIN MOTH and all leaf-eating insects. It sticks on and rain will not wash it off. Can be safely handled, and is without danger to man or beast. Use 3 lbs. to 50 gallons of water. Pamphlet and full directions for use on application. 1 lb. bottles Paste, 2/- each; 2 lb. bottles Paste, 3/6 each; 5 lb. jar Paste, 7/6 each.

Resin & Soda Wash for Deciduous Trees

Resin over a fire in 5 pints of water, then add water to make 5 galls. Boil well till Resin is thoroughly dissolved. 1 gallon of mixture to 7 gallons of warm water applied warm.

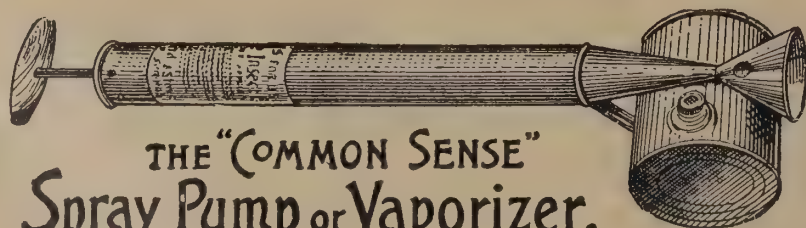

Dissolve 3 lb. washing soda and 4 lb. finely powdered

Resin Wash for Citrus Trees

70% Caustic Soda 6 lbs., Powdered Resin 16 lbs., Fish Oil 3 pints. Boil 10 gallons of water and add the above ingredients, gradually boiling the whole together for 2 or 3 hours until well dissolved, must be kept well stirred—add HOT water a little at a time till there is 20 galls. of hot solution, then dilute in the proportions of HOT water 4 galls., 1 gall. of hot solution, making 100 galls. in all. Apply warm, never add cold water.

Spray Pumps

you can spray with safety. If the trees have any dead wood on them remove it before dressing, as it will only harbour the insects; and if the growth of the trees is very dense, open them up in the centre by free pruning at the proper season.

Tin, 2s 6d each. Carefully packed and post free in N.S.W., 4s; other States, 4s 8d.

Brass. 5s each. Carefully packed and post free in N.S.W., 6s 6d; other States, 7s 2d.

The most effective **Cheap Spray Pump and Vaporizer** yet offered. It throws a spray as fine as mist, and is in consequence more effectual than any other Spray Pump, using about one-tenth the liquid.

Knapsack Pump

With single nozzle

This Sprayer is the best known and most widely used. It is specially recommended for the treatment of Fruit Trees, Flowers, Grape Vines, and Potatoes. It gives a fine, medium or coarse spray, and the nozzle is arranged so as to deliver straight in front, right, left, up or down at the will of the operator. It is simple in construction, and can be worked by adults or juveniles.

The body of the pump and the air-chamber are made of copper; the valves are of indiarubber. Each pump is fitted with 2 ft. of $\frac{3}{8}$ -in. indiarubber hose and a brass lance about a foot long for carrying the nozzle. To the lance is attached a Stop Cock, so that the flow can be stopped instantly.

Its capacity is about 3½ gals. Particulars for using Pump sent with each.

Bucket Spray Pumps	The Little Giant	24/6
	The Perfect	32/-
	The Lever Handled	35/-

The Little Giant	24/6
The Perfect	- 32/-
The Lever Handled	35 -
With 8ft. Extension Rod	

ONE of the most useful appliances that one can have where there is a garden, or where poultry are kept. For white washing or spraying the houses with disinfectants they are invaluable; and for spraying plants and fruit trees the pump is very effectual.

Our Select List OF Trees Shrubs AND Plants

OUR Plants are all young, vigorous, healthy stock, but some quick growers are sure to become pot bound if grown in pots even for a short season, and we give the following hints on how to prepare them for planting:—Remove the plant from the pot by tapping the edge of the

inverted pot on a wooden ledge, remove drainage and loosen the roots which surround it, also those which may be wound round the ball; if they are very much matted, use a blunt-pointed stick to disentangle them, but do not break the ball. Spread out the roots when planting. Water freely.

Our Pot Plants are sent in water-tight paper pots, saving freight and carriage in packing.

The cost of packing must be added to prices named. The minimum charge is 6d for small orders, and 1s to 1s 6d will cover cost of packing a dozen plants. Our packing is excellent.

ABUTILON

Boule de Nieve. White. 3 ft. ..	1 0
Cloth of Gold. Golden. 6 ft. ..	1 0
Darwini Tesselatum. Leaves variegated green and yellow. 3 ft. ..	1 6

ALLAMANDA

Nerifolia. 3 ft. .. 1 6
 Beautiful dwarf bright yellow flowering shrub; highly recommended; very hardy; and evergreen.

ALECTRYON

Excelsum (NEW ZEALAND OAK TREE). A
 handsome evergreen tree. 20 ft. .. 2 0

ALNUS

Communis Glutinosa (COMMON ALDER). Deciduous tree shrub, growing under suitable conditions to 50 ft. Suitable for tablelands .. 1 6

ALOYSIA

Citriodora (LEMON-SCENTED VERBENA). 8 ft. 1 0
 The scent of the leaves is delicious.

AMYGDALUS PERSICA

Double flowering peach; very ornamental.
 Clara Meyer. Palest double pink. .. 2 0
 Carnation Striped. Flaked white and pink. .. 2 0
 Crimson 1 6
 Pink 1 6
 White 1 6

ARALIA

Papyrifera (RICE-PAPER TREE). 10 ft. .. 1 0
 Handsome evergreen shrub, fine large ornamental foliage; elegant plant for a shrubbery or large garden.

ARBUTUS

Unedo (STRAWBERRY TREE). 10 ft. .. 1 6
 Canariensis. 20 ft. .. 1 6
 Known as Strawberry Trees; bear small edible fruit. Handsome evergreen, hardy shrubs, with laurel-like foliage; they prefer a light sandy or peaty soil.

ASTER

Argophyllus (MUSK ASTER). 40 ft. .. 1 6
 A native of N.S.W.; a hardy evergreen hardwood shrub.

ARDUINA (Cape Plum)

Bispinosa. Large white flowers. 3 ft. .. 1 6
 Grandiflora. White. 5 ft. .. 1 6
 Beautiful flowering shrubs, with white flowers; strongly scented like the Jasmine.

ASH (See Fraxinus)

ARDISIA

Crenulata. Crimson berries. 2 ft. .. 1 6
 Evergreen; a charming pot plant.

AUCUBA (The Gold Dust Tree)

In Variety 1 6 to 2 6
 Handsome, hardy, evergreen shrubs, leaves pale green, spotted with yellow and shining; will thrive even under trees, and will stand severe frosts.

BAUHINIA (Mountain Ebony)

Alba. 6 ft. .. 1 6
 Purpurea. 25 ft. .. 1 0
 Scandens. Semi-climber .. 2 0
 Very showy evergreen flowering shrubs.

BEECH (See Fagus)

BERBERIS

Aquifolium. Large leaved var. .. 1 6
 Darwini. Orange yellow flowers. 4 ft. .. 1 6
 Dulcis (SWEET BARBERRY). 4 ft. .. 1 6
 Japonica. 4 ft. .. 1 6
 Vulgaris (COMMON BARBERRY). 8 ft. .. 1 0
 Vulgaris Purpurea. 6 ft. .. 1 0
 Charming dwarf, ornamental and flowering shrubs. Vulgaris is the English Barberry, and makes a splendid hedge in the colder districts.

BENTHAMIA

Fragifera (HIMALAYAN STRAWBERRY). 10 ft. .. 1 0
 Flowers large, white, densely aggregate, forming a round head. This is a beautiful evergreen tree, and produces reddish fruit, somewhat resembling the Arbutus; very effective.

TREES, SHRUBS, & PLANTS

Continued

BETULA

Alba (THE BIRCH TREE). 20 to 30 ft. .. 1 6
 A very ornamental tree, deciduous.

BORONIA

Megastigma. 2 ft. .. 1 6
 Has very light, graceful foliage, brown flowers, with yellow lining; delicate perfume.

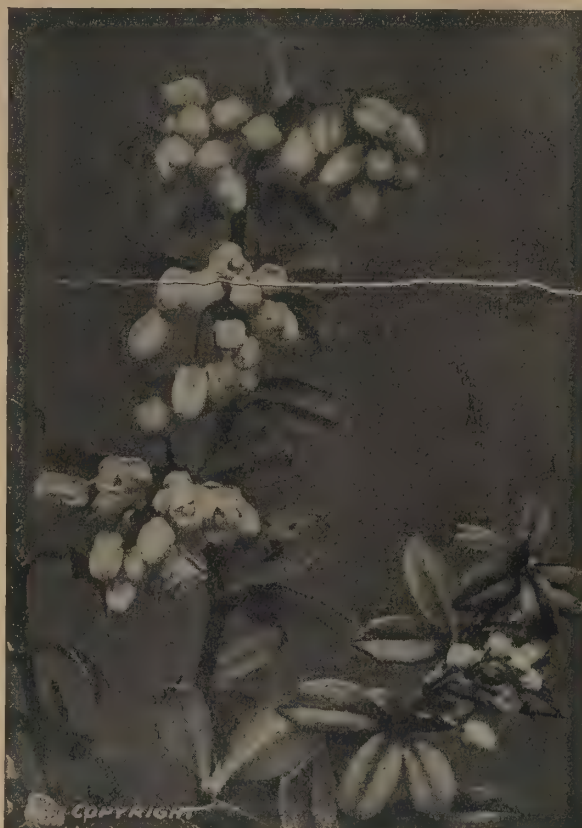

BLUE GUM OF TASMANIA

(See Eucalyptus)

BRACHYCHITON (See Sterculea)

BRASSIA

Actinophylla (UMBRELLA TREE). .. 1 6
 Tall growing; handsome large spreading foliage.

Berberis Darwini

BROWALLIA

Jamiesoni 1 0
 Deep orange-coloured flowers, produced in great abundance during spring and summer.

BRUGMANSIA (Trumpet Flower)

Knightii. White. 10 ft. .. 1 0
 Arborea. Large flowers. 10 ft. .. 1 6
 Cocinea. Pale scarlet. 10 ft. .. 1 6
 Sarmientosa. Shining foliage, white flowers, six inches across. 10 ft. .. 1 6

Soft-wooded evergreen flowering shrub, hardy only where frosts are not severe; flowers long, drooping tubes, often 6 inches; perfume is delightful.

BRUNSFELSIA (Franciscea)

Americana. Pure white, sweet scented. 6 ft. .. 1 6
 Eximea. Blue and white. 10 ft. .. 1 6
 Latifolia. Lavender with white eye. 6 ft. .. 1 6

Elegant, free-flowering evergreen shrubs, producing flowers of a variety of colour; they prefer a warm, sheltered situation.

We give Special Attention to Packing

BUDDLEIA

Globosa. 20 ft. .. 1 0
 Paniculata. 20 ft. .. 1 0
 Variabilis. Long spikes, violet flowers. 10 ft. .. 1 6
 Veitchiana. Splendid for hedges or as a shrub on a lawn. The clusters of flowers are 12 to 18 inches in length, and of bright lilac colour. The delicious fragrance resembles that of the English Lilac. 1s 6d each.

A very hardy, quick-growing family of plants, bearing honey scented blossoms in profusion.

BROUSSONETIA

Papyrifera. Small compact shrub. 8 ft. .. 1 0

BUXUS (Box)

Arborea (TREE BOX) 20 ft. .. 1 0
 Arborecens. 6 ft. .. 1 6
 Argentea Variegata. 3 ft. .. 1 6
 Aurea Variegata. 3 ft. .. 1 6
 Macrophyllus Rotundifolius .. 1 6
 Sempervirens. Common English Box for edging. 1s 6d doz.; 10s per 100.

CACTUS (See Epiphyllum)

CALLISTEMON (The Bottle Brush)

Lanceolatus. 8 ft. .. 1 0
 Colour, scarlet; very showy.

CALODENDRON

Capense. The Cape Chestnut, beautiful lilac flowering tree; evergreen .. 1 6

CALICARPA

Rosea. 4 ft. .. 1 6

CALYCANTHUS

Floridus (ALLSPICE). 4 ft. .. 1 6
 Præcox. 4 ft. .. 1 6
 A deciduous hardy shrub; the wood and roots, when cut, have a strong smell of spice; spreading habit.

CAMELLIA (See Special List)

CAMPHORA

Officinalis (CAMPHOR LAUREL). Beautiful evergreen tree, of quick growth; suitable to our climate; admirable as an avenue tree. 50 ft. .. 1 0

CARICA

Candamarcensis (PAW PAW). Large edible fruit, resembling Rock Melon. 6 ft. .. 1 6

CANTUA

Dependens. Pale red. 4 ft. .. 1 6
 Dependens Alba. White. 4 ft. .. 1 6
 Exquisite and uncommon flowering shrubs; hardy.

CARYA

Sulcata (THE AMERICAN HICKORY NUT). Very handsome, hardy deciduous tree .. 1 6
 Olivæformis (PECAN NUT) .. 1 6
 A very ornamental tree; deciduous.

CASSIA

Condolleana. 15 ft. .. 1 6
 Marylandica. Yellow. 10 ft. .. 1 6
 A very pretty evergreen shrub, covered with a profusion of yellow blossoms during the autumn.

CASTANOSPERMUM

Australis (MORETON BAY CHESTNUT). 70 ft. .. 1 0
 A native of Queensland, suitable for most parts of N.S.W.; bears saffron-coloured flowers, and makes a handsome evergreen tree.

CASTANEA

Vesca (SWEET OR SPANISH CHESTNUT). Flowers yellowish; very ornamental tree, but requires good soil; deciduous. 40 ft. .. 2 0

CATALPA

Speciosa. 20 ft. .. 1 0
 Syringefolia. White. 20 ft. .. 1 0
 Bungei. Yellow flowers, red spots. 10 ft. .. 1 6
 Kämpferi. New. 10 ft. .. 1 6
 A showy, rapid-growing tree with pyramidal clusters of white and purple fragrant flowers. Splendid specimens for lawns and shrubberies.

DOUBLE-FLOWERING CHERRY

Aveum fl. pl. .. 2 6
 Caproniana Ranunculiflora .. 2 6
 Japonica flore Rosea Pleno .. 2 0
 Padus. White, in clusters .. 1 6
 Virginiana (CHOKE CHERRY). White. .. 1 6
 Watereri. Pure white .. 2 6
 J. H. Veitch. Rosy pink, 2 in. diameter, bronze foliage .. 3 6
 Japanese double-flowering Cherries are the most beautiful flowering shrubs one could wish to have. They are showy, ornamental and the flowers sweetly pretty. Highly recommended.

PLANTS

SYDNEY

CELTIS

Australis. 30 ft. 1 0

CERASUS

Laurocerasus (ENGLISH LAUREL). 20 ft. .. 1 0
Lusitanica (PORTUGAL LAUREL). 20 ft. .. 1 0

The Laurels are old favourites; they thrive well here if planted in good strong soil, and make splendid hedges. See Hedge plants.

CERATONIA

Siliqua (CAROB TREE, ST. JOHN'S BREAD, LOCUST TREE). 16 ft. 1 6

Hardy evergreen tree, small red flowers, followed by pods 4 to 5 in. long, useful for stock feeding; has a thick stem, a spreading habit.

CERATOPETALUM (Christmas Bush)

Gummiferum. 40 ft. 1 6
The Christmas Bush is a gem.

CERCIS

Silliquastrum (JUDAS TREE). 20 ft. .. 1 6
Silliquastrum Album 1 6
Canadensis. Red 1 6

The Judas Tree is a beautiful deciduous, flowering tree, producing vivid purple flowers covering the leafless branches after which the curiously shaped leaves appear; requires shelter; suitable for cold districts.

CESTRUM

Aurantiacum. Orange. 8 ft. 1 0
Diurnum. White. 4 ft. 1 0
Purpureum. Purple and brown. 6 ft. .. 1 0
Nocturnum. Greenish white. Sweetly scented at night. 6 ft. 1 0

Beautiful free-growing and free-blooming evergreen shrubs.

CHAMAECERASUS (The Bird Cherry)

Flora Alba. 3 ft. 1 6
Grandiflora Rosea. 4 ft. 1 6

CHILIANTHUS

Diosophyllus. White. 10 ft. 1 0
A semi-climbing plant, useful for covering unsightly buildings; winter flowering.

CHIMONANTHUS

Fragrans Allspice. Yellow. 5 ft. 1 6

CHOISYA

Ternata 1 6
Dwarf evergreen shrub, with flowers like orange blossoms, sweetly scented.

CHORIZEMA

Cordata. Pretty dwarf shrub, producing flowers red and yellow. 2 ft. 1 6

CHRISTIA

Grandiflora. 5 ft. 1 6
A beautiful evergreen, compact-growing shrub, with curiously formed yellow and red flowers.

CHRISTMAS BUSH

(See Ceratopetalum)

CISTUS (Austrian Rock Rose)

Various sorts. 3 ft. 1 0
Useful dwarf flowering shrubs.

CITHAREXYLUM

Subserratum (FIDDLE WOOD). White. 10 ft. 1 6
Fine evergreen shrub.

CLETHRA ARBOREA

Lily of the Valley Tree. 10 ft. 2 0
Alnifolia (Alder leaved). A hardy shrub, producing white flowers 1 6

These are very ornamental. C. Arboorea has pure white flowers, very like the Lily of the Valley, from which it gets its name.

CLIANTHUS

Puniceus Albus. Pure white. 5 ft. 1 6
Puniceus (PARROT'S BEAK). Pink. 6 ft. .. 1 0

A hardy evergreen, soft-wooded, shrub, fine foliage, trailing habit.

TREES, SHRUBS, & PLANTS

Continued

COFFEA

Arabica (COFFEE OF COMMERCE). 10 ft. .. 1 6
Fine evergreen flowering shrub; requires shelter and a warm climate. White flowers succeeded by red berries.

CORONILLA

Glaucous. Yellow. 4 ft. 1 0
Pentaphylla. Yellow. 4 ft. 1 0
Pretty little plants, with small evergreen foliage.

COPROSMA

Variegata. Variegated. 6 ft. 1 0
Lucida. Strong grower. 6 ft. 1 0
Handsome evergreen shrubs, with bright shining leaves, some variegated and margined; very hardy, thriving well in either hot or cold districts; suitable for hedges near coast.

CORYNOCARPUS

Lævigatus (KARAKA TREE OF NEW ZEALAND). 30 ft. 1 6
A pretty evergreen, producing white flowers and a plum-like fruit.

COTONEASTER

Buxifolia. White. 3 ft. 1 6
Microphylla. White. 4 ft. 1 6
Simonsi. 8 ft. 1 0
Very hardy shrubs, bearing a profusion of berries.

CRATAEGUS (Hawthorn or May)

Oxyacantha Single White. 12 ft. 1 0
Oxyacantha Double White. 12 ft. 1 6
Oxyacantha Double Pink. 12 ft. 1 6
Oxyacantha Double Red. 12 ft. 1 6
Crenulata Fire Thorn. Bears red berries, like Ardisias; very pretty for decorations during winter 1 0
Aurea. Golden foliage, very ornamental. 6 ft. .. 1 6
Azarolli. White, sweetly scented. 10 ft. .. 1 6
Crus-Gallii. Cockspur Thorn. White tinged with red, producing edible fruit. 15 ft. 1 6

These are general favourites, flowering profusely in the spring; the double varieties exceedingly beautiful and particularly showy.

Choisya, Ternata

CROTOLARIA

Trifoliatum. Yellow pea-like flowers. 15 ft. .. 1 6

CUPANIA (Australian Tamarind)

Australis. 50 ft. 1 6
Cupania is a tree of considerable size, with magnificent and remarkable foliage.

CUPHEA

Platycentra. Red. The cigar-flower. 2 ft. .. 1 0
Jorulensis. Yellow and red. 3 ft. 1 0
Rozeili. Red and green. 4 ft. 1 0

Dwarf flowering plants; old favourites; flowers delicate tubes. Platycentra is bright scarlet, with black tips.

CYDONIA (Flowering Quince)

Alba Plena. 5 ft. 1 6
Candidissima. 5 ft. White 1 6
Cardinalis. 5 ft. Scarlet 1 6
Japonica. Scarlet. 6 ft. 1 6
Japonica Alba. White 1 6
Sanguinea Nivalis. White and Red 1 6
Rosea Plena. 6 ft. Pink 1 6
Sanguinea Plena. 6 ft. Double Red 1 6
Handsome deciduous shrubs; should be largely planted.

CYPHOMANDRA

Betacea (TOMATO TREE). 10 ft. 1 0
A very ornamental shrub; fruit makes a good preserve.

CYTISUS (Laburnum)

Laburnum. (ENGLISH GOLDEN CHAIN). 8 ft. .. 1 0
Laburnum Adami. Yellow. 8 ft. 1 0
Canariensis. Sweet scented golden yel. flowers. 8 ft. 1 6
Hirsutum. Yellow. 8 ft. 1 6
Charming English flowering trees, which during spring are covered with beautiful pendant racemes of flowers; deciduous; will flower near Sydney in a suitable position, but prefer cold climate.

DAPHNE

Indica Rubra. Red. 3 ft. from 2 0
Odora. White. 6 ft. from 2 0
Daphnes prefer a light, moist soil and warm situation; highly perfumed; free bloom; universal favourite.

DERRINGIA

Amhersti Variegata 5 ft. 1 0
Very pretty variegated shrub; white and green.

DEUTZIA (Wedding Bells)

Campanulata. Free flowering. White. 4 ft. .. 1 6
Candidissima fl. pl. Semi-double flow. 6 ft. .. 1 0
Corymbiflora. White 1 6
Crenata fl. pl. 1½ ft. White 1 0
Crenata Argentea. Variegated foliage. 4 ft. .. 1 6
Gracilis Folius Aurea. Var. golden leaves .. 1 6
Discolor Grandiflora. White. 4 ft. 1 6
Gracilis. White. 4 ft. 1 0
Gracilis Campanulata. White. 4 ft. 1 6
Lemoinei Compacta. Large White. 4 ft. 1 6
Marginata Aurea. 4 ft. 1 6
Pride of Rochester. Beautiful double flowers. 5 ft. 1 0
Rosea. Pink. 4 ft. 1 0
Scabra. White. 6 ft. 1 0
Venusta. White. 4 ft. 1 6
Vilmorinæ. New. Large White. 4 ft. 2 0
Dwarf flowering shrubs, highly recommended.

DIERVILLA (Weigelia)

(BUSH HONEYSUCKLE)

Abel Carriere. Rich, rosy crimson. 4 ft. .. 1 0
Amabilis. 6 ft. Pink 1 0
Amabilis Variegata. 6 ft. 1 6
Augustus Wilhelm. Intensely dark amaranth red shade. 4 ft. 1 0
Candidissima. White. 4 ft. 1 0
Hendersonii. Beautiful crimson flowers, spotted white on edge. 4 ft. 1 0
Hortensis Nivea. Pure white, distinct. 4 ft. 1 0
Montesquieu. Reddish crimson flowers. 4 ft. 1 0
Couquette. The largest flowered variety—deep rose, measuring 1½ to 2 in. across. 6 ft. .. 1 6
Eva Rathke. Vigorous, flowering abundantly, large, crimson red colour. 6 ft. 1 6
Gloire de Bosquets. Deep red flowers. 6 ft. .. 1 0
Magnifica. Bright rose tinged lilac. 6 ft. .. 1 6
Oeiris. Choice, profuse bloomer, peach blossom shade. 6 ft. 1 6
Lord Dudley. Free flowering, dark magenta flowers. 6 ft. 1 6
Beautiful plants; profuse bloomers; require but little attention. Produce fine clusters of tube-shaped flowers of a great variety of colours. Can be highly recommended.

DIOSMA

Ericoides. 3 ft. 1 6
Charming little evergreen plant, with light, feathery foliage, which is, during September and October, studded with small, starry white flowers.

DIPLACUS

Hybrida. 3 ft. 1 0
A dwarf, yellow flowering shrub; very attractive; evergreen.

DOMBEYA

Dregiana. White. 15 ft. 1 6
Mollis. White. 12 ft. 1 6
Mastersii. White. 12 ft. 1 6
Evergreen flowering shrubs, good foliage; flowers perfumed.

 Atropurpurea. Dark red. 4 ft. .. 1 6
 Canarienses. Resembling a Cactus. 4 ft. .. 1 6
 Regis Jubæ. Pale Yellow. 4 ft. .. 1 6
 Curious and beautiful plant of dwarf habit. The shoots are hard and woody, with diminutive leaves and strong prickles; bright crimson flowers, produced in trusses, being nearly always in flower.

EUPOMATIA

- Lauriana. 12 ft. .. 1 0
 An evergreen shrub, bearing curious flowers and foliage; a native of Australia; flowers perfumed.

EXOCHORDA

- Alberti (PEARL BUSH). .. 1 6
 One of the loveliest flowering shrubs in cultivation; flowers pure white; borne in great profusion;

Ficus Benjamineana (Queensland Weeping Fig)

FABIANA

- Imbricata. White; very hardy; 4 ft. .. 1 6
 Hardy, evergreen, heath-like flowering shrub.

FAGUS (Beech)

- Sylvatica. 60 ft. .. 1 6
 Sylvatica Cupreus. Copper-coloured. 50 ft. .. 2 0
 Sylvatica Purpureus. 50 ft. Purple leaved .. 1 6
 Beautiful deciduous tree; leaves cover the tree with dense foliage in the spring and summer; only suitable for cold climates.

FELICIA

- Angustifolia. Lilac. 2 ft. .. 1 0
 A very pretty spring flowering shrub.

FICUS

- Macrophylla (MORETON BAY FIG). 100 ft. .. 1 0
 Australis (PORT JACKSON FIG). 60 ft. .. 1 0
 Elastica (INDIAN RUBBER TREE). Very fleshy leaves, not quite hardy; makes a beautiful pot plant. .. 2 6
 Cunninghamii. 25 ft. .. 1 6
 Benjamineana (QUEENSLAND WEEPING FIG). A very handsome tree. 40 ft. .. 1 6
 Remarkable for their magnificent foliage. Useful shade trees.

FORSYTHIA

- Viridissima. Golden Bell. 4 ft. .. 1 0
 Variegata Aurea. 5 ft. .. 1 6
 Very showy, yellow, flowering shrub.

FOURCROYA

- Gigantea Variegata (THE GIANT AGAVE). 8 ft. .. 1 6
 When full grown produces enormous fleshy leaves. Flower stem 30 ft., crowned with white flowers.

FRAXINUS (Common Ash)

- Excelsior. 50 ft. .. 1 0
 Alba. 40 ft. .. 1 0
 Excelsior Aurea. Golden. 40 ft. .. 2 6
 Hardy and deciduous; prefers cool climate.

GARDENIA

- Globosa. White and globular. 6 to 8 ft. .. 1 0
 Intermedia. White, very free grower. 3 ft. .. 1 6
 Magnifica. 4 ft. .. 1 6
 Radicans. 1 ft. .. 1 6
 Thunbergi. 12 ft. .. 1 6

Evergreen dwarf flowering shrubs; foliage of a beautiful dark glossy green; lovely pure white flowers, deliciously fragrant. Globosa is a tall-growing shrub of great beauty. Not particular as to soil, but requires a warm situation.

GENISTA

- Alba. The white flowering broom; a very floriferous shrub. 8 ft. .. 1 6
 Florida. Yellow .. 1 0
 Pretty dwarf, hardy, flowering shrubs; good foliage.

GLEDITSIA

- Horrida (HONEY LOCUST TREE) 20 ft. .. 1 6
 Japonica. 20 ft. .. 1 6
 Splendid deciduous tree.

GOLDFUSSIA

- Anisophylla 3 ft. .. 1 0
 Glomerata. 3 ft. .. 1 0
 Dwarf and very pretty evergreen; flowers of rich lavender.

GRAPTOPHYLLUM

- Earlil. 10 ft. .. 1 6
 Pretty red Queensland flow. shrub.

GYMNOCLADUS

- Canadensis (KENTUCKY COFFEE TREE) .. 1 6
 Ornamental, nardy deciduous tree
 Racemes of white flowers.

GREVILLEA

- Robusta (SILKY OAK). 40 ft. 1 0
 A great favourite; grows remarkably quick; it is very handsome and fragrant when in blossom; thrives best sheltered among other trees.

HAKEA

- Eucalyptoides. A magnificent evergreen flowering shrub, with crimson flowers. 8 ft. .. 1 6

HABROTHAMNUS

- Elegans. 6 ft. Scarlet. .. 1 0
 Scaber. Deep crimson. 4 ft. .. 1 0
 A showy family of soft-wooded shrubs, allied to Cestrum; free flowering; very hardy; flowers in bunches.

HALESIA

- Tetraptera (SNOWDROP OR SILVER BELL TREE). White. 15 ft. .. 1 0
 Good for single specimens on lawns.

HAWTHORN (See Crataegus)

Syriacus Purpureus Plenus. Double pur. ..	1 0
Syriacus Alba Luteola Plena. 8 ft. ..	1 6
Syriacus Double Light Violet. 6 ft. ..	1 6
Syriacus Pæoniæflora ..	1 6
Syriacus Violeureus Atropurpurea Flore Plenissimo. 6 ft. ..	1 6
Syriacus Boule de Feu (Ball of Fire). 6 ft. ..	1 6

Hibiscus are absolutely indispensable in flower garden or shrubbery, requiring little attention, grow in any soil, with or without shelter, produce a profusion of large flowers.

The Syriacus varieties are very hardy and will thrive in the coldest districts.

HOLMSKIOLDIA

Sanguinea. Orange scarlet. 4 ft. ..	2 0
-------------------------------------	-----

Choice hardy shrub.

HOLLY (See Ilex)

HORSE CHESTNUT

(See Aesculus)

HYDRANGEA

Cyanoclada Dark blue. 4 ft. ..	1 0
Empress Eugenie White and Pink. 4 ft. ..	1 6
Hortensis Variegata. Light blue. 3 ft. ..	1 0
Otaska. Pink. 4 ft. ..	1 0
Paniculata Grandiflora. White. 4 ft. ..	1 6
Stellata Fimbriata. White. 4 ft. ..	1 6
Thomas Hogg. Pure white. 4 ft. ..	1 0

Beautiful hardy shrub. If grown in a shady position, the soil being moist, the flowers of Hortensis will be blue; if exposed and dry they are generally pink. H. Variegata is a handsome white and green foliage plant; very attractive.

HYPERICUM

Moserianum. Bright yellow. 3 ft. ..	1 6
M. Tricolor Variegata 3 ft. ..	1 6

Charming dwarf flowering plants, not more than 4 ft., producing their flowers in heads, and in great abundance all over the plant; very hardy.

HYMENOSPERMUM

Flavum. A splendid tree; hardy, with beautiful evergreen foliage; fragrant yellow flowers. 20 ft ..	1 0
---	-----

ILEX (Holly)

Aquifolium (ENGLISH HOLLY). 16 ft. ..	1 0
Alba Marginata (SILVER HOLLY). 10 ft. ..	2 0
Aurea (GOLDEN HOLLY). 10 ft. ..	2 0
Cornuta (CHINESE HOLLY) 15 ft. ..	1 0
Paraguayensis (MATE TEA PLANT OF S. AMERICA). 15 ft. ..	1 6

A beautiful tribe of evergreen shrubs, with bright green foliage, generally prickly, and in winter the first four produce bright red berries. Thrive in almost any part of the State. They also represent a variety of forms of variegation very pleasing.

ILLICICUM

Anisatum (ANISEED TREE). 6 ft. ..	1 6
-----------------------------------	-----

INDIGOFERA

Rosea. Pink. 4 ft. ..	1 6
Decora. Pink and white; very pretty. 2 ft. ..	1 6

INGA

Pulcherrima. Scarlet, tassel flower. 4 ft. ..	1 6
Portoricensis. White tassel flower. 4 ft. ..	1 6

Beautiful evergreen shrub, with mimosa-like foliage.

JACARANDA

Mimosæfolia ..	1 0
----------------	-----

Magnificent tree, producing beautiful lavender flowers; foliage graceful; deciduous; 30 or 40 ft. when full grown.

TREES, SHRUBS, & PLANTS

Continued

JUSTICIA

Adhatoda. White. 4 ft. ..	1 0
Carnea. Rose colour. 2½ ft. ..	1 6
Magnifica. Pink. 4 ft. ..	1 0
Rosea Carminæa. 6 ft. ..	1 6
Splendens. Pink. 3 ft. ..	1 0

Beautiful flowering shrubs, only requiring shelter and ample watering, except J. Adhatoda, which is particularly hardy, and makes a stately shrub.

KERRIA

Japonica. Yellow. 5 ft. ..	1 0
Japonica fl. pl. Double yellow. 5 ft. ..	1 0

Hardy, handsome shrub.

KALOSANTHES

Coccinea (CRASSULA). 1½ ft. ..	1 6
--------------------------------	-----

Beautiful heads of crimson flower.

LAGERSTRAEMIA (Cape Myrtle)

Indica. Pink. 20 ft. ..	1 6
Indica Alba. White. 10 ft. ..	1 6
Indica. Red. 10 ft. ..	1 6
Mathewsi. Lavender. 10 ft. ..	2 0

Splendid flowering, hardy, deciduous shrub.

HYDRANGEA.

LAGUNARIA

Patersoni. Pink. 20 ft. ..	1 6
----------------------------	-----

Most suitable tree for shelter from sea breezes. A native of Norfolk Island.

LANTANA

Splendid flowering shrubs and thrive anywhere. We can supply six colours, named varieties. 6 ft. .. 1 0

LASIANDRA

Heteromala. Blue. 5 ft. ..	1 6
Macrantha. Purple. 6 ft. ..	1 6
Macrantha Grandiflora. Extra large and choice. Purple. 6 ft. ..	2 6
Rosea. Pink; very profuse bloomer ..	1 6

Free flowering, slender, evergreen shrubs; free growers, producing lovely single flowers; require a sheltered situation.

LAURUS

Nobilis (SWEET BAY). 30 ft. ..	1 6
--------------------------------	-----

Beautiful evergreen, of easy culture; the leaves have strong seasoning properties.

LAVENDULA

Spica. Common lavender ..	1 0
Stœchas. French lavender ..	1 0

LIBONIA

Floribunda. Orange and red. 3 ft. ..	1 0
--------------------------------------	-----

Fine free flowering plant.

LIGUSTRUM

Japonicum. 8 ft. ..	1 6
Lucidum. 12 ft. ..	per 100 7 6
Lucidum Variegatum. 8 ft. ..	2 0
Ovatum. 8 ft. ..	1 6
Ovalifolium Aureum Elegantissimum. 4 ft. ..	1 6
Chinensis. Large evergreen, profuse bloomer. 15 ft ..	1 3
Robustum Marginatum Aureum. 6 ft. ..	1 6
Sinensis Minum Folis Variegatus Aureis. 4 ft. ..	1 6
Vulgaris. 6 ft. ..	per 100 7 6

Ligustrums, or Privets, are useful in shrubberies; they are frequently used for ornamental hedges; they stand exposure well, and will grow in moist soils. Vulgaris and Lucidum are expressly used for these purposes. The variegated sections make beautiful single specimens to plant on lawns.

LILAC (See Syringa)

LINUM

Trigynum. 1 ft. ..	1 0
--------------------	-----

Handsome, dwarf, yellow, winter flowering shrub.

LIQUIDAMBAR

Styraciflua (THE SWEET GUM TREE). 40 ft. ..	1 6
---	-----

Greenish yellow flowers; an elegant tree, somewhat resembling the maple, the leaves turning to a bright red in the autumn. Will grow in any soil or situation.

LIRIODENDRON

Tulipiferum (TULIP TREE). 60 ft. ..	1 6
-------------------------------------	-----

Elegant, hardy deciduous tree; large flowers, variegated with green, yellow and orange; fragrant, splendid foliage; hardy.

LOPHOSTEMON

Australis. 40 ft. ..	1 0
----------------------	-----

A handsome shelter tree, suitable for planting with pines and camphor trees; evergreen.

MACADAMIA

Ternifolia (QUEENSLAND NUT). 10 ft. ..	1 6
--	-----

Yielding an edible nut of good flavour; it is also a very ornamental tree; fine foliage.

MACKAYA

Bella. Lilac-purple. 6 ft. ..	1 0
-------------------------------	-----

Vigorous ornamental shrub.

MAGNOLIA

Grandiflora. White. 25 ft. ..	1 6
Anonæfolia. The Port Wine Magnolia, 8 ft. ..	1 6
Conspicua. Purple and White, deciduous 20 ft. ..	1 6
Purpurea. Purple and White, deciduous. 15 ft. ..	1 6
Bicolor. Deciduous. 10 ft. ..	1 6
Fuscata. Synonymous with Anonæfolia ..	1 6
Stellata. White star shaped flowers ..	3 6
Stellata Rosea. Pink star shaped flowers ..	5 0

Magnolias deserve a place in every garden. Grandiflora is evergreen, and produces lovely, large, pure white flowers. Fuscata is a pretty shrub, having pale, chocolate-coloured flowers and a delightful odour, resembling port wine. Purpurea, Conspicua, and Bi-colour are deciduous, with large purple and white tulip-shaped flowers.

MALUS (The Crab Apple)

Atrosanguinea. 10 ft. ..	1 6
Angustifolia fl. pl. 10 ft. ..	1 6
Floribunda. 10 ft. ..	1 6
Parkmani. 10 ft. ..	1 6
Scheideckerli. 10 ft. ..	1 6
Spectabilis Alba fl. pl. 10 ft. ..	1 6
Spectabilis Rosea fl. pl. 10 ft. ..	1 6

These are without doubt a decided acquisition; they will prove to be very ornamental wherever planted. Covered with beautiful pink and white blossoms in the springtime, and in due season there appears on the trees a profusion of small apples, about the size of a cherry, which can be used for preserving purposes.

MAPLE (See Acer)

MELALEUCA

Hypericifolia (Ti TREE). Scarlet ..	1 6
-------------------------------------	-----

Hardy flowering ornamental shrub; most suitable for sea coast; very showy.

MELASTOMA (See Lasiandra)

MELIA

Azederach (CHINESE WHITE CEDAR) 20 ft. ..	1 0
---	-----

Suitable for street and ornamental planting.

SEEDS

PLANTS

SYDNEY

METROSIDEROS

Tomentosus (NEW ZEALAND CHRISTMAS BUSH).
Blood red flowers. 25 ft. .. 1 6

MITRARIA

Coccolnea. 2 ft. A dwarf-growing shrub, with
pretty orange scarlet flowers .. 1 6

MURRAYA

Exotica. 6 ft. .. 1 6
A beautiful dwarf evergreen shrub, with perfumed
white flowers, like orange blossoms.

MUSA (Banana)

Ensate (ABYSSINIAN BANANA). Very handsome,
large foliage, with deep red mid-rib; for
sheltered situation. 10 ft. .. 1 6
Other varieties offered as fruits in General List.

MYRTUS (Myrtle)

Communis. 6 ft. .. 1 6
A charming plant, with dark green shining leaves, which
are highly perfumed; flowers white; not hardy in the
colder parts.

NANDINA

Domestica. 5 ft. .. 1 6
A pretty, hardy, dwarf shrub, with clusters of flowers and
graceful foliage.

NERIUM (Oleander)

Album. 15 ft. .. 1 6
Grandiflora. 20 ft. .. 1 6
Mile. Dubois. Flowers single, pure white. 6 ft. .. 1 6
Punctatum. Very large, of a beautiful shade of
light pink. 5 ft. .. 1 6
Rosea Splendens. 12 ft. .. 1 6
Splendens Variegata, with gold variegation, mak-
ing it most attractive .. 2 0
Sou de Cazalis Albert. Brilliant single red. .. 2 0
Beautiful family of flowering shrubs, with large clusters
of brilliant flowers.

OAK (See Quercus)

OCHNA

Multiflora. Yellow. 3 ft. .. 1 6
The flowers, which are produced in great profusion, are
very fragrant, and are succeeded by ornamental berries of
a scarlet and black colour.

OLEA

Europa (THE COMMON OLIVE) .. 10s per 100
Suitable for hedges; fine, dense, dark green foliage.

OSMANTHUS

Illicifolius Variegata. 6 ft. .. 1 6
Small-leaved, holly-like plant, compact habit.

PAEONIA

Arborea (JAPANESE TREE PEONY). Very showy.
4 ft. .. 3 6
A named collection of various shades, at 3s 6d each.

PAULOWNIA

Imperialis. 15 ft. .. 1 6
A very beautiful, hardy, deciduous tree, with large
leaves and abundance of flowers. Corolla pale violet with
dark spots.

PEPPER TREE (See Schinus)

PHILADELPHUS (Mock Orange)

Coronarius. 4 ft. .. 1 0
Gordonianus. Large, single. 6 ft. .. 1 6
Grandiflorus. 6 ft. .. 1 6
Manteau d'Homine. 5 ft. .. 1 6
Nivalis. Purest white. 5 ft. .. 1 6
Microphyllus. Small-leaved, of dwarf habit;
large white flow., deliciously scented. 4 ft. .. 1 6
Mont Blanc. Entirely covered with large fragrant
flowers. 5 ft. .. 1 6
Multiflorus Plenus. Large, double. 5 ft. .. 1 6
Primulæflorus. 5 ft. .. 1 6
Speciosa. Single, sweet-scented. 6 ft. .. 1 6
Beautiful hardy plants, bearing single and double white
flowers. The single flowers are not unlike orange blossoms;
deciduous.

PHORMIUM (New Zealand Flax)

Tenax. 5 ft. .. 1 0
Tenax Variegata. 5 ft. .. 1 6
A fibre plant of great value; the variegated varieties are
very ornamental.

PHOTINIA

Serrulata (CHINESE HAWTHORN). 10 ft. .. 1 0
A fine foliage, hardy, evergreen, of compact habit; its
flowers are small and white; leaves deep green.

PHYGELIUS

Capensis. 3 ft. .. 1 0
Beautiful dwarf-flowering shrub, with coral red and
yellow flowers on long stems.

PITTIOSPORUM

Crassifolium. 10 ft. .. 1 0
Eugenoides. 15 ft. .. 1 0
Eugenoides Variegatum. 12 ft. .. 15s doz. 1 6
Nana Compacta. A remarkably dwarf compact
variety, not exceeding 2 ft. in height; very
bushy habit .. 1s each, 9s doz.
Nigrescens. 12 ft. .. 1 0
Nigrescens Variegata. 12 ft. .. 1 6
Tobira. 10 ft. .. 1 0
Tobira Variegata. 6 ft. .. 1 6
Undulatum. So-called Victorian Laurel, producing
creamy white flowers, highly scented. 25 ft. .. 1 0
All the Pittiosporums are highly ornamental, and make
fine single specimens in the shrubbery. *Undulatum*,
Eugenoides, and *Eugenoides Variegata* are suitable for
ornamental evergreen hedges. (See Hedge Plants.)

PLATANUS (Plane)

Orientalis (ORIENTAL PLANE TREE). 50 ft. .. 1 0
Most handsome, deciduous tree, suitable for avenues or
pleasure grounds; quick growing shade trees.

PLUMBAGO

Capensis. Lavender. 5 ft. .. 1 0
Capensis Alba. Splendid shrub, bearing white
flowers in great profusion. 4 ft. .. 1 0
Larperntæ. Blue. 24 ft. .. 1 0
A favourite family of free-flowering plants.

Pyrus, Japonica

PLUMIERIA

Acuminata (FRANGIPANNI) .. 6 ft. 2 0
Charming white, trumpet-shaped flower; very sweet
perfume.

POINSETTIA

Albida. Pure white bracts. 10 ft. .. 1 6
Pulcherrima. Bright crimson. 12 ft. .. 1 6
Spring flowering shrubs, producing beautiful bracts
6 inches across on the points of the shoots or previous
season's growth; the leaves follow the flowers.

POPULUS (Poplar)

Alba (SILVER POPLAR). 50 ft. .. 1 0
Argentea (POPLAR). 40 ft. .. 1 0
Balsamea (BALSAM POPLAR) .. 1 0
Betulifolia. 40 ft. .. 1 0
Bolleana (SILVER LEAVED POPLAR). 70 ft. .. 1 0
Dilatata (UPRIGHT POPLAR). 60 ft. .. 1 0
Nigra (BLACK POPLAR). 60 ft. .. 1 0
The varieties of this fine deciduous, hardy tree have a
very upright habit of growth, and form fine contrasts in
plantations where pines predominate.

POINCIANA

Gillesii (THE BIRD OF PARADISE). Orange yellow
and red; a magnificent flower, and will do well
anywhere. 10 ft. .. 1 6
Pulcherrima. Reddish-yellow, with long red
anthers .. 1 6
Regia (ROYAL PEACOCK FLOWER). Bright scarlet
with red and yellow .. 1 6
The flowers of these beautiful shrubs resemble a bird, and
the foliage is very graceful and unique.

PROTEA

Mellifera (CAPE HONEYSUCKLE). Pink and yellow 1 6
Handsome, medium-sized shrub, with many white and
pink flowers about 4 in. long, with remarkable wax-like
appearance.

PRUNUS

Pissardii. Ornamental species from Persia, coppery
crimson foliage, strikingly pretty. Highly
coloured edible fruit .. 1 3
Pissardii Moseri fl. pl. Large bunches of charming
double rose-coloured flowers .. 2 6
Flora Rubra. Red. Double. 6 ft. .. 1 6
Alba Plena. Double, white, 6 ft. .. 1 6
Mume. White, double .. 2 0
Mume. Red, double .. 2 0
Triloba. Double, rose .. 1 6
Double-flowering prune; very pretty.

PUNICA (Pomegranate)

Granatum (COMMON POMEGRANATE). 10 ft. .. 1 0
Granatum fl. pl. 10 ft. .. 1 6
Granatum Alba fl. pl. 10 ft. .. 1 0
Andre Leroy. Quite distinct; reddish salmon;
white margin. 10 ft. .. 1 6
These graceful shrubs are charming, if only for their
flowers; the double varieties are particularly fine.

PYRUS (Cydonia)

Aucuparia (MOUNTAIN ASH OR ROWAN TREE) 30 ft. 1 6
Domestica. Splendid tree, with edible fruit .. 1 6
Japonica. Scarlet. 6 ft. (See Cydonias) .. 1 6
Japonica Alba. White .. 1 6

QUEENSLAND NUT (See Macadamia)

QUERCUS (Oak)

Cerris (TURKEY OAK) .. 1 6
Coccinea. Scarlet. 40 ft. .. 1 6
Ilex. Evergreen. 30 ft. .. 1 6
Pedunculata (ENGLISH OAK). 60 ft. .. 1 0
Pallustris (AMERICAN CRIMSON OAK). 30 ft. .. 1 6
Rubra. Red. 40 ft. .. 1 6
Rubra Pyramidalis. 40 ft. .. 1 6
Suber (CORK OAK). Very ornamental. 25 ft. .. 1 6
Virens (EVERGREEN OAK). 40 ft. .. 1 6
Hardy family of beautiful trees, mostly requiring cooler
districts of the State; deciduous and slow grower.

RAPHIOLEPSIS (Indian Hawthorn)

Indica. 3 ft. .. 1 0
Intermedia. 10 ft. .. 1 0
Ovata. 4 ft. .. 1 0
Evergreen; free-flowering hardy shrubs.

RED CEDAR (See Cedrela)

RHAMNUS (Buckthorn)

Latifolia. 5 ft. .. 1 6
Variegata. 5 ft. .. 2 0
Evergreen shrubs.

RHODODENDRON

Hybridum. Varieties. 8 ft. .. from 2 6
Ponticum Violaceum. Violet. .. 1 6
Charming tribe of plants for the cooler districts of the
State; hard-wooded evergreen shrubs, magnificent heads
of flowers of a variety of colours.

RHONDELETIA

Anomala. Scarlet. 3 ft. .. 1 6
Speciosa Major. Crimson. 6 ft. .. 1 6
Amena. Salmon. 10 ft. .. 1 6
Versicolor. 6 ft. .. 1 6
Highly ornamental and brilliant flowering shrubs.

RHUS (Autumn Foliage Plants)

Cotinus. Feathery flowers, becoming yellow in
the autumn. 6 ft. .. 1 6
Succedanea. The leaves of this variety turn to a
bright crimson in the autumn; very attractive.
10 ft. .. 1 6
Typhina (VINEGAR TREE). Branches and stalks
densely velvety and hairy. 10 ft. .. 1 6
Vernicifera (LACQUER TREE). Very ornamental,
with large pinnate leaves, turning brown-red
in the autumn .. 1 6
Hardy shrubs, with beautiful foliage.

RICINUS (Castor Oil Tree)

Communis .. 10 ft. .. 1 0
Large ornamental foliage.

SEEDS

Anderson & Co.

PLANTS

SYDNEY

ROBINIA

Decalsneana. Rose, flowers in great abundance.

30 ft.	2 0
Hispida Compacta. 15 ft.	1 6
Hispida Rosea (ROSE ACACIA). 6 ft.	1 6
Pseudo Acacia (FALSE ACACIA). 40 ft.	1 0

Pseudo Acacia is highly ornamental, with its Wistaria-like white flowers; can be strongly recommended for the drier parts of the State.

ROSMARINUS

Officinalis (ROSEMARY). 5 ft. 1 0

RUSSELLIA

Juncea. 3 ft. 1 0

Multiflora. 4 ft. 1 6

A small family of plants, with rush-like leaves, rather ornamental and suitable for outdoor culture; scarlet flowers.

SALIX (Willow)

Alba Flava. 40 ft. 1 0

Aurea. Golden variety. 25 ft. 1 6

Babylonica (WEeping Willow). 60 ft. 1 0

Purpurea Americana. 40 ft. 1 0

Sacramenta. 40 ft. 1 0

Smithiana. 40 ft. 1 0

Viminalis (BASKET Willow). 25 ft. 1 0

Salix Babylonica (Weeping Willow) thrives well in light, moist soil; it will grow best near ponds or water-courses, and even in water, if not too deep.

SALVIA (See Herbaceous Plants)

SAMBUCUS (The Elderberry)

Argentea Variegata. Silver-leaved. 12 ft. .. 1 0

Aurea. Golden-leaved. 12 ft. 1 0

Nigra. 12 ft. 1 0

Rosea fl. pl. Double pink flowering. 12 ft. .. 1 6

A useful and ornamental tree for shrubberies; prefers cooler regions.

SCHINUS

Molle (CALIFORNIAN PEPPER TREE). 25 ft. .. 1 0

(For price per 100, see page 72.)

A beautiful, fast-growing graceful tree; light green foliage and bright scarlet berries; leaves have a strong aromatic scent; suitable for avenues or breakwinds.

SCHOTIA

Latifolia (WHITE KAFFIR-BEAN TREE). 8 ft. .. 1 6

Speciosa. Scarlet. 10 ft. 1 6

SILKY OAK (See Grevillea)

SNOWBALL TREE (See Viburnum)

SOLLYA (Australian Blue Bell)

Heterophylla. 6 ft. 1 0

Very ornamental shrub, producing blue flowers.

SOPHORA (Japanese Pagoda Tree)

Japonica. White. 20 ft. 1 6

Free-flowering, deciduous tree shrub, prefers warm sheltered position.

SPARMANNIA

Africana. White. 15 ft. 1 6

SPARTIUM (Broom)

Album Multiflorum. 5 ft. 1 6

Scoparium. 5 ft. 1 0

Juncea (SPANISH BROOM). Yellow 1 0

Hardy and free-flowering, suitable for any climate.

SPIRÆA

Anthony Waterer. Crimson, free-flowering. 2 ft. 1 0

Arcefolia. Most profuse bloomer, and the most elegant of the Spiræas. 2 ft. 2 0

Californica. Pink. 2 ft. 1 0

Caryopteris Mastocanthus (called BLUE SPIRÆA). Not a true Spiræa; lovely rich lavender. 6 ft. 1 0

Callosa Rubra. 2 ft. 1 6

Douglasii. 3 ft. 1 0

Gracilis. Small, white, dwarf habit. 2 ft. .. 1 0

Grandiflora. Large white flower. 6 ft. .. 1 6

Hypericifolia (ITALIAN MAY). Single white. 6 ft. 1 0

Prunifolia fl. pl. 4 ft. 1 0

Reevesiana fl. pl. Beautiful hawthorn-like double flowering May; white. 4 ft. 1 0

Rupestris. White. 2 ft. 1 0

Deciduous, free-blooming and useful shrubs; a charming family of plants; should be in every garden.

STENOCARPUS

Cunninghamii (THE SCARLET UMBRELLA FLOWER TREE OF QUEENSLAND). 25 ft. 1 6

Beautiful tree; large handsome foliage and fine flowers; evergreen and hardy in warm districts.

STERCULEA

Acerifolia (FLAME TREE) 1 0

Diversifolia (KURRAJONG). 50 ft. 1 0

Heterophylla (BOTTLE TREE). 30 ft. 1 0

Handsome native trees.

Plicatum Tomentosum. 10 ft.	2 0
Macrocephalum. The Giant Snowball. 12 ft.	2 6

As ornamental foliage plants Viburnums are well worthy a place, but their beautiful flowers render them invaluable. Tinus (Laurustinus) is one of the finest shrubs in cultivation. All thrive equally well in the coldest as well as in the hottest parts of New South Wales.

"Am pleased to say that last season I had over 100 trees from you embracing every kind likely to grow in this locality, and though the season was exceptionally dry, have not lost a tree."—P. GRANT, Macksville, Nambucca River.—18-5-09.

"The plants arrived in splendid order. Thanks very much for splendid packing. I am sending along another order, and I shall leave it to your better judgment re the best method of transit."—Mrs. E. McDONALD, Goonooongla, Goulburn.—8-7-09.

"Every tree and shrub I got from you is growing splendidly. As a friend of mine said to me the other day: 'You can't beat Anderson's.'"—H. G. MADDEN, Avoca, Aberdeen.

Laurustinus (Viburnum, Tinus).

WEIGELIA (See Diervilla)

WILLOW (See Salix)

YUCCA

Alcelfolia Variegata. Superb variety. 8 ft. to 10 ft.	2 6
Filamentosa. 4 ft.	1 0
Gloriosa. 12 ft.	1 6
Quadricolor. 3 ft.	3 6
Recurva. 5 ft.	1 6

Ornamental plants on banks, rockeries, or dry places, some producing magnificent tall spikes of flowers.

"You are to be congratulated upon the way in which you packed the rose trees you sent me last month. I may add that the trees are in splendid order and are growing well, and I must thank you also for the seeds you sent me, they are all looking well. I am so pleased with your roses and seeds that I am going to give you an order for shrubs and other plants in a few months' time."—Mrs. O. NEILSEN, Avondale, via Bundaberg, Q.—20-8-09.

"I received the roses and fruit trees and I was well pleased with them, they could not have been better packed. They were better packed than any trees or plants I ever had sent me before, and if I should want any more another year, I will certainly send to you for them."—W. J. MAUNDER, Town View, Bective.—17-8-08.

HEDGE PLANTS

Aberia Caffra (KAFFIR APPLE). Plant 3 ft. apart; very spiny, very useful for a defensive hedge. 7s 6d doz.

African Box Thorn (LYCIUM HORRIDUM). Plant 12 inches apart. 2s 6d per 100, 20s per 1000; not less than 500 at 1000 rate.

This prickly hedge plant is a quick-growing evergreen, suitable for fencing large gardens.

Coprosma Lucida. Plant 3 ft. apart. 8s per doz. This is a good hedge plant, and is particularly hardy, especially on the sea coast.

Cupressus Torulosa. Plant 3 ft. apart. Plants of the true variety propagated from cuttings, and established in pots. 15s per doz.

This makes a splendid shelter hedge or breakwind, requiring little or no trimming for a long time.

Duranta. Blue. 3 ft. apart. One of the best flowering hedge plants. Seedlings, 30s per 100; Cuttings in pots, 6s per doz., 40s per 100.

Hawthorn Quicks (MAY). Plant 9 inches apart—8s per 100, 25s per 1000; not less than 500 at 1000. A fine, thorny, deciduous hedge plant.

Ligustrum Chinensis (CHINESE PRIVET). Plant 3 ft. apart. 15s per doz.; 90s per 100

Ligustrum Lucidum (LARGE-LEAVED PRIVET). Plant 12 inches apart. 1s 6d doz.; 7s 6d 100; not less than 50 at 100 rate.

Maclura Aurantiaca (OSAGE ORANGE). An excellent plant for forming hedges; strong growing. 7s 6d per 100

Olive, Common (OLEA EUROPA). Plant 12 in. apart. 1s 6d doz., 10s per 100; not less than 50 at 100 rate.

The very best hedge plant for this State, as it withstands drought and heat splendidly, is a quick grower, and stands any amount of cutting back.

SALTBUSH (Rhogodia Hastata). 1s per doz. 7s per 100; not less than 50 at 100 rate. Plant 12 inches apart.

Pittosporum Eugenioides 8s per doz., 60s per 100

Pittosporum Eugenioides, Var. 12s per doz., 90s per 100

Pittosporum Nigrescens 8s per doz., 60s per 100

Pittosporum Undulatum, the Victorian Laurel. 8s per doz., 60s per 100

These make fine evergreen hedges for gardens, and can be trimmed into any desired shape. Plant in single rows, 2 feet apart.

Plumbago. White and blue. 2 ft. apart. 8s doz. 50s 100

Privet. Evergreen. Plant 12 inches apart—1s 6d doz., 7s 6d 100; not less than 50 at 100 rate.

Privet, Golden. Plant 12 inches apart 4s per doz. Of all tried hedging shrubs none compare with Privet.

Raphiolepis (INDIAN HAWTHORN). Plant 2 feet apart; good flowering hedge 10s per doz., 60s per 100

Tecoma Capensis. Red flowering. 10s doz., 60s 100

Viburnum Tinus. Plant 2 feet apart. Useful evergreen hedge 10s per doz., 60s per 100

Cupressus Macrocarpa. 3 feet apart. Well-known plant. Small, 40s, large 60s per 100.

Cerasus (ENGLISH LAUREL). Suitable for cold districts only. 3 ft. apart. 40 to 50s per 100

Myrabolan Plum. Useful and ornamental. 1 ft. apart 6s doz., 40s per 100

Monthly Roses. 4 ft. apart. Assorted colours. 10s doz.

Veronica, Sorts. 3 ft. apart. 10s doz.

Rhamnus (BUCKTHORN). Useful hedge. 2 ft. apart. 8s per doz., 60s per 100

Rhamnus, Variegated. Choice. 3 ft. apart. 15s per doz.

SEEDS

PLANTS

SYDNEY

Climbing & Twining Plants

AKEBIA

Quinata 1 0
A beautiful climber from Japan; flowers of a dark heliotrope colour, borne in small clusters.

ALLAMANDA

Hendersonii. Large yellow, handsome flowers .. 1 6
It is usually grown as a greenhouse plant, but will do well in warm situations out of doors.

AMPELOPSIS (Virginian Creeper)

Hederacea 1 0
Muralis 1 0
Sieboldtii Variegata. Beautiful white and pink variegated foliage .. 1 6
Veitchii Purpurea. Foliage beautifully tinted red 1 0
Grown for their beautiful autumn-tinted foliage. Well-known favourite creepers, hardy and rapid growers, with fine foliage; of easy culture. A. Veitchii will cling to the wall without support; has most picturesque appearance.

ANTIGONON

Amabile. Bright rose 1 6
Leptopus. Pink. 50 ft. 1 6
Leptopus Alba. White 1 6
A charming, slender creeper, producing an abundance of flowers.

ARISTOLOCHIA

Elegans (so-called "Dutchman's Pipe")
Beautiful bush-house or greenhouse plant. Flowers have a slightly distended tube, bent upward; a rich purple colour, with white markings 1 6
Grandiflora. Interesting plant, with handsome foliage and singularly shaped flowers. Fine for a wall, fence or side of bush-house. 20 ft. 1 6
Sipho. Yellowish brown flowers .. 1 6

BEAUMONTIA

Grandiflora. White 1 6
A magnificent flowering climber, producing large white, trumpet-shaped flowers; highly perfumed.

BIGNONIA

Australis (WONGA WONGA VINE). Cream and brown 1 0
Capreolata. Red, very distinct 1 6
Cherere. Large scarlet 2 0
Excelsa. Yellow, handsome 1 0
Grandiflora. Orange 1 6
Guilfoylei. Red and orange 1 6
Jasminoides. White, dark eye 1 6
Lindleyana. Lavender 1 0
Mackeni. Rose. One of the best 1 0
Mad. Galen. Orange bronze 1 6
Mexicana. Lavender 1 6
Sanguinea Præcox. Orange and red 1 6
Speciosa Flava. Yellow and red 1 6
Tweediana. Golden 1 0
Venusta. Orange 1 6

Bignonias are of easy culture, fast growers, and beautiful as well as free bloomers. "Venusta," when grown on a wall, is unsurpassed in the profusion or magnificence of its large racemes of bright orange coloured flowers. Most varieties attach themselves to the walls and fences, and gain their own support.

BOUGAINVILLEA

Spectabilis. Rose lilac 1 6
Splendens. Crimson 2 6
Speciosa. Purple, white centre 1 6
Speciosa Variegata. A charming variegated foliage form; flower the same as parent plant Speciosa 1 6
Brazilensis. Bright mauve; very handsome .. 1 6
Conspicua. Purple shade 1 6
Glabra. Rose lilac; bush habit 1 6
Glabra Sanderiana. The most perpetual flowering of all. Violet red 1 6
Grandiflora. Magenta 1 6
Hessiana. Purple 1 6

Bougainvilleas like a warm northerly aspect and shelter; their flowers are magnificent, and continue for a long time. All are splendid climbers or creepers. Glabra and Glabra Sanderiana may be grown as shrubs, but are best trained against a wall in a northerly aspect.

This List contains a Choice Selection, and with the exception of the Ivies, and one or two others, all those named are handsome flowering plants, and valued for their trailing and climbing.

CANAVALIA

Bonarjensis 1 6
Has scarcely an equal in extent or quickness of growth or beauty of foliage; its leaves are large and of a brilliant shining green, with bright purplish red spikes of pea-like flowers.

CLEMATIS

Jackmanii Alba. Pure white, faintly tinted pink 2 0
Duchess of Edinburgh 1 6
In named varieties, 1s 6d each to 2s each.
Deciduous plants of great beauty; require a sheltered position and good soil; produce large single and double flowers of a variety of colours; grown on a trellis they are very effective.

Aristolochia
Elegans
(Dutchman's Pipe)

COBAEA

Scandens. Purple 1 0
Scandens Alba. White 1 0
Very suitable for covering a trellis; grow freely, have fine foliage, and produce an abundance of bloom; evergreen and quite hardy.

DOLICHOS

Lignosus. Pink. 1 0
Lignosus Alba. White 1 0
Fine climber for covering old fences, etc.

FICUS (Creeping Fig)

Minima. Very pretty, small-leaved variety .. 1 0
Stipulata. Ordinary variety 1 0
Repens Variegata 1 6

Very fine creepers for covering a wall or fence; leaves small and clinging, and the shoots, having small roots, will make fast to anything against which they are trained.

FUCHSIA (Climbing)

Procumbens or Kirkii 1 0
Flowers small, tube yellowish, upper portion reflexed. blue. This exceedingly pretty little hardy creeper is principally grown on account of its producing magenta-crimson berries, which remain on for months, and are very attractive during the winter. It is an admirable plant for a suspending basket.

GELSEMIUM

Sempervirens 1 6
A beautiful climber; corolla of the flower deep yellow, with protruding anthers.

HARDENBERGIA

Digitata. Purple and white 1 6
Monophylla. Purple 1 0
Monophylla Alba. White 1 0
Exceedingly pretty climbing plants.

HEDERA (Ivy)

Chrysophylla 1 6
Helix Madariensis Variegata 2 0
The best of the variegated tribe; free growing and very effective, leaves broadly margined with creamy white.
Helix (COMMON IVY). Green-leaved 1 0
Helix Rhomboides Variegata 1 6
Latifolia Maculata 1 6
Palmata Aurea 1 6
Tricolor Marginata. Golden margin 1 6

Ivies are so well known that they require no description here further than to remark that no garden or grounds should be without them; they thrive well anywhere. The variegated varieties are particularly fine, and cold climates suit them admirably.

HEXACENTRIS

Mysorensis. Scarlet and yellow 1 0
Rich glossy foliage, flowers in long bunches.

HONEYSUCKLE (See Lonicera)

HOYA (Wax Plant)

Carnosa. Beautiful climber, with thick, fleshy leaves and beautiful clusters of pinkish white flowers, which look as if frosted 1 0
Carnosa Variegata. Variegated leaves 1 6
Can be grown out of doors on a brick wall in a warm aspect, but is seen to best advantage when grown as a pot plant in a greenhouse.

HUMULUS

Lupulus (THE ENGLISH HOP). 1 6
A charming quick-growing climber, with fine fresh green foliage. The heads of the fruit are used in brewing, and the young branched foliage is a good pot herb.

IPOMÆA (Moon Flower)

Hardyil. Pink. 1 0
Learii. Blue 1 0
Pandurata. White 1 0
Tuberculata. Large rosy red 1 0
Will stand the drought well. It becomes a large luxuriant vine, clothed with abundant growth of pretty cordate leaves and bearing great quantities of large waxy flowers.

IVY (See Hedera)

JASMINUM

Fructicans. Yellow jasmine. 8 ft. 1 0
Gracilis. White. 5 ft. 1 0
Grandiflorum. White. 10 ft. 1 6
Grandiflorum fl. pl. Double white 1 6
Nudiflorum. Yellow. 10 ft. 1 0
Officinale. White. 8 ft. 1 0
Poicocium. White star-like flowers. 8 ft. .. 1 6
Primulinum 1 6
Flowers resembling Jasminum Nudiflorum, but much larger, measuring 1½ to 2 in. in diameter covering the branches their whole length; leaves dark green; a nice shrub.
Reevesii. Good variety; yellow flowers 1 6
Souvenir de Poiteau. Cream, produces a profusion of berries, black in colour. 1 0
Jasmines all produce sweetly-scented flowers, and can also be grown as shrubs.

SEEDS

SYDNEY

PLANTS

LAPAGERIA

Rosea. Bright crimson	7	6
Alba. White	10	6

Very choice climbing plants.

LATHYRUS (Everlasting Pea)

Latifolius Alba. White	1	0
Pubescens. Blue	1	0
Pink Beauty	1	0
Splendens. Crimson	1	0

Exceedingly ornamental, and very desirable plants of easy culture, thriving in any ordinary garden soil.

LOPHOSPERMUM

Grandiflorum. Red	1	6
---------------------------	---	---

Very showy climber, with Gloxinia-shaped flowers.

LONICERA (Honeysuckle)

Aurea Reticulata. White and yellow foliage. ..	1	0
Brachypoda. Yellow, very fragrant	1	6
Caprifolium (English)	1	6
Confusa. Yellow	1	0
Gigantea. Flowers buttercup yel., quick grower. ..	1	6
Halliana. The best white	1	6
Japonica. Cream, sweetly-scented, like Daphne. ..	1	6
Punicea. Very choice	1	6
Semperflorens. Scarlet outside, yellow inside ..	1	6
Sinensis. White and red	1	6
Sinensis Variegata. White and red	1	6
Tartarica Splendens. Scar. Trumpet Honeysuckle. ..	1	6

Scented flow. climbers; fine foliage; quick growth.

MANDEVILLEA

Suaveolens	1	0
--------------------	---	---

A beautiful, slender deciduous creeper, bearing lovely white flowers; fine foliage.

MANETTIA

Bicolour. Yellow and red. A very pretty climber ..	1	6
Glabra. A gem, either in the flower border or bush-house; it has nice foliage, slender habit, and large, scarlet tube-like flowers, 4 ft. ..	1	6

MAURANDYA

Alba. White	1	0
Barclayana. Blue	1	0

Beautiful close-growing climbers; do well on a wire fence or trellis; flowers and leaves small, but produced abundantly.

MEDEOLA (Smilax)

Asparagoides	1	0
----------------------	---	---

The graceful beauty of this handsome plant renders it most valuable for vases or hanging baskets, and it is suitable for either bush-house or verandah culture. It lends itself admirably to table decoration either in pots or for mixing the foliage with cut flowers and fern leaves; a quick grower.

MENISPERMUM

Canadense. Remarkable for beautiful foliage ..	1	6
--	---	---

Pretty deciduous climbing plants. Flowers unimportant; foliage fine; suit shady positions.

MIKANIA (Japanese Ivy)

A quick-growing climber, with ivy-like foliage. yellow flowers, freely produced. ..	1	0
---	---	---

NASTURTIUM (Double Flowering)

Brick Red. Striped yellow	1	0
Scarlet Flowered	1	0

Two charming hardy, quick-growing climbers, with fine foliage; profuse bloomers; perfectly double flowers.

PASSIFLORA (Passion Flower)

Cœrulea. Blue and white	1	0
Constance Elliott. Pure white	1	0
Edulis (EDIBLE PASSION FRUIT). White, ting. pur. ..	0	6
Fragrant Beauty. White, centre chocolate; upper portion purple; fragrant	1	6
Granadilla. Deep crimson, large fruiting	1	6
Kermesina. Richly-coloured scarlet small flowers. ..	1	6
Multiformis. Sweetly-scented; large petals; white rays; outer red	1	6
Sanguinolenta. Reddish violet	1	6

Passifloras should always be included amongst plants selected for covering unsightly objects. The flowers are very beautiful; of singular form and very interesting.

PERESKIA (Climbing Cactus)

Aculeata. Flowers white; known botanically as Barbados Gooseberry (edible)	1	0
--	---	---

PHASEOLUS

Carracalla (SNAIL FLOWER)	1	0
-----------------------------------	---	---

Slender climber, with full foliage, producing clusters of lovely lilac flowers; shell-shaped. Very curious.

PHYSIANTHUS (Cruel Plant)

Albens	1	0
----------------	---	---

White flowers, like Stephanotis; quick grower.

CLIMBING AND
TWINING PLANTS

Continued

Rhynchospermum Jasminoides

QUISQUALIS

Indica (RANGOON CREEPER)	1	6
----------------------------------	---	---

Producing beautiful sweet-scented flowers of orange and crimson on the same racemes.

RHYNCOSPERMUM

Jasminoides	1	6
Jasminoides Variegated	1	6

A beautiful, perfumed white-flowered creeper, of quick growth and fine foliage; it is evergreen and hardy, except in the coldest districts.

SOLANDRA

Grandiflora. Peach-coloured trumpet flower ..	1	6
---	---	---

SOLANUM

Jasminoides. White	1	0
Jasminoides Alba Marginata	1	0
Jasminoides Aurea Variegata	1	0
Seafortianum. Beautiful clusters of blue flowers ..	1	0

Wendlandii. One of the most superb summer flowering vines it is possible to conceive; blooms continuously, not stray blossoms, each one nearly 3 in. across, as many as 100 being in a cluster. The colour is an attractive shade of lavender blue, strikingly beautiful. .. 1 6

Superb summer flowering vines; bloom continuously, with great masses of flowers.

STEPHANOTIS

Floribunda	2	0
--------------------	---	---

Stephanotis is a green-house plant, but will sometimes do well in warm situation out of doors. The foliage is wax-like; flowers pure white; produced in abundant clusters, and very fragrant.

STIGMAPHYLLUM

Ciliatum (GOLDEN VINE)	1	6
--------------------------------	---	---

Producing orchid-like flowers. Very pretty.

TACSONIA

Exoniensis. Rose pink colour	1	0
Smytheana. Handsome hybrid. Flowers distinct in colour—a peculiar shade of orange scarlet; edible	1	6
Igneus. Intense scarlet	1	0
Manicata (SCARLET PASSION FLOWER)	1	6
Mollissima. Pink colour	1	6
Van Volxemi. Crimson colour	1	6

This family is distinguished from the Passiflora by the long cylindrical tubes of the calyx of the flowers; they are quick-growing, beautiful climbers.

THUNBERGIA

Laurifolia. Large blue flowers	1	6
Coccinea. Small red flowers	1	6
Fragrans. White, sweetly scented	1	6

These are fine, free-flowering plants of great beauty.

TROPÆOLUM

Pentaphyllum. Vermilion and green	1	0
Speciosum. Bright orange scarlet	1	0

These are climbers which gain great admiration, free flowering and bulbous.

VIRGINIAN CREEPER

(See Ampelopsis)

VINCA (Periwinkle)

Argentea Variegata. Useful for low border ..	1	0
--	---	---

WISTARIA

Sinensis. A handsome climber; in deep soil it grows to an enormous size; the lavender flowers hang in pendant clusters, flowering in early spring before it puts forth a leaf. ..	1	6
Sinensis Alba	1	6
Multijuga. A Japanese variety, with dark purple racemes, which attain a length of from 2 to 3 feet. An extra fine form	1	6
Multijuga Alba. White	1	6
Magnifica. Blue; flowering when in full leaf ..	1	6

Verandah Plants

Strong Plants, 1s 6d to 2s each

Aspidistra, Variegata

So many lovers of plants have no opportunity of indulging in their hobby, except in a verandah garden, that we add a short list of plants which can be successfully cultivated in pots or boxes in this way. They will all thrive, providing the ends of the verandah are closed in to prevent sharp currents of air blowing on them. In cold districts a screen in front will prevent frosts from injuring them.

Aspidistra. Very hardy; handsome foliage.
Asparagus Plumosus. Very handsome pot plant.
Aucuba. Charming foliage plant.
Azalea. Very showy verandah plants; free bloomers.
Begonia Rex. Ornamental foliage, beautifully marked.
Bouvardias. White, pink, and crimson; charming.
Cactus. Beautiful flowers; various.
Calla (LILY OF THE Nile). Fine foliage; easiest culture.
Coleus. Beautiful ornamental leaves; various kinds.
Epiphyllum. Cactus family; effective verandah plants.
Ferns. Fine, hardy varieties in pots.
Fuschias. In splendid variety; single and double.

Geraniums. Very hardy.
Heliotrope. Sweet-scented favourite flowering plants.
Hydrangea. Fine flowering plants; very attractive.
Imantophyllum. Orange flowers; massive foliage.
Mimulus Musk. Make charming pot plants.
Ophiopogon. Violet flowers; variegated foliage.
Palms. We can supply these in all sizes and varieties.
Primula Sinensis (CHINESE PRIMROSE). Extremely handsome.
Primula Obconica. 1s.
Small Tree Ferns.
Staghorn Ferns. Grown on walls are very beautiful.
Valotta Purpurea. Bulbous plant.

CONIFERS & TAXADS

ARAUCARIA

	each.	dozen.	hundred.
Cunninghami	1 6	15 0	100 0
Bidwilli (BUNYA BUNYA) ..	1 6	15 0	100 0
Excelsa (NORFOLK ISLAND PINE) ..	..	each 1 6	
Brazilensis. Magnificent species ..	..	each 3 6	
Imbricaca (MONKEY PUZZLE). 50 ft. An exquisite			
Pine, specially adapted for cooler districts ..	each 2 6		

A magnificent family of grand ornamental trees, which should be used freely in all plantations. Excelsa (Norfolk Island Pine) of fine symmetrical habit, will grow on the coast, but not too far from the sea; it grows quickly, is hardy and not particular to soil. Cunninghami is a very handsome tree; its foliage is produced on the end of its branches, giving it quite a unique appearance; foliage dark green; branching habit; native of Queensland. Bidwilli (Bunya Bunya), handsome tree of regular and symmetrical habit; leaves deep green, shining and very prickly.

ABIES

	each	1 6
Douglasii (SILVER FIR)	..	1 6
Excelsa (NORWAY SPRUCE)	..	1 6
Smithiana (HIMALAYA SPRUCE)	..	1 6
Alba (WHITE SPRUCE)	..	1 6
Nordmanniana (CRIMEAN PINE)	..	1 6
Menziesii	..	1 6

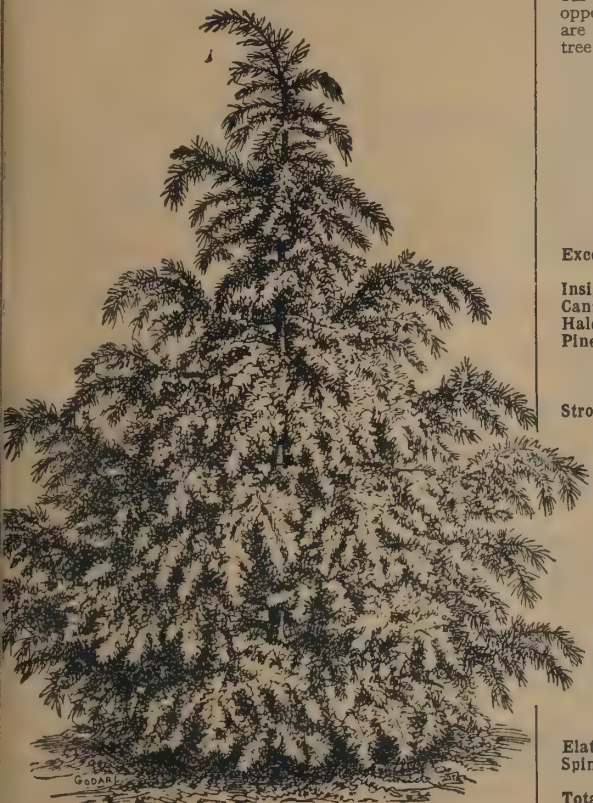

Beautiful trees of symmetrical but rather slow growth, should be in every plantation. When making young growth, they are clad with beautiful pale green foliage; quite hardy; resemble the Scotch firs.

CEDRUS

Deodara or INDIAN CEDAR	1 6 to 2 6 ea.
A beautiful tree, especially well adapted for specimen tree on extensive lawns, and can well be introduced into large avenues, and has proved to be drought-resisting.	
Atlantica (ATLAS CEDAR). Handsome silvery foliage ..	2 6
Lebani. CEDAR OF LEBANON	2 6

CRYPTOMERIA

Elegans	each 1 6
Japonica (THE TYPICAL TREE OF JAPAN); ..	1 6
Fine ornamental trees from Japan; hardy, but prefer good soil and sheltered position. Elegans, of upright habit, well branched, and covered with fine foliage, which changes from green to bronzy crimson during the winter. When well grown they make magnificent specimens.	

Cedrus, Deodara

CUPRESSUS (Cypress)

Lawsoniana Glauca	1 0
Macrocarpa. Of very quick growth	1 0
Macrocarpa Variegata	3 6
Sempervirens	1 0
Lambertiana, "Horizontalis." One of the best. (Grafted)	2 6
Lambertiana, Aurea. Very beautiful. (Grafted) ..	2 6
Knightii. Hardy in all parts	1 0
Torulosa (From Seed)	1 0
Torulosa. Propagated from cuttings; very useful for hedge	1 6
Benthamlana	1 0
Funeris (FUNERAL CYPRESS)	1 0
Goveniana. 15 to 20 ft.	1 0
Guadalupensis	1 0
Majestica	1 0
MacNabiana. 10 to 15 ft.	1 0

Most largely grown of all the Conifers, embracing a variety of beautiful quick-growing trees; they all do well near Sydney, and in nearly all other parts of the State. Lambertiana, the finest of this splendid family of tree shrubs, grows 15 to 20 feet, in three years; of dense habit, pyramidal, branching to the ground, hardy, will stand cutting freely; can be grown as a hedge or break-wind.

JUNIPERUS (Juniper)

Bermudiana (PENCIL CEDAR). An exquisite tree ..	1 6
Chinensis	1 6
Hibernica (Irish)	1 6
Rigida. Splendid for single specimen on lawn. 15 ft. ..	2 0
Thujaoides	1 6
Virginiana (VIRGINIAN CEDAR)	1 6

Hardy, upright-growing Conifers; will thrive in any climate; distinct in form and foliage, and contrast with Cupressus or Pines. Very useful for ornamental planting; of compact habit.

LIBOCEDRUS

Doniata	2 0
Decurrens	1 6

Libocedrus (Incense Cedar). Handsome tree, densely branched, conical shaped; hardy in the colder parts of our State. Leaves are scale formed, compressed, in opposite pairs, and in four imbricated rows. Its leaves are aromatic. Decurrens forms a magnificent specimen tree for a lawn, with bright glossy green foliage.

Muricata (BISHOP'S PINE). A distinct species, with a somewhat irregular growth	..	..	1 0
Rigida (THE PITCH PINE). 40 to 50 ft.	..	..	1 0

This family includes some of the finest trees in cultivation. They are hardy, quick-growing and beautiful specimens for lawn embellishments, or for avenues, and make excellent breakwind plantations.

PODOCARPUS

Elatius. The largest variety	1 6
Spinulosus (ILLAWARRA PINE). A much branched erect shrub	1 6
Totara (NEW ZEALAND YEW TREE)	1 6

We can offer a fine stock of this beautiful shade tree.

RETINOSPORA

Plisifera. 10 ft.	1 6
Plisifera Aurea. 10 ft. 2 0	
Ericoides. 10 to 15 ft. 1 6	
Plumosa Aurea. 20 ft. 2 0	
Retinospora, a beautiful tribe of tree shrubs from 15 to 20 feet high, closely allied to the Cupressus family, which they resemble; close habit, branching, pyramidal.	

SALISBURIA

Adiantifolia (MAIDEN HAIR TREE)	1 6
A fine tree with foliage somewhat resembling an Adiantum; it is not evergreen, however.	

SCIADOPITYS

Verticellata (THE UMBRELLA PINE OF JAPAN). A most remarkable tree of great beauty; does best in rich, moist loam. 60 ft.	2 6
--	-----

TAXODIUM

Distichum (THE DECIDUOUS PINE)	1 6
--	-----

TAXUS (Yew)

Argentea Variegata. Striped with silvery white, sometimes changing to straw colour; a very charming variety	2 6
Hibernica Variegata	2 0
Baccata	1 6
A very handsome tree shrub; quite hardy, compact in growth, and with good foliage.	

THUJA

Lobbi. Handsome tree from California	1 6
Occidentalis	1 0
Occidentalis Ellvangeriana	1 6
Orientalis (THE BOOKLEAF PINE)	1 0
Orientalis Aurea (Golden)	1 6

Beautiful family of plants, of compact dwarf habit of growth. T. Orientalis Aurea is a golden Thuja of great beauty. All the family are hardy anywhere, except in hottest districts.

THUJOPSIS

Borealis	1 6
Dolobrata	1 6
Dolobrata Variegata	1 6
Hardy evergreen coniferous tree, resembling Thuja.	

WELLINGTONIA (Big Tree of California)

Gigantea (REDWOOD)	2 6
In a young state it is of a beautiful habit of growth, and although rather slow growing, it is always worthy of a place. Only suitable for high altitudes in the State.

Azaleas

Strong Plants
1s 6d each
15s doz.

Large Plants at Advanced Prices.

S denotes Single; D, Double; SD, Semi-Dbl.

THE Azalea is a lovely spring-flowering shrub, and has no equal for richness and purity of colouring. Planted in masses it affords a strikingly beautiful display. In very dry seasons Azaleas should be helped with heavy waterings about once a fortnight. They can be grown as pot plants, and are suitable either for bush-house or verandah culture.

- Alba Magna.** Large white, occasionally striped. S.
Baron de Vriere. Pure white; large. S.
Bernard Andrea Alba. White. SD.
Charmer. Bright amaranth; good form. S.
Comtesse de Flanders. Large, satin rose. S.
Comte Charles de Kerchove. Free flowering, perfect shape; flesh colour; white stripe. D.
Coronata. Rosy red. S.
Dame Melanie. Bright rose, edged with pure white; carmine blotch. S.
Daphne. Pure white, sparingly striped with pink; crisped edges. D.
Deutsche Perle. This is without doubt the best double-white Azalea, being very free flowering, early blooming and well adapted for forcing purposes. D.
Due de Nassau. Large, dark rosy purple. S.
Empereur de Bresli. Large double rose of exquisite form, banded with white, upper petals marked with glossy red. D.
Empress of India. Flowers perfect; the outer segments are gracefully wavy and well expanded; the segments which occupy the centre are carmine white and salmony rose. D.
Eulalie van Gert. Pink, carmine spots. S.
Exquisite. Pink and white. S.
Indica Alba. Pure white. S.
Madame Herman Siedel. Pure white. SD.
Magnifica. Large, deep purple. S.
Marquis of Lorne. Bright orange, saffron yel. blotch. S.
Mollis. Orange yellow. S.
Mollis. Pale yellow. S.
Mollis. Orange red. S.
Mont Blanc. White, shaded lemon; beautifully striped. S.
Mortl. White, green tinge. S.
Refulgens. Purple, shaded rose. S.
Roi de Hollande. Bright red. S.
Sigismund Rucker. Rosy lilac, bordered white. S.
Souvenir de Prince Albert. Rose, broad margin white. S.
Splendens. Fine rosy salmon. S.

Bouvardias

1s ea; 9s doz. (Except otherwise marked).

BEAUTIFUL dwarf plants for outdoor cultivation. They are also charming for bouquets. The following collection embraces the best varieties.

- Alfred Neuner.** Double; petals waxy white.
Beauty of Brisbane. Pure white; robust habit.
Bocchil. Bright pink, white throat; very fine.
Bridal Wreath. Pure white; sweetly scented; vigorous grower.
Cardinale. White tube, carmine petals.
Coral Queen. Scarlet, with white throat.
Coral Beauty. pink, changing to half white and pk. 1s 6d
Countess Hopetoun. Rosy salmon, changing to flesh pink.
Dazzler. Fiery red.
Duchess of York. Very cheerful blush pink, shading to a tinge of heliotrope.
Elegans. Vermilion-scarlet; rich and bright.
Ethel Kerslake. Flowers large pure white and highly perf.
Flavescens. Yellow, changing to white.
Flavescens Improved. Very large.
Flavescens fl. pl. Double yellow.
Hogarth. Scarlet; good hardy variety.
Hogarth fl. pl. Dark scarlet; double.
Humboldtii Corymbiflora. Improved snow white; large.
Jaquiniflora. Bright scarlet, hardy.
King of Scarlets. The immense blooms of deep scarlet freely produced.
Luteola Plena. Double; pale yellow tubes.
Maiden's Blush. Bright blush pink.
Meteor. Brilliant scarlet; fine truss; strong vigorous hbt.
Maleking. Very dark crimson, with florets larger than President Cleveland.
Miss Ida Cheeseman. A very distinct variety with large flowers of a pale delicate pink colour, the tube and reverse of petals being of a deeper shade.
Mrs. G. H. Kerslake. Deliciously fragrant; dwarf, sturdy habit; large trusses of flowers.
Mrs. McCulloch. Very beautiful, producing immense trusses of flowers of a reddish salmon colour.
President Cleveland. Very large; brilliant scarlet.
President Garfield. Double rose.
Priory Beauty. Pale rose; fine; large trusses.
Rubra. Dark crimson variety, very floriferous.
Salmon Queen. An exceedingly fine Bouvardia; colour salmon, with a darker tube; distinct, flowers through the whole season.

Group of Bouvardias.

- Sang Lorrain.** Produces large corymbs of double flowers of an orange-scarlet colour.
Umbellata Carne. White, changing to rosy blush
Unique. Cherry red, bright rich, good variety.
Victor Lemoine. Double scarlet.
Vreelandii. White, hardy.
Walhallow. New coral pink variety; floriferous.
White Bocchil. Same habit and shape as the pink variety; buds before opening show pink.

Camellias

1s 6d to 2s each
(according to size)

THESE grand and favourite plants succeed admirably in this climate. The best soil for them is strong, well-drained loam of good depth, with liberal manuring once a year. In favourable soil, the trees will grow to a height of from 12 to 20 feet. With proper attention, fine specimens can be grown in large pots or ornamental tubs for decorative purposes. Bloom from May to September.

- Alba Plena.** White; fine. 2s.
Aspasia. White, pink spots.
Augusta Superba. Pink, cupped.
Blanda. Rose, very hardy.
Bonomiana. White stripes, splendid flower.
Candidissima. White, very beautiful.
C. H. Hovey. Crimson, shaded violet.
Comtesse Callina. Pure white, fine.
Chandleri. Red and White.
Cup of Beauty. White, shaded rose.
Dryade. Rose, fine form.
Fimbriata Alba. Spl., white fringed. 2s each.
Great Eastern. Red, large, showy.
Harriett Sheather. Rosy salmon, fine flower.
Helenor. Carnation striped.
Innocence. Pure white.
Isabella. Large and handsome, white.
Lady St. Clair. Pale pink.
Lavinia Maggi. White, crimson blotches.
Metallica. Dark red.
Mrs. Fairfax. Rose pink.
Mrs. Hope. Blush colour.
Mrs. Mort. Flesh, splendid, imbricated.
Mrs. Shottowe. White striped, rose.
Prince Frederick William. Rose.
Princess Louise. Pure white, fine.
Storvi. Bright rose.
Venus de Medici. Crimson, veined rose.
Virginia Franco. Rose, changing to pink, flesh margined.

"In confirming the small order sent to you this afternoon for hard-wood sticks (per telephone), I want to say that of all the seeds that I have had from you, both flower and vegetable, not one lot has turned out a failure. They have all been very satisfactory.

"I knew very little of gardening and plants when I commenced a few months ago, but with the aid of your Catalogue alone I have made a very considerable success of my small cottage garden, and what I have got from the sheer pleasure of tilling it I cannot express. I consider your Calendars for Vegetable and Flower Garden are excellent, and throughout the Catalogue there are very many valuable aids for the amateur which are positively indispensable to him.—
 Yours faithfully, L. S. COOTE, Y.M.C.A., Sydney, Nov. 11, 1909."

For Novelties in Flowers and Vegetables see Coloured Pages.

Beautiful Cannas

9d each
8s per doz.

THIS is a decorative plant of great beauty, nearly always in flower; magnificent foliage; not particular as to soil or situation. A very ornamental plant, apart altogether from its surprisingly lovely flowers.

Flowering Begonias

THESE charming pot plants are easily managed, and can be grown very successfully in a bush-house; abundant bloomers; all shades of colour. They bloom spring and summer.

TUBEROUS ROOTED

Single Varieties, 1s each; 9s doz. Double Varieties, 1s 6d each; 12s doz.

SHRUBBY VARIETIES

Distinct from the tuberous-rooted varieties; small flowers, but beautiful foliage.

Argyrostigma	Manicata	Nymphofolia
Dregiana	Macrophylla	Spotted Leopard
Fuchsioides	Metallica	Wiltoniensis

The following improved varieties are classed as Tree Begonias, growing to a height of 10 or 12 feet, under favourable shady conditions.

Carrieri (Tree).	Clusters of pure white flowers.	1 6
Coralina (Tree).	Rich, pale pink flowers in clusters	1 6
Coralina Carne.	Tree). Palest flesh colour	2 0
Smithi (Tree).	Rich carmine rose, bronze and green foliage	2 0
Boston Rose (Dwarf).	Excellent pot plant; rosy pink flowers	1 6

ORNAMENTAL LEAVED Begonias

1s each; 9s dozen.

A Fine Collection of the most Beautiful Varieties

HIGHLY decorative pot plants for green-house, verandah or bush-house culture. The leaves are beautifully marked with bronze, silver and crimson. Most charming house plants.

Double Petunias

1s each;
9s doz.

BEAUTIFUL Border Plants, which grow rapidly and bloom profusely during the summer.

Carnations

Perpetual and
Spring Blooming

Tree or Perpetual Flowering

1s each; 10s dozen; post free, 11s

Albert Pier. Silvery white; richly edged and striped ruby; exquisite form.**Amber Queen.** Colour, a pleasing shade of amber occasionally striped soft red; beautiful form; free.**Annie Douglas.** Canary, edged-flaked car., very fine.**Annie McDonald.** Pure white ground, marked maroon.**Antonio.** Bright cerise, free and fragrant.**Balaclava.** Old favourite, dark crimson; constant.**Beatrice.** A deep yellow in colour, edged and marked with bright purple, the contrast and unique colouring being most marked; the flowers do not burst, and it is delightfully sweet scented. 1s 6d.**Buttercup.** Handsome yellow ground, beautifully marked maroon.**Cecelia.** Has clear yellow flowers as large as Malmaisons.**Champion of Newcastle.** Golden yellow, pencilled crimson.**Conspicuous.** Lovely flower, sweet scented, and constantly in bloom; bright rose colour, smooth petals.**Cymbeline.** White ground, striped crimson and purple.**Distinction.** Uncommon colour, white ground with broad flakes of rose. Good tree habit, clove-scented.**Dwyer's Yellow.** Sterling yellow. 1s 6d.**Edith Gray.** White ground, finely pencilled maroon.**Empress.** White, picotee edged with delicate rose-pink.**Evelyn.** A rich lemon yellow, striped with pink and salmon, petals smooth and large; of robust habit, has a lily-like odour.**Fire.** Brilliant scarlet, good form.**Flag Lieutenant.** Bright crimson scarlet, vigorous grower, profuse winter bloomer.**Flora Macdonald.** White ground, edged and marked rosy cerise. 1s 6d.**George E. Elliott.** Brownish-red, flaked dark purple.**Illustrious.** Dark glowing crimson. Large, perfumed, free, and of good form.**Jancourt.** White ground, pencilled rose.**Jim Curry.** Salmon ground and red; strong grower.**Kathleen Sheldon.** Grand scarlet; good form.**Lady Northcote.** Pure white, delicately-edged rose-pink; nicely perfumed, strong habit, free flowering.**Lustre.** Dark crimson; metallic markings.**Mayawood.** Light ground, heavy striped bright crim. 1s 6d**Miss Jessie Moodle.** White ground, with uncommon rich and heavy carmine markings; non-burster.**Miss Harrison.** Slatey grey, barred velvety crimson.**Miss Eileen Ruse.** Pearly white, shell petal of excellent form, free flowering and beautifully clove-scented.**Mrs. Byron Ruse.** Bright orange, edged scarlet. Very large well-formed flower of great substance.

The lovely Carnations are really everybody's flowers, and are quite in the first rank as amateur's favourites; they are so beautiful, so free flowering and attractive, and continue to bloom so long. There is no trouble in their culture—good rich open ground, well drained, and plenty of room are essentials, as they like plenty of light and sun; a free supply of liquid manure during season will be found very beneficial.

Perpetual Carnation

Tree or Perpetual Flowering

1s each; 10s dozen; post free, 11s

Miss Barber. Dark crimson, splashed with purple.**Mrs. Shaw.** Golden yellow, pencilled and laced vermil.**Mrs. Cuthbert Hall.** White ground heavily edged and pencilled dark crimson; large, free, and clove-scented.**Mrs. G. H. Kerslake.** Rich golden yellow; edged and pencilled soft scarlet. Vigorous grower, free and extra good.**Mrs. G. H. Murray.** Bright rich crimson.**Mrs. C. T. Richardson.** Cream ground, splashed scarlet.**Mrs. Gazzard.** Delicate rose pink.**Miss M. Georgison.** Creamy-white splashed purple and orange.**Newhaven.** Very large, rich crimson, base of petals dark steel blue.**Princess Alice.** White ground, pencilled rose.**Purple Beauty.** Bright purple, free bloomer. 2s.**Royal Rose.** A strong growing variety of a beautiful tint of bright rose-pink.**Rosy Miller.** Very beautiful, two shades of pink.**Topaz.** Canary yellow, nice form and very free.**Tom Shaw.** Yellow ground and rose; good grower.**White Conqueror.** Very good.**White Clipper.** One of the best whites.**William King.** Very dark, glossy claret throughout; a splendid show flower.**W. R. Church.** Large white, pencilled bright pink.**Yellow Princess Alice.** Yellow ground, pencilled pink.

RAISED BY Mr. G. H. KERSLAKE.

Price 1s each; 10s per dozen; post free, 11s.

Large; sweetly perfumed; sturdy grower.**Thelma.** Soft rosy salmon self. Extra large, of good form and nicely perfumed.**Narelle.** White ground, edged deep crimson. Free flowering, strong grower. Clove scented.**Papuan.** Rich dark crimson self. Very free. Of good form and habit.**Avalanche.** Snowy white; of good form, free growth, and flowers all the year round.

"I may mention that the Malmaison Carnation Plants that I got from the packet of seed have turned out more than a success, and are admired by all that see them. Out of the 84 plants that I got, as I told you in my last, there was only one single one in the lot, and I never saw Carnations for size like them, more like Roses than Carnations, and about 20 different colours, ranging from pure white and flaked to dark crimson and purple. They are even better than those that I got the previous year."—JOHN ALLAN, Lunan Cottage, River Road, Toowong, Brisbane, Queensland, 14/9/09.

Spring Blooming and Fancy Varieties

PLANTS

Chrysanthemums

1s each; 9s doz.; 9s 6d post free

12 distinct varieties (Selection left to us) 6s ^{post} free

CULTURE. The Chrysanthemum suits almost any kind of garden soil, and is well adapted for our various climates. As Chrysanthemums produce far more flower buds than they can bring to maturity, it is necessary, where effect with fairly good bloom is desired, to disbud them to a great extent, as it greatly enhances the beauty of the blossoms without decreasing too much the supply of flowers. Where show blooms are desired, a much more liberal treatment, of course, is necessary, and to produce the vigorous plants and fine blooms seen at Exhibitions, the plants require—in the more advanced stages of their growth—soil of a rich and most substantial nature.

Ada. Cerise with silvery reverse; complete ball of silver.
Alfriston. Ref. A very deep maroon red, reverse of petals gold.

Attraction. Cinnamon-red, old gold reverse.

Australle. Rosy amaranth, silvery reverse.

Beattie. Blush white, centre incurved, outer petals reflexed. 1s 6d

Beauty of Exmouth. Flowers of immense size, snow-white florets beautifully twisted and incurved.

Ben Wells. Jap. Large bluish white, strong grower, good.

Blenheim. Ref. Bright rosy purple, reverse of petals silver.

Brightness. Large rich yellow; very full. 1s 6d

Brockhampton. Jap. Beautiful deep rich golden yellow.

Charm. White, creamy yellow centre, petals long and curly. 1s 6d

Clara Wells. Rich cream; incurved. 1s 6d

Commandant Blusset. Dark crimson red, with silvery white reverse broad florets.

Crimson Exmouth. Identical with Beauty of Exmouth in shape, good crimson. 1s 6d.

Daniel Lambert. Jap. Creamy white, veined and flushed lilac, immense. 1s 6d.

Distinction. Bright crimson, golden reverse. 1s 6d.

Dorothy. Colour, terra cotta, with gold reverse.

Duchess of York. Delicate light yellow, very graceful.

Evelyn Kerslake. Large pure white incurving show flower.

Florence Young. Waxy white, greenish centre, petals long and curly. 1s 6d

Freda Bedford. Bronzy orange shade, fine garden variety.

G. M. Childs. Jap. Flowers immense size, deep rich velvety crimson.

G. W. Pook. Salmon terra cotta. 1s 6d.

General Roberts. Jap. Red, shaded carmine; enormous flower.

Geraldine. Light port wine shade, silver reverse. 1s 6d

Glitters. Deepest yellow; free flowerer. 1s 6d

Godfrey's Pride. Jap. Reddish carmine crim., bronze rev.

Guinea Gold. Good yellow, large.

Hilda. Very deep rosy lilac, immense flower.

Irene Kerslake. Yellow, passing to white, narrow recurving petals.

Lady Dudley. Lemon yellow; petals long and narrow. 2s.

Lady Esther Smith. Pure ivory white, with broad incurving petals.

Lady Hopetoun. Ref. Heliotrope pink, reverse of petals silvery.

Laciniatum. Distinct feather petalled variety, lavender shade; useful for cutting.

Laella Filkins. Jap. Soft rosy pink, recurving petals.

Lillian Bird. Beautiful blush pink colour.

Lord Hopetoun. Ref. Most beautiful rich crimson, with golden reverse.

Lady Hutton. Jap. Beautiful waxy white. Large flower.

Mabel Morgan. Buttercup-yellow; one of the loveliest yet raised.

Madame Carnot. Pure white, enormous large flowers.

Magnificent. Crimson, bronze reverse, large, strong grower

Majesty. Jap. Deep glowing red.

Mary Mason. Old rosy red. 1s 6d.

Millicent Richardson. Purple claret, silvery reverse.

Miss Baden Powell. Colour, a beautiful clear golden yellow, slightly shaded red.

Miss Nellie Pockett. Creamy white, long drooping florets, curled at tips; perfectly full.

Miss V. Pearson. Pale carmine rose, large incurved bloom.

Miss A. Brenster. Pale sulphur.

Mr. T. Carrington. Rich carmine rose; slightly incurved.

Mr. W. T. McNee. Handsome flower, deep rosy lilac; reverse of petals lighter.

Mrs. W. R. Church. White, flushed with lilac rose.

Mrs. Edwin Currie. Jap. Delicate pink, veined lilac.

Mrs. James Marshall. Jap. Light mauve; clear silvery reverse. Incurved.

Chrysanthemums, Japanese

Mrs. Alexander McKinley. Jap. Terra cotta. Drooping petals.

Mrs. H. Marks. One of the best; white.

Mrs. H. Emmerton. Bright amber, shading to straw.

Mrs. George Fairbairn. Ref. Colour yellow, suffused with chocolate brown.

Mrs. J. F. Dunn. Salmon terra cotta; large flowers, quite distinct; champion at shows.

Mrs. T. W. Pockett. Jap. Deep canary yellow.

Mrs. White Popham. White, lined and frosted carmine.

Mrs. J. Shaw. Rich deep pink, with very broad petals.

Mrs. Albert E. Tyson. Old gold yellow, faintly lined red.

Mrs. M. J. Darey. Rich golden-yellow, with long, drooping curling petals; good form.

Mrs. J. C. Neill. Canary yellow; fine show variety.

Mrs. R. F. Felton. Old rosy terra-cotta; splendid grower

Mrs. W. Higgle. Large pure white.

Mrs. C. H. Potty. Bright pink, very fine. 1s 6d.

Mrs. Emily Austin. Rosy Salmon, biscuit colour reverse, 1s 6d.

Mrs. G. H. Kerslake. Excellent white.

Old Gold. Jap. Beautiful shade of old gold, large, good form.

Pink Heuby. Good pink variety.

Pockets' Surprise. Rosy crimson; very large broad petals.

Richard Seddon. Beautiful terra-cotta, lighter reverse.

Reginal Vallis. Purple amaranth; fine exhibition flower.

Rose Pocket. Old gold, shaded salmon; good habit.

Royal Standard. Jap. Ref. Flower of deepest crimson.

R. W. Harper. Rosy salmon; a show flower of great excellence.

S. T. Wright. Largest crimson yet raised; flowers lasting.

Silverkins. Decorative type; white medium, very narrow florets, straight petals, starlike appearance.

Silver Queen. Jap. Lovely mauve pink; flowers large.

Splendour. Rich golden yellow; large exhibition bloom.

Lord Kitchener. Colour, rich bright terra cotta; golden reverse.

Sunstone. Jap. Beautiful shade of buff, suffused with orange.

Syringa. Lilac flowers, large and curiously twisted.

The Princess. Creamy white; good dwarf grower.

Western King. Pure white, very good.

White Thread. White, dwarf and free.

W. Tricker. Sweet delicate rose, every flower incurving in a most attractive form.

Yellow Good Gracious. Very choice.

Yellow Thread. Bronzy yellow.

Zulinda. Petals clear rose pink; reverse silvery glossy pink, good stem and foliage.

Single Chrysanthemums

1s each; 9s dozen

Marguerite-like flowers; useful for bouquets and vases; lasting about ten days in water, and flowering late in autumn when other flowers are scarce.

Althea. Crimson changing to bronzy chestnut red.

Brightness. Bright rose-pink, nice warm colour for decoration.

Emeline. Blush white; attractive variety.

Florence. Cerise, yellow disc; very distinct.

Rosabel. White, tips of petals deep rosy lilac.

Audrey. White, very feathery.

Estelle. Pure white; very fine petals.

Cactus and Other Types of Dahlias

Cactus Dahlias

Alice Mortimer. Orange scarlet; large.

Alight. Fiery orange, deeper centre.

Ambassador. Pure white of the very best quality; flowers well set up on stiff stems.

Amethyst. Tints quite new, being one of pinkish-amethyst colour.

Bronze Mawley. Bronze.

Blazon. The lower half of the petals is golden yellow and the upper half soft scarlet. **1s 6d.**

Canary. Good yellow.

Cannell's Crest. Richest of the cherry-red section.

Charm. Yellow and reddish-bronze, tipped with white; long florets.

Cheerfulness. Rich, bright tangerine, shading to apricot in the centre. **2s.**

C. N. Richardson. Rich yellow, shaded rosy salmon.

Countess of Lonsdale. Salmon apricot, carmine pink towards tip.

Crayfish. Carmine, coppery shadings.

Daisy Easton. Rich deep yellow.

Dr. J. L. Beeston. Florets white, heavily suffused with pink towards the points; a beautiful combination.

Earl Likely. An exceedingly large refined bloom of a clear cherry red.

Felicia. Cream, passing to a pretty rose pink at the tips.

Fidelity. Petunia colour, passing to cerise at the base of the florets; narrow, incurving petals; large bloom, very distinct.

Fireworks. Canary yellow, blotched red.

Galliard. Crimson-scarlet; petals numerous and finely twisted.

Geraldine. Pale amber, gradually passing to chrome yellow in the centre.

G. H. Kerslake. A beautiful tint of carmine rose, rich and lustrous. **2s.**

General Buller. Rich velvety crimson, nearly black at base, white tip.

Gulding Star. Bright clear orange; shading to deep yellow in the centre; good, compact flower.

H. F. Robertson. Deep, pure yellow; florets narrow; good form.

H. Shoesmith. Scarlet crimson, narrow petals.

Harbinger. Colour soft salmon, shading to yellow in the centre; blooms large, deep and well quilled.

Harkaway. Brilliant fiery scarlet.

Harlequin. Straw yellow, heavily striped, purplish-crimson; a deep, bold, fine formed flower.

Hilda. Colour bluish-violet, with a lighter centre; a good, symmetrical form.

Ivanhoe. Bright straw colour.

J. H. Jackson. Darkest yet raised; brilliant crimson maroon, almost black.

J. R. Yorke. Deep claret-crimson; extremely long incurving florets.

J. W. Wilkinson. Deep rosy crimson, strong grower.

John Baxter. Yellow, shaded rose pink.

Kerslake's Masterpiece. Yellow, with a beautiful shade of old gold pervading the whole bloom; petals long, narrow and incurved; immense size and good form. **1s 6d.**

King of Stripes. Deep golden yellow, striped and speckled crimson; a great advance in the yellow-ground fancy type.

Koselusko. Finest quilled yet obtained among the white; blooms large and very full. **1s 6d.**

K. Ritz. Fine incurving florets of a beautiful self colour reddish apricot, darker in centre.

1s each; 10s per doz.; 11s post free.

Except where otherwise marked.

CACTUS DAHLIAS are the fashionable flower. The beautiful colourings of the curiously formed petals, and the extreme grace and elegance of the blooms for decorative purposes, have given this variety of Dahlia a first place.

Cactus Dahlias--continued

Kriemhilde. Finely rayed petals; clear bright rose, pure white centre.

Lord Roberts. One of the best whites; quilled petals.

Loveliness. The basal half of the florets are white, passing to a pleasing shade of deep heliotrope, forming a beautiful spidery bloom. **1s 6d.**

Lucinda. A distinctly pretty flower of a deep rosy-purple shade; long, wiry stems; good habit.

Mabel Kerslake. White, good.

Manifesto. Beautiful pure white.

Miss Dorothy Oliver. Primrose yellow at base, graduating to white.

Miss Nance Robinson. Old gold, flushed orange.

Mr. Deas-Thomson. Cinnamon, suffused with pink, yellow centre; petals long, finely quilled and slightly incurved.

Mrs. Cuthbert Hall. Bright pinkish heliotrope, shading to a silvery apple blossom. **1s 6d.**

Mrs. C. T. Richardson. A beautiful pure white; of large size; good form, robust grower.

Mrs. F. McQuade. Lovely pure white; beautiful.

Mrs. Kerslake. Soft salmon pink. One of the best.

Mrs. H. Cook. Bright golden yellow.

Mrs. J. W. Wilkinson. Lovely deep rose pink.

Pink Britannia. Every flower well above foliage; a rosy pink.

Pink Pearl. A pretty shade of rich rosy-pink, the florets in the centre and the extreme tips of those at the back of the flower being blush-white.

Primrose Queen. Primrose, with just a blush of salmon-rose at tips of the florets.

Queen of Roses. A clear, bright rose; choice.

Rangl. Dark velvety maroon, nearly black.

Richard Dean. Vermilion-scarlet; distinct white tips.

Robert Henderson. Yellow, rich in colour, long and fine in petal.

Fuchsias

1s each
10s dozen

FUCHSIAS form fine features in the flower garden; they merely demand shelter from the wind, plenty of water during dry weather, with a mulching during the summer months, and the ordinary treatment of general outdoor plants; they make splendid decorative plants; any good garden soil will suit them.

Double Fuchsias

Avalanche. Tube and sepals crimson, purple corolla.
Countess of Hopetoun. Very large corolla, pure white dark red sepals.
De Cherville. Large double rose corolla, sepals dark red and well reflexed.
Duchess of Edinburgh. Largest double white, red sepal.
Edmund About. Double white, carmine sepals, white corolla suffused with red.
Extraordinary. Plum colour with red sepals.
Frau Emma Topfer. Distinct and novel; tube and sepals rosy coral, corolla clear rosy blush; large.

Jubilee. Sepals crimson, rosy mauve corolla.
Jumna. Bright crimson sepals, rich purple double corolla, the base marked with rosy crimson.
Madame Jules Chretien. Short sepals reflexed crimson, pure snow-white corolla.
Minos. Sepals bright red, corolla rich purple, veined rose at base.
Molesworth. Sepals bright carmine, reflexed, corolla double, unusually large, and pure white.
Monument. Corolla deep purple, outer petals striped carmine, tube and sepals crimson.
Mrs. E. G. Hill. Sepals crimson, double white corolla.

Mrs. W. Cannell. White, large.
Novea Mastodonte. Dark violet, veined red.
Phenomenal. Short tube and reflexed sepals crimson; corolla azure violet, flaked red.
Storm King. Sepals rosy red, corolla rosy blush.
Viceroy of Canada. Violet corolla.
Victor Hugo. Large blood-red sepals; large double corolla, violet purple, marbled red.
Violet Le Duc. Reddish, expanded corolla of a metallic violet.
White Giant. White corolla, red sepals.
White Jubilee. Enormous, sepals red, reflexed corolla.

Single Fuchsias

Arabella. White tube and sepals, corolla rosy pink.
Aurora Superba. Sepals coral colour, purple corolla.
Beauty of Exeter. A novelty in colour, being a mixture of light and crimson: very floriferous.
Black Prince. Sepals carmine, pale pink corolla, margined with deep rose.
Countess of Aberdeen. White, the purest of all. 1s 6d.
Countess of Ranfurly. Red tube and sepals, white veined red corolla.
Fair Maid. Creamy white tube and sepals tinted blush; corolla deep carmine, flushed magenta.
General Roberts. Drooping habit: sepals rose, deepening into the corolla of shaded crimson.
Mrs. Henry Roberts. Tube and sepals rose, corolla dark crimson shade.
Mrs. Marshall. Tube and sepals white, corolla pink.
Peasant Girl. Tube and sepals tinted with blush, corolla pink and carmine, shaded violet.
Rose of Castile. White sepals, corolla violet.
Speciosa. Sepals flesh colour, rosy carmine corolla.
Star of Wilts. White sepals, salmon corolla.

Cactus Geraniums

THIS is a new type, differing from the ordinary Geranium, and producing flowers which are star-petalled, compact, and round.

SINGLE.

A. Metcalfe. Rosy salmon, fine truss	1 0
Blush Queen. Pretty pink	1 0
Exquisite. Salmon rose.	1 0
Fire Dragon. Dark red	1 0
H. Greenhill. Rosy pink, twisted petals	1 0
J. R. Greenhill. Soft pink	1 0
Mrs. J. Brown. Dark scarlet, dwarf and free	1 0
Queen. Semi-double, rosy carmine	1 0
Salmon Queen. Salmon, twisted petals	1 0
Scarlet King. Fine scarlet	1 0
The Countess. Dark salmon	1 0

Rhododendrons

THESE favourite, free flowering, and very beautiful evergreen shrubs have been in demand during the past few seasons, and justly so, for they are amongst the most attractive of our garden plants, and are eminently fitted for culture in pots or tubs.

They require good rich soil, which must be fairly open and heavily manured, and liquid manure during the flowering season is very beneficial.

Strong Plants. 2s 6d to 7s 6d each.

"I received plants in good condition. I was really delighted with the way you had them packed; they would stand a lot of knocking about before it would hurt them, as they were so nice and fresh."—M. PARKINSON, Palmer's Channel, Maclean. 24-8-09.

"I hope to be as well satisfied with your seeds this time as I have been in the past."—R. M. PATTERSON, P. S., Kiama.—10-9-09.

Hybrid Fuchsias

Boliviana. Rich crimson coloured trumpet-shaped flowers; tubes three inches.
Carter's Meteor. Leaves a bronze yellow, a pretty contrast.
Crimson Bedder. Leaves crimson and bronzy green, striped and white.
Earl of Beaconsfield. Tube and sepals light rosy carmine, corolla deep carmine.
Fulgens. Orange scarlet; long tube.
Furst Otto von Wernigerode. Very pleasing shade of pink; quite distinct.
Gracilis. Dwarf variety, flowers very small.
Gracilis Variegata. Dwarf, leaves green, broadly margined with white.
Mrs. Rundle. Sepals flesh colour, while the corolla is orange scarlet; single.
Mary. Very pretty, producing rich crimson flowers, bright green foliage.
Procumbens. Bearing large scarlet edible berries; plant is a trailer, and may be made to cover a fence.
Sunray. The leaves are of a bright rich crimson, white and bronzy green in equal parts.
Swanley's Yellow. Red corolla, with orange yellow sepals.
Triphylla. A Fuchsia of very handsome and distinct character, having neat, dark bronze foliage, and producing bunches of medium-sized Fulgens-shaped flowers, a brilliant orange scarlet colour.

SYDNEY

PLANTS

Herbaceous, Bulbous and other Hardy Plants

AGAPANTHUS (The African Lily)

Umbellatus. Blue	1 0
Umbellatus Alba	1 0

Strong tuberous plants, with flower stem 3 ft., surrounded by a crown of beautiful blue or white flowers.

Umbellatus Variegata	2 0
------------------------------	-----

Similar to A. Umbellatus, with the exception that its foliage is variegated.

AGATHEA COELESTA

(Blue Marguerite)

Flowers similar to Paris Daisy: blue with yellow centre	1 0
---	-----

AGAVE

Attenuata	2 0
Americana	1 6
Aurea Variegata	1 6

Very compact habit, leaves dark green; beautiful plants for lawn decoration.

ALOE

Arborea	1 6
Saponaria	1 6
Socotrina	1 6
Hamburiana	1 6

Useful plants for rock terraces.

ALOCASIA (The Spoon Lily)

Macrorrhiza	1 6
Macrorrhiza Variegata	2 0

Very useful for bush-house or verandah culture.

ALSTROEMERIA

Aurantica. Brownish orange	1 0
Alba. Pure white	1 0
Pelegria. Pale yellow, striped with rose	1 0

Few plants need less attention than these to grow them successfully, either in pots or planted out. They are very effective in masses.

AMARYLLIS (Hippeastrums)

(See Bulb List)

Exquisite varieties of different colours; very fashionable flower	from 1s to 2 6
---	----------------

AMORPHOPHALUS

Rivieri	1 0
-----------------	-----

Flowers of this lily are dark green colour, speckled or dotted with rose, pretty leaves, beautiful marbled stem.

ANEMONE

Japonica. Pink, single	1 0
Japonica Alba (HONORINE JOUBERT). Pure white, single	1 0
Japonica (WHIRLWIND). Double white	1 0
Japonica (BRILLIANT). Single, pink	1 0
Sylvestris fl. pl. Flowers double white, very hairy leaves	1 6
Lady Ardilaun. Pure white, large flower	1 0
Beautiful herbaceous plants, of great value for cut flowers; large leaves, flower stems 2 feet; flowers abundantly in cluster. Hardy.	
Japonica Montrose	1 6
A new semi-double variety. The flowers are deep rose in colour.	
Reine Charlotte. Semi-double; clear rose	1 6
Purpurea. Dark violet, purple and rose	1 6
Prinz Heinrich. Semi-double, dark red	1 6
Japonica Soir d'Ete	1 6

Flowers very large; rosy colour with purplish shade underneath; petals slightly imbricated.

ANTHERICUM

Elegantissimum. Foliage has a band of yellow through centre	1 0
Album Variegatum. Foliage has a band of white through centre	1 0
Showy variegated foliage plants; suitable for hanging-baskets and rockery.	

ARUM PALÆSTINUM (Black Calla)

Flowers purplish blotched outside, rich velvety black inside, and yellowish white at the base of tube. (Syn.) Arum Sanctum	1 6
--	-----

Anemone, Japonica

ARUNDO

Donax Variegata. Beautiful bamboo-like reeds, variegated yellow and white. 12 ft.	1 6
---	-----

ASTER

Alpina (MICHAELMAS DAISY). Of sorts	1 0
Novi Belgi (LADY TREVELYAN). Best white	1 0
White Queen	1 0

And many other varieties. List on application.

Calla, Maculata Alba

BAMBUSA (Bamboo Cane)

Arundinacea. 50 ft.; one of the strongest	from 2 6
Falcata. Beautiful plumed species. 8 ft.	2 0
Humilis. 15 ft.	1 6
Nigra (BLACK BAMBOO). 20 ft.	1 6
Fortunell. Dwarf	1 0

Bamboo, or Tree Grasses, thrive well here, and are quite indispensable in first-class grounds. They add a distinct and picturesque feature.

BOMERIA

Salsilla. Flowers purple, pink and green	1 6
--	-----

A very uncommon hardy, climbing plant.

CALLA, OR RICHARDIA

(Lily of the Nile)

Elliotiana. Leaves evenly spotted and marked with white. The spathe is a very rich pure yellow. One of the most beautiful Callas	2 6
Lemon Giant. Magnificent large yellow spathe, yellowish fol., white spotted leaves	2 6
Ethiopia (ARUM LILY). "Lily of the Nile." Easiest culture; prefers moist situation especially; foliage large, flowers white	1 0
Maculata Alba. Leaves spotted with silver; flowers white, effective	1 0

CHRYSANTHEMUM (Shasta Daisy)

Leucanthemum. White Ox-eye Daisy	0 8
Leucanthemum Maximum	0 8
Maurice Pritchard. Large white	1 0
Princess Henry. Large white	1 0
Snowstorm. Very large white	1 0
King Edward VII. Large white	1 0

CHRYSANTHEMUM FRUTESCENS

(Paris Daisy)

Single White. 4ft. 0 6	Single Yellow. 4ft. 0 6
Double White. 4ft. 0 6	Double Yellow. 4ft. 0 6
Andersonii. White, black centre	1 0

CLIVEA

Nobilis. Splendid free-flowering, bulbous plant, orange yellow Amaryllis-like flowers	2 0
Minlata. Red and orange flowers; drooping habit	2 0
Beautiful pot plants for verandah or bush-house culture.	

CRASSULA (Kalosanthos)

Coccolinea. Scarlet.	1 0
Jasminae. Pure white	1 0

Hardy plants, with Bouvardia-like flowers.

CONVALLARIA (Lily of the Valley)

Majalis. White	1 0
------------------------	-----

Old English favourite, which succeeds only in the colder districts. Its perfume is delightful.

COOPERIA (Zephyranthes)

Oberwetteri	1 0
Drummondii. Flowers pure white	1 0

CONVOLVULUS

Mauritanicus. Flowers blue, with a white throat and yellow anthers; useful for baskets	1 0
--	-----

CRINUM (Choice Varieties)

Asiaticum. White	1 6
Maritimum (SEA DAFFODIL). Pure white	1 6

Resembles Agapanthus in habit, produces tall flower stems, but its crown of flowers is more feathery; a beautiful plant.

CYCLAMEN

Of various Colours	1s 6d each; 15s doz.

One of the best insecticides for plants or annuals.

NIKOTEEN

In bottles—sufficient to make 4 gallons of wash 1 0
" " 5 " 1 3
" " 10 " 2 6
" " 20 " 3 6
" " 100 " 12 6
Certain death to aphids, scale, and all other insect pests; harmless to plant life. Directions on each bottle.

NICOTINE SOAP

In jars, 1s 6d each.
Another useful insecticide for washing plants.

MEDICATED TOBACCO PAPER

In 1 lb. packets, 1s 6d each.
For fumigating pot plants for the destruction of insect pests, such as red spider, mealy bug, and aphids.

TOBACCO FOR WASHES

In parcels of about 10 lb. weight, sufficient to make 10 gallons liquid, 1s.

TOBACCO POWDER

For the destruction of spider, mealy bug, etc., can be applied by a distributor. Plants should be syringed with clean water some time after they have been treated. 3d per lb.
Tobacco Powder Distributors, 1s 3d and 3s 6d.

LETHORION, VAPOUR CONE

1s, 1s 6d, and 2s 6d each, the smaller size being large enough to disinfect about 500 cubic feet.
For the purpose of destroying parasitic life with a certainty hitherto unachieved, and without hurt or prejudice to the most delicate and fragile organisation of the plant. These vapour cones may be used for cleansing all kinds of plants, either under glass or in bush-houses. Directions for use on each cone.

VERMORITE

A scientifically prepared Bordeaux mixture. Original packages of about 4½ lbs., sufficient for 22 to 25 gallons of water, 3s 6d; 1 lb. parcels 1s, sufficient for 5 gallons.

BORDEAUX MIXTURE

Use coarse nozzle for this wash. We can supply prepared Bordeaux mixture powder ready for dissolving in water, in the proportions of 4 lbs. bluestone, and 4 lbs. lime for 40 gallons of water. Price on application for 1 cwt casks, or in smaller quantities.

Murchison's SCRUB EXTERMINATOR

A splendid remedy for weeds on garden paths, and also for prickly pear, scrub, or any other strong weed growth. For garden paths, 5½ oz. to gallon; for heavy scrub, 7 oz. to gallon. Directions for use on application. 8d per lb.; 10 lb. box, 6s; 50 lb. box, 22s 6d; 100 lb. box, 40s.

"SURPAZOLL" SPRAY FLUID A PURELY VEGETABLE EXTRACT.

The surest and most effective remedy yet introduced for the perfect destruction of all Insect Life affecting Trees and Plants of every description. The Mixture can be applied as a spray in the open garden or orchard, and also in Bush-house or Green-house.

Full directions for use on each bottle. Very effective for Green Fly on Roses, and for Caterpillars and Cabbage Fly. BOTTLES, to make 7 gallons Spray, 1s 6d; 3d extra for postage. BOTTLES, to make 17½ gallons Spray, 3s 6d; 4d extra for postage.

It is recommended that when spraying Insects of a greasy nature, to add 1 lb. of Soft Soap to every 10 gallons of Spray.

Sole Agents for New South Wales:

ANDERSON & CO.

SEED MERCHANTS, 399 GEORGE ST., SYDNEY.

"SURPAZOLL" FUMIGATING LIQUID

A most effective vaporizer or fumigator for the eradication of Thrips, Red Spider, etc., in glass-houses or frames. Place a little of the liquid in an open tin, over a spirit lamp. This causes the liquid to vaporize, and the fumes are distributed throughout the glass-house, destroying all insect life without detriment to the most tender plant. Small bottle, 2s; large size, 4s 6d.

XL ALL VAPORIZING COMPOUND

2s for 2000 ft., 4s 9d for 5000 ft., 9s for 10,000 ft.,
An effectual and economical vaporizer for use in glass-house.

XL ALL SPRAYING COMPOUND

½ pints, 2s; 1 pint, 3s 9d; qts., 6s.
Full directions on bottles.
A very useful and efficient spraying compound for bush-house, glass-house, and outside work.

EVAPORATING APPARATUS

For vaporizing any liquids. 3s 6d each.

"SWIFT'S" ARSENATE OF LEAD

This is acknowledged all the world over to be the best remedy for codlin moth in apples, and all other leaf-eating insects. It is easily applied, and requires no tedious preparation beforehand.

1 lb. bottle, to make 17½ gallons, 2s.
2 lb. bottle, to make 35 gallons, 3s 6d.
5 lb. jar, to make 87½ gallons, 7s 6d.

UNIVERSAL FUMIGATOR

No. 1, 4s 6d; No. 2, 6s 6d; No. 3, 11s 6d.
No special care or paper required; no cinders used in lighting; no waste; gives a thick, cool smoke; will burn any kind of tobacco, tobacco paper, rags, cord leaves, common tobacco, or any fumigating material.

THE TREE SAVER

B.G. PRATT COMPANY
M'F'G CHEMISTS
NEW YORK CITY.

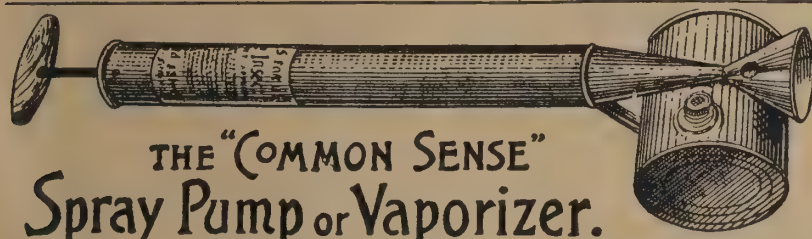

"Ready for Use in a Minute."

"SCALECIDE"

A splendid remedy for San Jose Scale, Mussel Scale, Woolly Aphids, Black Spot, and all Scale and Fungoid Diseases that affect trees and shrubs. Easily mixed and applied.

Pint tin ..	2 0	1 gallon tin ..	8 6
Quart tin ..	3 0	5 gallon tin ..	37 6
2 quart tin ..	5 0		

Full directions on each package.

THE "COMMON SENSE" Spray Pump or Vaporizer.

Tin, 2s 6d each; carefully packed and post free in N.S.W., 4s; other States, 4s 8d.
Brass, 5s each; carefully packed and post free in N.S.W., 6s 6d; other States, 7s 2d.

The most effective CHEAP SPRAY PUMP AND VAPORIZER yet offered. It throws a spray as fine as mist, and is in consequence more effectual than any other Spray Pump, and only about one-tenth the liquid.

Directions for Using.—The leather plunger on the inside of air chamber should be kept well oiled. Care should be taken to see that it does not get hard and dry, as it forms the air suction; it should be taken out and rubbed occasionally. To produce a heavy spray, work the plunger quickly. Always clean the machine thoroughly before putting away. For destroying scale, mealy bug, red spider, thrips, black or green fly, and mildew or insect life of any kind on plants, shrubs, or fruit trees, use "Surpazoll" Gishurst's Compound, or any of the washes or emulsions recommended, all of which can be applied with this sprayer.

Messrs. Anderson & Co. have the sole control of this splendid Sprayer for both New South Wales and Queensland.

Sulphur Bellows—"The Ideal."

an agitator which works automatically, assuring a regular flow of Sulphur, and prevents choking in the nozzle. 5s each.

The Holder for the Sulphur Powder is at the side of the Bellows, and has

KNAPSACK PUMP

"Eclair," Price £2 10s. With single nozzle.

This sprayer is the best known and most widely used. It is specially recommended for the treatment of Fruit Trees, Flowers, Grape Vines, and Potatoes. It gives a fine, medium or coarse spray, and the nozzle is arranged so as to deliver straight in front, right, left, up or down, at the will of the operator. It is simple in construction, and can be worked by adults or juveniles.

The body of the pump and the air-chamber are made of copper; the valves are of indiarubber. Each pump is fitted with 2 ft. of ½-in. indiarubber hose and a brass lance about a foot long for carrying the nozzle. To the lance is attached a Stop Cock, so that the flow can be stopped instantly.

Its capacity is about 3½ gallons. Particulars for using Pump sent with each.

Bucket Spray Pumps

The Little Giant ..	24 6
The Perfect ..	32 0
The Lever Handled ..	35 0

With 8 ft. extension rod.

One of the most useful appliances that one can have where there is a garden, or where poultry are kept. For white washing or spraying the houses with disinfectants they are invaluable; and for spraying plants and fruit trees the pump is very effectual.

MANURES, Etc.

Anderson's "Excellent" Superior Garden Fertilizer

For vegetables and flowers this manure is a fertilizer of a very high class, containing potash, nitrogen, and phosphoric acid in the proportions best suited to become the food of plants. It is ground to a fine powder, and is free from any smell; can be used either liquid or dry.

This fertilizer is sent out in a highly concentrated form; the ingredients are the very best. It should be applied sparingly at first, until its strength is properly gauged. Directions for use with each package.

Anderson's "Lawn King" Ball-Bearing LAWN MOWER

FINISHED in lustrous and lasting bicycle enamel, the body of the mower a rich olive; the wheels in orange, the underside of each cylinder knife also in orange; handsomely striped. The most attractive colour scheme ever used on a lawn mower.

The advantages of ball bearings are well understood. There is the same reason for their use on a lawn mower that there is on a bicycle—to make it run easy.

On its accurate ball bearings the cylinder of this Mower revolves at high speed with the free movement of a bicycle wheel.

While it runs so much easier and with less noise than other mowers, it cuts faster, cleaner, more evenly, does not push the grass before it, but cuts every spear, leaving the surface of the lawn perfectly smooth.

Every part is made on the interchangeable plan.

All oil holes and adjusting screws are easily reached from the upper side. The roller adjustment is simple.

The knife steel is the finest ever used on lawn mowers.

Can be adjusted to cut as close as $\frac{1}{8}$ ths of an inch.

Dust proof, hardened and ground bearings.

Patent ball retainers. $\frac{9}{16}$ inch wheels.

No Backache or Drudgery when using the PLANET Jr. TOOLS.

They Make Gardening Pleasant and Profitable

FULLY ILLUSTRATED PRICED CATALOGUE POST FREE

No. 6 Planet Jr. Hill and Drill Seeder

Wheel Hoe, Cultivator, and Plow Combined.

Equipment: Two 6 in. Hoes,
Three Improved Steel Cultivator Teeth,
Large Garden Plow,
Improved Double-leaf Guard.

This is the latest Planet Jr. Combined Hill and Drill Seeder and Wheel Hoe, in which, after 3 years' gratifying use in the field, every detail has been perfected.

Wheel is 16½ inches high, making an easy-running Seeder.
Price, £4.

The No. 25 Combined Drill

is intended for gardeners who have enough area in crops for a Double Wheel Hoe, as it is a Double Wheel Hoe, Cultivator and Plow, besides a Drill. It will sow in drills any thickness, or drop in hills 4, 6, 8, 12 or 24 inches apart. It has automatic device for stopping the feed, also a new seed index.

Price, £3 17s 6d.

The No. 12

Double Wheel Hoe, Plow, Cultivator, etc.

is used when a Drill is obtained separately. The wheels can be set 9 or 11 inches apart for straddling wide rows, 7 inches apart for narrow rows, or 4 inches apart for use as a Single Wheel Hoe. The frame is malleable iron, the arch is steel, and the working tools are polished and hardened steel. It is a rapid worker, saves backache, and is infinitely better than the old style hand hoe.

Price, £1 17s 6d.

No. 12 with Rakes is called No. 11 .. Price £2 7s 6d
No. 12 with Hoes only is called No. 13 .. „ £1 2s 6d

The No. 17 Single Wheel Hoe, Plow & Cultivator

will hoe a 14 or a 16 inch row at one passage, with a small rake or a cultivator tooth between the hoes. The plow is large, and does excellent furrowing or hilling. All parts are strong and durable.
Price, £1 5s.

No. 17 with 2 sets of Hoes, also Rakes, is called

No. 15 .. Price £1 15s 0d

No. 17 with 1 pair of Hoes, also Rakes, is called

No. 16 .. „ £1 10s 0d

No. 17 with Hoe Steels and Cultivator Teeth only, is called No. 17½ .. „ £1 2s 6d

New Disc attachment to suit any of the Planet Jr. hand tools .. per pair 15s 0d
